    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
30. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

31. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

32. United Launches CBP's International Remote Baggage Screening on Select International Flights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

33. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

14. Airport Baggage Screening Systems Market, by Procurement Channel

Direct Technology Suppliers and Distributors and Resellers differ in the authority behind the offer, not merely in proximity to the buyer. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ Buyers can therefore evaluate an indirect equipment route where the appointment and backing are documented; that historical invitation does not establish a current appointment or software-resale entitlement.

Systems Integration Primes provide a different commercial role. JFK Millennium Partners' March 2025 appointment of K2 covered procuring, installing, and deploying Terminal xx.xx's checkpoint while coordinating technology providers. ▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Independent Technical Service Providers address continuing support rather than automatically obtaining equipment-resale rights. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ Equipment agency authorization also should not be treated as a software licensor appointment: software-only resale requires its own rights and supported integration boundary.

Figure 22. Global Airport Baggage Screening Systems Market Size, by Procurement Channel, 2025 (%)

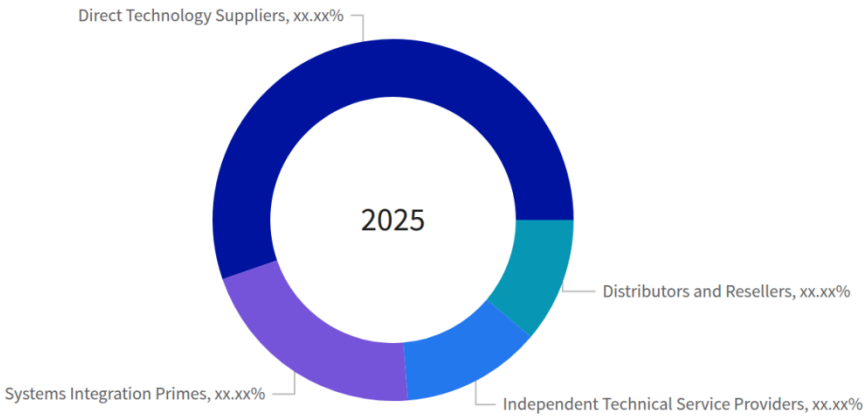

Figure 23. Global Airport Baggage Screening Systems Market, by Procurement Channel, 2032 (USD Million)

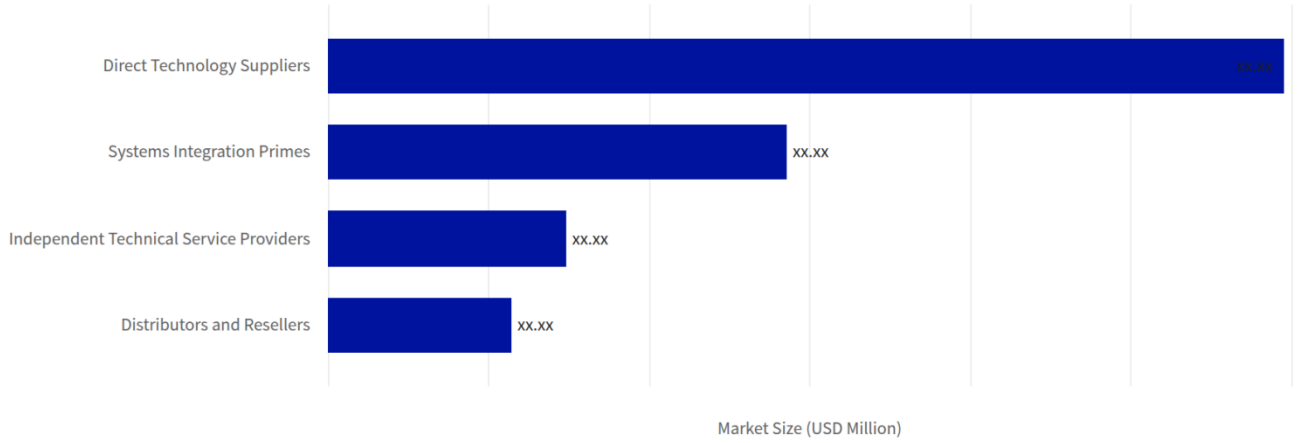

Table 186. Global Airport Baggage Screening Systems Market, by Procurement Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Direct Technology Suppliers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributors and Resellers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent Technical Service Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Systems Integration Primes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 187. Global Airport Baggage Screening Systems Market Size, by Procurement Channel, 2017-2040 (USD Million)

Procurement Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Technology Suppliers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributors and Resellers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent Technical Service Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Systems Integration Primes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Invitation for Submission of Bids for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines - Reference 202130407

   · The 2021 invitation permits an OEM or authorized OEM agent, requires manufacturer authorization for an agent, and includes a manufacturer guarantee and warranty form. The included equipment contains a cargo/baggage X-ray component. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

2. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

   · The March xx.xx 2025 announcement appoints K2 to procure, install, and deploy JFK Terminal xx.xx's checkpoint while coordinating technology providers and authorities. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

3. Key Corporate Risks - CATSA

   · CATSA reports transitioning maintenance of most screening equipment to KPrime Technologies in 2023/xx.xx. The disclosure establishes a separate maintenance relationship, not every baggage installation's coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

4. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

   · Taxonomy evidence: The airport's November xx.xx 2022 award notice describes an integrated CT, tray-return, and central-image solution. Naming the contracting equipment supplier alone does not resolve direct-supply versus integration-prime classification under the retained contractual-role rule; further responsibility evidence is required. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

5. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017

   · Taxonomy evidence: The January xx.xx 2017 decision's primary market investigation distinguishes manufacturer supply, local distribution or authorized intermediaries, third-party servicing, and non-OEM systems integration. These findings establish channel forms, not current appointments or shares. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))

6. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

7. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
8. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
9. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The substantial manufacturer aftermarket business qualifies independent-provider extrapolation because OEM support and subcontract receipts cannot automatically be reclassified as independent final-customer revenue.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The substantial manufacturer aftermarket business qualifies independent-provider extrapolation because OEM support and subcontract receipts cannot automatically be reclassified as independent final-customer revenue.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier anticipates a later-decade hold-baggage upgrade cycle. This supports the commercial replacement premise, not the assumed relative prime-capture factor.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

10. Smiths Group PLC - Annual Report & Accounts FY2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
11. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
12. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
13. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
14. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

15. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
16. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
17. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
18. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
19. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

20. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
21. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
22. Leidos wins TSA logistics contract
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

14.1. Direct Technology Suppliers

Table 188. Global Airport Baggage Screening Systems Market Size, by Direct Technology Suppliers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 189. Global Airport Baggage Screening Systems Market Size, by Direct Technology Suppliers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 190. Global Airport Baggage Screening Systems Market Size, by Direct Technology Suppliers, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
   · Taxonomy evidence: The airport's award names Rapiscan Systems Limited as the contracting supplier for equipment delivery, installation, optimization, and commissioning. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
2. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017
   · Taxonomy evidence: Paragraph xx.xx describes direct manufacturer supply alongside indirect distributor supply for detection equipment and servicing. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
31. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
32. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

14.2. Systems Integration Primes

Table 191. Global Airport Baggage Screening Systems Market Size, by Systems Integration Primes, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 192. Global Airport Baggage Screening Systems Market Size, by Systems Integration Primes, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 193. Global Airport Baggage Screening Systems Market Size, by Systems Integration Primes, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017
   · Taxonomy evidence: Paragraph xx.xx identifies non-OEM systems integrators that connect multiple threat-detection equipment types for end users.
   ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))

2. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at New JFK Terminal 6

   · Taxonomy evidence: The March xx.xx 2025 airport-project announcement identifies a screening specialist selected to procure, install, and deploy the new terminal checkpoint while coordinating multiple technology providers. It establishes an integration appointment rather than completed delivery. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier anticipates a later-decade hold-baggage upgrade cycle. This supports the commercial replacement premise, not the assumed relative prime-capture factor. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

26. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

28. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

30. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

14.3. Independent Technical Service Providers

Table 194. Global Airport Baggage Screening Systems Market Size, by Independent Technical Service Providers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 195. Global Airport Baggage Screening Systems Market Size, by Independent Technical Service Providers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 196. Global Airport Baggage Screening Systems Market Size, by Independent Technical Service Providers, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017

   · Taxonomy evidence: The decision recognizes third-party after-sales provision, while noting dependence on original technology and authorized relationships. This does not imply unrestricted independent servicing. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))

2. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks
   - Taxonomy evidence: The public screening authority states that maintenance of most screening equipment transitioned to KPrime Technologies in 2023/xx.xx establishing a separately contracted technical-maintenance provider role. Mixed-equipment spending still requires baggage-specific attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The substantial manufacturer aftermarket business qualifies independent-provider extrapolation because OEM support and subcontract receipts cannot automatically be reclassified as independent final-customer revenue. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The substantial manufacturer aftermarket business qualifies independent-provider extrapolation because OEM support and subcontract receipts cannot automatically be reclassified as independent final-customer revenue. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management’s Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.

16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
31. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
32. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

14.4. Distributors and Resellers

Table 197. Global Airport Baggage Screening Systems Market Size, by Distributors and Resellers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 198. Global Airport Baggage Screening Systems Market Size, by Distributors and Resellers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 199. Global Airport Baggage Screening Systems Market Size, by Distributors and Resellers, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

   · Taxonomy evidence: The purchaser-issued invitation expressly allows an authorized original-equipment-manufacturer agent to bid with manufacturer authorization. This independently establishes an indirect equipment-supply form, not an award, current appointment, or standalone software-resale transaction. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

2. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017

   · Taxonomy evidence: Paragraph xx.xx reports primary investigation findings concerning local equipment distribution and authorized partners; paragraph xx.xx separately identifies indirect distributor supply. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

15. Airport Baggage Screening Systems Market, by Investment Purpose

[illegible] JFK Terminal xx.xx illustrates a new-terminal checkpoint appointment, while CATSA's 2025-2026 to 2029-2030 capital plan separately identifies expansion of existing hold-baggage screening capacity. Suppliers should establish the awarded installation boundary and acceptance dependencies before treating a capital plan or contractor appointment as completed delivery.

[illegible] Buyers should distinguish mandatory renewal, passenger-experience objectives, and additional capacity requirements within a mixed project. An investment can serve several purposes, but those purposes do not establish separate additive opportunities or justify assigning the entire wider airport project to screening equipment.

Retrofits and Upgrades provide an evidenced alternative to wholesale replacement. Frankfurt's January 2026 announcement documents APIDS software entering regular operation on Smiths Detection CT scanners, while Smiths markets iCMORE as an upgrade for compatible existing systems and qualifies hardware requirements by machine type and age. [illegible]

Figure 24. Global Airport Baggage Screening Systems Market Size, by Investment Purpose, 2025 (%)

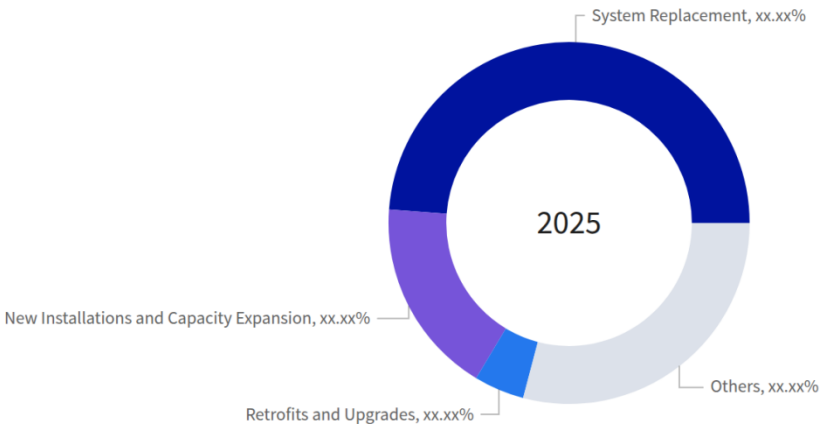

Figure 25. Global Airport Baggage Screening Systems Market, by Investment Purpose, 2032 (USD Million)

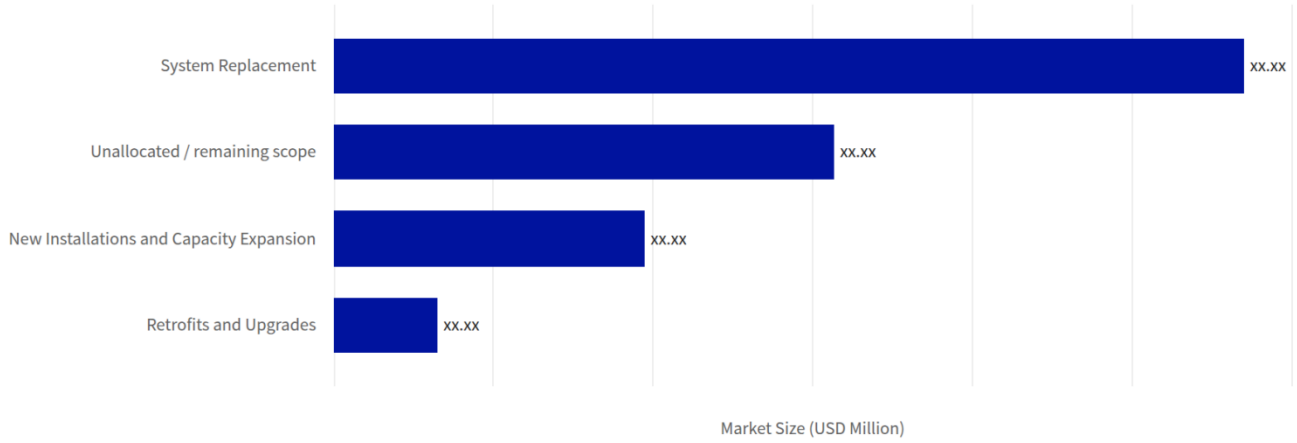

Table 200. Global Airport Baggage Screening Systems Market, by Investment Purpose growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
New Installations and Capacity Expansion	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retrofits and Upgrades	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
System Replacement	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 201. Global Airport Baggage Screening Systems Market Size, by Investment Purpose, 2017-2040 (USD Million)

Investment Purpose	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
New Installations and Capacity Expansion	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retrofits and Upgrades	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
System Replacement	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS

   · Fraport announced regular APIDS software use on Smiths Detection CT scanners on January xx.xx 2026, following national certification. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.

2. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · CATSA's 2025-2026 to 2029-2030 plan separately identifies checkpoint X-ray replacement with CT, existing hold-baggage capacity expansion, and renewal of assets reaching the end of useful life. These are plans, not completed purchases. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Taxonomy evidence: The inspected plan supports baggage capacity expansion and equipment replacement, but its algorithm-enhancement example is outside the baggage boundary; it does not fully verify all three investment-purpose peers. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Taxonomy evidence: The capital plan separately discusses additional screening capacity, equipment replacement, and upgrades to existing equipment, supporting an investment-purpose partition. Planned expenditure is not treated as realized sales. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.

3. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

   · The new-terminal appointment includes baggage CT and establishes a new-installation example rather than completed delivery. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

4. iCMORE

   · Smiths markets iCMORE for integration with existing systems and describes a software-upgrade route, qualifying possible additional hardware by machine type and age. This establishes an offering, not installation-specific eligibility. ([smithsdetection.com](https://www.smithsdetection.com/icmore/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

5. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

6. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

7. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

8. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales and the supplier's expectation of a later-decade hold-baggage cycle support renewal mechanisms, not an observed global purpose percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales and the supplier's expectation of a later-decade hold-baggage cycle support renewal mechanisms, not an observed global purpose percentage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing reports FY2025 iCMORE APIDS implementation at Schiphol, supporting base-year commercial activity without disclosing upgrade-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing reports FY2025 iCMORE APIDS implementation at Schiphol, supporting base-year commercial activity without disclosing upgrade-specific revenue.
9. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
10. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
11. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

12. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
13. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
14. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

16. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
17. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

15.1. System Replacement

Table 202. Global Airport Baggage Screening Systems Market Size, by System Replacement, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 203. Global Airport Baggage Screening Systems Market Size, by System Replacement, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The plan identifies replacement of existing checkpoint X-ray equipment with CT and renewal of assets reaching the end of their useful lives. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales and the supplier's expectation of a later-decade hold-baggage cycle support renewal mechanisms, not an observed global purpose percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales and the supplier's expectation of a later-decade hold-baggage cycle support renewal mechanisms, not an observed global purpose percentage.

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

15.2. New Installations and Capacity Expansion

Table 205. Global Airport Baggage Screening Systems Market Size, by New Installations and Capacity Expansion, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 206. Global Airport Baggage Screening Systems Market Size, by New Installations and Capacity Expansion, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 207. Global Airport Baggage Screening Systems Market Size, by New Installations and Capacity Expansion, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.

2. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at New JFK Terminal 6

   · Taxonomy evidence: The announced checkpoint is for the new Terminal xx.xx and includes baggage CT and automated bin-return systems, providing demand-side evidence of new-installation investment. People-screening and identity-system portions remain excluded. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

26. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

15.3. Retrofits and Upgrades

Table 208. Global Airport Baggage Screening Systems Market Size, by Retrofits and Upgrades, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 209. Global Airport Baggage Screening Systems Market Size, by Retrofits and Upgrades, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 210. Global Airport Baggage Screening Systems Market Size, by Retrofits and Upgrades, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The same body-scanner-specific upgrade passage does not establish a retained-baggage-system retrofit transaction. Baggage-related expansion and replacement passages do not independently prove this separate retained-asset category. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Taxonomy evidence: The plan expressly includes upgrading existing screening equipment with newer detection algorithms, supporting enhancement of retained systems. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing reports FY2025 iCMORE APIDS implementation at Schiphol, supporting base-year commercial activity without disclosing upgrade-specific revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing reports FY2025 iCMORE APIDS implementation at Schiphol, supporting base-year commercial activity without disclosing upgrade-specific revenue.
6. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16. Airport Baggage Screening Systems Market, by Region

Asia-Pacific presents different delivery and support conditions rather than a single modernization timetable. Sydney Airport's Q4 2025 disclosure distinguished completed international-terminal screening work from partial deployment elsewhere. ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■

North America offers evidenced agency-led equipment and sustainment routes, but eligibility and support remain separate. Leidos' January 2025 TSA award involved coordination with equipment manufacturers; Canada's CATSA procurement policy separately requires Transport Canada approval before equipment enters mandated service. ■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■

Latin America's purchasing structure should not be inferred from an airport's name alone. Brazil's published 2025 RBAC xx.xx text assigns aerodrome operators responsibility for providing physical resources that enable air carriers to screen international checked baggage. ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■■■■ ■■■■■

Europe offers a reusable evaluation framework without eliminating national access decisions. ECAC identifies evaluated configurations and states that national authorities retain approval responsibility. ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■

In the Middle East, the engineering purchaser can be a more relevant entry point than the passenger-facing airport brand. ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ The announcement establishes an award, not completed deployment or a GCC-wide purchasing arrangement.

Africa's AFI SECFAL Plan establishes coordinated aviation-security implementation, but does not settle a particular airport's equipment purchase or support arrangement. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ National implementation and an actual purchasing record are more defensible commitment triggers than a continent-wide policy program.

Figure 26. Global Airport Baggage Screening Systems Market, by Region: Market share evolution, 2025-2032

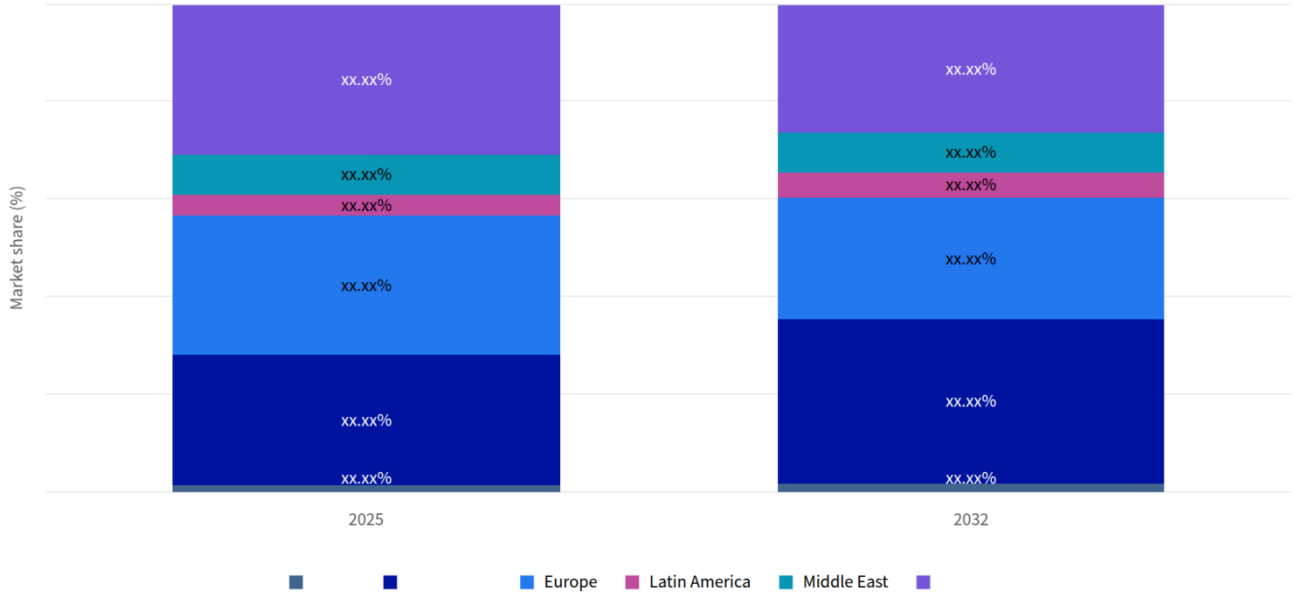

Figure 27. Global Airport Baggage Screening Systems Market, by Region: Market size by category, 2025

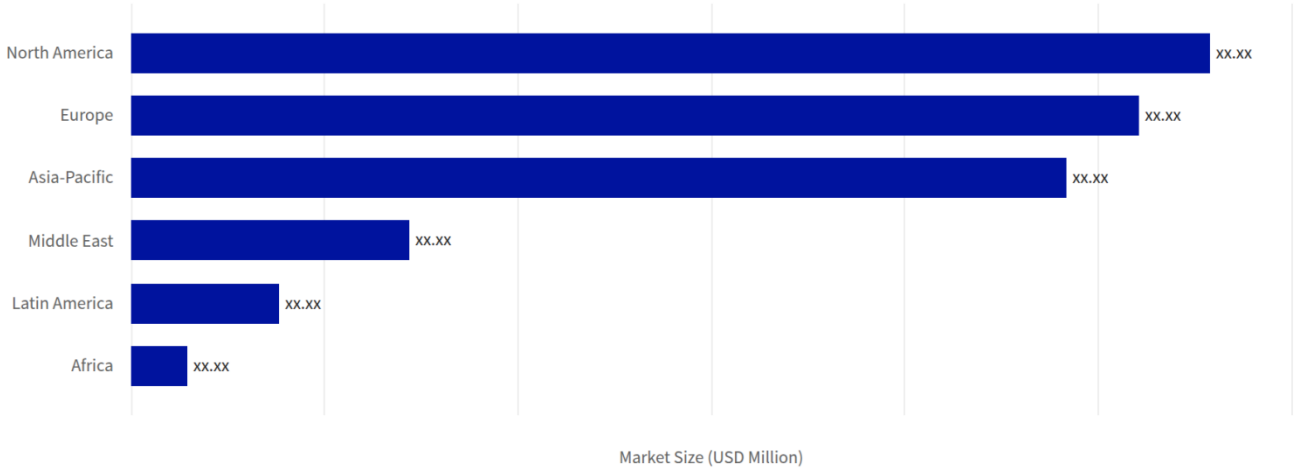

Figure 28. Global Airport Baggage Screening Systems Market, Regional growth by Offering, 2025-2032 (CAGR %)

Sources & Evidence

1. Leidos wins TSA logistics contract

   · The January xx.xx 2025 TSA sustainment award announcement assigns manufacturer coordination and maintenance responsibilities to Leidos. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))

2. Sydney Airport Traffic and Operational Performance Q4 2025

   · Sydney's Q4 2025 report distinguishes completed international-terminal screening work from partial deployment at another terminal. It is a historical staging example, not subsequent completion evidence. ([sydneyairport.com.au](https://www.sydneyairport.com.au/corporate/media/corporate-newsroom/sydney-airport-traffic-and-operational-performance-q4-2025))

3. Procurement and Contracting Policy - CATSA

   · CATSA's procurement policy requires Transport Canada approval before equipment enters mandated service. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))

4. ECAC Common Evaluation Process (CEP) of security equipment

   · ECAC publishes configuration-based evaluation information and states that evaluation does not constitute ECAC approval or certification; national authorities retain that responsibility. ([ecac-ceac.org](https://www.ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

5. Smiths Detection Inaugurates State-of-the-Art Global Customer Experience and Training Centre in India, Advancing AI-Powered Threat Detection and Sustainable Security

   · Smiths announced inauguration of its Gurugram customer experience and training center on September xx.xx 2025. The facility supports a documented training-access example, not regional site-service coverage. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-inaugurates-state-of-the-art-global-customer-experience-and-training-centre-in-india-advancing-ai-powered-threat-detection-and-sustainable-security/))

6. RBAC 107 EMD 10 - Agência Nacional de Aviação Civil ANAC

   · Brazil's published 2025 RBAC xx.xx text assigns aerodrome operators physical-resource provision enabling air carriers to conduct international checked-baggage screening. The record supports differentiated responsibilities, not budget ownership or a Latin America-wide rule. ([anac.gov.br](https://www.anac.gov.br/assuntos/legislacao/legislacao-xx.xx/rbha-e-rbac/rbac/rbac-xx.xx))

7. Smiths Detection Awarded Contract by DAEP to Provide Cutting-Edge Checkpoint Screening Technology for Dubai International Airport (DXB)

   · Smiths' May xx.xx 2025 announcement identifies Dubai Aviation Engineering Projects as the contracting party for checkpoint screening technology at Dubai International Airport. It establishes an award rather than completed deployment. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-awarded-contract-by-daep-to-provide-cutting-edge-checkpoint-screening-technology-for-dubai-international-airport-dxb/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

8. Comprehensive Regional Implementation Plan for Aviation Security and Facilitation in Africa (AFI SECFAL PLAN)

   · ICAO describes AFI SECFAL as a regional program to enhance sustainable aviation security and facilitation. This establishes policy coordination, not an airport equipment award or site-support entitlement. ([icao.int](https://www.icao.int/afisecfal))

9. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

· Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

10. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

11. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

12. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

13. Smiths Group PLC - Annual Report & Accounts FY2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
14. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
15. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
16. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
17. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

18. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
19. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
20. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
21. CATSA - 2025 Annual Report, Management’s Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.

22. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
23. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
24. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
25. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
26. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
27. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
28. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
29. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
30. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

16.1. North America

Table 213. North America Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 214. North America Airport Baggage Screening Systems Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. ACI World - Biannual global air travel demand update, 30 September 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion

14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
15. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.

16. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

17. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
18. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

19. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

20. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
21. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
22. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

23. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

24. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

25. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
26. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

27. Partners - HALO X-ray Technologies Ltd

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

28. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

31. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

32. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

33. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

34. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

35. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

36. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

37. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

38. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

39. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

40. Portable Explosive Detector - Trace Detector EVD-3000+
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
41. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

42. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
43. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

44. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

45. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

46. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

47. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

48. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

49. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

50. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
51. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
52. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
53. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
54. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
55. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

56. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
57. Japan's leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
58. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
59. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
60. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
61. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.

62. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
63. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
64. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
65. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
66. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

67. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

68. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

69. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

70. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

71. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

72. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

73. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

74. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

75. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

76. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

77. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

78. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

79. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

80. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

81. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

82. iCMORE - Smiths Detection

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16.2. Europe

Table 230. Europe Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.

13. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
14. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
15. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
16. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

17. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
18. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

19. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

20. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

21. Aviation security screening approved equipment list

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

22. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

23. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

24. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
25. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

26. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

27. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

28. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
29. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

30. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

31. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

32. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

33. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

34. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

35. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

36. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

37. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

38. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

39. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

40. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

41. Explosive Detection - Teledyne FLIR Defense

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

42. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

43. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

44. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

45. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
46. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

47. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

48. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

49. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

50. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

51. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

52. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

53. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
54. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
55. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
56. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
57. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
58. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

59. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
60. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
61. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
62. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
63. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
64. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

65. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
66. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
67. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
68. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
69. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

70. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

71. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

72. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

73. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

74. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

75. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

76. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

77. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

78. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

79. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

80. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

81. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

82. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

83. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

84. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

85. Leidos wins TSA logistics contract

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

86. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
87. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16.3. Asia-Pacific

Table 247. Asia-Pacific Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
14. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
15. Smiths Detection - Thailand’s First CT Checkpoint Systems, 24 October 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First CT delivery announcement constrains the initial premium-adoption premise; no national revenue figure is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First CT delivery announcement constrains the initial premium-adoption premise; no national revenue figure is disclosed.

16. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

17. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

18. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
19. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

20. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

21. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
22. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
23. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

24. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

25. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

26. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
27. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

28. Partners - HALO X-ray Technologies Ltd

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

29. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

31. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

32. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

33. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

34. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

35. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

36. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

37. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

38. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

39. Explosive Detection - Teledyne FLIR Defense

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

40. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

41. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

42. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

43. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
44. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

45. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

46. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

47. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

48. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

49. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

50. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

51. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
52. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
53. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
54. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
55. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
56. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

57. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
58. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
59. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
60. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
61. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
62. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

63. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
64. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
65. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
66. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
67. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

68. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

69. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

70. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

71. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

72. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

73. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

74. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

75. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

76. United Launches CBP's International Remote Baggage Screening on Select International Flights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

77. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

78. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

79. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

80. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

81. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

82. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

83. Leidos wins TSA logistics contract

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

84. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
85. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16.4. Middle East

Table 264. Middle East Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Israel	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.

13. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Turkey's xx.xx-million 2025 passenger aggregate constrains its rounded traffic input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Turkey's xx.xx-million 2025 passenger aggregate constrains its rounded traffic input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
14. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the Dubai engineering purchaser and awarded checkpoint scope, not annual revenue or completed deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes the Dubai engineering purchaser and awarded checkpoint scope, not annual revenue or completed deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

15. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

16. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

17. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
18. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

19. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

20. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
21. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
22. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

23. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

24. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

25. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
26. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

27. Partners - HALO X-ray Technologies Ltd

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

28. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

31. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

32. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

33. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

34. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

35. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

36. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

37. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

38. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

39. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

40. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

41. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

42. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
43. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

44. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

45. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

46. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

47. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

48. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

49. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

50. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
51. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
52. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
53. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
54. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
55. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

56. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
57. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
58. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
59. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
60. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
61. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

62. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
63. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
64. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
65. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
66. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

67. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

68. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

69. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

70. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

71. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

72. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

73. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

74. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

75. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

76. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

77. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

78. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

79. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

80. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

81. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

82. Leidos wins TSA logistics contract

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

83. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
84. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16.5. Latin America

Table 281. Latin America Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Argentina	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. ACI World - Biannual global air travel demand update, 30 September 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.

13. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Argentine traffic growth informs the temporal bridge, not an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Argentine traffic growth informs the temporal bridge, not an observed equipment share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.

14. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

15. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

16. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
17. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

18. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

19. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
20. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
21. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

22. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

23. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

24. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
25. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

26. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

27. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

28. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

30. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

31. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

32. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

33. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

34. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

35. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

36. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

37. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

38. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

39. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

40. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

41. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
42. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

43. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

44. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

45. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

46. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

47. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

48. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

49. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
50. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
51. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
52. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
53. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
54. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

55. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
56. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
57. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
58. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
59. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
60. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

61. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
62. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
63. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
64. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
65. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

66. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

67. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

68. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

69. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

70. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

71. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

72. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

73. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

74. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

75. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

76. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

77. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

78. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

79. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

80. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

81. Leidos wins TSA logistics contract

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

82. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
83. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

16.6. Africa

Table 298. Africa Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.

13. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator network indicators constrain the South African traffic-scale assumption; they are not a calendar-2025 national spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator network indicators constrain the South African traffic-scale assumption; they are not a calendar-2025 national spending census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

14. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

15. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

16. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
17. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

18. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

19. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
20. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
21. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

22. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

23. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

24. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
25. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

26. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

27. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

28. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

30. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

31. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

32. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

33. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

34. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

35. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

36. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

37. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

38. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

39. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

40. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

41. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
42. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

43. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

44. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

45. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

46. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

47. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

48. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

49. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
50. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
51. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
52. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
53. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
54. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

55. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
56. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
57. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
58. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
59. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
60. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

61. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
62. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
63. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
64. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
65. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

66. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

67. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

68. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

69. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

70. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

71. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

72. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

73. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

74. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

75. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

76. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

77. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

78. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

79. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

80. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

81. Leidos wins TSA logistics contract

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

82. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
83. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17. Airport Baggage Screening Systems Market, by Group

[illegible] Smiths Detection lists a shared sales-and-service contact for the United States and Latin America, alongside a separate Canadian office. Regional account coordination is consequently plausible, but buyers should contract for the countries and installations actually covered rather than infer coverage from the group label.

[illegible] Smiths Detection identifies an EMEA sales office in Germany while separately assigning specified markets to its UAE office. A regional account relationship can simplify engagement, but the appointment's territorial boundaries and site-support obligations still need confirmation; a sales-office listing is not a response commitment.

ASEAN's standards-harmonization framework can support reuse of conformity documentation, but its trade repository expressly advises checking national adoption. [illegible] Regional distribution is an option where those conditions align; the general harmonization framework does not itself establish baggage-screening acceptance.

GCC customs integration creates a logistics consideration distinct from equipment approval. The UAE's official explanation identifies common customs arrangements and first-entry clearance, while retaining treatment for prohibited or restricted goods. [illegible]

Australasia has a documented cross-border public-procurement mechanism. Australia and New Zealand reaffirmed their government procurement agreement in September 2026, including a competitive procurement market and a level playing field for their suppliers. [illegible]

Nordic countries share an aviation-security framework extending beyond EU membership: European Commission guidance states that the common rules also apply to Norway and Iceland. [illegible] Buyers should therefore compare the proposed installation and passenger proposition, not assume that a shared Nordic compliance environment creates uniform replacement needs.

The European Union provides common basic aviation-security rules, including cabin- and hold-baggage screening, while requiring national authorities and airport security programs.

Suppliers can organize a common compliance proposition, but the commercial offer must still fit the responsible national authority and airport program. ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■

BRICS transport cooperation is an infrastructure-policy signal rather than evidence of an executable screening procurement. ■■■ ■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ Prospective suppliers should wait for an identifiable airport solicitation or award before committing delivery resources to a group-level opportunity.

G7 comparisons have a relevant procurement lens through WTO Government Procurement Agreement participation, directly or through the European Union. ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Suppliers should establish coverage for the actual screening contract rather than assume that G7 membership creates reciprocal tender rights.

■■■■ ■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■ ■ ■■■■ ■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■ Suppliers should identify the contracting institution before relying on alliance-based eligibility. These geographic groups overlap with regions and with one another; their coverage is non-additive.

Figure 29. Global Airport Baggage Screening Systems Market Size, by Group, 2025 vs 2026 vs 2032

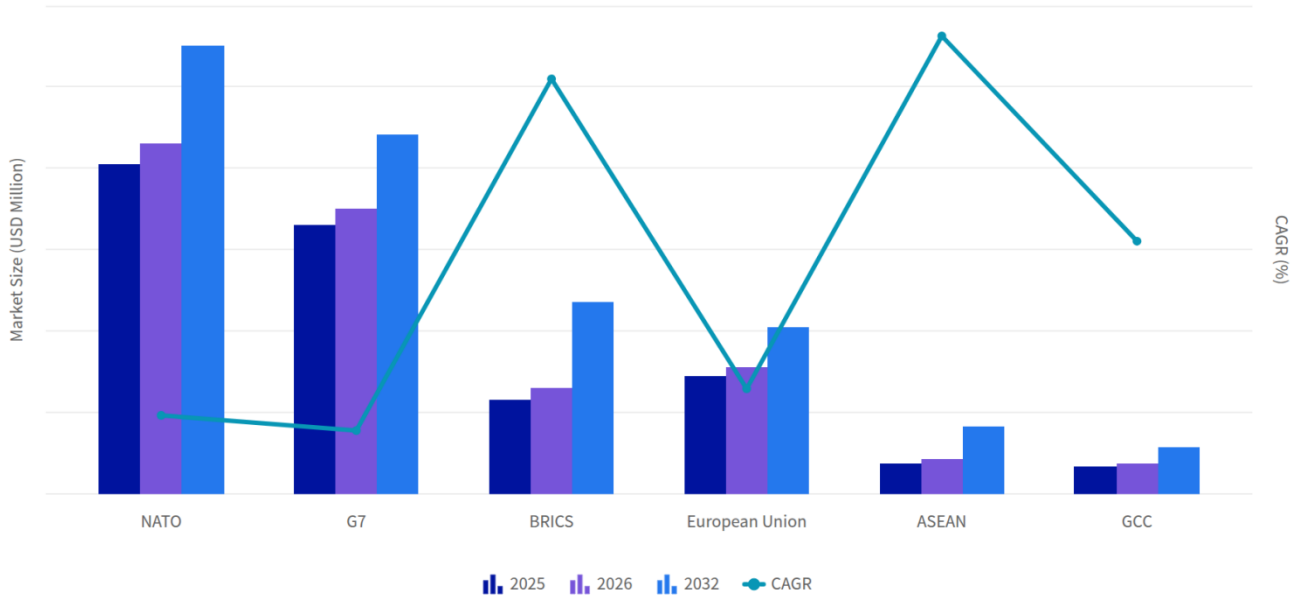

Table 315. Global Airport Baggage Screening Systems Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Contact Us | Smiths Detection
   · Smiths lists shared United States/Latin America sales and service contact arrangements, a separate Canadian office, an EMEA sales office with exceptions, and specified markets assigned to its UAE office. These are territorial contact arrangements, not site response commitments. ([smithsdetection.com](https://www.smithsdetection.com/contact-us/))
2. Harmonisation of Standards in ASEAN - ASEAN Trade Repository
   · ASEAN's trade repository describes standards harmonization and expressly advises users to confirm national adoption. It does not establish baggage-screening-specific recognition. ([atr.asean.org](https://atr.asean.org/read/harmonisation-of-standards-in-asean/xx.xx/))
3. Customs Union for GCC States
   · The UAE authority describes common GCC customs arrangements, first-entry clearance, and treatment of prohibited or restricted goods. This supports a conditional regional logistics assessment, not aviation equipment acceptance. ([icp.gov.ae](https://icp.gov.ae/en/customs-union-for-gcc/))
4. Closer Economic Relations Ministerial Meeting - September 2026
   · The September 2026 ministerial statement reaffirms the Australia New Zealand Government Procurement Agreement and its competitive procurement market and supplier level-playing-field commitments. ([trademinister.gov.au](https://www.trademinister.gov.au/minister/don-farrell/statements/closer-economic-relations-ministerial-meeting-september-2026))
5. Aviation Security - European Commission
   · The Commission identifies common cabin- and hold-baggage security rules, national authorities and airport programs, and extension of the common rules to Norway and Iceland. ([transport.ec.europa.eu](https://transport.ec.europa.eu/transport-modes/air/aviation-security_en))
6. Security control | Finavia
   · Finavia distinguishes preparation requirements at Helsinki departures, transfers, and regional airports, demonstrating that shared regulation does not establish a uniform installation-level passenger proposition. ([finavia.fi](https://www.finavia.fi/en/airport/security-control))
7. Under India's BRICS Chairship, Transport Ministers Adopt Ministerial Declaration at the 3rd BRICS Transport Ministers' Meeting in Nagpur, Maharashtra
   · The July xx.xx 2026 government release describes the July xx.xx BRICS transport declaration's infrastructure, decarbonization, and logistics cooperation priorities. It does not establish a baggage-screening solicitation or equipment authorization. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx))
8. WTO Agreement on Government Procurement - Parties and observers
   · The WTO parties register lists Canada, Japan, the United Kingdom, the United States, and the European Union with its member states, supporting the G7 procurement-participation lens. ([wto.org](https://www.wto.org/english/tratop_e/gproc_e/memobs_e.htm))

9. Agreement on Government Procurement as Amended by the 2012 Protocol Amending the Agreement on Government Procurement

   · The GPA applies to covered procurement defined through party schedules and procuring entities, and includes essential-security exceptions. Party membership alone does not settle contract eligibility. ([wto.org](https://www.wto.org/english/docs_e/legal_e/gpa_e.htm))

10. NATO Front Door for Industry

    · NATO's industry portal states that procurement opportunities are normally limited to entities registered in member countries, with exceptions specified in opportunity documentation. The portal concerns NATO procurement rather than ordinary civil-airport purchasing. ([nato.int](https://www.nato.int/en/work-with-us/business-and-project-opportunities?trk=article-ssr-frontend-pulse_little-text-block))

11. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

    · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

12. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

13. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

14. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

15. Smiths Group PLC - Annual Report & Accounts FY2023

    · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

16. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
17. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
18. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
19. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

20. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
21. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual

13. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
14. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
15. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
16. ACI EUROPE - 2025 all about traffic resilience as Europe’s airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published growth informs the Albanian temporal assumption, not national equipment receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published growth informs the Albanian temporal assumption, not national equipment receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
17. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

18. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
19. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Turkey's xx.xx-million 2025 passenger aggregate constrains its rounded traffic input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Turkey's xx.xx-million 2025 passenger aggregate constrains its rounded traffic input.
20. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.

21. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

22. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
23. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

24. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

25. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
26. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

27. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

28. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

29. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
30. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

31. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

32. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

33. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

34. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

35. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

36. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

37. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

38. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

39. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

40. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

41. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

42. Explosive Detection - Teledyne FLIR Defense

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

43. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

44. Portable Explosive Detector - Trace Detector EVD-3000+
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
45. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

46. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
47. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

48. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

49. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

50. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

51. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

52. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

53. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

54. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
55. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
56. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
57. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
58. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
59. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

60. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
61. Japan's leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
62. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
63. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
64. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
65. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.

66. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
67. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
68. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
69. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
70. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

71. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

72. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

73. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

74. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

75. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

76. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

77. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

78. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

79. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

80. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

81. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

82. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

83. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

84. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

85. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

86. iCMORE - Smiths Detection

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17.2. G7

Table 333. G7 Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. CATSA - 2025 Annual Report, Management’s Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual

13. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
14. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
15. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
16. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
17. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.

18. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.

19. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

20. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
21. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

22. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

23. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
24. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

25. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

26. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

27. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
28. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

29. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

30. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

31. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

32. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

33. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

34. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

35. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

36. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

37. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

38. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

39. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

40. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

41. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

42. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

43. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

44. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
45. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

46. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

47. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

48. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

49. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

50. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

51. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

52. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
53. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
54. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
55. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
56. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
57. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

58. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
59. Japan's leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
60. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
61. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
62. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
63. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.

64. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
65. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
66. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
67. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
68. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

69. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

70. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

71. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

72. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

73. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

74. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

75. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

76. United Launches CBP's International Remote Baggage Screening on Select International Flights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

77. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

78. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

79. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

80. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

81. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

82. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

83. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.

84. iCMORE - Smiths Detection

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17.3. European Union

Table 350. European Union Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.

13. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim growth input to the temporal bridge.
14. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
15. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.

16. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

17. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

18. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
19. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

20. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

21. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
22. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

23. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

24. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

25. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
26. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

27. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

28. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

31. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

32. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

33. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

34. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

35. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

36. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

37. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

38. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

39. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

40. Portable Explosive Detector - Trace Detector EVD-3000+
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
41. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

42. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
43. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

44. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

45. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

46. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

47. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

48. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

49. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

50. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
51. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
52. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
53. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
54. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
55. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

56. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
57. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
58. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
59. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
60. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
61. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

62. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
63. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
64. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
65. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
66. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

67. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

68. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

69. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

70. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

71. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

72. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

73. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

74. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

75. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

76. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

77. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

78. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

79. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

80. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

81. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

82. Leidos wins TSA logistics contract

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

83. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
84. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17.4. BRICS

Table 367. BRICS Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.

13. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
14. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator network indicators constrain the South African traffic-scale assumption; they are not a calendar-2025 national spending census.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator network indicators constrain the South African traffic-scale assumption; they are not a calendar-2025 national spending census.
15. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.

16. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

17. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

18. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
19. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

20. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

21. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
22. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
23. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

24. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

25. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

26. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
27. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

28. Partners - HALO X-ray Technologies Ltd

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

29. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

31. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

32. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

33. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

34. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

35. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

36. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

37. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

38. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

39. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

40. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

41. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

42. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

43. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
44. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

45. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

46. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

47. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

48. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

49. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

50. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

51. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
52. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
53. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
54. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
55. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
56. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

57. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
58. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
59. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
60. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
61. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
62. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

63. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
64. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
65. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
66. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
67. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

68. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

69. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

70. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

71. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

72. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

73. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

74. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

75. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

76. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

77. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

78. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

79. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

80. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

81. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

82. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

83. Leidos wins TSA logistics contract

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

84. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
85. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17.5. ASEAN

Table 384. ASEAN Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brunei	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cambodia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 392. ASEAN Airport Baggage Screening Systems Market Size, by Detection Platform, 2017-2040 (USD Million)

Detection Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Chemiluminescence Detection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Dielectric and Microwave Analysis	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fluorescence Detection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Integrated Multimodal Detection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ion Mobility Spectrometry	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Magnetic Resonance	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mass Spectrometry	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Projection X-Ray Imaging	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Raman Spectroscopy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Thermo-Redox Detection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
X-Ray Computed Tomography	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
X-Ray Diffraction	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 393. ASEAN Airport Baggage Screening Systems Market Size, by Projection X-Ray Imaging, 2017-2040 (USD Million)

Projection X-Ray Imaging	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Multiview X-Ray Imaging	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Single-View X-Ray Imaging	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 394. ASEAN Airport Baggage Screening Systems Market Size, by Interoperability Architecture, 2017-2040 (USD Million)

Interoperability Architecture	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Proprietary Architecture	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Standards-Based Interoperability	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vendor-Specific Integration	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 395. ASEAN Airport Baggage Screening Systems Market Size, by Screening Application, 2017-2040 (USD Million)

Screening Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Customs and Border Baggage Inspection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Passenger Property Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Cabin Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Checked Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Terminal-Entrance Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 396. ASEAN Airport Baggage Screening Systems Market Size, by Purchasing Organization, 2017-2040 (USD Million)

Purchasing Organization	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Airlines	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Airport and Terminal Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Contract Screening Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Customs and Border Authorities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Public Aviation Security Agencies	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 397. ASEAN Airport Baggage Screening Systems Market Size, by System Integration, 2017-2040 (USD Million)

System Integration	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Baggage Handling-Integrated Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Checkpoint Lane-Integrated Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standalone Screening Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 398. ASEAN Airport Baggage Screening Systems Market Size, by Image Review Location, 2017-2040 (USD Million)

Image Review Location	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Hybrid Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Local Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Off-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
On-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 399. ASEAN Airport Baggage Screening Systems Market Size, by Procurement Channel, 2017-2040 (USD Million)

Procurement Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Technology Suppliers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributors and Resellers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent Technical Service Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Systems Integration Primes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 400. ASEAN Airport Baggage Screening Systems Market Size, by Investment Purpose, 2017-2040 (USD Million)

Investment Purpose	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
New Installations and Capacity Expansion	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retrofits and Upgrades	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
System Replacement	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. Smiths Detection - Thailand’s First CT Checkpoint Systems, 24 October 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First CT delivery announcement constrains the initial premium-adoption premise; no national revenue figure is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First CT delivery announcement constrains the initial premium-adoption premise; no national revenue figure is disclosed.

13. Smiths Detection - Securing Vietnam’s Busiest Domestic Terminal
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named multi-view, lane-integration and hold-screening installation supports differentiated equipment mix; overlapping categories are not aggregated into a national fleet.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named multi-view, lane-integration and hold-screening installation supports differentiated equipment mix; overlapping categories are not aggregated into a national fleet.

14. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

15. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

16. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
17. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

18. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

19. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
20. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
21. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

22. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

23. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

24. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
25. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

26. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

27. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

28. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

30. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

31. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

32. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

33. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

34. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

35. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

36. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

37. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

38. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

39. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

40. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

41. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
42. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

43. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

44. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

45. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

46. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

47. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

48. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

49. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
50. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
51. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
52. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
53. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
54. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

55. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
56. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
57. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
58. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
59. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
60. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

61. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
62. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
63. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
64. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
65. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

66. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

67. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

68. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

69. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

70. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

71. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

72. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

73. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

74. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

75. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

76. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

77. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

78. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

79. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

80. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

81. Leidos wins TSA logistics contract

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

82. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
83. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

17.6. GCC

Table 401. GCC Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bahrain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kuwait	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. Bahrain Open Data Portal - Passengers at Bahrain International Airport

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines arrivals, departures, transit and transfer scope; the xx.xx-million working input is not claimed as a retrieved table observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines arrivals, departures, transit and transfer scope; the xx.xx-million working input is not claimed as a retrieved table observation.

13. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the Dubai engineering purchaser and awarded checkpoint scope, not annual revenue or completed deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes the Dubai engineering purchaser and awarded checkpoint scope, not annual revenue or completed deployment.

14. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

15. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

16. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
17. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

18. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

19. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
20. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
21. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

22. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

23. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

24. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
25. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

26. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

27. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

28. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

30. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

31. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

32. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

33. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

34. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

35. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

36. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

37. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

38. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

39. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

40. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

41. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
42. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

43. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

44. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

45. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

46. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

47. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

48. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

49. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
50. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
51. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
52. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
53. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.
54. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

55. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
56. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
57. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
58. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
59. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
60. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

61. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
62. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
63. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
64. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
65. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.

66. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

67. Smiths Detection selected as security technology provider to International Airport Heraklion Crete

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

68. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

69. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

70. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

71. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

72. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

73. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

74. United Launches CBP's International Remote Baggage Screening on Select International Flights

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

75. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

76. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

77. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

78. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

79. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

80. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

81. Leidos wins TSA logistics contract

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))

82. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
83. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

18. Airport Baggage Screening Systems Market, by Country

The United States and Canada illustrate different institutional entry decisions. ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ Suppliers should establish whether they are pursuing an equipment-eligibility decision, a covered solicitation, or a service obligation; success at one gate does not settle the others.

The United Kingdom and Germany also require application-specific comparisons. ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■■■■■ Buyers should compare the exact equipment and software combination within the intended national application rather than use another country's deployment as a substitute for eligibility.

■■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ For suppliers, the actionable relationship is the named airline-airport-authority arrangement, not blanket access to either national airport market. Expansion should depend on an additional documented route agreement and its support responsibilities, not an assumption that the initial initiative extends countrywide.

Figure 30. Global Airport Baggage Screening Systems Market Size, by Country, 2025 vs 2032 (%)

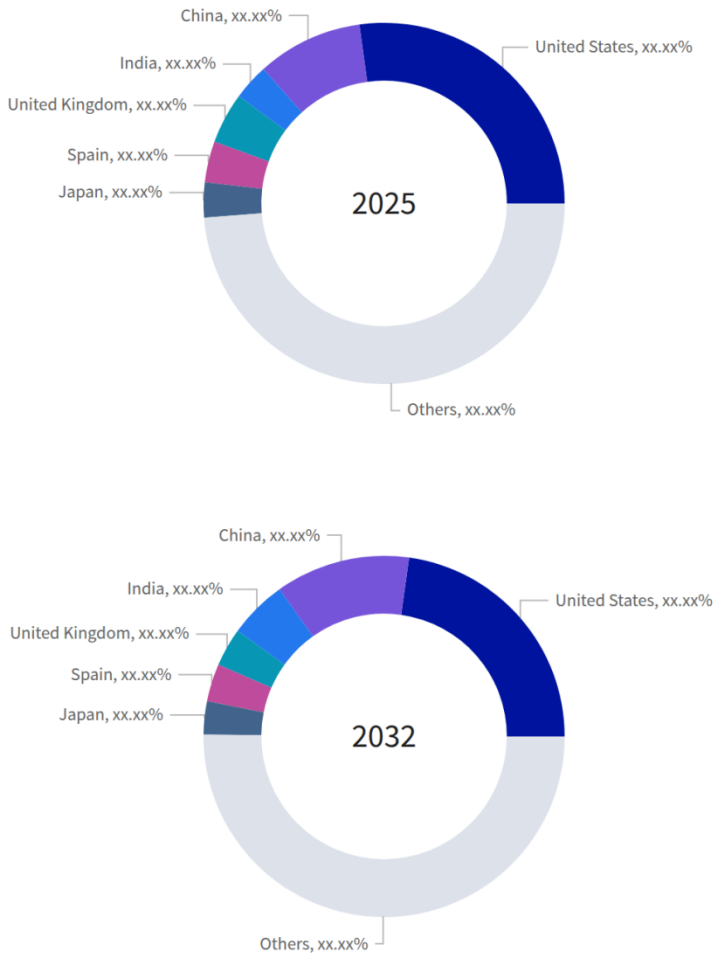

Figure 31. Global Airport Baggage Screening Systems Market Size, by Country, 2025 vs 2026 vs 2032

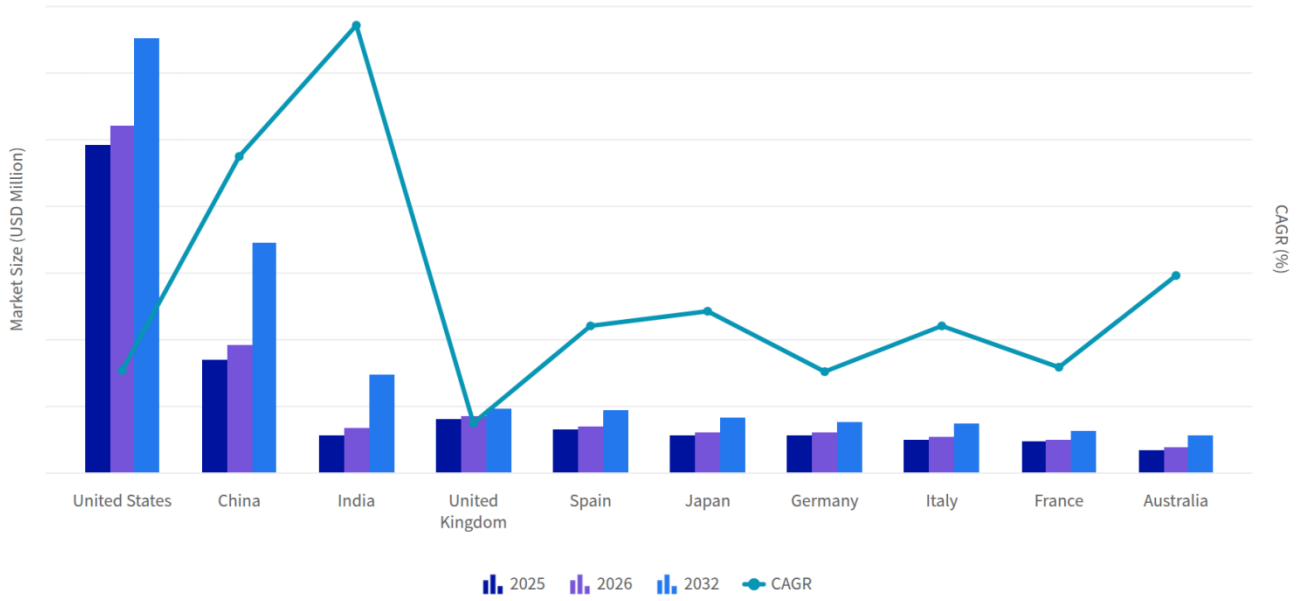

Table 418. Global Airport Baggage Screening Systems Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Aviation security screening approved equipment list
   · UK guidance distinguishes approval categories and states that conventional X-ray equipment does not require specific Department for Transport approval.
   ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
2. Leidos wins TSA logistics contract
   · The TSA example establishes a United States agency sustainment route involving equipment manufacturers, not general service-provider access.
   ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
3. Procurement and Contracting Policy - CATSA
   · The policy establishes a Canadian equipment-approval gate separate from applicable trade-procurement obligations.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
4. Trade Agreement Covered Procurements Procedure - CATSA
   · CATSA's procedure effective January xx.xx 2026, addresses determining procurement coverage under CETA/Canada-UK TCA and the Canadian Free Trade Agreement.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/trade-agreement-covered-procurements-procedure))

5. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
   · Frankfurt's nationally certified deployment is a German application-specific example rather than another jurisdiction's acceptance. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
6. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입
   · The announcement identifies a particular South Korea-United States airline route, not countrywide deployment. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
7. United Launches CBP's International Remote Baggage Screening on Select International Flights
   · United's September xx.xx 2025 announcement identifies its Sydney-San Francisco initiative and cooperation with Sydney Airport, BagCheck, and Brock Solutions. It establishes a named route relationship, not countrywide coverage. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx-xx-xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
8. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
9. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
10. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
11. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

12. Smiths Group PLC - Annual Report & Accounts FY2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
13. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
14. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
15. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
16. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

17. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
18. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
19. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
20. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
21. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
22. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
23. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

24. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.

26. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.

27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

18.1. United States

Table 420. United States Airport Baggage Screening Systems Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025

5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.

11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

12. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
13. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.

14. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

15. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management,

16. Aviation security screening approved equipment list
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
17. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

18. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.

19. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
20. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
21. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

22. Smiths Detection - Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))

23. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

24. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
25. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

26. Partners - HALO X-ray Technologies Ltd

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

27. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

28. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

30. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

31. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

32. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

33. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

34. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

35. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

36. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

37. Explosive Detection - Teledyne FLIR Defense

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

38. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

39. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

40. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

41. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
42. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

43. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

44. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
