Airport Baggage Screening Systems Market

Global Forecast 2026-2032

MRR-3C68ED2D0A2F | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 22
   1.5. Currency Considered for the Study 22
   1.6. Language Considered for the Study 22
   1.7. Key Stakeholders 22
2. Research Methodology 24
   2.1. Introduction 24
   2.2. Research Design 24
      2.2.1. Primary Research 25
      2.2.2. Secondary Research 25
   2.3. Research Framework 26
      2.3.1. Qualitative Analysis 26
      2.3.2. Quantitative Analysis 27
   2.4. Market Size Estimation 27
      2.4.1. Top-Down Approach 27
      2.4.2. Bottom-Up Approach 28
   2.5. Data Triangulation 28
   2.6. Research Outcomes 29
   2.7. Research Assumptions 29
   2.8. Research Limitations 29
3. Executive Summary 31
   3.1. Introduction 31
   3.2. CXO Perspective 31
   3.3. New Revenue Opportunities 32
   3.4. Next-Generation Business Models 33
   3.5. Industry Roadmap 34
4. Market Overview 36
   4.1. Introduction 36
   4.2. Key Growth Contribution 39
   4.3. Industry Ecosystem & Value Chain Analysis 69
      4.3.1. Supply-Side Analysis 70
      4.3.2. Demand-Side Analysis 71
      4.3.3. Stakeholder Analysis 71
   4.4. Market Dynamics 72
      4.4.1. Key Drivers 72
         4.4.1.1. Passenger-preparation benefits support checkpoint modernization 72
         4.4.1.2. Space-constrained renewal pulls integration and automation 73
         4.4.1.3. Training-software approval creates continuing support requirements 73

4.4.2. Key Restraints 74
4.4.2.1. Configuration-specific eligibility limits transferable market access 74
4.4.2.2. Brownfield capital dependencies separate need from commitment 74
4.4.2.3. Funding and workforce complements constrain benefit realization 74
4.4.3. Key Opportunities 75
4.4.3.1. Supported enhancement of retained screening equipment 75
4.4.3.2. Accountable delivery across screening interfaces 75
4.4.3.3. Equipment-specific lifecycle support 75
4.4.3.4. Continuity of approved training software 76
4.4.4. Key Challenges 76
4.4.4.1. Coordinating phased deployment without overstating completion 76
4.4.4.2. Converting multi-vendor positioning into enforceable integration rights 76
4.4.4.3. Making maintenance and parts coverage contractually executable 77
4.4.4.4. Resolving commercial permissions for remote image review 77
4.5. Porter's Five Forces Analysis 78
4.6. PESTLE Analysis 79
4.7. Market Outlook 81
4.7.1. Near-Term Market Outlook (0-2 Years) 81
4.7.2. Medium-Term Market Outlook (3-5 Years) 82
4.7.3. Long-Term Market Outlook (5-10 Years) 82
4.8. Go-to-Market Strategy 83
5. Market Insights 85
5.1. Consumer Insights & End-User Perspective 85
5.2. Consumer Experience Benchmarking 85
5.3. Opportunity Mapping 86
5.4. Distribution Channel Analysis 88
5.5. Pricing Trend Analysis 89
5.6. Regulatory Compliance & Standards Framework 90
5.7. ESG & Sustainability Analysis 91
5.8. Disruption & Risk Scenarios 92
5.9. Return on Investment & Cost-Benefit Analysis 94
6. Cumulative Impact of Artificial Intelligence 2026 96
7. Airport Baggage Screening Systems Market, by Offering 98
7.1. Detection Equipment 104
7.1.1. Baggage Inspection Systems 114
7.1.2. Explosive Trace Detectors 122
7.1.3. Liquid and Bulk Material Analyzers 129
7.2. System Services 137
7.2.1. Maintenance, Repair, and Technical Support 147
7.2.2. Installation, Integration, and Commissioning Services 155
7.2.3. Planning and Engineering Services 163
7.2.4. Equipment Training Services 171
7.3. Replacement Parts and Consumables 179
7.3.1. Replacement Parts and Upgrade Kits 188
7.3.2. Detection Consumables 196

7.4. Screening Automation Equipment 204
7.4.1. Screening Lanes and Tray-Return Systems 212
7.4.2. Screening Conveyors and Sortation Equipment 219
7.5. Screening Software 227
7.5.1. Image Review and Management Software 236
7.5.2. Automated Threat Detection Software 244
7.5.3. Screening Connectivity and Fleet Management Software 252
7.5.4. Screener Training and Quality Assurance Software 260
8. Airport Baggage Screening Systems Market, by Detection Platform 269
8.1. X-Ray Computed Tomography 281
8.2. Projection X-Ray Imaging 289
8.2.1. Multiview X-Ray Imaging 298
8.2.2. Single-View X-Ray Imaging 305
8.3. Ion Mobility Spectrometry 313
8.4. Raman Spectroscopy 321
8.5. Dielectric and Microwave Analysis 328
8.6. X-Ray Diffraction 335
8.7. Integrated Multimodal Detection 344
8.8. Fluorescence Detection 351
8.9. Chemiluminescence Detection 358
8.10. Thermo-Redox Detection 366
8.11. Magnetic Resonance 374
8.12. Mass Spectrometry 383
9. Airport Baggage Screening Systems Market, by Interoperability Architecture 392
9.1. Vendor-Specific Integration 399
9.2. Closed Proprietary Architecture 408
9.3. Open Standards-Based Interoperability 417
10. Airport Baggage Screening Systems Market, by Screening Application 426
10.1. Passenger Checked Baggage Screening 433
10.2. Passenger Cabin Baggage Screening 441
10.3. Non-Passenger Property Screening 448
10.4. Customs and Border Baggage Inspection 456
10.5. Terminal-Entrance Baggage Screening 464
11. Airport Baggage Screening Systems Market, by Purchasing Organization 472
11.1. Airport and Terminal Operators 479
11.2. Public Aviation Security Agencies 488
11.3. Customs and Border Authorities 496
11.4. Airlines 504
11.5. Contract Screening Operators 512
12. Airport Baggage Screening Systems Market, by System Integration 520
12.1. Baggage Handling-Integrated Systems 526
12.2. Checkpoint Lane-Integrated Systems 534

12.3. Standalone Screening Systems....542
13. Airport Baggage Screening Systems Market, by Image Review Location....552
13.1. On-Site Remote Image Review....561
13.2. Local Image Review....569
13.3. Hybrid Image Review....578
13.4. Off-Site Remote Image Review....586
14. Airport Baggage Screening Systems Market, by Procurement Channel....595
14.1. Direct Technology Suppliers....602
14.2. Systems Integration Primes....610
14.3. Independent Technical Service Providers....618
14.4. Distributors and Resellers....627
15. Airport Baggage Screening Systems Market, by Investment Purpose....635
15.1. System Replacement....641
15.2. New Installations and Capacity Expansion....649
15.3. Retrofits and Upgrades....658
16. Airport Baggage Screening Systems Market, by Region....668
16.1. North America....676
16.2. Europe....712
16.3. Asia-Pacific....750
16.4. Middle East....787
16.5. Latin America....823
16.6. Africa....859
17. Airport Baggage Screening Systems Market, by Group....896
17.1. NATO....901
17.2. G7....940
17.3. European Union....977
17.4. BRICS....1014
17.5. ASEAN....1050
17.6. GCC....1086
18. Airport Baggage Screening Systems Market, by Country....1123
18.1. United States....1131
18.2. China....1167
18.3. United Kingdom....1201
18.4. Spain....1236
18.5. Germany....1272
18.6. India....1308
18.7. Japan....1343
18.8. Italy....1378
18.9. France....1414
18.10. Canada....1450
18.11. Australia....1485
18.12. Brazil....1520

18.13. South Korea 1555
18.14. Mexico 1590
18.15. Russia 1625
19. Competitive Landscape 1661
19.1. Market Share Analysis, 2025 1661
19.2. Market Concentration Analysis, 2025 1672
19.3. Recent Developments & Impact Analysis, 2025 1675
19.4. Product Portfolio Analysis, 2025 1677
19.5. Benchmarking Analysis, 2025 1684
20. Company Profiles 1689
20.1. Smiths Detection 1689
20.2. Analogic Corporation 1690
20.3. Rapiscan Systems 1691
20.4. Nuctech 1692
20.5. SureScan Corporation 1693
20.6. Vanderlande 1694
20.7. SeeTrue 1695
20.8. Bruker 1696
20.9. K'(Prime) Technologies Inc. 1697
20.10. Brock Solutions 1698
20.11. K2 Security Screening Group 1699
20.12. SEGMAN S.A. DE C.V. 1700
20.13. Agilent Technologies 1701
20.14. Westminster Group Plc 1702
20.15. Micro-X Limited 1703
20.16. Point FWD 1704
21. Companies Covered 1706
22. Key Experts 1730

1. Preface

1.1. Objectives of the Study

- Which purchasing organization controls selection, approval, and delivery responsibilities for each screening application, and how do the roles of Airport and Terminal Operators, Public Aviation Security Agencies, Customs and Border Authorities, Airlines, and Contract Screening Operators differ?
- Which suppliers document commercial participation in the included equipment, software, services, parts, and consumables, and what ownership, licensing, distribution, or support rights distinguish their roles from broader aviation-security portfolio claims?
- What jurisdiction-specific authorizations, procurement eligibility conditions, buyer qualifications, and delivery commitments must be established before an offering can be considered accessible to a particular airport purchaser?
- How do interoperability architecture, system integration, image-review location, software rights, and maintenance obligations affect supplier switching, upgrade choices, and allocation of responsibility across the screening system?
- What distinguishes the commercial requirements of New Installations and Capacity Expansion, System Replacement, and Retrofits and Upgrades, including integration with existing assets and continuity of the airport's screening activity?
- When do Direct Technology Suppliers, Distributors and Resellers, Systems Integration Primes, or Independent Technical Service Providers offer a suitable procurement relationship, and which rights, warranties, and delivery obligations must be confirmed for that route?
- How should buyers compare lifecycle commitments involving integration, software licensing, maintenance, replacement support, and equipment training, while distinguishing documented capabilities from unverified claims of equivalence or operational benefit?

1.2. Market Definition

Airport Baggage Screening Systems encompasses commercial offerings for the inspection of baggage and other included property in airport security and customs-and-border settings. The Global study covers Detection Equipment, Screening Automation Equipment, Screening Software, System Services, and Replacement Parts and Consumables, including separately supplied and bundled offerings.

The application boundary includes Passenger Cabin Baggage Screening, Passenger Checked Baggage Screening, Terminal-Entrance Baggage Screening, Non-Passenger Property Screening, and Customs and Border Baggage Inspection. Standalone systems, checkpoint lane-integrated systems, and baggage handling-integrated systems are included, as are local, on-site remote, off-site remote, and hybrid image-review arrangements. The purchasing

boundary encompasses the airport, public-agency, airline, customs-and-border, and contract-operator categories established in the study.

The value chain extends from the included technology and software offerings through their distribution, integration, training, maintenance, and replacement support. General-purpose upstream manufacturing, unrelated airport infrastructure, person-only screening, and routine security staffing are adjacent activities rather than the studied offering. Screening-related automation, technical services, equipment training, parts, and consumables remain included; a supplier's broader airport portfolio does not automatically bring its other activities within this market.

1.3. Market Segmentation & Coverage

Offering distinguishes what is supplied and supported. Detection Equipment includes Baggage Inspection Systems, Liquid and Bulk Material Analyzers, and Explosive Trace Detectors. Screening Automation Equipment includes Screening Lanes and Tray-Return Systems and Screening Conveyors and Sortation Equipment. Screening Software includes Automated Threat Detection Software, Image Review and Management Software, Screening Connectivity and Fleet Management Software, and Screener Training and Quality Assurance Software. System Services includes Planning and Engineering Services; Installation, Integration, and Commissioning Services; Maintenance, Repair, and Technical Support; and Equipment Training Services. Replacement Parts and Consumables includes Replacement Parts and Upgrade Kits and Detection Consumables. These distinctions support comparison of equipment delivery and continuing commercial commitments without presuming that each element is separately contracted.

Detection Platform includes Projection X-Ray Imaging, with Single-View X-Ray Imaging and Multiview X-Ray Imaging; X-Ray Computed Tomography; X-Ray Diffraction; Ion Mobility Spectrometry; Mass Spectrometry; Raman Spectroscopy; Dielectric and Microwave Analysis; Magnetic Resonance; Fluorescence Detection; Chemiluminescence Detection; Thermo-Redox Detection; and Integrated Multimodal Detection. This axis organizes the accepted technology categories for commercial comparison without implying equivalent authorization, suitability, or supplier capability.

Interoperability Architecture includes Closed Proprietary Architecture, Vendor-Specific Integration, and Open Standards-Based Interoperability. It frames questions concerning integration responsibility, interface rights, licensing dependencies, and supplier switching. Category inclusion does not itself establish a particular product's compatibility or a buyer's contractual right to substitute another supplier.

Screening Application includes Passenger Cabin Baggage Screening, Passenger Checked Baggage Screening, Terminal-Entrance Baggage Screening, Non-Passenger Property Screening, and Customs and Border Baggage Inspection. This axis preserves the purchasing and eligibility context of each use rather than treating evidence from one application as transferable to every other application.

Purchasing Organization includes Airport and Terminal Operators, Public Aviation Security Agencies, Customs and Border Authorities, Airlines, and Contract Screening Operators. It

separates the identity of the purchaser from the application and technology, allowing the study to examine who selects, contracts for, and bears responsibility for an offering.

System Integration includes Standalone Screening Systems, Checkpoint Lane-Integrated Systems, and Baggage Handling-Integrated Systems. This axis distinguishes the scope of supply and the interfaces for which commercial responsibility must be established; it does not expand the study to unrelated baggage-handling or terminal infrastructure.

Image Review Location includes Local Image Review, On-Site Remote Image Review, Off-Site Remote Image Review, and Hybrid Image Review. The axis separates location-related contracting, software, connectivity, and accountability questions without assuming that a permission or delivery arrangement applies across jurisdictions.

Procurement Channel includes Direct Technology Suppliers, Distributors and Resellers, Systems Integration Primes, and Independent Technical Service Providers. It distinguishes the contracting route from the origin of the technology and focuses attention on channel rights, delivery obligations, warranties, and continuing support authority.

Investment Purpose includes New Installations and Capacity Expansion, System Replacement, and Retrofits and Upgrades. It distinguishes the buyer's investment objective so that a complete new system, replacement procurement, and modification of an existing installation are not treated as the same commercial proposition.

These root axes are independent analytical lenses within the same Global market. They support cross-classification, not addition across axes, and do not independently establish deployment, market access, or commercial attractiveness.

Table 1. Global Airport Baggage Screening Systems Market Segmentation & Coverage

Segmentation	Coverage

Detection Platform	• X-Ray Computed Tomography
	• Projection X-Ray Imaging
	  o Multiview X-Ray Imaging
	  o Single-View X-Ray Imaging
	• Ion Mobility Spectrometry
	• Raman Spectroscopy
	• Dielectric and Microwave Analysis
	• X-Ray Diffraction
	• Integrated Multimodal Detection
	• Fluorescence Detection
	• Chemiluminescence Detection
	• Thermo-Redox Detection
	• Magnetic Resonance
	• Mass Spectrometry

Image Review Location	• On-Site Remote Image Review • Local Image Review • Hybrid Image Review • Off-Site Remote Image Review

Table 1 - continued

Segmentation	Coverage
Interoperability Architecture	• Vendor-Specific Integration • Closed Proprietary Architecture • Open Standards-Based Interoperability
Investment Purpose	• System Replacement • New Installations and Capacity Expansion • Retrofits and Upgrades

Offering	• Detection Equipment
	  o Baggage Inspection Systems
	  o Explosive Trace Detectors
	  o Liquid and Bulk Material Analyzers
	• System Services
	  o Maintenance, Repair, and Technical Support
	  o Installation, Integration, and Commissioning Services
	  o Planning and Engineering Services
	  o Equipment Training Services
	• Replacement Parts and Consumables
	  o Replacement Parts and Upgrade Kits
	  o Detection Consumables
	• Screening Automation Equipment
	  o Screening Lanes and Tray-Return Systems
	  o Screening Conveyors and Sortation Equipment
	• Screening Software
	  o Image Review and Management Software
	  o Automated Threat Detection Software
	  o Screening Connectivity and Fleet Management Software
	  o Screener Training and Quality Assurance Software

Procurement Channel	• Direct Technology Suppliers • Systems Integration Primes • Independent Technical Service Providers • Distributors and Resellers
Purchasing Organization	• Airport and Terminal Operators • Public Aviation Security Agencies • Customs and Border Authorities • Airlines • Contract Screening Operators
Screening Application	• Passenger Checked Baggage Screening • Passenger Cabin Baggage Screening • Non-Passenger Property Screening • Customs and Border Baggage Inspection • Terminal-Entrance Baggage Screening
System Integration	• Baggage Handling-Integrated Systems • Checkpoint Lane-Integrated Systems • Standalone Screening Systems

Sources & Evidence

1. **Aviation security screening approved equipment list**

   · Taxonomy evidence: The inspected collection retains hold-baggage EDS and cabin-baggage EDSCB categories, with EDS guidance dated September xx.xx 2026 and EDSCB guidance dated June xx.xx 2026. These are UK category records, not global sales classifications. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection identifies hold-baggage EDS, cabin-baggage EDSCB, and conventional X-ray equipment as baggage-screening equipment classes. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection identifies LEDS for cabin baggage, with its linked guidance dated October xx.xx 2026. It does not establish the entire solid/powder analyzer extension. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: Liquid explosive detection systems are separately identified for cabin-baggage screening; this directly supports the liquid-analyzer portion of the offering. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: ETD remains identified for hold and cabin baggage; the linked ETD guidance is dated June xx.xx 2026. Shared people-screening attribution is not resolved. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: ETD equipment is explicitly identified for hold- and cabin-baggage screening, establishing an in-scope trace-detector category. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection retains an ETD third-party-consumables publication dated March xx.xx 2026, independently distinguishing dedicated consumables from finished instruments. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection separately recognizes approved ETD consumables. Attribution to baggage rather than shared people-screening use still requires allocation. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: TIP library software remains separately listed, with guidance dated September xx.xx 2026; this does not establish standalone transaction values. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The official equipment collection distinguishes baggage explosive-detection systems, liquid explosive detectors, and explosive-trace equipment from people-screening categories. This supports distinct detector offerings, not a technology-only partition. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. CATSA 2025 Annual Report - Notes to the Financial Statements

· Taxonomy evidence: The 2025 financial-statement notes separately identify screening labor, trace/consumables, equipment maintenance/spare parts, and intangible assets, supporting their economic distinction without supplying baggage-only allocations. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

· Taxonomy evidence: Reported expense and commitment categories include spare parts and trace consumables, supporting aftermarket activity rather than an equipment-only boundary. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

· Taxonomy evidence: Equipment maintenance and spare parts appear in expenses and vendor commitments. Parts are combined with maintenance; physical upgrade kits and baggage-only amounts are not separately established. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

· Taxonomy evidence: Trace and consumables appear as an expense category, but their property-screening allocation is not disclosed here. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

· Taxonomy evidence: The notes describe vendor commitments for screening-equipment maintenance and spare parts, independently corroborating technical lifecycle spending. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

· Taxonomy evidence: Separately acquired software licenses are capitalized; this accounting policy does not identify baggage-specific software functions or purchases. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

3. Open Architecture for Airport Security Systems, Second Edition

- Taxonomy evidence: The jointly prepared guidance explicitly includes automated tray return, baggage-handling systems, and conveyors supporting X-ray equipment as hardware building blocks. This establishes screening-support functions, not inclusion of whole baggage-handling projects. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: Screening-support conveyors are expressly recognized. Separately purchasable conveyor/reject-sortation values remain a transaction-level gap. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: Software building blocks include viewing stations, image distribution/multiplexing, and data storage, distinguishing image-review/management functions from sensing hardware. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: The guidance addresses sharing screening data across equipment and applications, supporting the image-data-management function but not a standalone image-review purchase. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: Control/monitoring, management tools, reporting, and predictive maintenance are identified functions. Their separate commercial allocation is not established by the framework. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: Security-equipment control, monitoring, data sharing, and user administration are identified as distinct architectural functions. This supports connectivity and management functionality, not transaction pricing. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: The framework distinguishes integration from interoperability and permits identified partial compliance. It therefore does not justify classifying a whole purchase as open from one format claim. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: The joint guidance distinguishes proprietary end-to-end integration from interoperability using documented interfaces and standards. The proposed three-part partition is an analytical application, not a published certification scheme. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: The discussion of proprietary systems and barriers supports the closed-architecture concept; it does not identify the contractual restrictions of individual purchases. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: The guidance distinguishes integration from interoperable component connections. Vendor-specific integration is an inferred intermediate commercial category requiring configuration evidence. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
- Taxonomy evidence: Open architecture is associated with available, documented interfaces and standards-based exchange; partial compliance is possible and must be identified. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

4. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
   - Taxonomy evidence: The airport's November xx.xx 2022 award notice describes an integrated CT, tray-return, and central-image solution. Naming the contracting equipment supplier alone does not resolve direct-supply versus integration-prime classification under the retained contractual-role rule; further responsibility evidence is required. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
   - Taxonomy evidence: Central image processing is an explicit component of the awarded package, corroborating purchased image-review functionality but not an independently priced license. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
   - Taxonomy evidence: The notice specifies central image-processing capability without stating the interpretation room's physical location; centralized processing cannot alone establish local, on-site remote, or off-site allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
   - Taxonomy evidence: Central image-processing capability is expressly included in the awarded screening-system package, supporting image-review functionality as a commercial procurement distinction; the notice does not specify the review room's location. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
   - Taxonomy evidence: The contract concluded October xx.xx 2022 procured an integrated cabin-baggage screening solution combining CT scanners, automated tray return, and central image-processing capability. The award establishes purchased scope, not completed installation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
   - Taxonomy evidence: The airport's award names Rapiscan Systems Limited as the contracting supplier for equipment delivery, installation, optimization, and commissioning. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
5. GETS - Civil Aviation Authority - Holdstow Baggage Screening Equipment, RFx 33811330
   - Taxonomy evidence: The official record identifies the Civil Aviation Authority as the procuring agency and now displays Tender Closed, with a May xx.xx 2026 closing date. Its intended June award is not evidence of a completed award. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
   - Taxonomy evidence: The Civil Aviation Authority of New Zealand's March xx.xx 2026 RFP requests hold-baggage explosive-detection equipment and supporting maintenance. This independently establishes a public aviation body's procurement role; its intended award date does not establish that an award occurred. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
   - Taxonomy evidence: The March xx.xx 2026 RFP explicitly seeks CT explosive-detection systems for hold baggage, independently linking the purchased platform and baggage context. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
   - Taxonomy evidence: Hold baggage is the stated application; the future installation intention does not establish delivered base-year sales. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
   - Taxonomy evidence: A supporting maintenance and support agreement is expressly required alongside the detector procurement. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
6. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407
   - Taxonomy evidence: The purchaser-issued invitation expressly allows an authorized original-equipment-manufacturer agent to bid with manufacturer authorization. This independently establishes an indirect equipment-supply form, not an award, current appointment, or standalone software-resale transaction. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))
   - Taxonomy evidence: Tender reference xx.xx is issued on behalf of SriLankan Airlines for supply and maintenance of heavy cargo and medium cargo/baggage X-ray machines, with airport and transfer-baggage locations in the requirements. It establishes an airline purchasing context, not a completed award, passenger-baggage-only allocation or 2025 spending. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

7. EMSD Provides Comprehensive Support for Terminal 2 Commissioning - VoiceLink, Issue 79, June 2026
   - Taxonomy evidence: The June 2026 government account places baggage/parcel X-ray procurement and installation for Customs and Excise within Terminal xx.xx facilities that commenced operation on May xx.xx 2026. This strengthens the dated airport-customs context but does not isolate baggage expenditure. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))
   - Taxonomy evidence: The June 2026 government report describes baggage-inspection X-ray equipment procured and installed for the Customs and Excise Department at Hong Kong International Airport Terminal xx.xx. This supports an airport customs-inspection application distinct from passenger aviation-security screening, but does not isolate baggage spending from parcels and other equipment. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))
   - Taxonomy evidence: EMSD is described as assisting Customs and Excise with procurement and installation. The client/technical-agent distinction is documented, but the final capital-budget holder is not expressly identified. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))
   - Taxonomy evidence: The report identifies Customs and Excise as the client and EMSD as providing procurement and installation assistance. It supports distinguishing a border authority's commissioning context from its technical procurement agent, but does not expressly identify the final capital-budget holder. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))
8. International Remote Baggage Screening - Pacific Northwest National Laboratory
   - Taxonomy evidence: The public laboratory describes checked-baggage images acquired abroad and reviewed by U.S. border/security officers before arrival, including completed pilots. This supports a cross-site review configuration, not an unrestricted commercial primary-screening deployment or separately attributable system revenue. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))
   - Taxonomy evidence: The public laboratory describes transmission of checked-baggage images from international departure airports for remote U.S. review and reports completed pilots. This establishes cross-site review configurations, not separately attributable commercial system revenue. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))
   - Taxonomy evidence: The account links image review to both CBP and TSA and describes cloud-based integrations. Physical review location must therefore be classified separately from agency mission and from whether a system uses centralized image processing. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

9. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

- Taxonomy evidence: The capital-plan paragraph mentioning detection-algorithm and hardware improvements explicitly concerns full-body scanners. It cannot establish baggage detection-software upgrade demand; that previous binding is narrowed. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The plan identifies ongoing upgrades to screening equipment with detection algorithms. It supports upgrade demand, not an assumption that all algorithm value is separately licensed. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The same body-scanner-specific upgrade passage does not establish a retained-baggage-system retrofit transaction. Baggage-related expansion and replacement passages do not independently prove this separate retained-asset category. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The plan expressly includes upgrading existing screening equipment with newer detection algorithms, supporting enhancement of retained systems. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The inspected plan supports baggage capacity expansion and equipment replacement, but its algorithm-enhancement example is outside the baggage boundary; it does not fully verify all three investment-purpose peers. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The capital plan separately discusses additional screening capacity, equipment replacement, and upgrades to existing equipment, supporting an investment-purpose partition. Planned expenditure is not treated as realized sales. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The capital plan distinguishes existing single-view and multiview X-ray equipment from CT replacement, providing demand-side support for a projection-imaging family. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The plan explicitly identifies single-view X-ray machines as a replacement population. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: Multiview X-ray versions are identified as planned replacements for single-view equipment in specified airport screening contexts. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: CT X-rays are separately identified in the pre-board equipment replacement program, establishing a commercial purchasing distinction from projection equipment. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Taxonomy evidence: The plan identifies replacement of existing checkpoint X-ray equipment with CT and renewal of assets reaching the end of their useful lives. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

10. Airport Security Equipment for Doncaster Sheffield Airport.
    - Taxonomy evidence: The August xx.xx 2025 preliminary procurement identifies tray-return systems separately from screening machines. It establishes intended purchasing categories, not an awarded or delivered sale. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
    - Taxonomy evidence: The proposed procurement includes software licenses alongside equipment and services, supporting software as an identifiable purchasing component without establishing every functional software subclass. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
    - Taxonomy evidence: Installation, ongoing maintenance, and training are explicitly included in the proposed contract scope, distinct from equipment supply. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
    - Taxonomy evidence: Installation is an explicit prospective service deliverable; the notice does not prove completed installation. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
    - Taxonomy evidence: Ongoing equipment maintenance is included as a prospective contract service. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
    - Taxonomy evidence: Training is included with the proposed equipment contracts, supporting an equipment-associated training service rather than screening-officer staffing. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
11. Smart Security Guidance Document - Cabin Baggage Screening (2019)
    - Taxonomy evidence: The guidance distinguishes single-view, dual/multiview, and computed-tomography equipment, while treating detection algorithms as equipment intelligence rather than separate imaging modalities. Its 2019 maturity observations are historical. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))
    - Taxonomy evidence: Single- and multiview equipment produce projection views, whereas CT is described separately as tomographic imaging. This supports the projection-versus-CT classification rule. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))
    - Taxonomy evidence: The equipment-intelligence section treats algorithmic image analysis and automated target recognition as functions that support or automate screening decisions. This supports the software function, not standalone pricing. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))
12. ASTM E2520-26 - Standard Practice for Measuring and Scoring Performance of Trace Explosive Chemical Detectors
    - Taxonomy evidence: The publicly available scope of ASTM E2520-xx.xx identifies ion mobility spectrometry as a trace-detector technology. This establishes platform terminology, not airport approval, deployment, or sales. ([store.astm.org](https://store.astm.org/e2520-xx.xx.html))
    - Taxonomy evidence: The same standards scope explicitly identifies mass spectrometry as a trace-detector technology distinct from IMS. Airport-specific commercial attribution remains a separate evidence requirement. ([store.astm.org](https://store.astm.org/e2520-xx.xx.html))

13. X-Ray Diffraction: Introducing a new era in threat detection

    · Taxonomy evidence: CEA-Leti's July xx.xx 2024 account identifies an X-ray-diffraction module in the marketed SDX xx.xx XDi airport baggage scanner. It establishes a commercial platform introduction, not delivered airport sales or regulatory authorization.
    ([leti-cea.com](https://www.leti-cea.com/cea-tech/leti/english/Pages/What%27s-On/News/smiths-detection.aspx))

14. CEP implements testing of APIDS and EVD, extending the programme to nine categories of security equipment

    · Taxonomy evidence: ECAC's February 2023 notice recognizes Automated Prohibited Item Detection Systems as a distinct security-equipment evaluation category. Category recognition does not establish authorization or sales for any particular implementation.
    ([ecac-ceac.org](https://www.ecac-ceac.org/news/cep-implements-testing-of-apids-and-evd-extending-the-programme-to-nine-categories-of-security-equipment))

15. Threat image projection (TIP) library software

    · Taxonomy evidence: The official TIP publication identifies an approved library of fictional threat images for aviation screening equipment and requires machine/library compatibility checks. This supports a dedicated image-training and quality-assurance software category.
    ([gov.uk](https://www.gov.uk/government/publications/threat-image-projection-library-software))

16. CATSA Functions, Programs and Activities

    · Taxonomy evidence: CATSA defines hold-baggage activities as including equipment purchase and integration into airport baggage-handling systems. This supports the integration-service category.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

    · Taxonomy evidence: Equipment maintenance is explicitly included in CATSA's hold-baggage activity boundary.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

    · Taxonomy evidence: The hold-baggage activity definition includes management of screening-officer training on detection equipment, supporting equipment-specific training as distinct from equipment supply.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

    · Taxonomy evidence: Integration into baggage-handling systems establishes the screening/transport interface, but does not separately identify conveyor equipment prices or justify including an entire baggage-handling system. Support for this physical offering remains partial.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

    · Taxonomy evidence: CATSA expressly includes equipment purchase, baggage-system integration, operation, maintenance and equipment training in its hold-baggage activities, establishing a public screening body's direct equipment-purchasing role.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

    · Taxonomy evidence: The record assigns equipment-purchase activity to CATSA while separately discussing screening-officer and contractor functions; the equipment purchaser and screening workforce are therefore not interchangeable roles.
    ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

17. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

    · Taxonomy evidence: The Dublin and Cork hold-baggage project account identifies separate professional-service contracts for project controls, design oversight, interface management, and multidisciplinary design and delivery consulting. This supports screening-specific planning and engineering services.
    ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))

18. Liquid Explosive Detector, Bottle Liquid Scanner, Insight

- Taxonomy evidence: Agilent's own airport-security offering identifies Insight alarm-resolution systems for liquids and expandable material-analysis applications. This corroborates a baggage-content analyzer offering without establishing the market's complete partition. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))
- Taxonomy evidence: The offering explicitly identifies spatially offset Raman spectroscopy for airport threat detection, establishing Raman as a commercially offered sensing platform in the captured boundary. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

19. Overview Management Server

- Taxonomy evidence: Agilent presents Overview Management Server as centralized management for connected Insight200M systems. This corroborates a dedicated screening-equipment management software product, but not separately itemized airport spending. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-software-tools-libraries/overview-management-server))

20. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

- Taxonomy evidence: Battelle describes its LS10 airport liquid scanner as combining radio-frequency and ultrasonic technology with data fusion in one product. This supports an integrated multimodal category, not separate counting of its constituent sensing capabilities. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

21. EMA Liquid Explosive Detection System

- Taxonomy evidence: CEIA's own EMA offering describes a dedicated liquid-container screening instrument for airport checkpoints. This corroborates the analyzer product category; its general electromagnetic description does not verify the exact dielectric/microwave platform classification. ([security.ceia-usa.com](https://security.ceia-usa.com/products/ema/))

22. Overview - CATSA

- Taxonomy evidence: CATSA's corporate-plan overview separately identifies pre-board, hold-baggage and non-passenger screening, providing an official program basis for distinguishing their property-screening missions. It does not establish the full global market boundary. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))
- Taxonomy evidence: Pre-board screening covers passengers' carry-on baggage and belongings before secure-terminal-area entry. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))
- Taxonomy evidence: Hold-baggage screening is defined around passengers' checked baggage before aircraft loading. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))
- Taxonomy evidence: Non-passenger screening includes crew, ground personnel and service providers and their belongings entering restricted areas. Only the belongings portion is retained here; vehicles and people-only screening are excluded. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))

23. Cochin International Airport - CIAL/COMMN/CT-XBIS/01

- Taxonomy evidence: Cochin International Airport Ltd.'s January xx.xx 2026 tender invites suppliers to provide and integrate a hold-baggage screening system for Terminal xx.xx directly identifying an airport operating company as the commissioning purchaser. The notice is not an award or proof of delivery. ([cial.aero](https://cial.aero/Tender-Details?TdId=xx.xx))
- Taxonomy evidence: The purchaser's stated requirement is specifically an inline hold-baggage screening system for an international passenger terminal, supporting checked-baggage screening as a distinct purchased application. ([cial.aero](https://cial.aero/Tender-Details?TdId=xx.xx))

24. New security screening equipment transforms travel through BNE - Brisbane Airport

· Taxonomy evidence: Brisbane Airport's February xx.xx 2026 account describes installed cabin-baggage screening equipment in its domestic and international terminal security program, corroborating a passenger-cabin application from the airport operator's own operations. ([bne.com.au](https://www.bne.com.au/blog/behind-scenes/new-security-screening-equipment-transforms-travel-through-bne))

· Taxonomy evidence: The airport separately describes an inline checked-baggage screening system within the same upgrade program. Its mixed security-program cost is not treated as baggage-screening market revenue. ([bne.com.au](https://www.bne.com.au/blog/behind-scenes/new-security-screening-equipment-transforms-travel-through-bne))

25. About the security control itself - Fraport TAV Antalya Airport

· Taxonomy evidence: Fraport TAV Antalya Airport's guidance distinguishes terminal-entry security from a later gate-area security check and describes X-ray screening of carried items. A separate terminal-admission baggage mission is an analytical classification of this documented activity, not a claim that all airports use it or that its baggage expenditure is separately disclosed. ([antalya-airport.aero](https://www.antalya-airport.aero/passengers-visitors/passenger-guide/departing-from-ayt/luggage-security-information/about-the-security-control-itself))

26. Cross Segment Services - I-SEC

· Taxonomy evidence: I-SEC describes its aviation-security business covering hand and hold luggage and its security-training academy. This establishes a screening-service operator business setting only; it does not establish that the operator independently purchases or owns in-scope baggage-screening hardware or software. ([i-sec.com](https://www.i-sec.com/segments/cross-segment-services))

27. Advanced Cabin Baggage Screening - Computed Tomography (CT) Implementation Guide

· Taxonomy evidence: The guide distinguishes standalone cabin-baggage CT configurations from integration with automated tray-return systems and automated screening lanes, establishing a physical-configuration distinction independent of CT technology. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))

· Taxonomy evidence: Section xx.xx explicitly discusses a standalone CT configuration, including equipment-local entry and exit conveyors; standalone therefore does not mean conveyor-free. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))

· Taxonomy evidence: Section xx.xx separately addresses CT integration with automated tray-return systems and automated screening lanes. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))

28. Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

· Taxonomy evidence: The April xx.xx 2012 government review distinguishes stand-alone equipment from in-line checked-baggage systems. These are historical configuration definitions, not current deployment proportions. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))

· Taxonomy evidence: The review describes stand-alone screening machines in airport lobbies or ticketing areas as distinct from integrated in-line installations. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))

· Taxonomy evidence: The review defines in-line systems through integration of screening equipment into baggage-handling systems, directly supporting a baggage-handling-integrated configuration. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))

29. European Commission - Case M.8087, Smiths Group / Morpho Detection, Decision of January 18, 2017

- Taxonomy evidence: The January xx.xx 2017 decision's primary market investigation distinguishes manufacturer supply, local distribution or authorized intermediaries, third-party servicing, and non-OEM systems integration. These findings establish channel forms, not current appointments or shares. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))
- Taxonomy evidence: Paragraph xx.xx describes direct manufacturer supply alongside indirect distributor supply for detection equipment and servicing. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))
- Taxonomy evidence: Paragraph xx.xx reports primary investigation findings concerning local equipment distribution and authorized partners; paragraph xx.xx separately identifies indirect distributor supply. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))
- Taxonomy evidence: Paragraph xx.xx identifies non-OEM systems integrators that connect multiple threat-detection equipment types for end users. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))
- Taxonomy evidence: The decision recognizes third-party after-sales provision, while noting dependence on original technology and authorized relationships. This does not imply unrestricted independent servicing. ([ec.europa.eu](https://ec.europa.eu/competition/mergers/cases/decisions/m8087_2149_3.pdf))

30. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at New JFK Terminal 6

- Taxonomy evidence: The March xx.xx 2025 airport-project announcement identifies a screening specialist selected to procure, install, and deploy the new terminal checkpoint while coordinating multiple technology providers. It establishes an integration appointment rather than completed delivery. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
- Taxonomy evidence: The announced checkpoint is for the new Terminal xx.xx and includes baggage CT and automated bin-return systems, providing demand-side evidence of new-installation investment. People-screening and identity-system portions remain excluded. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

31. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks

- Taxonomy evidence: The public screening authority states that maintenance of most screening equipment transitioned to KPrime Technologies in 2023/xx.xx establishing a separately contracted technical-maintenance provider role. Mixed-equipment spending still requires baggage-specific attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

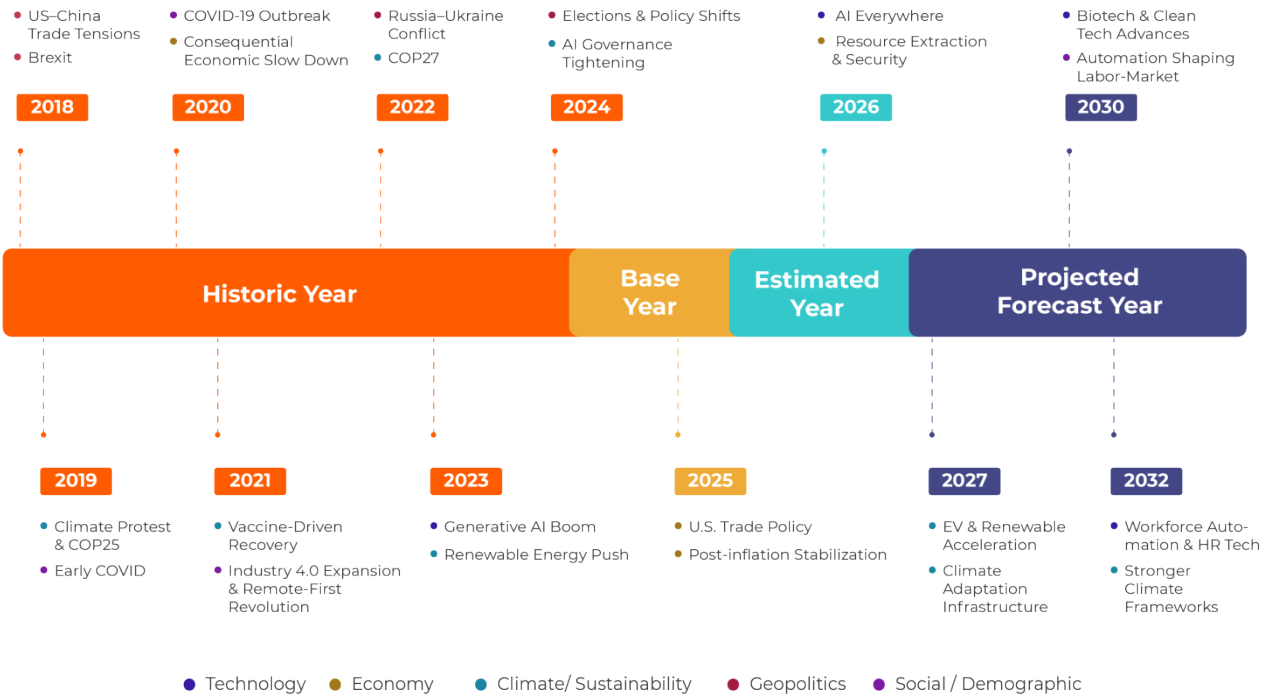
32. Centralised Image Processing: The Impact on Security Checkpoints - Milena Kuhn, Aviation Security International, October/November 2017

- Taxonomy evidence: The research article distinguishes screening stations within the checkpoint from separate screening rooms and describes combined configurations. The taxonomy adapts these physical-location distinctions rather than treating centralized processing as necessarily remote. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Taxonomy evidence: The article identifies local matrix screening within the checkpoint, demonstrating that network-distributed images can still be reviewed locally. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Taxonomy evidence: The article describes separate image-review rooms near or farther from the checkpoint, supporting remote-room review within an airport. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Taxonomy evidence: The article describes combining a remote screening room during busy periods with checkpoint matrix-screening stations during quieter periods. This supports a mixed-location configuration, but not a particular commercial package or price allocation. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

1.4. Years Considered for the Study

The historical year is 2024, the base year is 2025, and the estimated year is 2026. The forecast endpoint is 2032.

Figure 1. Global Airport Baggage Screening Systems Market, Years Considered for the Study



1.5. Currency Considered for the Study

USD is the study's reporting currency. Monetary amounts use the absolute USD reporting scale.

1.6. Language Considered for the Study

The study is published in American English.

1.7. Key Stakeholders

- Airport and Terminal Operators: Decisions concerning terminal fit, system integration, investment purpose, delivery responsibility, and continuity during installation or replacement.
- Public Aviation Security Agencies: Decisions concerning purchasing eligibility, applicable approvals, acquisition requirements, and the division of responsibility between the agency and airport stakeholders.
- Customs and Border Authorities: Decisions concerning baggage-inspection requirements, application-specific eligibility, procurement, and interfaces with airport security systems.

- Airlines: Purchasing and coordination decisions concerning baggage-screening interfaces, contractual responsibilities, and the consequences of system changes for airline-related airport activities.
- Contract Screening Operators: Decisions concerning technology responsibilities, equipment training, software access, service dependencies, and obligations allocated through their operating contracts.
- Equipment, automation, software, parts, and consumables suppliers: Decisions concerning documented capability, commercial rights, buyer qualification, route to market, and support commitments for the included offerings.
- Distributors and Resellers, Systems Integration Primes, and Independent Technical Service Providers: Decisions concerning channel rights, scope of supply, integration accountability, warranty interfaces, and authority to provide continuing support.
- Regulatory and authorization bodies: Decisions and records establishing applicable permissions and requirements, distinguished from buyer acceptance or evidence of commercial deployment.
- Investors and strategic acquirers: Evaluation of business rights, buyer access, delivery obligations, and support dependencies rather than treating category participation as proof of commercial attractiveness.

2. Research Methodology

2.1. Introduction

Airport Baggage Screening Systems are examined as a commercial system spanning detection equipment, screening automation, software, system services, and replacement support. The approach connects each offering to its purchaser, application, delivery relationship, and operating context rather than treating a detection technology name as a complete business proposition.

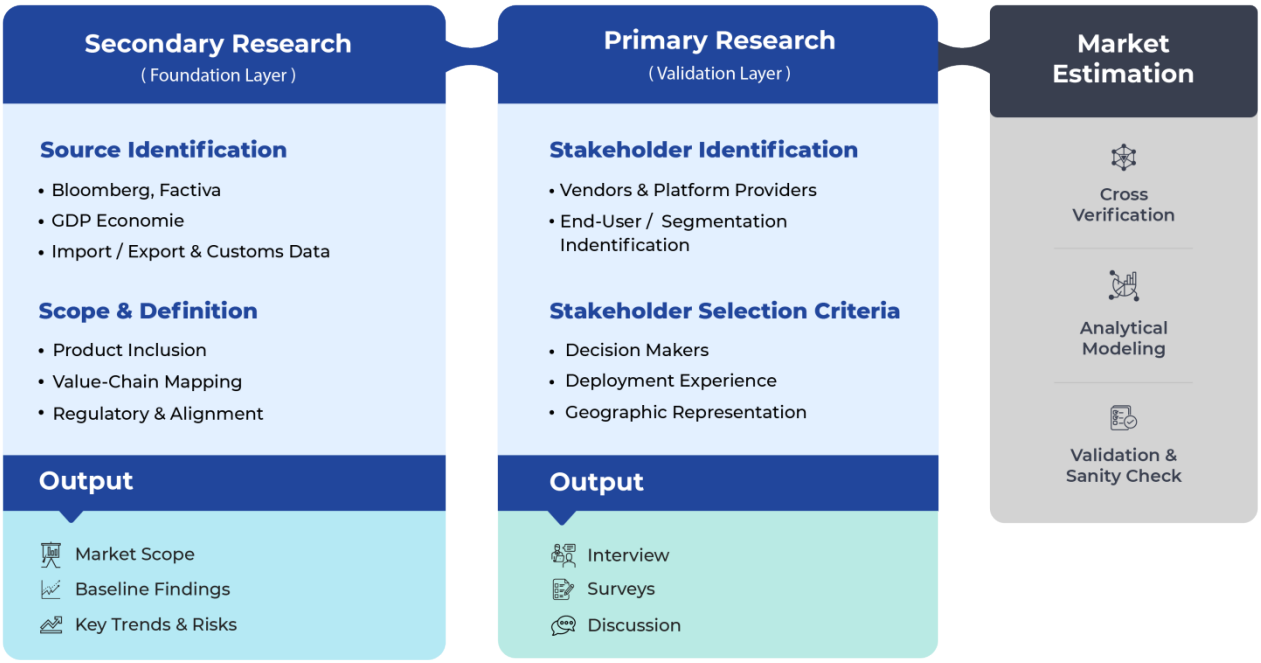
The study distinguishes documented business facts from economic interpretation and conditional implications. Analyst-led qualitative research challenges analytical assumptions within the defined market; quantitative conclusions require their own support. This separation allows commercial access, switching, and delivery questions to be examined without presuming demand outcomes.

2.2. Research Design

The research design organizes commercial questions around an identifiable offering, responsible business participant, purchasing organization, screening application, jurisdiction, and period. This keeps an equipment claim separate from a software right, a distribution relationship separate from an integration commitment, and a buyer requirement separate from evidence of completed procurement.

The accepted hierarchy provides coverage across standalone and integrated systems, all listed image-review locations, and each investment purpose. Evidence from a particular airport or jurisdiction can clarify a purchasing condition within that setting, but it does not automatically establish the same condition throughout the Global market.

Figure 2. Global Airport Baggage Screening Systems Market, Research Design



2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary evidence is matched to the business proposition it can establish. Official portfolios can support advertised offerings; company filings and ownership or licensing records can support stated business relationships; regulatory records can establish authorization within their named jurisdiction and scope. Public buyer policies and award records can clarify purchasing conditions or a specific award, while official service commitments can clarify the supplier's stated delivery and support responsibilities.

These records are not interchangeable. An authorization does not establish adoption, an award does not establish completed deployment, and a partnership announcement does not establish every party's contractual rights. Source authority, effective period, underlying origin,

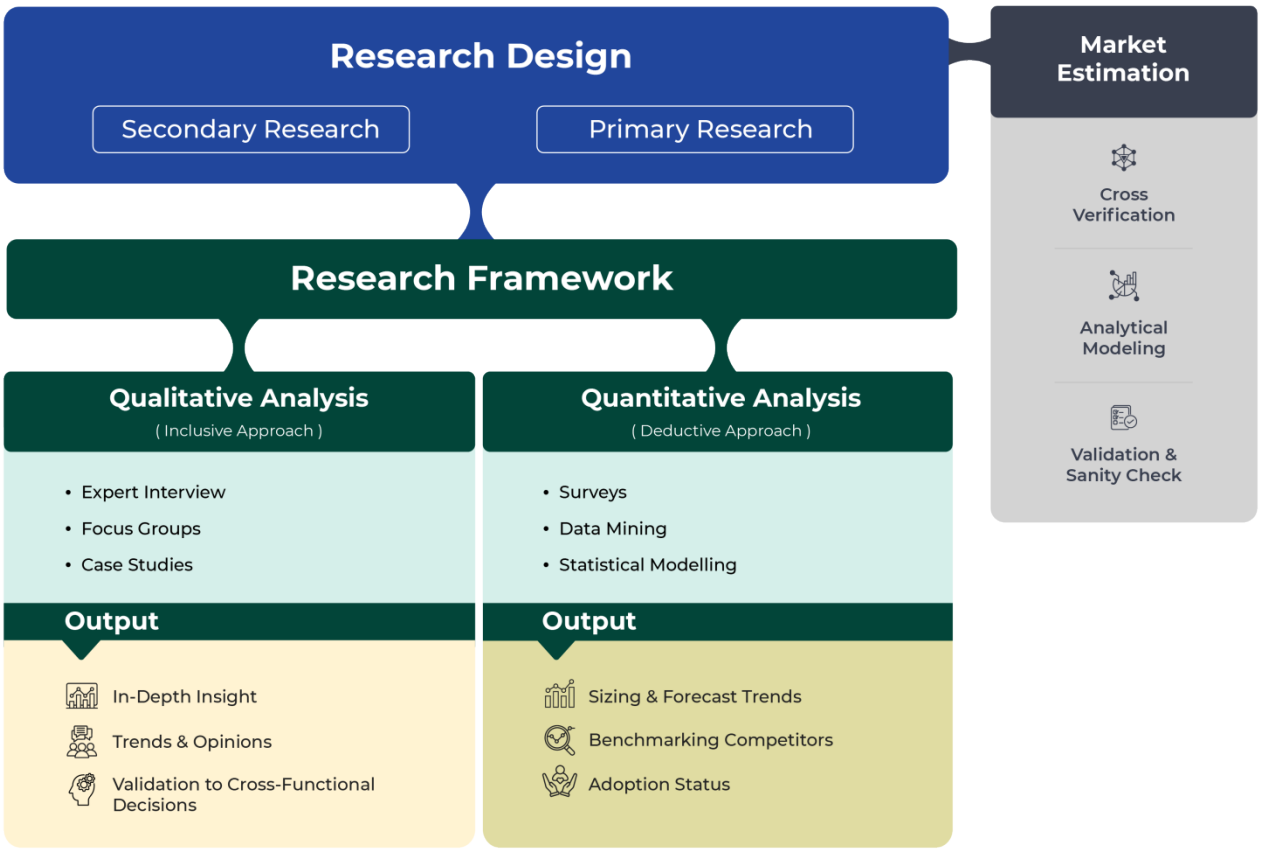
and commercial scope govern interpretation; repeated accounts of the same underlying statement do not create independent support.

2.3. Research Framework

The framework connects market definition, accepted taxonomy, relevant commercial participants, comparison boundaries, competitive interpretation, and buyer decisions. A participant's relevance depends on its documented role in an included offering or screening application, not merely on a broader presence in aviation or security.

Competitive comparison distinguishes advertised capability, legal eligibility, buyer selection, deployment, and ongoing support as separate propositions. Shared detection-platform terminology does not establish substitutability. The commercial question is whether the documented offering, rights, integration responsibility, and service commitment meet the requirements of the particular purchaser and operating setting.

Figure 3. Global Airport Baggage Screening Systems Market, Research Framework



2.3.1. Qualitative Analysis

Qualitative analysis examines whether buyer qualification, procurement responsibility, licensing, integration obligations, and lifecycle support constrain commercial choice. It separates the reasons a buyer might prefer an offering from the conditions that permit that buyer to purchase and deploy it.

Comparisons of proprietary, vendor-specific, and open standards-based architectures focus on documented commercial implications: interface rights, support responsibility, software access, and the feasibility of changing suppliers. An architecture label alone does not settle those questions. Similarly, local and remote image-review categories frame different accountability questions without establishing that either arrangement is authorized or preferable for a particular buyer.

2.3.2. Quantitative Analysis

Quantitative interpretation follows the same Global boundary, accepted offerings, screening applications, and period roles as the qualitative study. Offering, Detection Platform, Purchasing Organization, and the other root axes describe different aspects of the same commercial activity; their inclusion does not make them additive economic opportunities.

A monetary observation can inform comparison only when its offering scope, business role, geography, and period are understood. Bundled systems, separately supplied software, integration services, and replacement support require compatible comparison boundaries. A category's inclusion in the study does not itself provide a monetary observation or establish how a broader disclosure relates to that category.

2.4. Market Size Estimation

Market-size analysis is intended to address economic activity associated with the defined Airport Baggage Screening Systems offerings and applications. A supplier's entire portfolio or a complete airport infrastructure project is not automatically equivalent to that activity. Included software, services, parts, and consumables remain within the study whether separately supplied or bundled, while their commercial presentation must be understood before aggregation.

Qualitative hypotheses concerning new installations, replacement, or retrofits identify questions for quantitative investigation; they do not establish an estimate by themselves. Any estimate or forecast requires evidence appropriate to its economic perimeter, period, and geographic scope, with uncertainty retained where commercial boundaries cannot be reconciled.

2.4.1. Top-Down Approach

A top-down perspective has a boundary-checking role: it asks whether broader airport, aviation-security, or supplier disclosures contain an identifiable component corresponding to Airport Baggage Screening Systems. Relevance depends on separating the included activity from wider infrastructure, general baggage handling, and unrelated security offerings.

A broader disclosure cannot be allocated across the accepted categories merely because those categories are included in the taxonomy. Where commercial boundaries differ, interpretation should retain the narrower supported scope rather than presume proportional relationships between airport activity and baggage-screening business.

2.4.2. Bottom-Up Approach

A bottom-up perspective has an offering-and-participant role: it asks whether evidence concerning specific suppliers, contracts, or service relationships can be understood within the defined baggage-screening scope. A documented commercial role is necessary to distinguish an original technology supplier from a reseller, integration prime, software licensor, or technical-service provider.

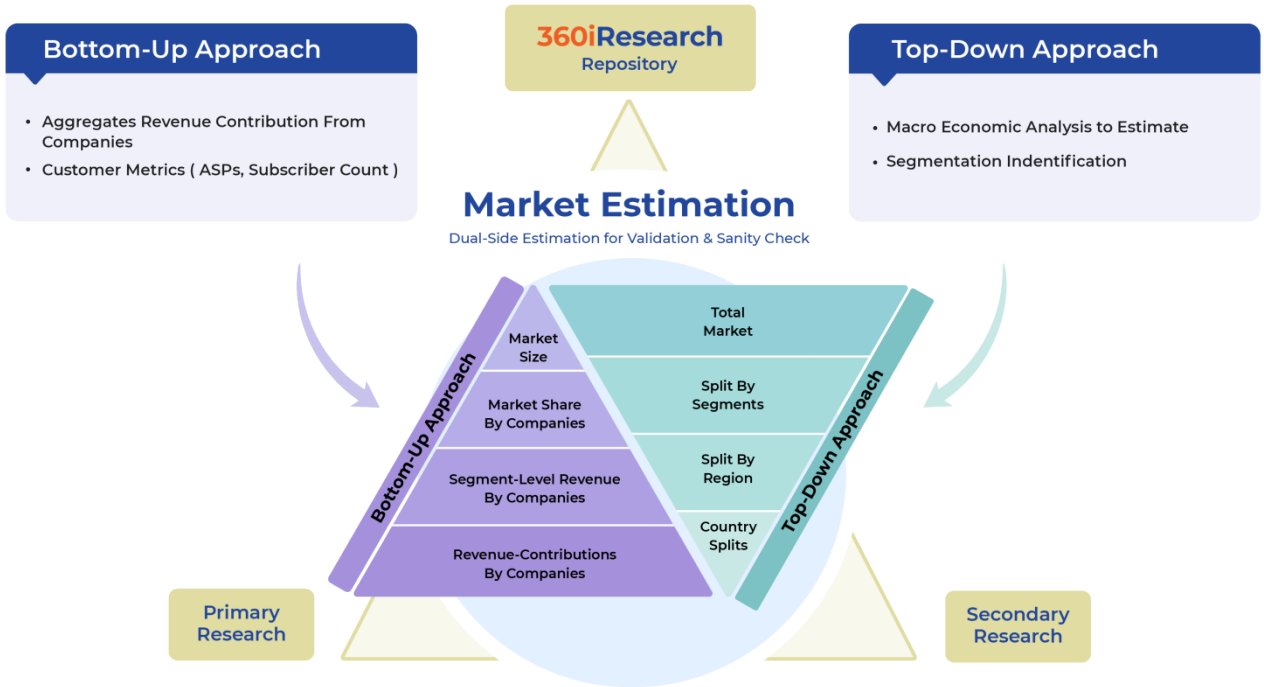
Different participants can describe their involvement in the same procurement. Those descriptions require examination for overlap rather than automatic treatment as separate economic activity. An advertised capability is not a completed transaction, and documented participants should not be presumed to represent the entire commercial universe.

2.5. Data Triangulation

Triangulation serves to reconcile claims, not to presume agreement among different kinds of records. A portfolio description, authorization, procurement award, and service commitment answer different questions. Their comparison must preserve differences in offering configuration, application, jurisdiction, period, and project state.

When accounts conflict, the conclusion should reflect the authority and scope relevant to the exact proposition. Unresolved differences should narrow the claim or make its implications conditional. Qualitative agreement can strengthen an explanation of commercial mechanisms, but it does not independently establish a numerical estimate.

Figure 4. Global Airport Baggage Screening Systems Market, Data Triangulation



2.6. Research Outcomes

The intended outcome is a defensible basis for buyer shortlisting, supplier qualification, channel evaluation, and comparison of delivery and support commitments for Airport Baggage Screening Systems. Decision support should distinguish documented offerings and business rights from claims that still depend on procurement, contractual, or jurisdiction-specific confirmation.

The study also frames the conditions under which new installations, replacement, or upgrades could be commercially relevant without presuming a preferred investment purpose. Conclusions should identify the responsible buyer, applicable screening setting, required capabilities, meaningful alternatives, and remaining verification needed before commitment.

2.7. Research Assumptions

- Independent analytical axes: The accepted root axes describe different characteristics of the same commercial activity. An offering can be classified by platform, application, purchaser, integration, review location, channel, and investment purpose without creating separate additive opportunities.
- Role-specific participation: A business is assessed for its documented supplier, licensor, distributor, integration, or service role. Participation in one role does not establish ownership of the underlying technology, unrestricted resale rights, or responsibility for the complete screening system.
- Comparable commercial perimeter: Bundled and separately supplied equipment, software, services, parts, and consumables require an explicit common comparison boundary. A difference in contractual presentation should not be mistaken for a difference in the underlying scope of supply.
- Bounded rights and permissions: Authorizations, licenses, channel appointments, and service commitments apply only within their documented scope. Transfer to another jurisdiction, purchaser, application, or system configuration requires separate support before a commercial commitment.
- Distinct project states: Planned investment, procurement eligibility, contract award, deployment, and ongoing support are separate commercial states. An earlier state is not treated as proof of a later one when interpreting new installations, replacement, or upgrades.

2.8. Research Limitations

- Broad disclosure boundaries: Supplier-wide statements and airport project descriptions can encompass activities beyond the included screening offerings. Such material cannot establish the position of a specific in-scope business without evidence that separates the relevant activity.
- Capability is not realized adoption: Portfolio inclusion, authorization, or an announced partnership does not by itself establish buyer selection, deployment, or an ongoing

support relationship. Commercial interpretation must remain limited to the state directly supported.

- Contract-dependent switching: Public architecture or partnership descriptions may not settle interface rights, software access, warranty responsibility, or maintenance restrictions. Where those terms are not established, the feasibility of replacing a supplier or using an independent service provider remains conditional on contractual confirmation.
- Application-specific comparability: Evidence for one screening application or system configuration does not establish equivalent eligibility or suitability for another. Detection-platform classification supports organization of the study, not a presumption that offerings are interchangeable.
- Geographic transferability: A jurisdiction-specific procurement condition or institutional perspective cannot establish a Global requirement. Local commercial records remain necessary when a decision depends on national authorization, buyer eligibility, channel rights, or support obligations.

3. Executive Summary

3.1. Introduction

Airport Baggage Screening Systems is a Global market in which commercial value depends on an eligible, supportable installation rather than a scanner alone. Detection Equipment, Screening Automation Equipment, Screening Software, System Services, and Replacement Parts and Consumables participate through separate and bundled purchases. ECAC evaluation is configuration-specific and does not replace national approval; the UK's conventional X-ray exception demonstrates why eligibility requirements cannot be generalized across categories.

Renewal is differentiated rather than a synchronized platform transition. CATSA's 2025-2026 to 2029-2030 plan distinguishes major-checkpoint CT replacement, other X-ray renewal, and existing hold-baggage expansion. Seattle's consolidation program, meanwhile, anticipates reduced screening-machine requirements. Buyers should define the required screening function and supplier obligations before comparing packages. Suppliers should pursue the documented equipment, integration, or support requirement rather than infer detector demand from a wider airport project.

Sources & Evidence

1. Aviation security screening approved equipment list
   · UK guidance differentiates approved equipment categories and states that conventional X-ray equipment does not require specific Department for Transport approval. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
2. Baggage Handling System Optimization
   · Seattle's consolidation program identifies reduced screening-machine requirements as an intended benefit, supporting the distinction between integration needs and detector demand. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
3. ECAC Common Evaluation Process (CEP) of security equipment
   · ECAC evaluation applies only to the identified equipment configurations and does not itself constitute national approval or certification. ([ecac-ceac.org](https://www.ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))
4. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
   · CATSA's 2025-2026 to 2029-2030 plan separately describes major-checkpoint CT replacement, other X-ray renewal, existing hold-baggage screening expansion, and lifecycle replacement. These remain planned activities. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

3.2. CXO Perspective

Airport owners and finance leaders should compare supported retention with replacement against the same accepted screening function. Smiths Detection markets iCMORE upgrades for existing equipment but qualifies additional hardware needs by machine type and age. CATSA's 2024-2025 to 2028-2029 planning identifies funding, workforce, schedules, and airport space as additional influences on service outcomes. Secure complementary commitments before relying on staffing or financial benefits; replacement becomes preferable when retained

equipment cannot meet the accepted requirement or continuing support cannot be established.

Analogic Corporation announced completion of its combination with Leidos' Security Enterprise Solutions, Ports & Borders, and Industrial Automation businesses on October xx.xx 2026. Buyers should distinguish the affected portfolios from independently controlled alternatives. A broader package may simplify sourcing, but consolidation should await confirmation of the legal supplier and continuing licenses, warranties, and support; common ownership does not establish harmonized agreements.

Sources & Evidence

1. Strategic Objectives, Activities, and Priority Initiatives
   · CATSA's 2024-2025 to 2028-2029 plan identifies funding, workforce, airline schedules, infrastructure, and airport space as influences on screening-service outcomes. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))
2. Analogic and Leidos Complete Combination of Security Enterprise Solutions Businesses
   · Analogic announced completed combination with Leidos' Security Enterprise Solutions, Ports & Borders, and Industrial Automation businesses on October xx.xx 2026; individual contract succession is not established. ([analogic.com](https://www.analogic.com/press-release-analogic-and-leidos-complete-combination-of-security-enterprise-solutions-businesses/))
3. iCMORE
   · Smiths Detection markets iCMORE for existing systems and qualifies additional hardware requirements by machine type and age, supporting a conditional retention alternative. ([smithsdetection.com](https://www.smithsdetection.com/icmore/))

3.3. New Revenue Opportunities

Conditional revenue routes assessed in Opportunity Mapping include software enhancement for owners of compatible CT equipment; screening-interface delivery for terminal developers; asset-specific maintenance for public agencies and airports; approved threat-image-projection library continuity for relevant UK cabin-baggage systems; and off-site review arrangements for participating airlines and airports. These address distinct purchasing needs rather than additive opportunities. Access depends respectively on accepted software-scanner combinations, allocated delivery obligations, enforceable maintenance rights, continuing UK approval, and route-specific institutional participation.

Sources & Evidence

1. Threat Image Projection (TIP)
   · Relevant UK cabin-baggage TIP libraries require approval and reapproval; applicable third-party components require approval within the overall system. These requirements support a bounded continuity proposition. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
2. International Remote Baggage Screening
   · PNNL describes international checked-baggage review involving designated airports, airlines, CBP, and TSA. Named arrangements establish a commercial basis, not permission for every proposed route. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

3. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6
   · JFK Millennium Partners' March xx.xx 2025 appointment gives K2 procurement, installation, and deployment responsibilities involving authorities and technology providers, supporting a screening-integration route. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
4. Key Corporate Risks - CATSA
   · CATSA records its 2023/xx.xx maintenance transition to KPrime Technologies, establishing separate maintenance purchasing without settling prospective installation coverage or access. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
5. APIDS for CT Screening | ECAC-Approved AI - SeeTrue
   · SeeTrue advertises separately supplied APIDS for CT platforms and states that platform-specific qualification does not transfer to other scanner models. This supports an enhancement route, not universal access. ([seetrue.ai](https://www.seetrue.ai/apids-for-ct/))

3.4. Next-Generation Business Models

Separately supplied screening software creates a licensing route alongside manufacturer-led equipment enhancements. SeeTrue's APIDS offering and Smiths Detection's iCMORE upgrade proposition support comparing separate application purchasing with a manufacturer package. This route is usable only when the exact scanner combination, local acceptance, license, updates, and warranty responsibility are secured. Retaining equipment preserves assets but also preserves platform dependence and can add supplier coordination.

Delivery and maintenance can likewise be contracted independently of equipment origination. JFK Terminal xx.xx's appointment of K2 Security Screening Group documents a procurement-and-deployment prime; CATSA's disclosed 2023/xx.xx transition to K'(Prime) Technologies Inc. documents separate maintenance contracting. Smiths Detection offers direct field service and inclusive labor-and-parts contracts as an alternative. Buyers should consolidate only the responsibilities the counterparty accepts, including interfaces, acceptance, site coverage, and escalation. Separate contracts preserve direct supplier control where the buyer can manage coordination; aggregation transfers that burden only to the extent supported by the agreement.

Sources & Evidence

1. Service
   · Smiths Detection advertises direct on-site field service and inclusive capital-equipment contracts covering labor and parts, providing an alternative to separate maintenance contracting without establishing prospective site coverage. ([smithsdetection.com](https://www.smithsdetection.com/service/))
2. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6
   · The K2 appointment documents a delivery-prime structure, not completed deployment or another contract's responsibility allocation. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
3. Key Corporate Risks - CATSA
   · The historical transition separates maintenance contracting from equipment origination; CATSA also identifies outsourced-service and supplier dependence as risks. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))

4. iCMORE
   · The iCMORE offering establishes a manufacturer-led software enhancement route, not another installation's license or acceptance. ([smithsdetection.com](https://www.smithsdetection.com/icmore/))
5. APIDS for CT Screening | ECAC-Approved AI - SeeTrue
   · SeeTrue's software offering supports separate application purchasing; its public description does not establish a customer's executed license, national permission, or warranty allocation. ([seetrue.ai](https://www.seetrue.ai/apids-for-ct/))

3.5. Industry Roadmap

For 2026-2027, advance installation-matched commitments through the applicable purchasing and approval gates. CATSA's policy separately requires funding confirmation before financial commitments and Transport Canada approval before equipment enters mandated service. Suppliers should stage commitments around those decisions rather than equate modernization interest with an order.

For 2028-2029, manage phased handover and continued support. Oslo's checkpoint reconstruction targets summer 2028 completion, while Seattle targets final-phase completion in 2029. These are project-specific targets, not common market deadlines. Align resources with confirmed work packages and retain covered legacy support until the relevant installation phase is accepted; a schedule change should trigger an interim-support decision.

For 2030-2032, preserve component choice through purchasing rights rather than architecture labels. The joint airport-security open-architecture framework allows partial compliance and recognizes integrator accountability, while CATSA's standard terms demonstrate broad software rights without transferring ownership. Modular purchasing remains conditional on explicit substitution rights, supported changes, and allocated responsibility. Tenders and awards containing those obligations-not platform announcements-are the relevant milestones; an integrated arrangement remains defensible where usable alternatives cannot be secured.

Sources & Evidence

1. Baggage Handling System Optimization
   · Seattle's published schedule targets final-phase completion in 2029; it is a project schedule, not evidence of completed handover. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. Procurement and Contracting Policy - CATSA
   · CATSA requires delegated funding confirmation before financial commitments and Transport Canada approval before equipment enters mandated service. Multiyear approval can precede confirmation of all later-year funding. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
3. CATSA's Purchase Order Terms and Conditions
   · CATSA's standard terms grant broad rights to use and modify pre-existing software without transferring ownership; those terms do not establish another purchaser's permissions. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

4. Open Architecture for Airport Security Systems, Second Edition
   · The joint open-architecture framework permits identified partial compliance and discusses allocating delivery and subsystem obligations to an accountable integrator. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
5. Oslo Airport builds new Security Checkpoint | The Avinor Group
   · Avinor's December xx.xx 2025 announcement targets Oslo checkpoint completion for summer 2028 and explicitly anticipates coexistence of old and new technology during phased reconstruction. ([kommunikasjon.ntb.no](https://kommunikasjon.ntb.no/pressemelding/xx.xx/oslo-airport-builds-new-security-checkpoint?lang=en&publisherId=xx.xx))

4. Market Overview

4.1. Introduction

[redacted] The Global scope includes Detection Equipment, Screening Automation Equipment, Screening Software, System Services, and Replacement Parts and Consumables, whether supplied separately or within a broader contract. The accepted detection platforms and operating arrangements are distinct commercial categories, not assertions that every offering has equivalent eligibility or deployment maturity.

Regulatory evaluation and permission to deploy are separate commercial gates. The European Civil Aviation Conference publishes configuration-specific evaluation results, while national aviation-security authorities retain approval responsibility. [redacted]

Figure 5. Global Airport Baggage Screening Systems Market Size, 2017-2040 (USD Million, Growth %)

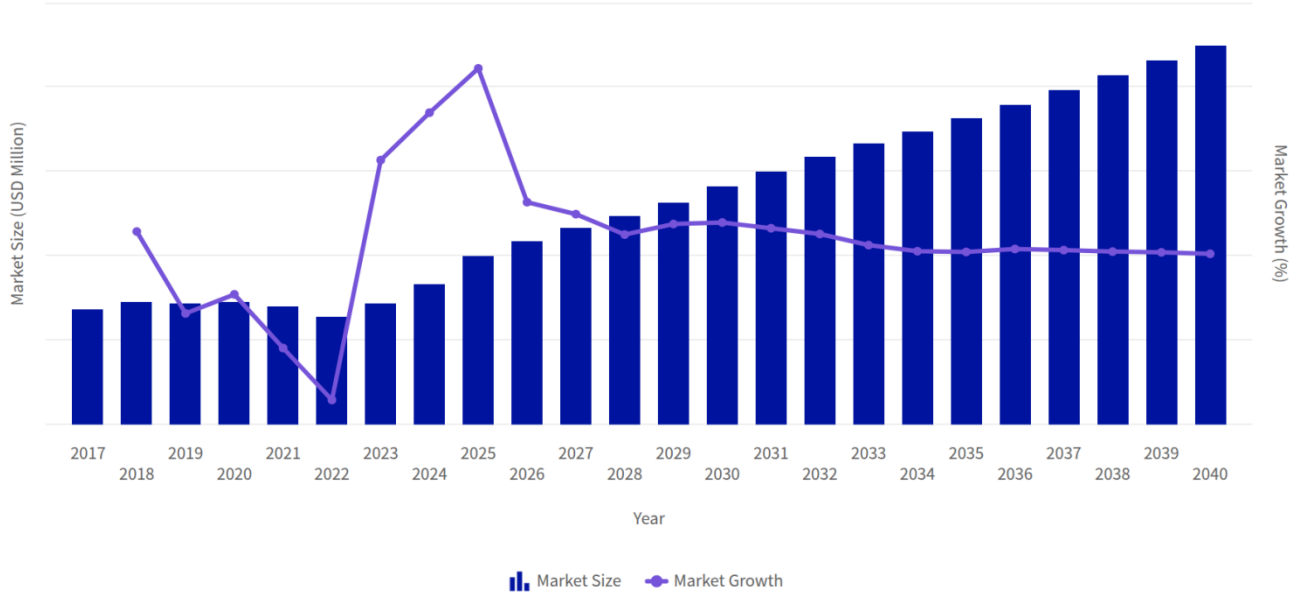


Table 2. Global Airport Baggage Screening Systems Market Size, 2017-2040 (USD Million, Growth %)

Metric	2017	2024	2025	2026	2027	2032	2040
Market Size (USD Million)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Market Growth (%)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ECAC Common Evaluation Process (CEP) of security equipment
   · ECAC distinguishes its configuration-specific evaluations from national approval or certification. ([ecac-ceac.org](https://ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))
2. Aviation security screening approved equipment list
   · UK guidance distinguishes approved baggage-screening categories from equipment exempt from specific departmental approval. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. 8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

4.2. Key Growth Contribution

Easier cabin-baggage preparation provides an evidenced adoption mechanism for checkpoint modernization: Heathrow's January xx.xx 2026 completion announcement allows liquids and electronics to remain packed. Serving that need requires an eligible installation with coordinated lane delivery, training, and continuing support, not an isolated scanner sale. CATSA's planning reinforces the importance of equipment-manufacturer and maintenance-provider cooperation. The counterforce is that permitted procedures and complementary operating commitments remain local; a preparation benefit does not independently establish staffing savings or justify complete replacement where an eligible, supported enhancement meets the buyer's requirement.

Figure 6. Global Airport Baggage Screening Systems Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

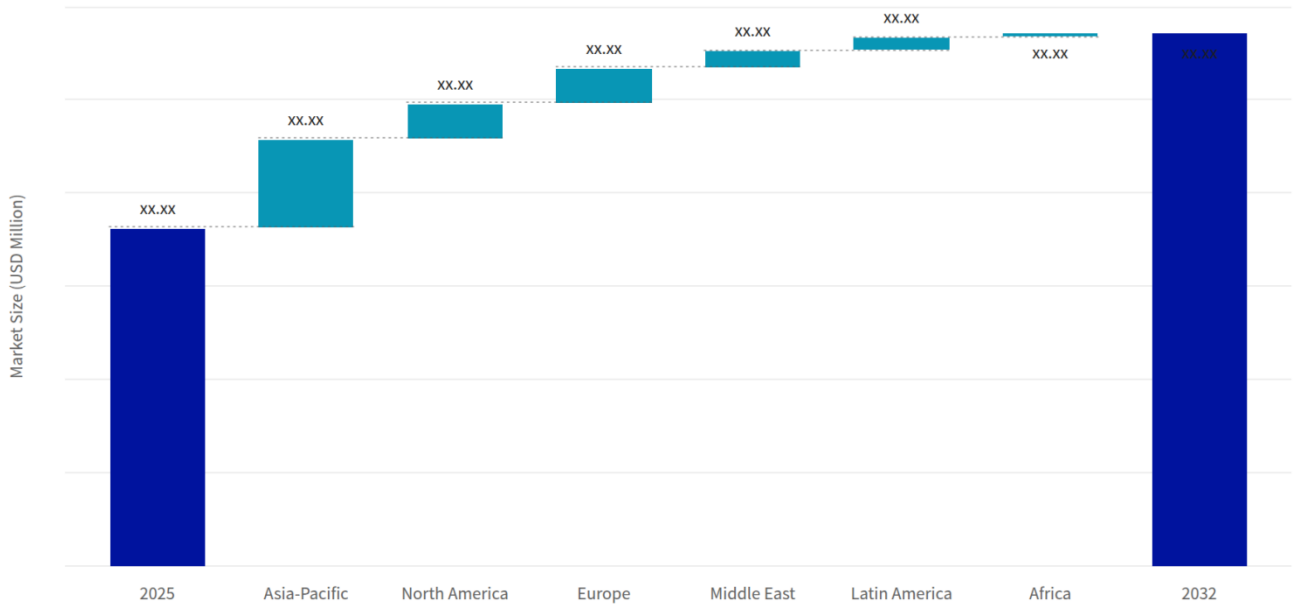

Figure 7. Global Airport Baggage Screening Systems Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

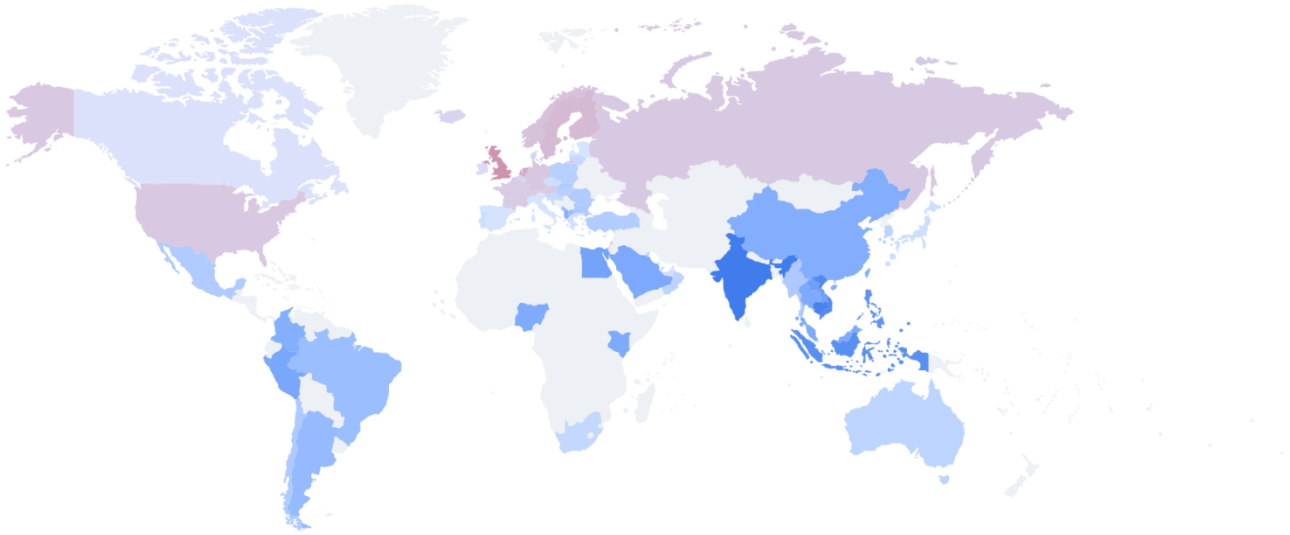

Table 3. Global Airport Baggage Screening Systems Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Country	xx.xx	xx.xx	xx.xx	xx.xx
Detection Platform	xx.xx	xx.xx	xx.xx	xx.xx
Image Review Location	xx.xx	xx.xx	xx.xx	xx.xx
Interoperability Architecture	xx.xx	xx.xx	xx.xx	xx.xx
Investment Purpose	xx.xx	xx.xx	xx.xx	xx.xx
Offering	xx.xx	xx.xx	xx.xx	xx.xx
Procurement Channel	xx.xx	xx.xx	xx.xx	xx.xx
Purchasing Organization	xx.xx	xx.xx	xx.xx	xx.xx
Region	xx.xx	xx.xx	xx.xx	xx.xx
Screening Application	xx.xx	xx.xx	xx.xx	xx.xx
System Integration	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet

   · Heathrow announced completed CT deployment on January xx.xx 2026, allowing liquids and electronics to remain in hand luggage; this supports a passenger-preparation mechanism, not transferable financial returns. ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))

2. Planning and Results

   · CATSA's 2025-2026 to 2029-2030 plan combines reduced unpacking of permitted items with officer development and collaboration among maintenance providers and equipment manufacturers. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/planning-and-results))

3. Port of Seattle - Baggage Handling System Optimization
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle's project combines increased screening capacity with consolidation from six screening systems and reduced screening-machine demand. This constrains the forecast assumption that capacity growth requires proportional equipment additions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Replacement and capacity objectives coexist within the project. Its wider baggage-handling budget is not treated as screening-equipment revenue or assigned additively to multiple purposes.
4. ACI World - Biannual global air travel demand update, 30 September 2025
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

5. ACI World - Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. CATSA - 2025 Annual Report, Management’s Discussion and Analysis
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS outturn was C$xx.xx versus an original C$xx.xx plan and revised C$xx.xx budget. Reprofiling constrains assumed award conversion and deployment timing; it does not measure procurement-channel mix. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual capital-project list identifies hold-baggage capacity expansion at Montréal-Trudeau, supporting the expansion classification, not its modeled global revenue weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The actual project list includes checkpoint CT deployment and hold-baggage oversize-equipment lifecycle management, supporting renewal activity without disclosing its purpose-specific spending.

7. Leidos - Leidos wins TSA logistics contract, 23 January 2025
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 announcement describes an eight-year, USD xx.xx maximum sustainment contract covering xx.xx equipment units at over xx.xx locations with manufacturer coordination. Annualization and baggage/third-party attribution in the model are explicit assumptions. ([leidos.com](https://www.leidos.com/insights/leidos-wins-tsa-logistics-contract))
8. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
9. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
10. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

11. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
12. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
13. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: On January xx.xx 2026, Fraport announced regular APIDS software operation on more than xx.xx existing Smiths CT scanners. This independently supports retained-system enhancement at one buyer, not global penetration or realized license revenue.
14. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
15. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

16. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
17. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
18. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
19. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
20. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.

21. CATSA 2025 Annual Report - Notes to the Financial Statements

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited expense disclosure reports C$xx.xx for maintenance and spare parts in the year ended March xx.xx 2025. It constrains support-spending materiality, not the amount attributable to an independent provider. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

22. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment organic growth of xx.xx% and approximately xx.xx cumulative CTiX sales constrain modernization assumptions, but do not directly measure integrated-lane penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management anticipates a later-decade hold-baggage renewal cycle. This is a forward-looking input to relative purchasing assumptions, not an observed 2032 share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation revenue includes GBP xx.xx original equipment and GBP xx.xx aftermarket. Manufacturer support participation is a counterforce to wholesale outsourcing; these supplier receipts do not identify final-buyer channel shares. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The substantial manufacturer aftermarket business qualifies independent-provider extrapolation because OEM support and subcontract receipts cannot automatically be reclassified as independent final-customer revenue. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-

23. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
24. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

25. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets direct on-site support and inclusive capital-equipment labor-and-parts contracts. This supports a continuing manufacturer-service alternative, without measuring a pricing premium. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-provided bundled support is a commercial alternative to separate technical-service procurement, limiting assumptions of unrestricted third-party substitution. ([smithsdetection.com](https://www.smithsdetection.com/service/))
26. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.

27. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan includes additional screening equipment and expansion of existing hold-baggage screening capacity. Its FY2025/xx.xx capital budget is C$xx.xx across mixed activities; plans are not recognized supplier revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The plan distinguishes replacement of checkpoint X-ray equipment with CT and asset lifecycle renewal from additional capacity. Funding, partner timing and reprofiling qualify forecast realization.

28. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume.
([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume.
([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))

29. Partners - HALO X-ray Technologies Ltd

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue.
([haloxray.com](https://www.haloxray.com/partners))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue.
([haloxray.com](https://www.haloxray.com/partners))

30. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.
31. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))
32. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))
33. Liquid Explosive Detector, Bottle Liquid Scanner, Insight - Agilent
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

34. Bottle Liquid Scanner for Sale from China - Securina

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

35. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

36. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

37. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

38. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

39. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

40. Explosive Detection - Teledyne FLIR Defense

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

41. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

42. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

43. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

44. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
45. Open Architecture for Airport Security Systems, Second Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

46. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 assessment records xx.xx checkpoint deployments as of September 2023 against xx.xx planned systems replacing aging equipment. It supports staged renewal, but does not establish current deployment completion or the modeled 2032 share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The program separately anticipates enhancements to fielded systems, supporting a retained-equipment commercial pathway without supplying an attributable upgrade-revenue split.

47. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

48. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

49. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

50. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

51. Scarabee's Checkpoint Property Screening System to be deployed at DEN

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

52. CATSA Annual Report 2024 - Management's Discussion and Analysis

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.

53. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
54. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
55. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
56. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life EDS within a xx.xx-unit U.S. checked-baggage fleet, citing the FY2024 capital plan. The derived xx.xx% backlog constrains the aging-fleet premise, but is neither an annual turnover rate nor a funded global replacement forecast.
57. Fraport TAV Antalya Airport - About the security control itself
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.

58. EMSD VoiceLink, Issue 79, June 2026 - EMSD Provides Comprehensive Support for Terminal 2 Commissioning

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.

59. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

60. Bank of Canada - Annual exchange rates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.

61. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.

62. Narita International Airport anticipates threats with integrated solutions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.

63. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.

64. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
65. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
66. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
67. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
68. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.

69. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
70. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
71. Smiths Detection selected as security technology provider to International Airport Heraklion Crete
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

72. Centralised Image Processing: The Impact on Security Checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price.
([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

73. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

74. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

75. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

76. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

77. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

78. United Launches CBP's International Remote Baggage Screening on Select International Flights

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

79. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

80. TSA awards $781.2 million to procure additional CT X-Ray scanners for airport checkpoints

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2022 announcement identifies up to USD xx.xx for procurement and maintenance of up to xx.xx systems from an OEM. This is a historical procurement-scale anchor, not annual 2025 direct-channel revenue. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The award includes full-size automated lanes, cautioning against assigning all automation value to non-OEM integration primes; exact contractual-role attribution is not disclosed. ([content.govdelivery.com](https://content.govdelivery.com/accounts/USDHSTSA/bulletins/30f6e5f))

81. OSI Systems, Inc. - Form 10-K for the fiscal year ended June 30, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes regional direct security-product sales and direct maintenance relationships. Its broader security scope supports route coexistence, not baggage-only sales weights. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company identifies a global independent-distributor network, supporting a continuing indirect route without quantifying its value share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized service providers are identified separately from distributors, supporting distinct technical-service attribution and access limitations. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

82. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2021 purchaser invitation permits an OEM or authorized OEM agent and requires authorization for the latter. It establishes equipment-channel eligibility, not an award or software-resale right. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

83. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment assigns procurement and deployment coordination across multiple technology suppliers at a future ten-gate terminal. It supports integration-prime participation and a forecast mechanism, not a disclosed share or completed 2025 revenue. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2025 appointment covers baggage CT and automated bin-return equipment for a future xx.xx-gate terminal, with phased opening planned for 2026-2028. It establishes new-installation activity, not attributable 2025 receipts; wider airport investment and person-only technologies are excluded.

84. CATSA Corporate Plan 2024-25 to 2028-29 Summary - Key Corporate Risks
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports transferring maintenance of most screening equipment to KPrime in 2023/xx.xx. This establishes a separately contracted maintenance relationship, without a baggage-only payment split. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
85. Checkpoint Transformation: Malta International Airport Streamlines Passenger Flow with Smiths Detection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seven conventional automated lanes were replaced by six CT-equipped lanes, with final commissioning in January 2025. This is a counterexample to equating capacity improvement with net additional equipment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complete checkpoint replacement illustrates why an offering described commercially as an upgrade can belong to System Replacement. The seven-year service commitment is not counted wholly as installation-year revenue.
86. iCMORE - Smiths Detection
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current commercial offering describes a software-upgrade path while qualifying additional hardware requirements by machine type and age. This constrains forecast eligibility assumptions; product availability does not measure adoption or revenue.

4.3. Industry Ecosystem & Value Chain Analysis

Value is created by turning an eligible product into an accepted and supportable screening installation. ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ The buyer must define the boundary of supply so that screening interfaces, commissioning, and acceptance responsibility are not lost between equipment and wider airport-infrastructure contracts.

Continuing service is a separate contracting relationship, not an automatic entitlement following an equipment sale. ■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ These examples support alternative service structures, but neither establishes unrestricted access for an unrelated maintenance provider.

Bundling equipment, software, and support can concentrate accountability, whereas separate contracts can preserve purchasing flexibility. ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ Buyers should allocate those responsibilities explicitly before comparing bundled and separately supplied offerings; a common product label is not a common contractual perimeter.

Sources & Evidence

1. Baggage Handling System Optimization
   · Seattle's project couples centralized screening with baggage-system reorganization. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. Leidos wins TSA logistics contract
   · Leidos announced a TSA checkpoint sustainment award on January xx.xx 2025, with manufacturer coordination among its obligations. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
3. Service
   · Smiths Detection describes direct on-site service, providing a commercial alternative to an aggregated service-prime structure. ([smithsdetection.com](https://www.smithsdetection.com/service/))

4.3.1. Supply-Side Analysis

■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ These offerings illustrate why a detector supplier, lane supplier, and software provider should not automatically be treated as interchangeable suppliers of a complete installation. Portfolio descriptions establish commercial positioning, not local delivery eligibility.

■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ Historical references to those equipment businesses should therefore not be used to presume independent competing ownership. Buyers should confirm the contracting entity and continuity of product support; the transaction announcement does not establish the transfer of any particular customer contract or every Leidos aviation-service obligation.

Sources & Evidence

1. Analogic and Leidos Complete Combination of Security Enterprise Solutions Businesses
   · On October xx.xx 2026, Analogic announced completion of the combination with the specified Leidos businesses under the Analogic brand. ([analogic.com](https://www.analogic.com/press-release-analogic-and-leidos-complete-combination-of-security-enterprise-solutions-businesses/))
2. Aviation & Critical Infrastructure
   · Analogic's expanded portfolio describes ClearScan baggage inspection, ProPassage tray-return equipment, and ProSight enterprise software. ([leidos.com](https://www.leidos.com/markets/aviation/security-detection/aviation-checkpoint/enterprise-software))
3. Passenger Checkpoint
   · Vanderlande describes passenger-checkpoint products, including PAX MX2 positioned for constrained space and personnel. The page does not establish local deployment eligibility. ([vanderlande.com](https://www.vanderlande.com/airports/systems/passenger-checkpoint/))

4.3.2. Demand-Side Analysis

Airport buyers seek an acceptable screening service within a functioning passenger journey. ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ The commercial inference is that replacement can be justified by the wider checkpoint experience, but the airport's announcement does not independently establish labor savings or financial returns for another installation.

Canadian planning provides an important counterforce. ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ Buyers should keep compliance, passenger convenience, and staffing assumptions separate when choosing between replacement and supported upgrades.

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet
   · Heathrow announced completed CT deployment on January xx.xx 2026, allowing liquids and electronics to remain packed. ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))
2. Strategic Objectives, Activities, and Priority Initiatives
   · The 2024-2025 to 2028-2029 plan identifies funding, labor, airport space, and schedules as influences on service delivery. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))
3. Planning and Results
   · CATSA's 2025-2026 to 2029-2030 plan describes in-bag screening of permitted liquids and electronics while retaining its stated liquids restriction. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/planning-and-results))

4.3.3. Stakeholder Analysis

The user, beneficiary, purchaser, and approver need not be the same organization. CATSA's responsibilities encompass passenger belongings, checked baggage, and non-passenger property screening, while national authorities define applicable security requirements. ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■

Airport operators control essential site interfaces; equipment and software suppliers control their contracted scope; service providers carry the obligations they actually accept. ■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ Terminal-Entrance Baggage Screening and Customs and Border Baggage Inspection also require their own purchasing and approval records: an aviation-checkpoint permission should not be treated as settlement of those separate commercial questions.

Sources & Evidence

1. Baggage Handling System Optimization
   · Planned check-in flexibility benefits airlines without establishing their purchasing authority. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. CATSA Functions, Programs and Activities
   · CATSA describes responsibilities covering passenger belongings, checked baggage, and non-passenger property screening under Canadian requirements. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

4.4. Market Dynamics

Modernization can expand the scope of a screening procurement without creating a corresponding requirement for additional detectors. Passenger-preparation benefits support checkpoint replacement, while Seattle's consolidation plan aims to reduce screening-machine requirements through system reorganization. ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■

■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■

Smiths Detection describes multi-vendor connectivity, while UK requirements for threat-image-projection integration retain an overall-system approval boundary. Modular purchasing can preserve supplier choice only when compatibility and rights are established; otherwise, the buyer inherits coordination obligations without obtaining dependable substitutability.

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet
   · Heathrow links its completed modernization to easier passenger preparation; financial implications remain analytical and conditional. ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))
2. Baggage Handling System Optimization
   · The project identifies reduced screening-machine requirements as an intended benefit. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
3. Digital Innovation
   · Smiths Detection describes multi-vendor connectivity and third-party integration within its digital offering. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
4. Threat Image Projection (TIP)
   · UK third-party threat-image-projection components require approval assessed within the overall system. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

4.4.1. Key Drivers

4.4.1.1. Passenger-preparation benefits support checkpoint modernization

■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ The counterforce is

permission-specific benefit realization: CATSA's 2025-2026 to 2029-2030 plan describes in-bag screening while retaining the stated limit on permitted liquids. Buyers should therefore assess the passenger procedure actually authorized, rather than purchasing against a generic CT convenience promise.

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet
   - The completed deployment provides an observed passenger-preparation benefit, not proof of another installation's returns. ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))
2. Planning and Results
   - The plan provides a counterexample to assuming that CT installation automatically removes liquid restrictions. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/planning-and-results))

4.4.1.2. Space-constrained renewal pulls integration and automation

Seattle's plan to centralize checked-baggage screening within the existing airport footprint demonstrates demand for integration and screening-related automation, not simply additional detectors. This creates a purchasing rationale for engineering, routing interfaces, software, and commissioning within the included screening scope. ■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■

Sources & Evidence

1. Baggage Handling System Optimization
   - Centralized screening is planned within the existing airport footprint. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

4.4.1.3. Training-software approval creates continuing support requirements

The UK introduced approval requirements for threat-image-projection libraries used with cabin-baggage explosive-detection equipment in 2024. ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ Buyers should assign renewal and compatibility responsibility; a general training-software license does not establish that the required approved library is covered.

Sources & Evidence

1. Threat Image Projection (TIP)
   - Approval of relevant libraries was introduced in 2024; continuing approval and third-party integration requirements support the stated software-lifecycle mechanism. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

4.4.2. Key Restraints

4.4.2.1. Configuration-specific eligibility limits transferable market access

[redacted] The barrier is not uniform across the accepted taxonomy: the UK exempts conventional X-ray equipment from specific Department for Transport approval while listing other baggage-screening categories for approval. Eligibility must be checked against the exact application and jurisdiction before a bid is treated as addressable.

Sources & Evidence

1. ECAC Common Evaluation Process (CEP) of security equipment
   · Published evaluation results apply only to the listed equipment configurations; national authorities retain approval responsibility.
   ([ecac-ceac.org](https://ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))
2. Aviation security screening approved equipment list
   · Conventional X-ray equipment does not require specific Department for Transport approval; other listed baggage-screening categories have approval lists.
   ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

4.4.2.2. Brownfield capital dependencies separate need from commitment

Screening replacement within a working airport can depend on a broader capital program. [redacted] Suppliers should distinguish an airport investment announcement from an awarded screening package, and buyers should preserve supported interim arrangements where construction sequencing delays replacement.

Sources & Evidence

1. Baggage Handling System Optimization
   · The final construction phase has a targeted completion in 2029.
   ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

4.4.2.3. Funding and workforce complements constrain benefit realization

CATSA's 2024-2025 to 2028-2029 plan makes stronger service outcomes dependent on funding and complementary conditions such as labor availability and airport space. Equipment capability therefore cannot independently establish achievable checkpoint service. [redacted]

Sources & Evidence

1. Strategic Objectives, Activities, and Priority Initiatives
   - Stronger wait-time service is contingent on funding and complementary operating conditions. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))

4.4.3. Key Opportunities

4.4.3.1. Supported enhancement of retained screening equipment

[redacted] Smiths Detection's upgrade offering and SeeTrue's named CT combinations establish commercial routes, conditional on installation-specific acceptance, licensing, compatibility, and continuing support.

Sources & Evidence

1. iCMORE
   - Smiths Detection markets iCMORE as an enhancement for existing equipment and qualifies additional hardware requirements by machine type and age. ([smithsdetection.com](https://www.smithsdetection.com/icmore/))
2. APIDS for CT Screening | ECAC-Approved AI - SeeTrue
   - SeeTrue advertises a separately supplied APIDS software layer and identifies Analogic ConneCT and Rapiscan 920CT combinations; its promotional approval language does not establish national deployment permission. ([seetrue.ai](https://www.seetrue.ai/apids-for-ct/))

4.4.3.2. Accountable delivery across screening interfaces

[redacted] K2's JFK appointment demonstrates a prime role that specialists can complement through defined packages, provided the purchaser and suppliers explicitly allocate acceptance and continuing responsibilities.

Sources & Evidence

1. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6
   - JFK Millennium Partners' March xx.xx 2025 appointment gives K2 procurement, installation, and deployment responsibilities involving authorities and technology suppliers. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))

4.4.3.3. Equipment-specific lifecycle support

[redacted] The opportunity depends on enforceable asset coverage, access, and escalation obligations; direct manufacturer service remains the alternative where a separate provider cannot secure them.

Sources & Evidence

1. Service
   · Smiths Detection advertises direct on-site maintenance and tailored support, providing a manufacturer-service alternative. ([smithsdetection.com](https://www.smithsdetection.com/service/))
2. Leidos wins TSA logistics contract
   · Leidos' January xx.xx 2025 company release describes TSA checkpoint sustainment involving equipment manufacturers, maintenance, logistics, and supply-chain responsibilities. ([prnewswire.com](https://www.prnewswire.com/news-releases/leidos-wins-tsa-logistics-contract-xx.xx.html))

4.4.3.4. Continuity of approved training software

[redacted] A bounded software-support proposition can address that obligation when the provider accepts approval continuity and supported-change responsibility.

Sources & Evidence

1. Threat Image Projection (TIP)
   · Relevant UK cabin-baggage TIP libraries require approval and reapproval; applicable third-party components are assessed within the overall system. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

4.4.4. Key Challenges

4.4.4.1. Coordinating phased deployment without overstating completion

Airport modernization must distinguish partial commissioning from a completed passenger proposition. Sydney Airport's Q4 2025 update reported completed new screening lanes at its international terminal while CT-enabled deployment at another terminal remained partial. [redacted]

Sources & Evidence

1. Sydney Airport Traffic and Operational Performance Q4 2025
   · Sydney's Q4 2025 update distinguishes completed international-terminal screening lanes from partial CT-enabled deployment at another terminal. This is a historical staging example, not a statement of subsequent completion. ([sydneyairport.com.au](https://www.sydneyairport.com.au/corporate/media/corporate-newsroom/sydney-airport-traffic-and-operational-performance-q4-2025))

4.4.4.2. Converting multi-vendor positioning into enforceable integration rights

[redacted] Before committing, the buyer needs documented compatibility and change responsibility. A single accountable prime may reduce

coordination burden, but can provide less independent control than a genuinely supported modular arrangement.

Sources & Evidence

1. Aviation & Critical Infrastructure
   · ProSight is described as unifying equipment, algorithms, and third-party information; this does not establish customer-specific licensing rights. ([leidos.com](https://www.leidos.com/markets/aviation/security-detection/aviation-checkpoint/enterprise-software))
2. Digital Innovation
   · The digital portfolio establishes integration positioning, not a prospective customer's interface entitlements or warranty allocation. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

4.4.4.3. Making maintenance and parts coverage contractually executable

[redacted] Buyers must establish local response coverage, included components, and authorized access before substituting a service provider. Approved third-party consumables can provide a bounded alternative, but do not establish interchangeable parts or unrestricted maintenance rights.

Sources & Evidence

1. Leidos wins TSA logistics contract
   · The award's service model includes cooperation with original equipment manufacturers and logistics support. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
2. Explosive trace detection (ETD) systems: third party consumables
   · Department for Transport guidance specifically covers third-party consumables for approved explosive trace-detection systems. ([gov.uk](https://www.gov.uk/government/publications/approved-explosive-trace-detection-systems-consumables))
3. Service
   · The service portfolio includes field engineers, training, parts support, and tailored contracts, but does not establish a prospective site's obligations. ([smithsdetection.com](https://www.smithsdetection.com/service/))

4.4.4.4. Resolving commercial permissions for remote image review

Centralized software capability does not establish permission for every image-review location. [redacted] An off-site proposal requires documented authority acceptance, customer permission, connectivity accountability, and software-support obligations before its business case can be relied upon.

Sources & Evidence

1. Strategic Objectives, Activities, and Priority Initiatives
   · The plan describes exploration of remote screening, not general authorization of off-site deployment. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))
2. Digital Innovation
   · Centralized screening appears in the offering; location-specific operating permission is not established by that description. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

4.5. Porter’s Five Forces Analysis

[redacted] TSA's checkpoint sustainment award to Leidos demonstrates centralized purchasing of support coordinated with equipment manufacturers. Aggregation can strengthen control over service scope, but it does not make every equipment configuration or replacement provider eligible.

Supplier leverage depends on the particular dependency being purchased. [redacted] Buyers should distinguish approved alternatives from unverified interchangeability and examine contractual access before changing providers.

[redacted] A broader combined portfolio may simplify a buyer's procurement, but the transaction alone establishes neither superior performance nor improved bargaining terms. Bid comparisons should identify common ownership and the exact scope each bidder controls.

[redacted] That is counterevidence to a patent-only barrier thesis, not proof of unrestricted technology access. A software entrant also faces its own applicable approval boundary, as the UK's treatment of threat-image-projection integration demonstrates.

[redacted] Seattle's consolidation plan illustrates how system reconfiguration can reduce the requirement for screening machines. These alternatives are suitable only where the resulting installation remains acceptable to the relevant authority and buyer.

Sources & Evidence

1. Baggage Handling System Optimization
   · Consolidation provides a documented alternative to simply adding screening machines. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. Leidos wins TSA logistics contract
   · The agency award demonstrates centralized checkpoint-support purchasing, without establishing unrestricted substitution rights. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
3. Analogic and Leidos Complete Combination of Security Enterprise Solutions Businesses
   · The completed combination changes common ownership of historical equipment alternatives; bid-level bargaining effects are an inference. ([analogic.com](https://www.analogic.com/press-release-analogic-and-leidos-complete-combination-of-security-enterprise-solutions-businesses/))
4. Threat Image Projection (TIP)
   · The approval boundary provides a software-specific entry constraint rather than evidence of a patent-only barrier. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
5. Explosive trace detection (ETD) systems: third party consumables
   · The dedicated third-party consumables list counters a blanket manufacturer-only supply assumption, without proving parts interchangeability. ([gov.uk](https://www.gov.uk/government/publications/approved-explosive-trace-detection-systems-consumables))
6. OSI Systems, Inc. Form 10-K for the fiscal year ended June 30, 2026
   · OSI Systems states that its patents may not provide meaningful protection from competition; the filing does not establish freedom to operate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

4.6. PESTLE Analysis

Regulatory policy can change the commercial benefits of installed equipment without making the underlying investment unnecessary. The European Commission's liquid-screening restriction effective September xx.xx 2024, illustrates this exposure. ■■ ■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■■ ■■ ■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■

■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ These disclosures establish supplier exposure, not a uniform surcharge across baggage-screening systems. Buyers and suppliers should settle product origin, import responsibility, currency allocation, and treatment of policy changes before committing to delivery obligations.

Passenger convenience and workforce readiness influence acceptance of modernization. Heathrow's completed upgrade reduced the need for passengers to unpack belongings, while CATSA's planning emphasizes screening-officer development. ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■

RESEARCH SAMPLE REPORT

[illegible]

Connected screening introduces continuing software-governance obligations. [illegible] Commercial review should therefore involve the security-system owner and the information-security owner, with responsibility assigned for supported updates and approved changes.

Environmental benefits remain project-specific. Seattle identifies energy efficiency as an intended benefit of screening consolidation, while Smiths Detection offers refurbishment and equipment-life-extension services. [illegible]

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet
   · Heathrow's completed deployment supports convenience analysis and illustrates jurisdiction-specific procedures distinct from the historical EU measure. ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))
2. Baggage Handling System Optimization
   · Energy efficiency is an intended project benefit, not a reported realized result. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
3. Strategic Objectives, Activities, and Priority Initiatives
   · CATSA identifies screening-officer development and training among its planned initiatives. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))
4. Digital Innovation
   · The supplier includes cybersecurity maintenance within its digital offering. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
5. Threat Image Projection (TIP)
   · Overall-system assessment of third-party integration supports continued change-governance responsibility. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
6. Service
   · Refurbishment and equipment-life-extension services are offered; realized environmental benefits are not established by this offering description. ([smithsdetection.com](https://www.smithsdetection.com/service/))
7. Commission enforces temporary restrictions on liquid screening at certain EU airports
   · The Commission announced a temporary liquid-screening restriction effective September xx.xx 2024, describing a technical precaution rather than a new threat. This supports historical policy exposure, not a universal current restriction. ([transport.ec.europa.eu](https://transport.ec.europa.eu/news-events/news/commission-enforces-temporary-restrictions-liquid-screening-certain-eu-airports-2024-xx.xx-31_en))
8. OSI Systems, Inc. Form 10-K for the fiscal year ended June 30, 2026
   · The fiscal 2026 filing identifies tariff, currency, and government-budget exposure and describes mitigation. It does not establish an applicable tariff effect for a particular baggage-screening purchase. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm?utm_source=openai))

4.7. Market Outlook

The Global market supports differentiated renewal and lifecycle propositions rather than one synchronized technology transition. CATSA's capital plan distinguishes major-checkpoint CT replacement from projection-equipment renewal in other applications and from existing hold-baggage expansion. ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■■■

■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ The favorable scenario is coordinated commitment across purchaser, authority, site owner, and support counterparties. Where those commitments remain incomplete, supported retention or a narrower package is more defensible than assuming a comprehensive replacement will proceed.

Sources & Evidence

1. Digital Innovation
   · Smiths Detection advertises multi-vendor connectivity, equipment monitoring, third-party integration, and cybersecurity maintenance. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
2. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
   · CATSA's plan distinguishes major-checkpoint CT replacement, single-view-to-multiview renewal in other applications, existing hold-baggage expansion, and lifecycle replacement. These are planned activities. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

4.7.1. Near-Term Market Outlook (0-2 Years)

During 2026-2027, deployment eligibility, contractual handover, and continuity of support are more defensible commitment anchors than demonstrations or broad capability announcements. ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ Suppliers should advance installation-matched offers and buyers should distinguish an operating reference from transferable permission.

For agency-led opportunities, the immediate commercial indicator is an authorized commitment through the applicable procurement route. ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ Early engagement remains useful for defining a requirement, but is unsuitable as the sole basis for a binding delivery commitment.

Sources & Evidence

1. Procurement and Contracting Policy - CATSA
   · CATSA requires delegated confirmation of funds before a contractual financial commitment and Transport Canada approval before equipment enters mandated service. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
2. KI an der Luftsicherheitskontrolle: Fraport und Bundespolizei überführen APIDS in den Regelbetrieb
   · Fraport reported regular APIDS operation on January xx.xx 2026, following national certification, with screening personnel retaining final decisions. ([fraport.com](https://www.fraport.com/de/newsroom/pressemitteilungen/2026/q1/ki-an-der-luftsicherheitskontrolle.html))

4.7.2. Medium-Term Market Outlook (3-5 Years)

During 2028-2029, phased airport programs make acceptance and legacy-support coordination important commercial milestones. Avinor's Oslo announcement plans completion for summer 2028 and expressly anticipates coexistence of old and new technology. ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■

Suppliers should align project-specific resources with released work packages and confirmed handover obligations. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■ ■ ■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ If construction or acceptance moves, a defined interim service extension is preferable to an unsupported transition, although it postpones replacement benefits.

Sources & Evidence

1. Baggage Handling System Optimization
   · Seattle targets final construction-phase completion in 2029 and identifies reduced screening-machine requirements as an intended consolidation benefit. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. Oslo Airport builds new Security Checkpoint | The Avinor Group
   · Avinor's December xx.xx 2025 announcement plans Oslo checkpoint completion for summer 2028, with legacy and new technology coexisting during reconstruction. ([kommunikasjon.ntb.no](https://kommunikasjon.ntb.no/pressemelding/xx.xx/oslo-airport-builds-new-security-checkpoint?lang=en&publisherId=xx.xx))

4.7.3. Long-Term Market Outlook (5-10 Years)

During 2030-2032, the important strategic question is whether modular purchasing becomes contractually executable, not whether every installation acquires an open-architecture label. ■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■■■■■ ■■ ■■■■■■■■■■■ Broader component choice is consequently a conditional option requiring explicit substitution rights, supported changes, and an accountable counterparty, rather than an assured industry outcome.

Buyers should preserve future choice through the rights purchased at renewal, while suppliers should commit only to the interfaces and continuing obligations they can support. CATSA's broad standard software rights demonstrate that proprietary ownership need not prevent buyer-directed change, but do not establish another customer's permissions. ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. CATSA's Purchase Order Terms and Conditions
   - CATSA's standard terms grant broad pre-existing-software rights without transferring ownership, supporting examination of executed rights rather than architecture labels. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
2. Open Architecture for Airport Security Systems, Second Edition
   - The joint open-architecture framework permits identified partial compliance and recognizes possible transfer of liability toward integrators. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

4.8. Go-to-Market Strategy

▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ UK category exceptions also show why the same approval assumption should not be applied to every included platform. Advance only the offering whose eligibility and commercial obligations can be documented for the proposed purchase.

Use an integration partner when it contributes enforceable delivery responsibilities the supplier cannot provide directly. ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Direct supply remains preferable where the buyer already has those responsibilities covered; a prime-led route trades some commercial control for consolidated accountability.

▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ CATSA's standard terms illustrate that software rights

and delivery obligations can be material. Secure necessary licenses and supplier commitments before promising the package, then tie handover and support commencement to contractual acceptance.

Sources & Evidence

1. Aviation security screening approved equipment list
   · UK guidance distinguishes approved baggage-screening categories from conventional X-ray equipment, which does not require specific departmental approval. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
2. Procurement and Contracting Policy - CATSA
   · Funding authority, contract approval, and screening-equipment approval are separately specified in CATSA's procurement policy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
3. Doing Business with CATSA
   · CATSA states that most goods and services requirements are publicly tendered through MERX. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/doing-business-catsa))
4. CATSA's Purchase Order Terms and Conditions
   · The terms address delivery, acceptance, import obligations, and software rights; amendments require express written agreement approved by CATSA. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
5. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6
   · The buyer announcement establishes an integration-prime contracting model, not completed delivery or an available partnership for another bidder. ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
6. Oslo Airport builds new Security Checkpoint | The Avinor Group
   · Avinor identifies Smiths Detection equipment and Sensec Solution AS installation, commissioning, service, and maintenance responsibilities. This demonstrates a delivery structure, not another supplier's appointment. ([kommunikasjon.ntb.no](https://kommunikasjon.ntb.no/pressemelding/xx.xx/oslo-airport-builds-new-security-checkpoint?lang=en&publisherId=xx.xx))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

The decisive customer is the organization authorized to commit funds, not necessarily the screening user or passenger beneficiary. ■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■ For a supplier, a recognized modernization need is therefore different from a funded purchasing opportunity; proposals should identify the contracting authority and applicable solicitation rather than rely solely on airport or operator interest.

■■■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ An equipment-only offer may suit a purchaser with established support arrangements; a broader package is more defensible where those responsibilities would otherwise remain unassigned. User input helps define the requirement but does not replace procurement approval.

CATSA's standard terms grant broad pre-existing-software rights without transferring ownership; switching analysis should examine the actual license, not proprietary branding.

Sources & Evidence

1. Planning and Results
   - CATSA's planning assigns importance to officer training and collaboration among its maintenance provider and equipment manufacturers. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/planning-and-results))
2. Procurement and Contracting Policy - CATSA
   - CATSA requires delegated funding confirmation before financial commitments, including subsequent-year commitments under multiyear contracts. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
3. Doing Business with CATSA
   - CATSA publicly tenders most requirements and publishes procurement solicitations through MERX. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/doing-business-catsa))
4. CATSA's Purchase Order Terms and Conditions
   - CATSA's standard terms grant broad license rights over pre-existing software without transferring its ownership. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

5.2. Consumer Experience Benchmarking

■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■

RESEARCH SAMPLE REPORT

[redacted] CATSA's June xx.xx 2025, Halifax announcement documented the same broad preparation benefit for permitted items at a newly equipped line, within a phased rollout. These dated records benchmark delivered preparation changes and commissioning scope; they do not establish Halifax's subsequent completion state or comparable whole-checkpoint performance.

Airport buyers should therefore compare matched, commissioned lanes and the procedures actually permitted, rather than infer a uniform airport experience from a scanner purchase. Acceptance commitments should distinguish passenger preparation, deployment coverage, training handover and continuing service. [redacted]

Sources & Evidence

1. Heathrow Completes £1bn Tech Upgrade to Deliver Its Fastest, Smoothest Security Yet
   · Heathrow announced completed terminal-wide CT deployment on January xx.xx 2026, with liquids and electronics remaining packed. This supports a preparation-experience benchmark, not independent proof of wider service outcomes.
   ([mediacentre.heathrow.com](https://mediacentre.heathrow.com/pressrelease/detail/xx.xx))
2. Planning and Results
   · The plan includes accessibility engagement and removal of checkpoint-design barriers as intended improvements, not completed outcomes.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/planning-and-results))
3. New Security Screening Line at Halifax Stanfield International Airport (YHZ) includes CATSA CT Technology
   · CATSA's June xx.xx 2025, Halifax announcement documented an operational CT-equipped line, reduced unpacking of permitted items, and a staged wider deployment.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/media/new-security-screening-line-halifax-stanfield-international-airport-yhz-includes))

5.3. Opportunity Mapping

[redacted] ECAC evaluation cannot replace national permission. A manufacturer package is preferable where independent application rights cannot be secured; replacement remains appropriate where retained equipment cannot meet the accepted requirement.

Brownfield integration offers a different opportunity for terminal developers and specialist integrators: accepting screening interfaces and delivery coordination that would otherwise

remain with the purchaser. K2's JFK appointment demonstrates a prime model, but Dublin and Cork's completed program demonstrates that separate specialist contracts can also work. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ The opportunity is an enforceable support package, not unrestricted aftermarket substitution. Direct manufacturer service remains a credible alternative where its site commitment is more dependable or the buyer cannot administer a separate provider's dependencies.

Approved training-software continuity is a narrowly defined purchasing need rather than a general training-content opportunity. Relevant UK cabin-baggage TIP arrangements connect library reapproval with overall-system acceptance of third-party components. ▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

Off-site review should remain an arrangement-specific option. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ Where these commitments are unavailable, retaining the applicable local arrangement is preferable to relying on an unverified connection benefit.

Sources & Evidence

1. Baggage Handling System Optimization
   · Seattle's centralization links screening to wider baggage-system reorganization; integration requirements do not automatically establish additional detector demand. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. Threat Image Projection (TIP)
   · Continuing library approval and overall-system integration requirements support a bounded software-continuity proposition, not unrestricted entry for a general training provider. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
3. Service
   · Direct manufacturer service is a documented alternative to aggregated maintenance; general descriptions do not settle site coverage. ([smithsdetection.com](https://www.smithsdetection.com/service/))

4. ECAC Common Evaluation Process (CEP) of security equipment
   · ECAC evaluation applies to listed configurations and does not itself constitute national approval or certification.
   ([ecac-ceac.org](https://www.ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))
5. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland
   · Dublin and Cork used separate building, baggage-integration, and professional-service appointments; the project account reports completion in March 2023. This challenges a universal single-prime requirement.
   ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
6. International Remote Baggage Screening
   · PNNL describes international checked-baggage image review involving U.S. authorities and named airline-airport arrangements, supporting a bounded institutional rather than software-only access route.
   ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))
7. JFK Millennium Partners Selects K2 to Deliver State-of-the-Art Security Screening Checkpoint at new JFK Terminal 6
   · K2's appointed coordination role provides a documented alternative to leaving component-supplier interfaces with the terminal developer.
   ([portauthoritybuilds.com](https://www.portauthoritybuilds.com/redevelopment/us/en/jfk/planned-projects/terminal-xx.xx/news/jfk-millennium-partners-selects-k2-to-deliver-state-of-the-art-s.html))
8. Key Corporate Risks - CATSA
   · CATSA records its 2023/xx.xx transition of maintenance for most screening equipment to KPrime Technologies, without identifying every installation's coverage.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
9. United Launches CBP's International Remote Baggage Screening on Select International Flights
   · United's September xx.xx 2025 announcement identifies a Sydney-San Francisco remote-baggage arrangement involving Sydney Airport, BagCheck, Brock Solutions, CBP, and TSA.
   ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))
10. APIDS for CT Screening | ECAC-Approved AI - SeeTrue
    · Named software-scanner combinations establish an application-layer alternative for assessment, not a prospective customer's license, warranty allocation, or eligible installation.
    ([seetrue.ai](https://www.seetrue.ai/apids-for-ct/))
11. Leidos wins TSA logistics contract
    · The announced sustainment structure supports a manufacturer-coordinated service route; it does not confer access rights on an unrelated provider.
    ([prnewswire.com](https://www.prnewswire.com/news-releases/leidos-wins-tsa-logistics-contract-xx.xx.html))
12. KI an der Luftsicherheitskontrolle: Fraport und Bundespolizei überführen APIDS in den Regelbetrieb
    · Frankfurt provides a buyer-reported operating example of a software addition to Smiths Detection CT equipment, without establishing another airport's entitlement or staffing outcome.
    ([fraport.com](https://www.fraport.com/de/newsroom/pressemitteilungen/2026/q1/ki-an-der-luftsicherheitskontrolle.html))

5.4. Distribution Channel Analysis

Distribution reach and service authority are separate commitments. OSI Systems describes direct security-product sales, independent distributors and authorized service providers. ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■ ■■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■

[redacted]

A service prime provides a different route from equipment resale. Leidos' January 2025 TSA sustainment announcement assigns manufacturer coordination, maintenance and logistics responsibilities. [redacted]

Integration channels require similarly explicit boundaries. [redacted] Buyers should retain separate contracts where they can manage those interfaces and obtain enforceable access; channel convenience alone does not settle compatibility or authorization.

Sources & Evidence

1. Leidos wins TSA logistics contract
   - The January 2025 TSA sustainment announcement assigns Leidos manufacturer coordination, maintenance, logistics and support responsibilities. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
2. Digital Innovation
   - Smiths Detection markets multi-vendor connectivity and third-party integration; the portfolio description does not establish customer-specific interface entitlements. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
3. Service
   - Smiths Detection offers direct on-site field service and tailored support contracts, providing an alternative to a separate service prime. ([smithsdetection.com](https://www.smithsdetection.com/service/))
4. OSI Systems, Inc. Form 10-K for the fiscal year ended June 30, 2026
   - OSI Systems describes direct security-product sales, independent distributors, and authorized service providers as distinct commercial relationships. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))

5.5. Pricing Trend Analysis

[redacted] Suppliers should settle any cost-adjustment exception before accepting an order, not presume automatic tariff recovery.

[redacted] Buyers should compare covered obligations, exclusions and renewal treatment across bundled and separate offers: predictable support expenditure can be valuable, but only when the required site and

components are covered. A hardware discount should not substitute for this scope comparison.

[redacted] Its caution that patents may not meaningfully protect against competition also challenges a patent-only pricing-power assumption. Licensed functionality, eligible alternatives and enforceable support remain more defensible negotiating considerations.

Sources & Evidence

1. Service
   · Smiths Detection describes inclusive capital-equipment service contracts covering labor and parts, illustrating a supported service-bundling option. ([smithsdetection.com](https://www.smithsdetection.com/service/))
2. OSI Systems, Inc. Form 10-K for the fiscal year ended June 30, 2026
   · OSI identifies tariff, currency and government-budget exposure, describes mitigation, and cautions that patents may not meaningfully protect against competition. These disclosures do not establish purchase-specific pass-through or exclusivity. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/osis-20260630x10k.htm))
3. CATSA's Purchase Order Terms and Conditions
   · The standard terms limit contractual charges and aftermarket escalation, generally include duties and brokerage, and separately treat specified Canadian sales taxes. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

5.6. Regulatory Compliance & Standards Framework

[redacted] UK guidance separately identifies approved baggage, trace and liquid-detection categories while stating that conventional X-ray equipment does not require specific departmental approval. Buyers should establish the exact application, configuration and national requirement before comparing eligible offers; an exception for one category cannot establish permission for another.

[redacted] Separately licensing training software can preserve purchasing choice, but the license does not establish eligibility of the combined installation. These are UK requirements, not a universal approval regime for every training-software category.

Canada illustrates the separate purchasing gate: CATSA requires Transport Canada approval before equipment enters its mandated service. [redacted]

■■■■■■■ For Terminal-Entrance Baggage Screening and Customs and Border Baggage Inspection, purchasers should establish the responsible authority and applicable purchasing record rather than transfer an aviation-checkpoint permission to the different application.

Sources & Evidence

1. Aviation security screening approved equipment list
   · UK guidance lists approval categories for cabin and hold baggage equipment, trace detection, liquid detection, consumables and TIP libraries, while conventional X-ray equipment does not require specific departmental approval.
   ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
2. Threat Image Projection (TIP)
   · UK cabin-baggage TIP libraries require approval and continuing reapproval; relevant third-party components are assessed as part of the overall screening system.
   ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
3. Procurement and Contracting Policy - CATSA
   · CATSA requires Transport Canada approval before screening equipment enters mandated service.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
4. ECAC Common Evaluation Process (CEP) of security equipment
   · ECAC evaluation applies to listed configurations and does not itself constitute national approval or certification; the appropriate national authority retains that responsibility.
   ([ecac-ceac.org](https://www.ecac-ceac.org/activities/security/common-evaluation-process-cep-of-security-equipment))
5. Trade Agreement Covered Procurements Procedure - CATSA
   · CATSA's procedure effective January xx.xx 2026, requires determining procurement coverage under the applicable Canadian and international trade agreements.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/trade-agreement-covered-procurements-procedure))

5.7. ESG & Sustainability Analysis

■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■ Its reported supplier-specific emissions collection concerns screening contractors, not comparable individual equipment footprints. Equipment buyers can consequently request relevant supplier information and continuity commitments without treating agency-wide disclosure as proof that one scanner is environmentally preferable.

■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ Buyers should establish these end-of-life obligations when comparing replacement with continued use of eligible, supported assets. Replacement can introduce a new environmental

proposition while also creating disposal obligations; neither a project objective nor a disposal offering establishes realized lifecycle improvement.

Responsible-supply requirements create a separate commercial obligation. ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ These are documented buyer requirements, not evidence of misconduct by screening-equipment suppliers: CATSA reports no identified actual forced or child labor in its supply chain, and enhanced requirements remain risk-specific.

Sources & Evidence

1. Baggage Handling System Optimization
   · Seattle identifies improved energy efficiency as an intended benefit of its broader baggage-system consolidation, rather than a measured screening-equipment outcome. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
2. 2025-26 Report on Taskforce on Climate-Related Financial Disclosures - CATSA
   · CATSA's climate disclosure includes equipment, consumables and maintenance within value-chain emissions and identifies equipment damage and service interruption as climate-related risks. Supplier-specific data collection is reported for screening contractors, not comparable individual equipment footprints. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-xx.xx-report-taskforce-climate-related-financial-disclosures))
3. Responsible Disposals - Smiths Detection
   · Smiths Detection offers decommissioning and disposal assistance for X-ray and trace-detection equipment, including sensitive-data treatment and disposal documentation. This establishes an offering, not realized environmental benefits. ([smithsdetection.com](https://www.smithsdetection.com/service/responsible-disposals/))
4. CATSA Modern Slavery Act Report 2025-26
   · CATSA reports mandatory contractor conduct requirements, forced-labor risk screening in procurement planning, and enhanced due diligence for elevated risks. It reports no identified actual forced or child labor in its supply chain. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/corporate-publications/catsa-modern-slavery-act-report-2025-xx.xx))

5.8. Disruption & Risk Scenarios

■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ Relevant authority notices and changes to permitted procedures are the monitoring triggers. Contracts should separate equipment acceptance from the passenger proposition and identify who bears change obligations.

■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ Equipment suppliers are exposed if they commit delivery resources before

authorized funding and package release; buyers are exposed if existing support expires before replacement acceptance. The response is stage-specific commitment and expressly covered interim support, while recognizing that deferral postpones the intended modernization benefit.

[illegible] Warning indicators include unsupported versions, unaccepted contract changes, and unresolved service renewals. Buyers should require continuing update responsibility and a documented transition arrangement rather than assume that either a broad platform label or an aggregated service contract removes dependency.

A remote-review expansion could fail commercially if the necessary institutions do not participate or permissions do not cover the proposed route. Documented international arrangements are counterevidence to treating off-site review as inherently unavailable, but not proof of transferable access. [illegible]

Sources & Evidence

1. Digital Innovation
   · The connected offering establishes continuing software and support functions, not customer-specific permissions or an installation-specific response commitment. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
2. Commission enforces temporary restrictions on liquid screening at certain EU airports
   · The European Commission announced a temporary restriction effective September xx.xx 2024, affecting passenger procedures at certain installed cabin-baggage screening systems. This is historical policy-exposure evidence, not a universal current restriction. ([transport.ec.europa.eu](https://transport.ec.europa.eu/news-events/news/commission-enforces-temporary-restrictions-liquid-screening-certain-eu-airports-2024-xx.xx-31_en))
3. Procurement and Contracting Policy - CATSA
   · The policy supports treating funded authorization as a commitment trigger rather than assuming that modernization interest is an executable order. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/procurement-and-contracting-policy))
4. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
   · The plan is subject to funding, identifies possible partner and supply-chain delays, and recognizes potential rescheduling of capital expenditure; it does not establish a subsequent funding decision. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
5. International Remote Baggage Screening
   · The described collaboration depends on designated airports, airlines, and authorities; it does not establish another route's permission or support allocation. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

6. Key Corporate Risks - CATSA
   · CATSA identifies dependence on outsourced maintenance and major suppliers as a corporate risk, including continuing parts and staffing exposure. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/key-corporate-risks))
7. United Launches CBP's International Remote Baggage Screening on Select International Flights
   · The announcement describes a named route and continuing passenger screening, not blanket permission to extend the arrangement elsewhere. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

5.9. Return on Investment & Cost-Benefit Analysis

For an airport owner, the relevant comparison is complete replacement versus an eligible retained-equipment enhancement delivering the same required screening function. ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■ A smaller initial scope does not by itself establish a better lifecycle outcome.

■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ Commitment is more defensible when the buyer has assigned the complementary obligations and a supported transition. Otherwise, a narrower upgrade or staged replacement preserves flexibility at the cost of delaying broader benefits.

Contract allocation changes both buyer value and supplier economics. ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ Buyers should also allocate decommissioning and sensitive-data removal rather than leave end-of-life responsibility outside the comparison.

Sources & Evidence

1. Strategic Objectives, Activities, and Priority Initiatives
   · CATSA's 2024-2025 to 2028-2029 plan identifies deployment-stage disruption and funding, workforce, schedules, and airport space as influences on service outcomes. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/strategic-objectives-activities-and-priority-initiatives))
2. Service
   · Smiths describes inclusive capital-equipment service contracts covering labor and parts, supporting comparison of covered obligations rather than assumed economic superiority. ([smithsdetection.com](https://www.smithsdetection.com/service/))

3. CATSA's Purchase Order Terms and Conditions

   · Contract terms allocate delivery, duties, acceptance, and intellectual-property obligations, supporting a supplier-side assessment of retained obligations rather than assumed automatic cost recovery. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

4. Responsible Disposals - Smiths Detection

   · Smiths Detection offers equipment decommissioning, sensitive-data removal, and disposal assistance; the offering supports including end-of-life obligations, not assuming realized environmental savings. ([smithsdetection.com](https://www.smithsdetection.com/service/responsible-disposals/))

5. iCMORE

   · The marketed upgrade route supports comparing retained-equipment enhancement with replacement, but its hardware qualification prevents assuming an equipment-free change. ([smithsdetection.com](https://www.smithsdetection.com/icmore/))

6. Cumulative Impact of Artificial Intelligence 2026

AI has an evidenced assistive role in cabin-baggage screening, but deployment does not establish autonomous decision-making. Fraport announced regular APIDS operation on January xx.xx 2026, using Smiths Detection CT equipment following national certification. ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■

Other applications have different maturity and purchasing consequences. CATSA's December 2025 newsletter distinguished its deployed demand-planning model from planned APIDS trials and an exploratory officer-assistance chatbot. ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■

AI consequently adds software and data-governance obligations to the commercial relationship. ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ The trigger for broader adoption should be a documented approved deployment and service commitment, not a demonstration or an adjacent airport-management use case.

Sources & Evidence

1. Leidos wins TSA logistics contract
   · Leidos describes a dedicated support system using predictive analytics and its AI capabilities to support screening-equipment availability; the announcement does not independently demonstrate resulting improvements. ([investors.leidos.com](https://investors.leidos.com/news-releases/news-release-details/leidos-wins-tsa-logistics-contract))
2. Digital Innovation
   · The digital portfolio includes AI applications, equipment monitoring, cybersecurity maintenance and integration offerings. These are supplier-described capabilities rather than proof of a prospective buyer's deployment. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
3. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS
   · Fraport announced regular APIDS operation on January xx.xx 2026, using Smiths Detection CT equipment after national certification, while retaining final decisions with screening personnel. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))

4. Beyond the Checkpoint - December 2025 - CATSA
   · CATSA's December 2025 newsletter distinguishes a deployed demand-planning model from planned APIDS trials and an exploratory officer-assistance chatbot. These have different commercial maturity and application boundaries. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

7. Airport Baggage Screening Systems Market, by Offering

Detection Equipment, Screening Automation Equipment, and Screening Software answer different purchasing requirements even when awarded together. ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ Buyers should specify the required inspection role before comparing a complete baggage scanner with a dedicated analyzer or trace detector.

Automation changes the scope a supplier must deliver. ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ An automation specialist should establish whether the purchaser accepts a separate package or requires participation under an accountable prime.

Software functions also create different continuing commitments. ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ A software purchase should identify its intended function, permitted installation, and responsibility for supported changes rather than rely on a broad digital-platform label.

System Services can be separately purchased or attached to equipment. ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ Separate contracting preserves specialist choice, but requires the purchaser to assign responsibilities that a broader package might otherwise consolidate.

Replacement Parts and Consumables support a different purchasing decision from complete replacement. CATSA's 2025 financial statements distinguish maintenance and spare parts from trace consumables, although those categories do not isolate baggage-only activity. ■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Aviation security screening approved equipment list
   - The UK collection distinguishes baggage explosive-detection systems, liquid explosive detectors, trace detectors, consumables, and TIP libraries.
2. Digital Innovation
   - Smiths Detection markets centralized screening, connectivity, equipment monitoring, and detection applications as distinct digital functions.
3. Threat Image Projection (TIP)
   - Relevant UK cabin-baggage TIP libraries require approval and reapproval, while applicable third-party components are assessed within the overall system.
4. Explosive trace detection (ETD) systems: third party consumables
   - The UK publication recognizes approved third-party consumables for explosive trace-detection systems. This does not establish interchangeability of unrelated parts or upgrade kits.

5. Service

   · Smiths Detection offers direct on-site maintenance, technical training, parts support, and tailored service arrangements. A general offering does not establish a prospective installation's coverage.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))

6. AI for Monitoring Aviation Security: Fraport and German Federal Police Start Regular Operation of APIDS

   · On January xx.xx 2026, Fraport reported regular APIDS deployment with Smiths Detection CT equipment following national certification; personnel retained final decisions.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))

7. Liquid Explosive Detector, Bottle Liquid Scanner, Insight

   · Agilent markets Insight systems for airport alarm resolution, including liquid and material-analysis applications.

8. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

   · Newcastle's contract concluded October xx.xx 2022 combined CT scanners, automated tray return, central image processing, installation, and commissioning.

9. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

   · Dublin and Cork used separate professional-service appointments for project controls, design oversight, interface management, and delivery consulting.

10. 2025 Annual Report - Notes to the Financial Statements

    · CATSA's 2025 statements distinguish trace consumables from equipment maintenance and spare parts without isolating baggage-only activity.

    · Taxonomy evidence: The 2025 financial-statement notes separately identify screening labor, trace/consumables, equipment maintenance/spare parts, and intangible assets, supporting their economic distinction without supplying baggage-only allocations. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

11. Holdstow Baggage Screening Equipment

    · The March xx.xx 2026 hold-baggage solicitation requires a supporting maintenance and support agreement.

12. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

    · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

13. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

14. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

15. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

16. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

17. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

18. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

19. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

20. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

21. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
22. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
23. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))

7.1. Detection Equipment

Table 6. Global Airport Baggage Screening Systems Market, by Detection Equipment growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. Aviation security screening approved equipment list

   · Taxonomy evidence: The official equipment collection distinguishes baggage explosive-detection systems, liquid explosive detectors, and explosive-trace equipment from people-screening categories. This supports distinct detector offerings, not a technology-only partition. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment revenue of GBP xx.xx provides an independent equipment-activity scale check, not a global category share. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
   - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management’s Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Actual spending, original budget and reprofile amounts constrain the forecast's purchasing-execution interpretation; they are not a global growth rate. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))

15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.1.1. Baggage Inspection Systems

Table 10. Global Airport Baggage Screening Systems Market Size, by Baggage Inspection Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 11. Global Airport Baggage Screening Systems Market Size, by Baggage Inspection Systems, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Aviation security screening approved equipment list

   · Taxonomy evidence: The inspected collection retains hold-baggage EDS and cabin-baggage EDSCB categories, with EDS guidance dated September xx.xx 2026 and EDSCB guidance dated June xx.xx 2026. These are UK category records, not global sales classifications. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection identifies hold-baggage EDS, cabin-baggage EDSCB, and conventional X-ray equipment as baggage-screening equipment classes. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Baggage EDS/EDSCB and conventional X-ray classes support the inspection-system boundary, not sales weights. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx cumulative CTiX sales corroborate commercial imaging activity and replacement demand; they do not measure annual global sales. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
   - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consolidation of six systems with reduced machine demand qualifies a traffic-to-detector-volume forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.1.2. Explosive Trace Detectors

Table 13. Global Airport Baggage Screening Systems Market Size, by Explosive Trace Detectors, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 14. Global Airport Baggage Screening Systems Market Size, by Explosive Trace Detectors, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Aviation security screening approved equipment list

   · Taxonomy evidence: ETD remains identified for hold and cabin baggage; the linked ETD guidance is dated June xx.xx 2026. Shared people-screening attribution is not resolved. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: ETD equipment is explicitly identified for hold- and cabin-baggage screening, establishing an in-scope trace-detector category. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ETD serves baggage and other applications, requiring explicit baggage attribution rather than allocating all detector sales here. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.1.3. Liquid and Bulk Material Analyzers

Table 16. Global Airport Baggage Screening Systems Market Size, by Liquid and Bulk Material Analyzers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 17. Global Airport Baggage Screening Systems Market Size, by Liquid and Bulk Material Analyzers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 18. Global Airport Baggage Screening Systems Market Size, by Liquid and Bulk Material Analyzers, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Aviation security screening approved equipment list

   · Taxonomy evidence: The collection identifies LEDS for cabin baggage, with its linked guidance dated October xx.xx 2026. It does not establish the entire solid/powder analyzer extension. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: Liquid explosive detection systems are separately identified for cabin-baggage screening; this directly supports the liquid-analyzer portion of the offering. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Liquid detectors are a distinct cabin-baggage category; the complete bulk-material extension remains modeled within the captured boundary. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. Liquid Explosive Detector, Bottle Liquid Scanner, Insight

   · Taxonomy evidence: Agilent's own airport-security offering identifies Insight alarm-resolution systems for liquids and expandable material-analysis applications. This corroborates a baggage-content analyzer offering without establishing the market's complete partition. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

3. EMA Liquid Explosive Detection System

   · Taxonomy evidence: CEIA's own EMA offering describes a dedicated liquid-container screening instrument for airport checkpoints. This corroborates the analyzer product category; its general electromagnetic description does not verify the exact dielectric/microwave platform classification. ([security.ceia-usa.com](https://security.ceia-usa.com/products/ema/))

4. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

5. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

6. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
7. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
8. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

9. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

10. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

11. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

12. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

13. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
14. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
15. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

16. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
17. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
18. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
19. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
20. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

21. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
22. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
23. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
24. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
25. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
26. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
27. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

28. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

29. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

30. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.2. System Services

Table 19. Global Airport Baggage Screening Systems Market, by System Services growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Equipment Training Services	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Installation, Integration, and Commissioning Services	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Maintenance, Repair, and Technical Support	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Planning and Engineering Services	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 20. Global Airport Baggage Screening Systems Market Size, by System Services, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 21. Global Airport Baggage Screening Systems Market Size, by System Services, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 22. Global Airport Baggage Screening Systems Market Size, by System Services, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Airport Security Equipment for Doncaster Sheffield Airport.
   · Taxonomy evidence: Installation, ongoing maintenance, and training are explicitly included in the proposed contract scope, distinct from equipment supply. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx aviation aftermarket revenue supports lifecycle materiality while qualifying transfer of one supplier's mix to the global service allocation. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.

17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

25. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx accounts disclose C$xx.xx maintenance/spares and C$xx.xx training/certification, supporting the service-budget calibration but not global baggage-only shares. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
30. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
31. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

32. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inclusive capital-equipment support covers labor and parts, requiring a single-count economic allocation across services and goods. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
33. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue. ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))

7.2.1. Maintenance, Repair, and Technical Support

Table 23. Global Airport Baggage Screening Systems Market Size, by Maintenance, Repair, and Technical Support, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 24. Global Airport Baggage Screening Systems Market Size, by Maintenance, Repair, and Technical Support, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 25. Global Airport Baggage Screening Systems Market Size, by Maintenance, Repair, and Technical Support, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA 2025 Annual Report - Notes to the Financial Statements

   · Taxonomy evidence: The notes describe vendor commitments for screening-equipment maintenance and spare parts, independently corroborating technical lifecycle spending. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and spare parts are combined in the accounts; the labor-versus-goods split therefore remains modeled. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

2. GETS - Civil Aviation Authority - Holdstow Baggage Screening Equipment, RFx 33811330

   · Taxonomy evidence: A supporting maintenance and support agreement is expressly required alongside the detector procurement. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))

3. Airport Security Equipment for Doncaster Sheffield Airport.

   · Taxonomy evidence: Ongoing equipment maintenance is included as a prospective contract service. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))

4. CATSA Functions, Programs and Activities

   · Taxonomy evidence: Equipment maintenance is explicitly included in CATSA's hold-baggage activity boundary. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

5. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

6. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

7. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

8. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

9. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

10. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

11. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

12. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

13. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

14. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
16. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

17. CATSA - 2025 Annual Report, Management's Discussion and Analysis
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.

18. Leidos - Leidos wins TSA logistics contract, 23 January 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

19. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.

20. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.

21. Eurostat - Air passenger transport: data by month
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

22. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
23. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
24. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
25. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
26. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
27. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
28. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

29. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
30. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
31. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
32. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The baggage-handling cost study uses a modeled xx.xx% labor share, adopted only as an adjacent support-cost proxy. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

7.2.2. Installation, Integration, and Commissioning Services

Table 26. Global Airport Baggage Screening Systems Market Size, by Installation, Integration, and Commissioning Services, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 27. Global Airport Baggage Screening Systems Market Size, by Installation, Integration, and Commissioning Services, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 28. Global Airport Baggage Screening Systems Market Size, by Installation, Integration, and Commissioning Services, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Airport Security Equipment for Doncaster Sheffield Airport.
   · Taxonomy evidence: Installation is an explicit prospective service deliverable; the notice does not prove completed installation. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
2. CATSA Functions, Programs and Activities
   · Taxonomy evidence: CATSA defines hold-baggage activities as including equipment purchase and integration into airport baggage-handling systems. This supports the integration-service category. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brownfield consolidation supports the integration-demand premise, not the forecast's exact service growth factor. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capital definition includes associated installation and integration, supporting the distinction between deployment services and equipment value. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supply, installation and commissioning are included deliverables, supporting deployment-service attribution without establishing its percentage. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

7.2.3. Planning and Engineering Services

Table 29. Global Airport Baggage Screening Systems Market Size, by Planning and Engineering Services, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 30. Global Airport Baggage Screening Systems Market Size, by Planning and Engineering Services, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 31. Global Airport Baggage Screening Systems Market Size, by Planning and Engineering Services, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland

   · Taxonomy evidence: The Dublin and Cork hold-baggage project account identifies separate professional-service contracts for project controls, design oversight, interface management, and multidisciplinary design and delivery consulting. This supports screening-specific planning and engineering services.
   ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue.
   ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate professional-service appointments cover project controls, design oversight and interface management; the broader construction budget is not used as screening-service revenue.
   ([neccontract.com](https://www.neccontract.com/projects/hold-baggage-screening-upgrade-dublin-and-cork-airports-ireland))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

22. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

25. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.2.4. Equipment Training Services

Table 32. Global Airport Baggage Screening Systems Market Size, by Equipment Training Services, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 33. Global Airport Baggage Screening Systems Market Size, by Equipment Training Services, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 34. Global Airport Baggage Screening Systems Market Size, by Equipment Training Services, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Airport Security Equipment for Doncaster Sheffield Airport.

   · Taxonomy evidence: Training is included with the proposed equipment contracts, supporting an equipment-associated training service rather than screening-officer staffing. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))

2. CATSA Functions, Programs and Activities

   · Taxonomy evidence: The hold-baggage activity definition includes management of screening-officer training on detection equipment, supporting equipment-specific training as distinct from equipment supply. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EDS capital expenditure of C$xx.xx includes equipment and installation/integration and supplies the training-calibration denominator, subject to baggage attribution. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/management-discussion-and-analysis))

16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The C$xx.xx training/certification expense supplies the numerator of the adjusted training-to-capital proxy. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
31. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment-specific training and certification are commercial offerings distinct from routine screening staffing. ([smithsdetection.com](https://www.smithsdetection.com/service/))

7.3. Replacement Parts and Consumables

Table 35. Global Airport Baggage Screening Systems Market, by Replacement Parts and Consumables growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Detection Consumables	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Replacement Parts and Upgrade Kits	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 36. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Consumables, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 37. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Consumables, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 38. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Consumables, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA 2025 Annual Report - Notes to the Financial Statements

   · Taxonomy evidence: Reported expense and commitment categories include spare parts and trace consumables, supporting aftermarket activity rather than an equipment-only boundary. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. Aviation security screening approved equipment list
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

30. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

31. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))

7.3.1. Replacement Parts and Upgrade Kits

Table 39. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Upgrade Kits, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 40. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Upgrade Kits, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 41. Global Airport Baggage Screening Systems Market Size, by Replacement Parts and Upgrade Kits, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA 2025 Annual Report - Notes to the Financial Statements

   · Taxonomy evidence: Equipment maintenance and spare parts appear in expenses and vendor commitments. Parts are combined with maintenance; physical upgrade kits and baggage-only amounts are not separately established. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Quantifying the Impacts of Delayed Maintenance of Airport Assets: A Guide - Chapter 6, Baggage Handling Systems
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Its corresponding modeled xx.xx% parts share calibrates the labor/goods separation; it is not an observed screening-equipment ratio. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
30. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The parts-support offering and inclusive contracts corroborate the goods boundary, but not the assumed xx.xx% allocation. ([smithsdetection.com](https://www.smithsdetection.com/service/))

7.3.2. Detection Consumables

Table 42. Global Airport Baggage Screening Systems Market Size, by Detection Consumables, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 43. Global Airport Baggage Screening Systems Market Size, by Detection Consumables, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 44. Global Airport Baggage Screening Systems Market Size, by Detection Consumables, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Aviation security screening approved equipment list

   · Taxonomy evidence: The collection retains an ETD third-party-consumables publication dated March xx.xx 2026, independently distinguishing dedicated consumables from finished instruments. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Taxonomy evidence: The collection separately recognizes approved ETD consumables. Attribution to baggage rather than shared people-screening use still requires allocation. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated ETD consumables are separately recognized, supporting goods classification without establishing spending or unrestricted interchangeability. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))

2. CATSA 2025 Annual Report - Notes to the Financial Statements
   - Taxonomy evidence: Trace and consumables appear as an expense category, but their property-screening allocation is not disclosed here. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx trace/consumables is distinct from maintenance/spares and supplies the contrary consumables-intensity comparator, not a global observation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

7.4. Screening Automation Equipment

Table 45. Global Airport Baggage Screening Systems Market, by Screening Automation Equipment growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Screening Conveyors and Sortation Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Screening Lanes and Tray-Return Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 46. Global Airport Baggage Screening Systems Market Size, by Screening Automation Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 47. Global Airport Baggage Screening Systems Market Size, by Screening Automation Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 48. Global Airport Baggage Screening Systems Market Size, by Screening Automation Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition
   - Taxonomy evidence: The jointly prepared guidance explicitly includes automated tray return, baggage-handling systems, and conveyors supporting X-ray equipment as hardware building blocks. This establishes screening-support functions, not inclusion of whole baggage-handling projects. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

7.4.1. Screening Lanes and Tray-Return Systems

Table 49. Global Airport Baggage Screening Systems Market Size, by Screening Lanes and Tray-Return Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 50. Global Airport Baggage Screening Systems Market Size, by Screening Lanes and Tray-Return Systems, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 51. Global Airport Baggage Screening Systems Market Size, by Screening Lanes and Tray-Return Systems, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Airport Security Equipment for Doncaster Sheffield Airport.
   · Taxonomy evidence: The August xx.xx 2025 preliminary procurement identifies tray-return systems separately from screening machines. It establishes intended purchasing categories, not an awarded or delivered sale. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The seven-system award includes automated tray return, demonstrating bundled purchasing but no separately priced hardware allocation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

7.4.2. Screening Conveyors and Sortation Equipment

Table 52. Global Airport Baggage Screening Systems Market Size, by Screening Conveyors and Sortation Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 53. Global Airport Baggage Screening Systems Market Size, by Screening Conveyors and Sortation Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 54. Global Airport Baggage Screening Systems Market Size, by Screening Conveyors and Sortation Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition
   - Taxonomy evidence: Screening-support conveyors are expressly recognized. Separately purchasable conveyor/reject-sortation values remain a transaction-level gap. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
2. CATSA Functions, Programs and Activities
   - Taxonomy evidence: Integration into baggage-handling systems establishes the screening/transport interface, but does not separately identify conveyor equipment prices or justify including an entire baggage-handling system. Support for this physical offering remains partial. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consolidation project supports integration-driven conveyor demand, but its whole-project value is excluded. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated CT/tray-return scope constrains the automation interface boundary; it does not value general airport conveyors. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

7.5. Screening Software

Table 55. Global Airport Baggage Screening Systems Market, by Screening Software growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Automated Threat Detection Software	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Image Review and Management Software	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Screener Training and Quality Assurance Software	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Screening Connectivity and Fleet Management Software	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 56. Global Airport Baggage Screening Systems Market Size, by Screening Software, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 57. Global Airport Baggage Screening Systems Market Size, by Screening Software, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 58. Global Airport Baggage Screening Systems Market Size, by Screening Software, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. CATSA 2025 Annual Report - Notes to the Financial Statements
   · Taxonomy evidence: Separately acquired software licenses are capitalized; this accounting policy does not identify baggage-specific software functions or purchases. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/notes-financial-statements))
2. Airport Security Equipment for Doncaster Sheffield Airport.
   · Taxonomy evidence: The proposed procurement includes software licenses alongside equipment and services, supporting software as an identifiable purchasing component without establishing every functional software subclass. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025?origin=SearchResults&p=xx.xx))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: January xx.xx 2026 APIDS deployment demonstrates additional software adoption, without establishing separate revenue. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor. ([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

31. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
32. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

7.5.1. Image Review and Management Software

Table 59. Global Airport Baggage Screening Systems Market Size, by Image Review and Management Software, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 60. Global Airport Baggage Screening Systems Market Size, by Image Review and Management Software, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition

   · Taxonomy evidence: Software building blocks include viewing stations, image distribution/multiplexing, and data storage, distinguishing image-review/management functions from sensing hardware. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Taxonomy evidence: The guidance addresses sharing screening data across equipment and applications, supporting the image-data-management function but not a standalone image-review purchase. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

2. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

   · Taxonomy evidence: Central image processing is an explicit component of the awarded package, corroborating purchased image-review functionality but not an independently priced license. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is an explicit purchased function, without a separately disclosed license price. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Centralized screening supports the image-review function, not an observed software revenue weight. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

7.5.2. Automated Threat Detection Software

Table 62. Global Airport Baggage Screening Systems Market Size, by Automated Threat Detection Software, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 63. Global Airport Baggage Screening Systems Market Size, by Automated Threat Detection Software, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The capital-plan paragraph mentioning detection-algorithm and hardware improvements explicitly concerns full-body scanners. It cannot establish baggage detection-software upgrade demand; that previous binding is narrowed. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Taxonomy evidence: The plan identifies ongoing upgrades to screening equipment with detection algorithms. It supports upgrade demand, not an assumption that all algorithm value is separately licensed. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

2. Smart Security Guidance Document - Cabin Baggage Screening (2019)

   · Taxonomy evidence: The equipment-intelligence section treats algorithmic image analysis and automated target recognition as functions that support or automate screening decisions. This supports the software function, not standalone pricing. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))

3. CEP implements testing of APIDS and EVD, extending the programme to nine categories of security equipment

   · Taxonomy evidence: ECAC's February 2023 notice recognizes Automated Prohibited Item Detection Systems as a distinct security-equipment evaluation category. Category recognition does not establish authorization or sales for any particular implementation. ([ecac-ceac.org](https://www.ecac-ceac.org/news/cep-implements-testing-of-apids-and-evd-extending-the-programme-to-nine-categories-of-security-equipment))

4. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

5. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

6. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
7. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
8. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

9. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

10. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

11. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

12. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

13. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
14. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
15. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

16. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
17. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
18. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
19. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
20. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

21. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

22. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

23. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment on more than xx.xx CT scanners is the independent quantitative rollout test; it does not validate the modeled license-growth factor.
([fraport.com](https://www.fraport.com/en/newsroom/press-releases/2026/q1/ai-for-monitoring-aviation-security.html))

24. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

25. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

26. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

27. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
28. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
29. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
30. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
31. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies detection applications as a commercial function; separate fee allocation remains assumed. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

7.5.3. Screening Connectivity and Fleet Management Software

Table 65. Global Airport Baggage Screening Systems Market Size, by Screening Connectivity and Fleet Management Software, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition

   · Taxonomy evidence: Control/monitoring, management tools, reporting, and predictive maintenance are identified functions. Their separate commercial allocation is not established by the framework. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Taxonomy evidence: Security-equipment control, monitoring, data sharing, and user administration are identified as distinct architectural functions. This supports connectivity and management functionality, not transaction pricing. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

2. Overview Management Server

   · Taxonomy evidence: Agilent presents Overview Management Server as centralized management for connected Insight200M systems. This corroborates a dedicated screening-equipment management software product, but not separately itemized airport spending. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-software-tools-libraries/overview-management-server))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

· Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

26. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Connectivity, multi-vendor integration and equipment-health applications establish the fleet-management function without proving customer-specific rights or prices. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

7.5.4. Screener Training and Quality Assurance Software

Table 68. Global Airport Baggage Screening Systems Market Size, by Screener Training and Quality Assurance Software, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 69. Global Airport Baggage Screening Systems Market Size, by Screener Training and Quality Assurance Software, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 70. Global Airport Baggage Screening Systems Market Size, by Screener Training and Quality Assurance Software, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Aviation security screening approved equipment list
   · Taxonomy evidence: TIP library software remains separately listed, with guidance dated September xx.xx 2026; this does not establish standalone transaction values. ([gov.uk](https://www.gov.uk/government/collections/aviation-security-screening-approved-equipment-list))
2. Threat image projection (TIP) library software
   · Taxonomy evidence: The official TIP publication identifies an approved library of fictional threat images for aviation screening equipment and requires machine/library compatibility checks. This supports a dedicated image-training and quality-assurance software category. ([gov.uk](https://www.gov.uk/government/publications/threat-image-projection-library-software))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

26. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. UK Civil Aviation Authority - Threat Image Projection (TIP)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: TIP library approval and renewal obligations support continuing software commitments, not the modeled global fee or share. ([caa.co.uk](https://www.caa.co.uk/commercial-industry/security/training-and-human-factors/threat-image-projection/))

8. Airport Baggage Screening Systems Market, by Detection Platform

■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■ These purchasing records support application-specific platform selection: a buyer should follow its authorized mission and investment program rather than infer that every projection installation faces the same replacement requirement. Plans and solicitations do not establish completed deployment.

Ion Mobility Spectrometry and Mass Spectrometry provide documented alternatives within the trace-detection role. Smiths Detection identifies IONSCAN xx.xx as an IMS offering used in baggage screening; 1st Detect markets TRACER xx.xx mass-spectrometry equipment for passenger and baggage screening. ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■ ■■■■■■■

X-Ray Diffraction and Raman Spectroscopy have different evidenced commercial positions. CEA-Leti documented the marketed introduction of Smiths Detection's SDX xx.xx XDi airport baggage scanner in 2024. ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■

Dielectric and Microwave Analysis has supplier-positioned airport liquid-screening offerings: Securina identifies microwave-based liquid detection and markets the SA1000 for airport and customs settings. ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■ Buyers should evaluate the complete supported configuration rather than treat its constituent sensing capabilities as separate substitute products.

For Magnetic Resonance, Fluorescence Detection, Chemiluminescence Detection, and Thermo-Redox Detection, a defensible airport purchase still requires a named offered configuration, application-specific acceptance, and a continuing support counterparty. ■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■

■■■■■■■■■■■■■ The appropriate commercial trigger is a documented offering and applicable purchasing or authorization record, not a technical-category label or historical research relationship.

Figure 10. Global Airport Baggage Screening Systems Market Size, by Detection Platform, 2025 (%)

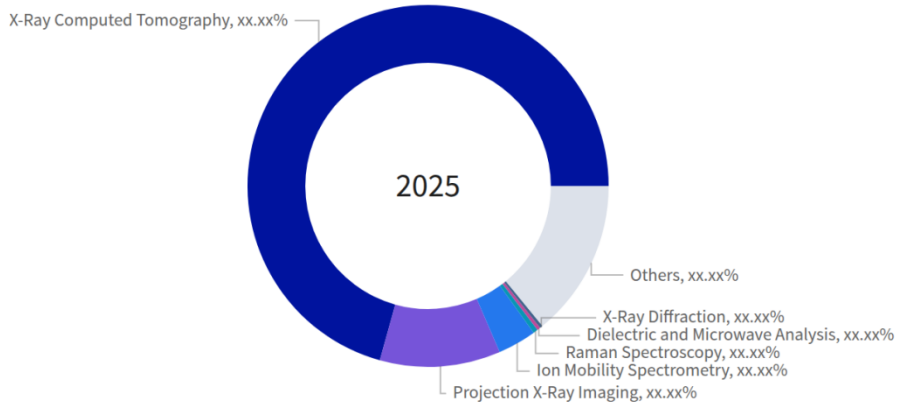

Figure 11. Global Airport Baggage Screening Systems Market, by Detection Platform, 2032 (USD Million)

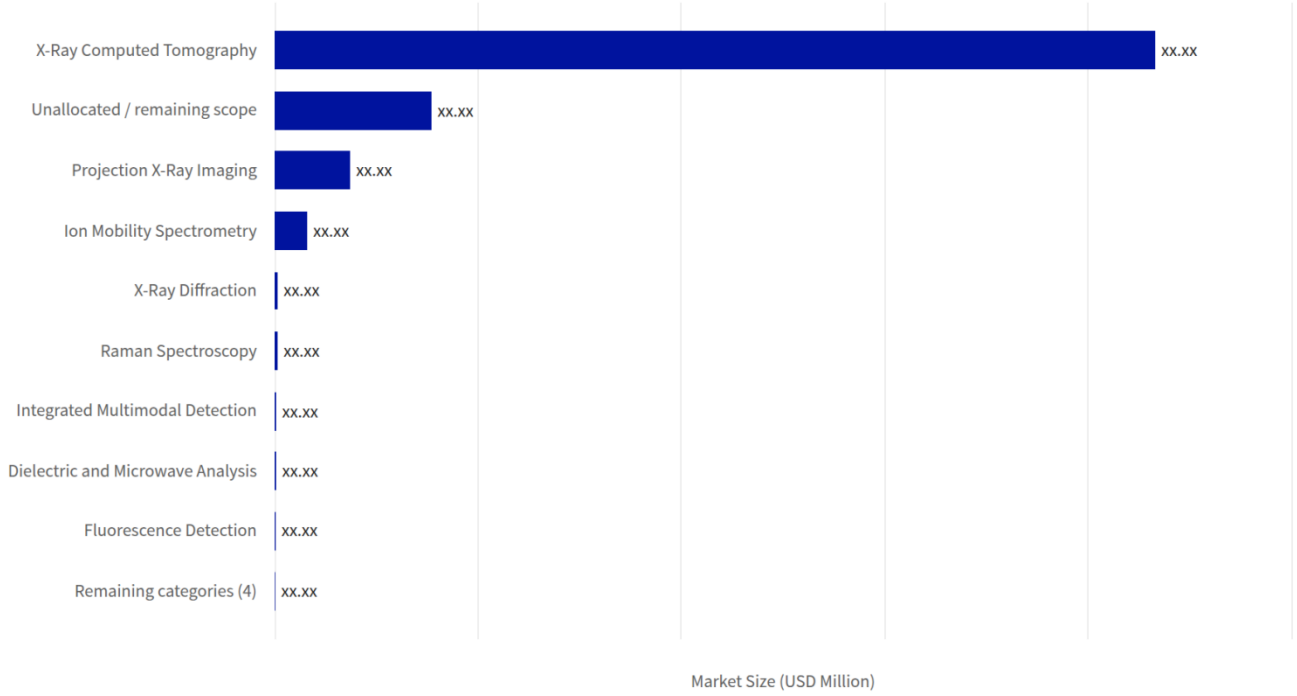

Table 71. Global Airport Baggage Screening Systems Market, by Detection Platform growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. Liquid Explosive Detector, Bottle Liquid Scanner, Insight

   · The Insight offering identifies Raman technology and positions the products for airport alarm resolution; this does not independently establish local authorization.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

2. Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview
   - CATSA's 2025-2026 to 2029-2030 plan distinguishes CT replacement at major pre-board checkpoints from single-view-to-multiview replacement at non-passenger checkpoints and Class xx.xx airports. These are plans, not completed deployments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.
3. Holdstow Baggage Screening Equipment
   - The solicitation specifies CT explosive-detection equipment for hold baggage; its intended award and installation dates do not establish completed events.
4. The Transportation Security Administration adds IONSCAN 600 Explosives Trace Detector to Qualified ETD Technology on the Air Cargo Screening Technology List
   - Smiths Detection identifies IONSCAN xx.xx as an IMS product and describes baggage-screening use. The announcement's cargo qualification does not establish universal baggage-procurement eligibility.
5. Tracer 1000 ETD
   - 1st Detect markets TRACER xx.xx as a mass-spectrometry explosive trace detector and identifies passenger and baggage screening as airport applications.
6. X-Ray Diffraction: Introducing a new era in threat detection
   - CEA-Leti's July xx.xx 2024 account identifies the marketed Smiths Detection SDX xx.xx XDi airport baggage scanner as using X-ray diffraction. It establishes commercial introduction, not a particular airport's authorization or purchase.
7. Bottle Liquid Scanner for Sale from China
   - Securina describes microwave-based liquid detection and positions its SA1000 offering for airport security and customs. The page establishes supplier positioning rather than local authorization.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

8. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

   · Battelle describes the LS10 liquid scanner as combining radio-frequency and ultrasonic capabilities in one product, supporting a complete multimodal offering rather than separate substitute instruments.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

9. Liquids scanner for airport security

   · UC Davis's February xx.xx 2011 account describes an airport magnetic-resonance development contract and licensing relationships. That historical record does not establish a current supported airport offering.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))

10. Smart Security Guidance Document - Cabin Baggage Screening (2019)

    · Taxonomy evidence: The guidance distinguishes single-view, dual/multiview, and computed-tomography equipment, while treating detection algorithms as equipment intelligence rather than separate imaging modalities. Its 2019 maturity observations are historical. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))

11. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

    · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

12. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

13. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

14. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
15. Smiths Group PLC - Annual Report & Accounts FY2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
16. Smiths Group PLC - Annual Report FY2022
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

17. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

18. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

19. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

20. Port of Seattle - Baggage Handling System Optimization

    · Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

21. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
22. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
23. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
24. Partners - HALO X-ray Technologies Ltd
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

25. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.

26. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))

27. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

28. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))

29. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

30. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))

31. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))

32. Explosive Detection - Teledyne FLIR Defense

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

33. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

34. Portable Explosive Detector - Trace Detector EVD-3000+

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

35. CATSA's Purchase Order Terms and Conditions

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.

8.1. X-Ray Computed Tomography

Table 73. Global Airport Baggage Screening Systems Market Size, by X-Ray Computed Tomography, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. GETS - Civil Aviation Authority - Holdstow Baggage Screening Equipment, RFx 33811330

   · Taxonomy evidence: The March xx.xx 2026 RFP explicitly seeks CT explosive-detection systems for hold baggage, independently linking the purchased platform and baggage context. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))

2. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: CT X-rays are separately identified in the pre-board equipment replacement program, establishing a commercial purchasing distinction from projection equipment. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CT replacement is a stated major-checkpoint investment priority, subject to funding and delivery risks; this supports direction, not the modeled global share.

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; cumulative sales constrain commercial scale but are not annual global shipments. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

30. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the existence of manufacturer lifecycle offerings; broad service-footprint counts are not used as CT revenue weights.
31. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual price limits constrain the pricing premise, but do not verify CT-specific global support receipts.

8.2. Projection X-Ray Imaging

Table 76. Global Airport Baggage Screening Systems Market, by Projection X-Ray Imaging growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Multiview X-Ray Imaging	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Single-View X-Ray Imaging	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	N/A	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**N/A**	**xx.xx**

Table 77. Global Airport Baggage Screening Systems Market Size, by Projection X-Ray Imaging, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 78. Global Airport Baggage Screening Systems Market Size, by Projection X-Ray Imaging, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The capital plan distinguishes existing single-view and multiview X-ray equipment from CT replacement, providing demand-side support for a projection-imaging family. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CATSA distinguishes major-checkpoint CT replacement from single-view-to-multiview replacement elsewhere, supporting application-specific projection demand and forecast assumptions. It also discloses capital funding subject to reprofile approval. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.

2. Smart Security Guidance Document - Cabin Baggage Screening (2019)

   · Taxonomy evidence: Single- and multiview equipment produce projection views, whereas CT is described separately as tomographic imaging. This supports the projection-versus-CT classification rule. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-Cabin-Baggage-Screening_2019.pdf?_cldee=AjxdtOqtLf7W_ZF84_jihyK3eMUGWY7tCnaqBNxE1JbGVj5__s_TKT3exxYt_KCo&esid=2a8c150d-5c6f-4b7d-b5fc-e9fbe332494e&recipientid=lead-dc237e2665ccec11a7b5000d3a848411-c9ddf21e8a604678b0bdcf85d521a454))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inclusive labor-and-parts contracts and manufacturer support, supporting nonduplicative lifecycle attribution to projection equipment, not a verified xx.xx% fee. ([smithsdetection.com](https://www.smithsdetection.com/service/))
31. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract terms constrain maintenance, parts and consumables escalation, qualifying unrestricted aftermarket pricing assumptions in the projection lifecycle model. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

8.2.1. Multiview X-Ray Imaging

Table 80. Global Airport Baggage Screening Systems Market Size, by Multiview X-Ray Imaging, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 81. Global Airport Baggage Screening Systems Market Size, by Multiview X-Ray Imaging, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: Multiview X-ray versions are identified as planned replacements for single-view equipment in specified airport screening contexts. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multiview remains a planned purchasing destination at non-passenger checkpoints and Class xx.xx airports, qualifying universal CT substitution.

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

8.2.2. Single-View X-Ray Imaging

Table 83. Global Airport Baggage Screening Systems Market Size, by Single-View X-Ray Imaging, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. CATSA Corporate Plan 2025-26 to 2029-30 Summary - Financial Overview

   · Taxonomy evidence: The plan explicitly identifies single-view X-ray machines as a replacement population. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/corporate-plan-2025-xx.xx-2029-xx.xx/financial-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies single-view equipment as a replacement population, supporting the modeled displacement mechanism rather than an observed global share.

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

8.3. Ion Mobility Spectrometry

Table 86. Global Airport Baggage Screening Systems Market Size, by Ion Mobility Spectrometry, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 87. Global Airport Baggage Screening Systems Market Size, by Ion Mobility Spectrometry, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ASTM E2520-26 - Standard Practice for Measuring and Scoring Performance of Trace Explosive Chemical Detectors

   · Taxonomy evidence: The publicly available scope of ASTM E2520-xx.xx identifies ion mobility spectrometry as a trace-detector technology. This establishes platform terminology, not airport approval, deployment, or sales. ([store.astm.org](https://store.astm.org/e2520-xx.xx.html))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Smiths Detection - Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports commercial maintenance, refurbishment and parts offerings for portable equipment without establishing baggage-specific service receipts.
30. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IONSCAN xx.xx list-price configurations around USD xx.xx-xx.xx constrain the IMS price class; they do not establish 2025 purchasing volumes or realizations. ([dhs.gov](https://dhs.gov/sites/default/files/2021-xx.xx/SAVER_Explosives%20Trace%20Detectors%20MSR_08Nov2021_Final-xx.xx.pdf))
31. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance and consumable escalation limits qualify the trace-platform pricing assumption rather than establishing the modeled IMS share.

8.4. Raman Spectroscopy

Table 89. Global Airport Baggage Screening Systems Market Size, by Raman Spectroscopy, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 90. Global Airport Baggage Screening Systems Market Size, by Raman Spectroscopy, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 91. Global Airport Baggage Screening Systems Market Size, by Raman Spectroscopy, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Liquid Explosive Detector, Bottle Liquid Scanner, Insight

   · Taxonomy evidence: The offering explicitly identifies spatially offset Raman spectroscopy for airport threat detection, establishing Raman as a commercially offered sensing platform in the captured boundary. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Raman-based airport resolution products and dated September 2025 launch and May 2026 contract announcements. Supports category continuity and adoption premises, not global unit or revenue shares. ([agilent.com](https://www.agilent.com/en/product/molecular-spectroscopy/raman-spectroscopy/raman-aviation-security-systems/insight-series-alarm-resolution-systems))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

8.5. Dielectric and Microwave Analysis

Table 92. Global Airport Baggage Screening Systems Market Size, by Dielectric and Microwave Analysis, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 93. Global Airport Baggage Screening Systems Market Size, by Dielectric and Microwave Analysis, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 94. Global Airport Baggage Screening Systems Market Size, by Dielectric and Microwave Analysis, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
15. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
16. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
17. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

18. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
19. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
20. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
21. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
22. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
23. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
24. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
26. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
28. Bottle Liquid Scanner for Sale from China - Securina
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Positions microwave-based liquid-screening products for airports and customs. Supports commercial classification only; prices, authorization and purchasing weights remain assumptions. ([securinadetection.com](https://www.securinadetection.com/Bottle-Liquid-Scanner-Manufacturer-China.html))

8.6. X-Ray Diffraction

Table 95. Global Airport Baggage Screening Systems Market Size, by X-Ray Diffraction, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 96. Global Airport Baggage Screening Systems Market Size, by X-Ray Diffraction, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 97. Global Airport Baggage Screening Systems Market Size, by X-Ray Diffraction, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. X-Ray Diffraction: Introducing a new era in threat detection

   · Taxonomy evidence: CEA-Leti's July xx.xx 2024 account identifies an X-ray-diffraction module in the marketed SDX xx.xx XDi airport baggage scanner. It establishes a commercial platform introduction, not delivered airport sales or regulatory authorization. ([leti-cea.com](https://www.leti-cea.com/cea-tech/leti/english/Pages/What%27s-On/News/smiths-detection.aspx))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports four operating XDi units as of July 2025 and pending regulatory certification, constraining the small XRD cohort and qualifying aggressive commercialization assumptions.

6. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. ECAC CEP Public Equipment List - Explosive Detection Systems, Update 18 April 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April xx.xx 2025 list retains XRD xx.xx supporting the legacy commercial-category premise but not the assumed installed cohort or sales volume. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-EDS-equipment_public_list_update_20250418.pdf))
30. Partners - HALO X-ray Technologies Ltd
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Named airport pilots and approximately USD xx.xx and USD xx.xx development programs establish commercialization activity and program scale, not realized annual XRD equipment revenue. ([haloxray.com](https://www.haloxray.com/partners))

8.7. Integrated Multimodal Detection

Table 98. Global Airport Baggage Screening Systems Market Size, by Integrated Multimodal Detection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 99. Global Airport Baggage Screening Systems Market Size, by Integrated Multimodal Detection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 100. Global Airport Baggage Screening Systems Market Size, by Integrated Multimodal Detection, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Quick, Accurate Threat-Detection Scanner for Liquid, Aerosol, and Gels Eases and Secures Air Travel Worldwide

   · Taxonomy evidence: Battelle describes its LS10 airport liquid scanner as combining radio-frequency and ultrasonic technology with data fusion in one product. This supports an integrated multimodal category, not separate counting of its constituent sensing capabilities. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies LS10 as a complete commercial liquid scanner combining RF and ultrasonic capabilities, supporting nonduplicative complete-product attribution. ([battelle.org](https://www.battelle.org/insights/case-studies/case-study-details/quick-accurate-threat-detection-scanner-for-liquid-aerosol-and-gels-eases-and-secures-air-travel-worldwide))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.

27. Sydney Airport - Traffic and Operational Performance Q4 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

8.8. Fluorescence Detection

Table 101. Global Airport Baggage Screening Systems Market Size, by Fluorescence Detection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 102. Global Airport Baggage Screening Systems Market Size, by Fluorescence Detection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 103. Global Airport Baggage Screening Systems Market Size, by Fluorescence Detection, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

5. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
6. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
15. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
16. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
17. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

18. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
19. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
20. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
21. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
22. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
23. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
24. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
26. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
28. Explosives Trace Detectors (ETDs): Market Survey Report, November 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Fido X4 historical USD xx.xx list-price benchmark supports the explicit nominal-price bridge; baggage attribution and unit mix remain modeled.
29. Explosive Detection - Teledyne FLIR Defense
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists offered Fido X-series products and service support, supporting commercial offering continuity only, not airport-specific eligibility or sales weights. ([flir.com](https://www.flir.com/threat-detection/explosives/))

8.9. Chemiluminescence Detection

Table 104. Global Airport Baggage Screening Systems Market Size, by Chemiluminescence Detection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 105. Global Airport Baggage Screening Systems Market Size, by Chemiluminescence Detection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 106. Global Airport Baggage Screening Systems Market Size, by Chemiluminescence Detection, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
5. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
15. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
16. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
17. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

18. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
19. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
20. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
21. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
22. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
23. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
24. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
26. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
28. Scintrex Trace E3500 Explosive Trace Detection Unit - SecurityPro USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers E3500 chemiluminescence equipment and identifies customs/border applications. Supports a commercial category lead, not measured airport purchasing or the assumed price. ([securityprousa.com](https://www.securityprousa.com/collections/explosive-detection/products/scintrex-trace-e3500-explosive-trace-detection-unit))

8.10. Thermo-Redox Detection

Table 107. Global Airport Baggage Screening Systems Market Size, by Thermo-Redox Detection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 108. Global Airport Baggage Screening Systems Market Size, by Thermo-Redox Detection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 109. Global Airport Baggage Screening Systems Market Size, by Thermo-Redox Detection, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

5. Smiths Group PLC - Annual Report & Accounts FY2023

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
15. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
16. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
17. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

18. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
19. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
20. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
21. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
22. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
23. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
24. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
26. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
28. Portable Explosive Detector - Trace Detector EVD-3000+
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The distributor offers EVD-xx.xx+ thermo-redox equipment. Supports offered-product classification, not airport authorization, purchasing volume or the modeled realization. ([securityprousa.com](https://www.securityprousa.com/products/scintrex-trace-evd-xx.xx-portable-trace-detection-unit))

8.11. Magnetic Resonance

Table 110. Global Airport Baggage Screening Systems Market Size, by Magnetic Resonance, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
2. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

3. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

4. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

5. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

6. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
7. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
8. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
9. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

10. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
11. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
12. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

13. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
14. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
15. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
16. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
17. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

18. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
19. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
20. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
21. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
22. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
23. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
24. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

25. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
26. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
27. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
28. ECAC CEP Public Equipment List - Liquid Explosive Detection Systems, Update 10 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 list includes One Resonance Sensors MobiLab BLS. This supports retained listed status for a named product, not active supply, paid installed stock or observed receipts. ([ecac-ceac.org](https://www.ecac-ceac.org/images/activities/security/ECAC-CEP-LEDS%20equipment%20public%20list-update%xx.xx-xx.xx-rev1.pdf))
29. MobiLab BLS Bottled Liquid Scanner Endorsed By European Civil Aviation Conference
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's May xx.xx 2014 announcement identifies MobiLab BLS as an NMR-based airport liquid scanner and states that orders were being accepted. Establishes historical commercial offering, not 2025 deliveries. ([prnewswire.com](https://www.prnewswire.com/news-releases/mobilab-bls-bottled-liquid-scanner-endorsed-by-european-civil-aviation-conference-xx.xx.html))

30. SafePointe BLS Powered by ORS - Bottled Liquid Explosives Detection Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The branded supplier brochure documents an ORS-powered bottled-liquid product channel. Its availability does not establish current orders or support continuity; it supports only the legacy-channel modeling premise. ([uploads-ssl.webflow.com](https://uploads-ssl.webflow.com/608330bcae48962bf6d7ff37/6149f80be6c30d34b5e3debe_BLS-Flyer-Compressed.pdf))
31. Florida Division of Corporations - One Resonance Sensors, LLC, Entity Detail
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official registry records One Resonance Sensors, LLC as inactive following administrative dissolution on September xx.xx 2019. This counterevidence constrains continuity assumptions but does not prove zero surviving product support. ([search.sunbiz.org](https://search.sunbiz.org/Inquiry/CorporationSearch/SearchResultDetail?aggregateId=flal-l11000122986-c57f60b3-690d-4c87-836a-9aeb045075e8&directionType=CurrentList&inquirytype=EntityName&listNameOrder=ONERESONANCESENSORS+L110001229860&searchNameOrder=ONERESONANCESENSORS+L110001229860&searchTerm=ONE+RED+AMPERSAND+LLC))
32. Liquids Scanner for Airport Security - UC Davis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2011 account establishes a development contract and licensing relationship. Its development allocation is excluded from 2025 receipts and does not establish a surviving commercial cohort. ([ucdavis.edu](https://www.ucdavis.edu/news/liquids-scanner-airport-security))

8.12. Mass Spectrometry

Table 113. Global Airport Baggage Screening Systems Market Size, by Mass Spectrometry, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ASTM E2520-26 - Standard Practice for Measuring and Scoring Performance of Trace Explosive Chemical Detectors

   · Taxonomy evidence: The same standards scope explicitly identifies mass spectrometry as a trace-detector technology distinct from IMS. Airport-specific commercial attribution remains a separate evidence requirement. ([store.astm.org](https://store.astm.org/e2520-xx.xx.html))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses FY2025 product and service revenue, xx.xx deployment locations, and a six-unit USD xx.xx order. These provide a price comparator and supplier-scale check, not baggage-only revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20250630_10k.htm))
30. Astrotech Corporation - Form 10-K for the Fiscal Year Ended June 30, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports eight TRACER units sold in FY2025 versus three in FY2026, identifies grant-related revenue within FY2025 product revenue, and describes a potential subsidiary sale. These constrain MS attribution and forecast optimism. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/astc20260630_10k.htm))

9. Airport Baggage Screening Systems Market, by Interoperability Architecture

[illegible] The executed license, supporting documentation, warranty provisions, and applicable approval still determine what a purchaser can change. Buyers retaining a closed arrangement should obtain explicit continuity and transition commitments rather than presume either unrestricted access or unavoidable lock-in.

[illegible] A buyer should identify the combinations covered by the supplier's commitment and who accepts responsibility when another supplier changes its product. This route is attractive when the platform provider accepts enforceable integration and support obligations; it is less suitable when the purchaser needs substitution rights that the contract does not provide.

Open Standards-Based Interoperability requires a defined scope, not an all-or-nothing marketing designation. The joint airport-security open-architecture framework permits identified partial compliance and warns that modular arrangements can shift responsibilities toward an integrator. [illegible]

Figure 12. Global Airport Baggage Screening Systems Market Size, by Interoperability Architecture, 2025 (%)

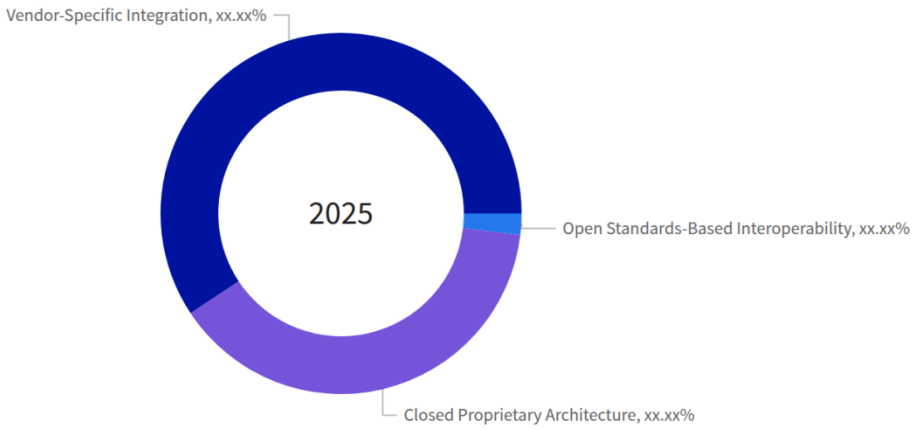

Figure 13. Global Airport Baggage Screening Systems Market, by Interoperability Architecture, 2032 (USD Million)

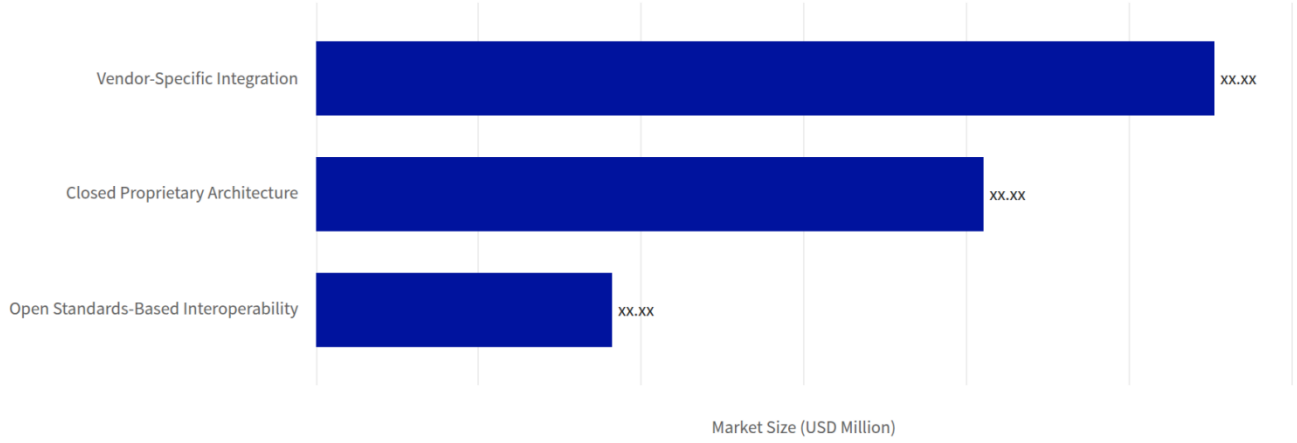

Table 116. Global Airport Baggage Screening Systems Market, by Interoperability Architecture growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Closed Proprietary Architecture	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Standards-Based Interoperability	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vendor-Specific Integration	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 117. Global Airport Baggage Screening Systems Market Size, by Interoperability Architecture, 2017-2040 (USD Million)

Interoperability Architecture	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Proprietary Architecture	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Standards-Based Interoperability	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vendor-Specific Integration	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Digital Innovation

· ELECTORA is positioned to integrate multi-vendor devices, datasets, and applications; the public description does not grant customer-specific substitution rights.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))

2. CATSA's Purchase Order Terms and Conditions

· CATSA's standard terms grant broad use and modification rights over pre-existing software without transferring its ownership, subject to the applicable purchase arrangement.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))

3. Open Architecture for Airport Security Systems, Second Edition
   - The joint framework distinguishes integration from interoperability, permits identified partial compliance, and discusses responsibility allocation to an accountable integrator in modular arrangements.
   - Taxonomy evidence: The framework distinguishes integration from interoperability and permits identified partial compliance. It therefore does not justify classifying a whole purchase as open from one format claim. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Taxonomy evidence: The joint guidance distinguishes proprietary end-to-end integration from interoperability using documented interfaces and standards. The proposed three-part partition is an analytical application, not a published certification scheme. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))
4. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

5. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
6. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
7. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
8. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

9. Smiths Group PLC - Annual Report FY2022

   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

10. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

11. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

12. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

13. Port of Seattle - Baggage Handling System Optimization

- Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

14. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

15. CATSA 2025 Annual Report - Overview of Activities

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

16. CATSA - Beyond the Checkpoint, December 2025

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))

17. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

18. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements. ([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

19. Scarabee's Checkpoint Property Screening System to be deployed at DEN

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

9.1. Vendor-Specific Integration

Table 118. Global Airport Baggage Screening Systems Market Size, by Vendor-Specific Integration, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 119. Global Airport Baggage Screening Systems Market Size, by Vendor-Specific Integration, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 120. Global Airport Baggage Screening Systems Market Size, by Vendor-Specific Integration, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition

   · Taxonomy evidence: The guidance distinguishes integration from interoperable component connections. Vendor-specific integration is an inferred intermediate commercial category requiring configuration evidence. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integration does not guarantee interoperability; this constrains attribution of vendor-mediated configurations. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The deployed configuration mix underlies the xx.xx/xx.xx newer-cohort and xx.xx/xx.xx older-cohort proxy calculations; global and contractual attribution remain modeled. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Smiths Detection - Digital Innovation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELECTORA is offered for integrating multi-vendor devices, datasets and applications; establishes the vendor-platform category but discloses no category revenue or customer-specific substitution entitlement. ([smithsdetection.com](https://www.smithsdetection.com/digital-innovation/))
30. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines across xx.xx airports serving more than xx.xx% of passengers in 2024/xx.xx; provides an independent integration-activity check, not a direct value allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

31. CATSA - Beyond the Checkpoint, December 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx operational CT machines at eight airports and a modular-line average of xx.xx passengers per hour versus xx.xx for traditional multi-split lines; supports the bounded throughput-to-unit bridge and phased-deployment premise. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/about-us/beyond-checkpoint-2025-december))
32. Scarabee's Checkpoint Property Screening System to be deployed at DEN
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a xx.xx-lane Denver award combining Scarabee lanes with Smiths scanners. Corroborates a commercial mixed-supplier integration route; an award is not realized annual revenue or proof of unrestricted interoperability. ([daifukuatec.com](https://daifukuatec.com/news/scarabees-checkpoint-property-screening-system-to-be-deployed-at-den))

9.2. Closed Proprietary Architecture

Table 121. Global Airport Baggage Screening Systems Market Size, by Closed Proprietary Architecture, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 122. Global Airport Baggage Screening Systems Market Size, by Closed Proprietary Architecture, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 123. Global Airport Baggage Screening Systems Market Size, by Closed Proprietary Architecture, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

RESEARCH SAMPLE REPORT

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition

   · Taxonomy evidence: The discussion of proprietary systems and barriers supports the closed-architecture concept; it does not identify the contractual restrictions of individual purchases. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes proprietary integration from interoperable connections, supporting the category boundary rather than an observed revenue share. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx AT/CT, xx.xx base, xx.xx mid-size and xx.xx full-size deployments by September 2023; supplies configuration proxies and an incomplete-renewal constraint, not contractual architecture shares. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The pre-existing-software clause grants broad license rights without transferring ownership; proprietary ownership alone therefore cannot establish the Closed revenue numerator. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
30. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported modernized passenger coverage constrains an assumption of universally standalone activity, while leaving commercial architecture and revenue attribution unresolved. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

9.3. Open Standards-Based Interoperability

Table 124. Global Airport Baggage Screening Systems Market Size, by Open Standards-Based Interoperability, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 125. Global Airport Baggage Screening Systems Market Size, by Open Standards-Based Interoperability, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 126. Global Airport Baggage Screening Systems Market Size, by Open Standards-Based Interoperability, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Open Architecture for Airport Security Systems, Second Edition

   · Taxonomy evidence: Open architecture is associated with available, documented interfaces and standards-based exchange; partial compliance is possible and must be identified. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Allows identified partial compliance and discusses accountable integration responsibilities; supports scoped open attribution, not whole-purchase reclassification. ([aci-europe.org](https://aci-europe.org/downloads/resources/Open%20Architecture%20for%20Airport%20Security%20Systems%202nd%20Edition.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. CATSA's Purchase Order Terms and Conditions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Software modification rights are not themselves proof of standards-based interfaces or independent component substitution; supports conservative classification. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-purchase-order-terms-and-conditions))
30. Smiths Detection Delivers Fully Automated International Remote Baggage Screening System Between South Korea and the United States
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 disclosure identifies xx.xx software licenses and DICOS V3.xx.xx exchange, and dates operational service to August 2025. Supports commercial standards-based activity and forecast feasibility, not an observed global share or a confirmed 2025 license inventory. ([smithsdetection.com](https://www.smithsdetection.com/press-releases/smiths-detection-delivers-fully-automated-international-remote-baggage-screening-system-between-south-korea-and-the-united-states/))

31. SeeTrue Marks Milestone with Over 100 X-ray Checkpoint Installations of Advanced AI-Based Threat Detection Software

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements.
([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2024 announcement reports the 100th operational screening lane across airports and other sectors. Provides a limited commercial-adoption scale check; it is neither airport-only nor a census of standards-based entitlements.
([seetrue.ai](https://www.seetrue.ai/seetrue-marks-milestone-with-over-xx.xx-x-ray-checkpoint-installations-of-advanced-ai-based-threat-detection-software/))

10. Airport Baggage Screening Systems Market, by Screening Application

[illegible] Cabin-baggage buyers should therefore specify the passenger-facing checkpoint deliverable, while checked-baggage buyers must resolve screening-related transport interfaces and acceptance responsibility. A common detector family does not make these procurement packages equivalent.

Non-Passenger Property Screening has a separate constituency and authorization context. [illegible] The commercial opportunity depends on the authority's actual program and purchasing requirement, not simply on the presence of airport employees.

[illegible] This supports treating terminal-entrance baggage requirements separately from the subsequent aviation checkpoint. Suppliers should establish the entrance-screening purchaser, authorized equipment scope, and support arrangement before extending a checkpoint offer to this application; the airport example does not establish a universal terminal-entry requirement.

Customs and Border Baggage Inspection also has its own commissioning relationship. [illegible] A supplier should pursue the customs authority's stated inspection requirement and procurement arrangement, not assume that an aviation-security acceptance or airport-wide supplier appointment settles access to this mission.

Figure 14. Global Airport Baggage Screening Systems Market Size, by Screening Application, 2025 (%)

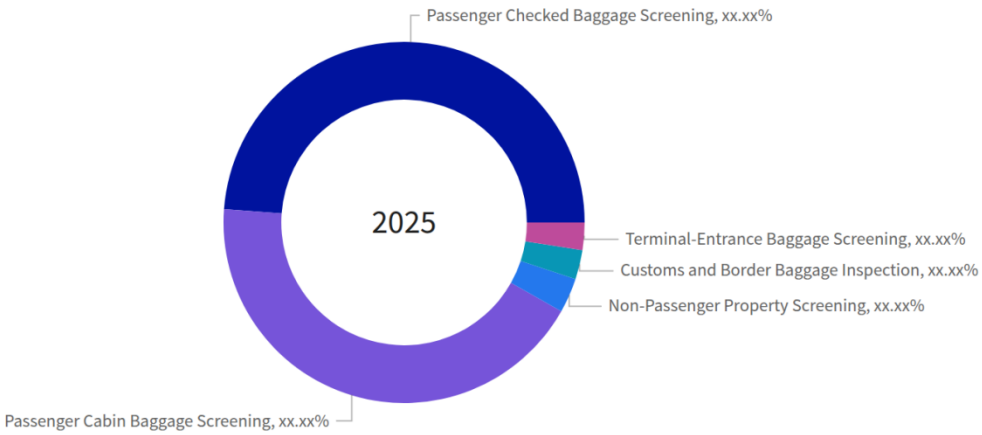

Figure 15. Global Airport Baggage Screening Systems Market, by Screening Application, 2032 (USD Million)

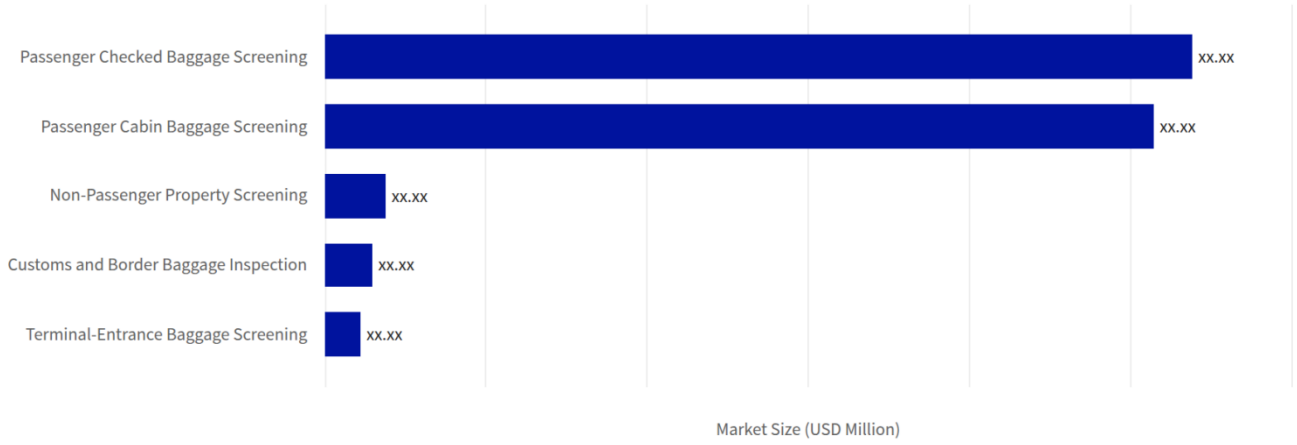

Table 127. Global Airport Baggage Screening Systems Market, by Screening Application growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Customs and Border Baggage Inspection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Passenger Property Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Cabin Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Checked Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Terminal-Entrance Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 128. Global Airport Baggage Screening Systems Market Size, by Screening Application, 2017-2040 (USD Million)

Screening Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Customs and Border Baggage Inspection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Passenger Property Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Cabin Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Passenger Checked Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Terminal-Entrance Baggage Screening	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. CATSA Functions, Programs and Activities

   · CATSA includes equipment purchase, baggage-handling integration, maintenance, and equipment training within its hold-baggage activities.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.

2. Corporate Plan 2024-25 to 2028-29 Summary - Overview

   · CATSA defines pre-board screening around carry-on belongings before secure-area entry, hold-baggage screening before aircraft loading, and non-passenger screening to include staff and service-provider belongings.

   · Taxonomy evidence: CATSA's corporate-plan overview separately identifies pre-board, hold-baggage and non-passenger screening, providing an official program basis for distinguishing their property-screening missions. It does not establish the full global market boundary. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))

3. About the security control itself

   · Fraport TAV Antalya Airport's guidance distinguishes terminal-entry security from a later security check and describes X-ray screening of carried items. It does not establish a universal terminal-entry procurement requirement.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.

4. EMSD Provides Comprehensive Support for Terminal 2 Commissioning

   · EMSD's June 2026 account describes procurement and installation assistance for Customs and Excise baggage and parcel X-ray equipment at Hong Kong International Airport Terminal xx.xx.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.

5. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.

6. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
7. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
8. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
9. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
10. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

11. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
12. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
13. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
14. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.

15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
16. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
17. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
18. CATSA Annual Report 2024 - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
19. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
20. Cochin International Airport Selects Smiths Detection's CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.

21. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

10.1. Passenger Checked Baggage Screening

Table 129. Global Airport Baggage Screening Systems Market Size, by Passenger Checked Baggage Screening, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 130. Global Airport Baggage Screening Systems Market Size, by Passenger Checked Baggage Screening, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 131. Global Airport Baggage Screening Systems Market Size, by Passenger Checked Baggage Screening, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. GETS - Civil Aviation Authority - Holdstow Baggage Screening Equipment, RFx 33811330
   · Taxonomy evidence: Hold baggage is the stated application; the future installation intention does not establish delivered base-year sales. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))
2. Overview - CATSA
   · Taxonomy evidence: Hold-baggage screening is defined around passengers' checked baggage before aircraft loading. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))
3. Cochin International Airport - CIAL/COMMN/CT-XBIS/01
   · Taxonomy evidence: The purchaser's stated requirement is specifically an inline hold-baggage screening system for an international passenger terminal, supporting checked-baggage screening as a distinct purchased application. ([cial.aero](https://cial.aero/Tender-Details?TdId=xx.xx))
4. New security screening equipment transforms travel through BNE - Brisbane Airport
   · Taxonomy evidence: The airport separately describes an inline checked-baggage screening system within the same upgrade program. Its mixed security-program cost is not treated as baggage-screening market revenue. ([bne.com.au](https://www.bne.com.au/blog/behind-scenes/new-security-screening-equipment-transforms-travel-through-bne))

5. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies xx.xx end-of-life systems within a xx.xx-system checked-baggage fleet. This constrains renewal exposure, not realized annual purchasing or a verified global replacement deadline.
6. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
7. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

8. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

9. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

10. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

11. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

12. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

13. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
14. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport replaces six separate screening systems with centralized screening and expects reduced screening-machine demand while expanding capacity. This supplies a counterforce to volume-only checked-baggage forecasting.
15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

16. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
17. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx hold-baggage capital appropriations used were C$xx.xx; this constrains the independent application-capital comparison.
18. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

19. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
20. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
21. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
22. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
23. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
24. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

25. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
26. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
27. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
28. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
29. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
30. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
31. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

32. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hold-baggage activities include equipment purchase, baggage-handling integration and equipment maintenance, supporting the checked-baggage capital and lifecycle boundary.

10.2. Passenger Cabin Baggage Screening

Table 132. Global Airport Baggage Screening Systems Market Size, by Passenger Cabin Baggage Screening, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 133. Global Airport Baggage Screening Systems Market Size, by Passenger Cabin Baggage Screening, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 134. Global Airport Baggage Screening Systems Market Size, by Passenger Cabin Baggage Screening, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Overview - CATSA
   · Taxonomy evidence: Pre-board screening covers passengers' carry-on baggage and belongings before secure-terminal-area entry. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))
2. New security screening equipment transforms travel through BNE - Brisbane Airport
   · Taxonomy evidence: Brisbane Airport's February xx.xx 2026 account describes installed cabin-baggage screening equipment in its domestic and international terminal security program, corroborating a passenger-cabin application from the airport operator's own operations. ([bne.com.au](https://www.bne.com.au/blog/behind-scenes/new-security-screening-equipment-transforms-travel-through-bne))
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The assessment records xx.xx checkpoint systems deployed by September 2023 against an eventual xx.xx-system program. This supports an incomplete replacement cycle and qualifies any assumption of universal CT adoption.
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx pre-board capital appropriations used were C$xx.xx. This supplies the Canadian purchasing comparison and a component of the non-passenger-to-cabin activity proxy, not a global share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. CATSA Annual Report 2024 - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx pre-board capital appropriations used of C$xx.xx provide the second period in the non-passenger-to-cabin purchasing comparison.

10.3. Non-Passenger Property Screening

Table 135. Global Airport Baggage Screening Systems Market Size, by Non-Passenger Property Screening, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 136. Global Airport Baggage Screening Systems Market Size, by Non-Passenger Property Screening, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 137. Global Airport Baggage Screening Systems Market Size, by Non-Passenger Property Screening, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Overview - CATSA

· Taxonomy evidence: Non-passenger screening includes crew, ground personnel and service providers and their belongings entering restricted areas. Only the belongings portion is retained here; vehicles and people-only screening are excluded.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/overview))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx non-passenger capital appropriations used were C$xx.xx, below the original C$xx.xx budget. Actual purchasing informs the proxy and qualifies automatic announcement-to-revenue conversion.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual report identifies enhanced non-passenger requirements and implementation planned from spring 2025. This supports a conditional modernization premise, not the modeled global uptake factor.
30. CATSA Annual Report 2024 - Management’s Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2023/xx.xx non-passenger capital appropriations used of C$xx.xx enter the two-period activity proxy; they do not identify the property-only fraction.
31. CATSA Functions, Programs and Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-passenger screening covers airport workers and their belongings; only attributable property-screening offerings enter this allocation.

10.4. Customs and Border Baggage Inspection

Table 138. Global Airport Baggage Screening Systems Market Size, by Customs and Border Baggage Inspection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. EMSD Provides Comprehensive Support for Terminal 2 Commissioning - VoiceLink, Issue 79, June 2026

   · Taxonomy evidence: The June 2026 government account places baggage/parcel X-ray procurement and installation for Customs and Excise within Terminal xx.xx facilities that commenced operation on May xx.xx 2026. This strengthens the dated airport-customs context but does not isolate baggage expenditure. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))

   · Taxonomy evidence: The June 2026 government report describes baggage-inspection X-ray equipment procured and installed for the Customs and Excise Department at Hong Kong International Airport Terminal xx.xx. This supports an airport customs-inspection application distinct from passenger aviation-security screening, but does not isolate baggage spending from parcels and other equipment. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2026 account identifies baggage-and-parcel equipment procurement and installation for the customs authority at Terminal xx.xx. It supports a separate commissioning mission but does not isolate baggage expenditure.

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Cochin International Airport Selects Smiths Detection’s CTX 9800 for Next-Generation Hold Baggage Screening
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The May 2017 deployment identifies xx.xx customs baggage systems alongside four hold-baggage systems. This supports the customs-intensive historical configuration proxy, not current global fleet or revenue observations.
30. GAO-26-107811 - Guam: Considerations for Evaluating Alternative Customs Models and Potential Economic Effects
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audit identifies two historical airport-customs baggage systems inactive for years and delayed replacement procurement. This challenges conversion of installed stock or acknowledged need directly into annual equipment and support revenue.

10.5. Terminal-Entrance Baggage Screening

Table 141. Global Airport Baggage Screening Systems Market Size, by Terminal-Entrance Baggage Screening, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 143. Global Airport Baggage Screening Systems Market Size, by Terminal-Entrance Baggage Screening, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. About the security control itself - Fraport TAV Antalya Airport

   · Taxonomy evidence: Fraport TAV Antalya Airport's guidance distinguishes terminal-entry security from a later gate-area security check and describes X-ray screening of carried items. A separate terminal-admission baggage mission is an analytical classification of this documented activity, not a claim that all airports use it or that its baggage expenditure is separately disclosed. ([antalya-airport.aero](https://www.antalya-airport.aero/passengers-visitors/passenger-guide/departing-from-ayt/luggage-security-information/about-the-security-control-itself))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The airport operator distinguishes terminal-entry security from a subsequent checkpoint. This supports a separate entrance-screening mission while providing no global prevalence or spending share.

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Smiths Detection confirm order of 91 advanced scanners for new terminals at Moscow Sheremetyevo International Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated airport deployment includes xx.xx entrance baggage systems and xx.xx cabin-checkpoint systems. Their ratio supplies a historical relative-density proxy, subsequently discounted for assumed global coverage.

11. Airport Baggage Screening Systems Market, by Purchasing Organization

Airport and Terminal Operators and Public Aviation Security Agencies provide distinct direct-purchasing routes. Cochin International Airport Ltd.'s January xx.xx 2026 tender solicited an integrated CT-based hold-baggage system for Terminal xx.xx. ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■

Public-agency access also depends on delegated authority and the solicitation route. CATSA's policy requires confirmation of funds before a contractual financial commitment, and its business guidance says most requirements are publicly tendered. ■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■

Customs and Border Authorities may work through a technical procurement agent. EMSD's Hong Kong account identifies Customs and Excise as the client receiving procurement and installation assistance, but does not expressly identify the final capital-budget holder. ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■■■

Airlines require transaction-specific treatment. ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ An airline's operational benefit from airport screening is therefore insufficient to identify it as the equipment customer; the relevant tender and purchase mandate remain decisive.

■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ An operator can be an important user or implementation stakeholder without independently authorizing an equipment purchase. Suppliers should confirm a prospective operator's contractual purchasing mandate before treating it as the final buyer; that independent mandate remains unresolved without the applicable contract.

Figure 16. Global Airport Baggage Screening Systems Market Size, by Purchasing Organization, 2025 (%)

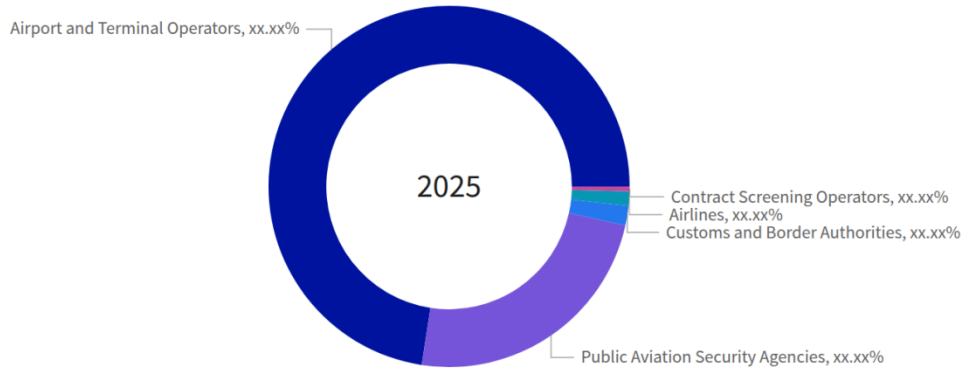

Figure 17. Global Airport Baggage Screening Systems Market, by Purchasing Organization, 2032 (USD Million)

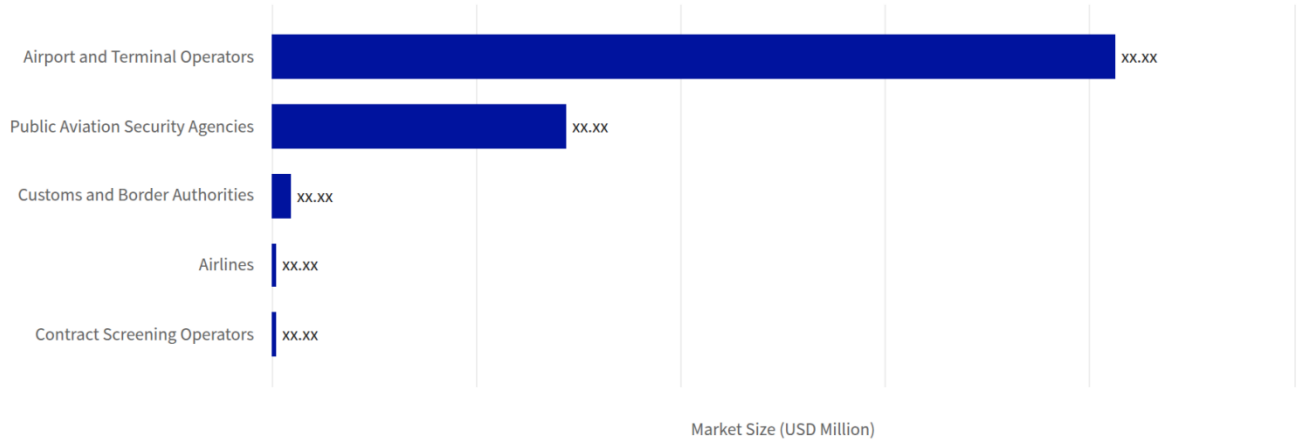

Table 144. Global Airport Baggage Screening Systems Market, by Purchasing Organization growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Airlines	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Airport and Terminal Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Contract Screening Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Customs and Border Authorities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Public Aviation Security Agencies	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. CATSA Functions, Programs and Activities

   · The assignment of equipment purchasing to CATSA supports distinguishing the agency's role from that of screening users or service operators.

   · Taxonomy evidence: The record assigns equipment-purchase activity to CATSA while separately discussing screening-officer and contractor functions; the equipment purchaser and screening workforce are therefore not interchangeable roles.
   ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

2. Procurement and Contracting Policy - CATSA

   · CATSA's policy requires delegated confirmation of funds before a contractual financial commitment, supporting a distinction between user interest and purchasing authority.

3. Doing Business with CATSA

   · CATSA states that most goods and services requirements are publicly tendered and that solicitations are posted through MERX.

4. 2025 Annual Report - Notes to the Financial Statements
   - The statements distinguish screening-contractor commitments from equipment maintenance and spare-parts commitments, supporting separation of operating and equipment-support relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
5. Holdstow Baggage Screening Equipment
   - The record identifies New Zealand's Civil Aviation Authority as the procuring agency and displays the solicitation as closed, not awarded.
6. EMSD Provides Comprehensive Support for Terminal 2 Commissioning
   - The account distinguishes Customs and Excise as the client from EMSD's technical assistance role, without expressly identifying the final capital-budget holder.
7. CIAL/COMMN/CT-XBIS/01
   - Cochin International Airport Ltd.'s January xx.xx 2026 tender solicits an integrated CT-based hold-baggage screening system for Terminal xx.xx establishing the airport company's procurement role but not an award.
8. Invitation for Submission of Bids for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines - Reference 202130407
   - Tender reference xx.xx was issued on behalf of SriLankan Airlines for cargo and baggage X-ray equipment with installation, commissioning, and maintenance. It does not establish a passenger-baggage-only award.
9. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
10. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

11. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

12. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

13. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

14. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

15. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

16. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
17. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
18. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
19. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
20. CATSA 2025 Annual Report - Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.

21. Bennet, Moran, Van Hollen, Boozman Introduce Bill to Bolster Aviation Safety
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
22. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
23. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
24. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
25. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
26. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

27. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
28. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
29. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
30. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.

11.1. Airport and Terminal Operators

Table 146. Global Airport Baggage Screening Systems Market Size, by Airport and Terminal Operators, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Cochin International Airport - CIAL/COMMN/CT-XBIS/01
   · Taxonomy evidence: Cochin International Airport Ltd.'s January xx.xx 2026 tender invites suppliers to provide and integrate a hold-baggage screening system for Terminal xx.xx directly identifying an airport operating company as the commissioning purchaser. The notice is not an award or proof of delivery. ([cial.aero](https://cial.aero/Tender-Details?TdId=xx.xx))
2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transfer direction supports modeled airport-manager purchasing gains. Continued shared financing does not imply equal purchasing shares.
30. Heathrow announces £2.3bn accelerated investment plan to upgrade the UK's international gateway to growth
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports GBP xx.xx invested in security-lane upgrades during 2024, supporting material airport-directed purchasing. Broader infrastructure obligations and historical timing prevent treating the amount as 2025 in-scope market receipts.
31. Fraport Assumes Responsibility for Aviation Security Checks at Frankfurt Airport
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents Fraport's checkpoint-management responsibility from January 2023, six initial CT-equipped lanes and three contracted screening providers. Supports distinguishing an airport commissioning role from regulator oversight and contracted screening labor.

11.2. Public Aviation Security Agencies

Table 149. Global Airport Baggage Screening Systems Market Size, by Public Aviation Security Agencies, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 150. Global Airport Baggage Screening Systems Market Size, by Public Aviation Security Agencies, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 151. Global Airport Baggage Screening Systems Market Size, by Public Aviation Security Agencies, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. GETS - Civil Aviation Authority - Holdstow Baggage Screening Equipment, RFx 33811330

   · Taxonomy evidence: The official record identifies the Civil Aviation Authority as the procuring agency and now displays Tender Closed, with a May xx.xx 2026 closing date. Its intended June award is not evidence of a completed award. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))

   · Taxonomy evidence: The Civil Aviation Authority of New Zealand's March xx.xx 2026 RFP requests hold-baggage explosive-detection equipment and supporting maintenance. This independently establishes a public aviation body's procurement role; its intended award date does not establish that an award occurred. ([gets.govt.nz](https://www.gets.govt.nz/CAA/ExternalTenderDetails.htm?id=xx.xx))

2. CATSA Functions, Programs and Activities

   · Taxonomy evidence: CATSA expressly includes equipment purchase, baggage-system integration, operation, maintenance and equipment training in its hold-baggage activities, establishing a public screening body's direct equipment-purchasing role. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-functions-programs-and-activities))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a TSA checked-baggage fleet of xx.xx EDS, including xx.xx at end-of-life, and assigns purchase, installation and maintenance responsibilities to TSA. Supports agency fleet calibration and renewal pressure, not the assumed forecast uplift.
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

7. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization

· Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

· Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports C$xx.xx EDS capital expenditure for FY2024/xx.xx and identifies both baggage equipment and full-body scanners in the capital scope, requiring a baggage-attribution adjustment.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
20. ACI EUROPE - 2025 all about traffic resilience as Europe’s airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.

29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2025 official release identifies xx.xx U.S. screening lanes, used as agency purchasing-exposure calibration rather than observed annual equipment sales.
30. CATSA 2025 Annual Report - Notes to the Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports C$xx.xx maintenance/spares, C$xx.xx trace/consumables and C$xx.xx training/certification, constraining attributable agency lifecycle expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates screening-contractor payments from equipment support, preventing staffing expenditure from becoming equipment-market purchasing.
31. Bank of Canada - Annual exchange rates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual exchange-rate observations support the inherited fiscal-period approximation of xx.xx Canadian dollars per U.S. dollar; this is not a transaction-weighted exchange rate.

11.3. Customs and Border Authorities

Table 152. Global Airport Baggage Screening Systems Market Size, by Customs and Border Authorities, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 153. Global Airport Baggage Screening Systems Market Size, by Customs and Border Authorities, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 154. Global Airport Baggage Screening Systems Market Size, by Customs and Border Authorities, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. EMSD Provides Comprehensive Support for Terminal 2 Commissioning - VoiceLink, Issue 79, June 2026

   · Taxonomy evidence: EMSD is described as assisting Customs and Excise with procurement and installation. The client/technical-agent distinction is documented, but the final capital-budget holder is not expressly identified. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))

   · Taxonomy evidence: The report identifies Customs and Excise as the client and EMSD as providing procurement and installation assistance. It supports distinguishing a border authority's commissioning context from its technical procurement agent, but does not expressly identify the final capital-budget holder. ([wcms.emsd.gov.hk](https://wcms.emsd.gov.hk/minisites/voice/en/issue79/en/text/article5.html))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe’s airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. EU Publications Office - Purchase and maintenance of non-intrusive X-ray inspection equipment for baggage and air cargo volume control
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Autoridade Tributária e Aduaneira as buyer and reports a 2026 award of EUR xx.xx across four lots for baggage/air-cargo inspection equipment and maintenance. Provides a buyer-role and commercial-scale comparator, not 2025 baggage-only annual expenditure.
30. ACI World - Busiest Airports in the World
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx international airport passenger movements in 2025. Half provides an approximate arrival-movement scale check before transfer exclusions, not a customs examination or equipment-purchasing weight.

11.4. Airlines

Table 155. Global Airport Baggage Screening Systems Market Size, by Airlines, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 156. Global Airport Baggage Screening Systems Market Size, by Airlines, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. SriLankan Airlines - Invitation for Supply, Installation, Commissioning and Maintenance of Dual View Heavy and Medium X-Ray Machines, Reference 202130407

   · Taxonomy evidence: Tender reference xx.xx is issued on behalf of SriLankan Airlines for supply and maintenance of heavy cargo and medium cargo/baggage X-ray machines, with airport and transfer-baggage locations in the requirements. It establishes an airline purchasing context, not a completed award, passenger-baggage-only allocation or 2025 spending. ([srilankan.com](https://www.srilankan.com/download/tender/TN-Invitationforsubmiss-xx.xx.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Japan’s leading airline revolutionizes check in experience with new Smiths Detection technology
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August 2023 announcement identifies JAL as customer for five screening ecosystems and reports xx.xx deployed iLane units across Japan. These are historical commercial-stock anchors, not an airline-only fleet or 2025 sales observation.
30. Narita International Airport anticipates threats with integrated solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies Narita airport as a screening-technology customer and describes xx.xx lane-related installations, qualifying any assumption that the supplier's Japanese installed stock was purchased entirely by airlines.
31. MLIT - 保安検査の実施主体が変わります！ - June 27, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 announcement targets transfer of security-screening responsibility from airlines to airport managers, with leading cases targeted in FY2026. Supports a conditional reduction in airline purchasing, not an observed contract-transfer percentage.

11.5. Contract Screening Operators

Table 158. Global Airport Baggage Screening Systems Market Size, by Contract Screening Operators, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 159. Global Airport Baggage Screening Systems Market Size, by Contract Screening Operators, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 160. Global Airport Baggage Screening Systems Market Size, by Contract Screening Operators, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Cross Segment Services - I-SEC

   · Taxonomy evidence: I-SEC describes its aviation-security business covering hand and hold luggage and its security-training academy. This establishes a screening-service operator business setting only; it does not establish that the operator independently purchases or owns in-scope baggage-screening hardware or software. ([i-sec.com](https://www.i-sec.com/segments/cross-segment-services))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. ICTS International N.V. - Annual Report for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses USD xx.xx company-wide property/equipment purchases and USD xx.xx airport-security revenue in 2025. Supports an asset-light purchasing-intensity proxy; the in-scope fraction and global expansion remain assumptions.

12. Airport Baggage Screening Systems Market, by System Integration

Standalone Screening Systems and Checkpoint Lane-Integrated Systems differ in delivery responsibility, not simply detection technology. ACI's 2019 CT guide distinguishes standalone configurations from automated tray-return and lane integration; standalone configurations can still include equipment-local conveyance. ■ ■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■

Newcastle's October 2022 award illustrates a combined checkpoint boundary: CT scanning, central image processing, automated tray return, installation, and commissioning formed one purchased solution. For a Checkpoint Lane-Integrated System, the buyer should contract for acceptance of the combined physical and software deliverables rather than accept unrelated component handovers. ■■■■■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■ ■■ ■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■

■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ Integration demand therefore does not necessarily mean a requirement for additional detectors. Suppliers should distinguish an awarded screening package from the broader construction timetable and preserve a clear boundary around screening-related work.

Dublin and Cork provide a completed counterexample to assuming that one supplier must control every obligation. Their hold-baggage upgrade used separate building and baggage integrators alongside professional-service appointments and was reported completed in March 2023. ■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■ ■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■■

Figure 18. Global Airport Baggage Screening Systems Market Size, by System Integration, 2025 (%)

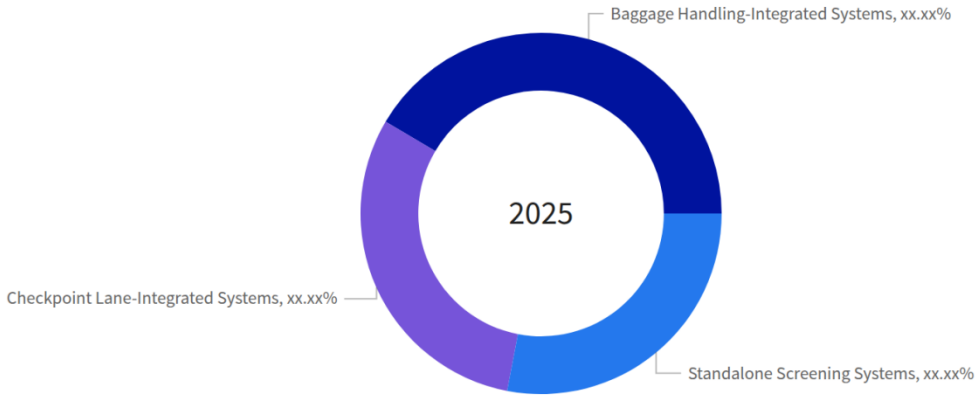

Figure 19. Global Airport Baggage Screening Systems Market, by System Integration, 2032 (USD Million)

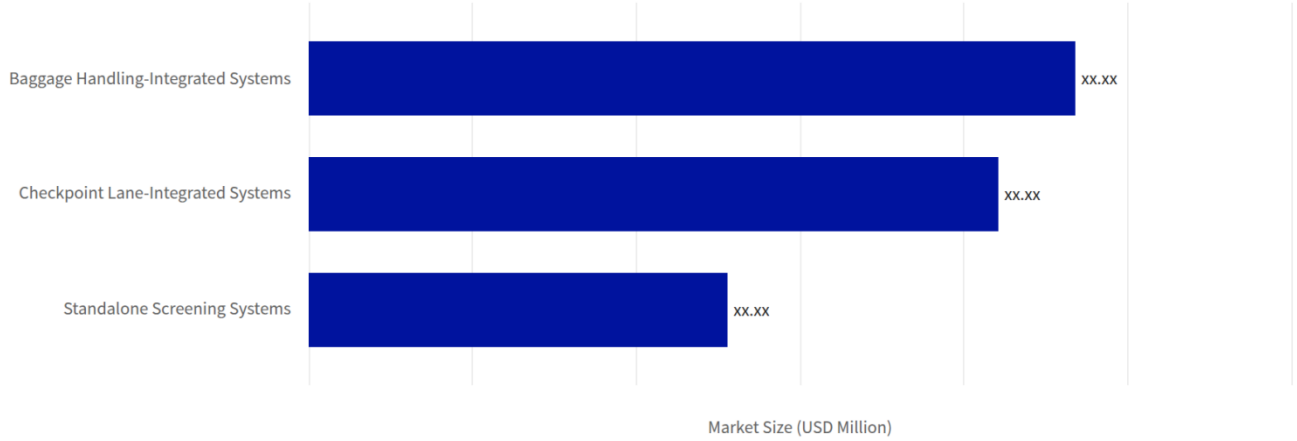

Table 161. Global Airport Baggage Screening Systems Market, by System Integration growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Baggage Handling-Integrated Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Checkpoint Lane-Integrated Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standalone Screening Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Baggage Handling System Optimization

   · Seattle's published program consolidates outbound baggage systems, identifies reduced screening-machine requirements as an intended benefit, and targets final-phase completion in 2029.

   · Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.

2. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

   · The award establishes a combined checkpoint procurement boundary, not completed installation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.

3. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland
   - The project account identifies separate building and baggage integrators and reports completion in March 2023.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
4. Advanced Cabin Baggage Screening - Computed Tomography Implementation Guide
   - ACI's 2019 guide distinguishes standalone CT configurations, including equipment-local conveyance, from automated tray-return and screening-lane integration. These historical distinctions do not establish a prospective installation's outcome.
   - Taxonomy evidence: The guide distinguishes standalone cabin-baggage CT configurations from integration with automated tray-return systems and automated screening lanes, establishing a physical-configuration distinction independent of CT technology. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
5. Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
   - Taxonomy evidence: The April xx.xx 2012 government review distinguishes stand-alone equipment from in-line checked-baggage systems. These are historical configuration definitions, not current deployment proportions. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))
6. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

7. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
8. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
9. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment organic growth of xx.xx% and approximately xx.xx cumulative CTiX sales constrain modernization assumptions, but do not directly measure integrated-lane penetration.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management anticipates a later-decade hold-baggage renewal cycle. This is a forward-looking input to relative purchasing assumptions, not an observed 2032 share.
10. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

11. Smiths Group PLC - Annual Report FY2022

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

· Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

12. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))

13. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019

· Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

14. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI

· Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

16. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
17. Smiths Detection selected as security technology provider to International Airport Heraklion Crete
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

12.1. Baggage Handling-Integrated Systems

Table 163. Global Airport Baggage Screening Systems Market Size, by Baggage Handling-Integrated Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

   · Taxonomy evidence: The review defines in-line systems through integration of screening equipment into baggage-handling systems, directly supporting a baggage-handling-integrated configuration. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management anticipates a later-decade hold-baggage renewal cycle. This is a forward-looking input to relative purchasing assumptions, not an observed 2032 share.
6. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Seattle is consolidating six screening systems, expects reduced screening-machine demand and schedules final-phase completion in 2029. Supports integration demand while constraining detector-volume growth; the whole-project budget is excluded.
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

29. Hold baggage screening upgrade, Dublin and Cork Airports, Ireland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes three upgraded hold-baggage systems delivered through separate construction, baggage-integration and advisory appointments, completed in March 2023. Supports integrated-system attribution without assuming a universal single-prime model.
30. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx in-line EDS across xx.xx in-line systems and distinguishes equipment counts from integrated-system counts; supports the historical configuration bridge.

12.2. Checkpoint Lane-Integrated Systems

Table 166. Global Airport Baggage Screening Systems Market Size, by Checkpoint Lane-Integrated Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 167. Global Airport Baggage Screening Systems Market Size, by Checkpoint Lane-Integrated Systems, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

   · Taxonomy evidence: The contract concluded October xx.xx 2022 procured an integrated cabin-baggage screening solution combining CT scanners, automated tray return, and central image-processing capability. The award establishes purchased scope, not completed installation. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 award covers seven systems combining cabin CT, tray return, image processing and deployment responsibilities. It supports integrated purchased scope, not completed delivery or a global sales weight.

2. Advanced Cabin Baggage Screening - Computed Tomography (CT) Implementation Guide
   - Taxonomy evidence: Section xx.xx separately addresses CT integration with automated tray-return systems and automated screening lanes. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies automated tray-return and automated screening-lane integration as commercially distinct configurations; supports the lane-integrated category definition.
3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mid-size and xx.xx full-size systems within xx.xx deployed CT systems; supports differentiated configuration assumptions rather than treating technology adoption as an integration-share observation.

5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 aviation original-equipment organic growth of xx.xx% and approximately xx.xx cumulative CTiX sales constrain modernization assumptions, but do not directly measure integrated-lane penetration.
7. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

8. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.

21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.

22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.

24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.

25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.

26. Airports Company South Africa - Airport statistics
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
30. Smiths Detection selected as security technology provider to International Airport Heraklion Crete
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 announcement identifies eight cabin CT scanners and eight automated tray-return systems for Heraklion, with installation planned across late 2025 and mid-2026; supports ongoing integrated procurement, not realized annual revenue.

12.3. Standalone Screening Systems

Table 169. Global Airport Baggage Screening Systems Market Size, by Standalone Screening Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 170. Global Airport Baggage Screening Systems Market Size, by Standalone Screening Systems, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Advanced Cabin Baggage Screening - Computed Tomography (CT) Implementation Guide

   · Taxonomy evidence: Section xx.xx explicitly discusses a standalone CT configuration, including equipment-local entry and exit conveyors; standalone therefore does not mean conveyor-free. ([store.aci.aero](https://store.aci.aero/wp-content/uploads/2019/xx.xx/Smart-Security-ACBS-CT-Implementation-Guide-v0.xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes standalone CT, including equipment-local conveyance, from integrated screening-lane configurations; supports attribution boundaries, not a revenue weight.

2. Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

   · Taxonomy evidence: The review describes stand-alone screening machines in airport lobbies or ticketing areas as distinct from integrated in-line installations. ([gao.gov](https://www.gao.gov/products/gao-xx.xx-xx.xx))

3. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))
4. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a September 2023 U.S. CT cohort containing xx.xx AT/CT and xx.xx base systems, providing counterevidence to assigning all CT activity automatically to integrated lanes.
5. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.

6. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported checkpoint modernization provides a commercial reason to model substitution from discrete legacy offerings; the filing does not disclose standalone configuration revenue.
7. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
8. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
9. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
10. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   · Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))

11. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
12. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
13. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

14. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
15. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
16. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.

17. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
18. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
19. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
20. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
21. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
22. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.

23. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
24. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
25. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
26. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
27. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
28. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
29. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.

30. GAO-12-266 - Checked Baggage Screening: TSA Has Deployed Optimal Systems at the Majority of TSA-Regulated Airports, but Could Strengthen Cost Estimates

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2011 table reports xx.xx standalone EDS alongside xx.xx in-line EDS; this historical machine-count comparator constrains, but does not determine, the current global allocation.

13. Airport Baggage Screening Systems Market, by Image Review Location

[illegible] Conversely, Newcastle International Airport's 2022 award included central image-processing capability without identifying the review room's location. Buyers should specify the contracted locations rather than classify an installation from the phrase central processing alone.

Local review and a separate on-site room create different accommodation and support obligations. [illegible] A simpler location arrangement remains preferable where the additional contractual responsibilities cannot be assigned.

[illegible] These records support a cross-border review relationship for named arrangements, not unrestricted substitution for every primary-screening function. An airport or airline considering another route should require documented authority participation, customer permissions, and allocation of connectivity and support responsibilities before relying on the proposed passenger benefit.

Figure 20. Global Airport Baggage Screening Systems Market Size, by Image Review Location, 2025 (%)

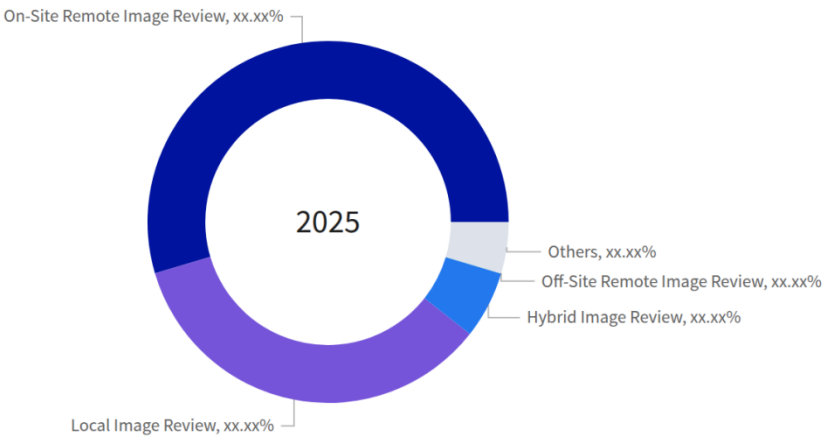

Figure 21. Global Airport Baggage Screening Systems Market, by Image Review Location, 2032 (USD Million)

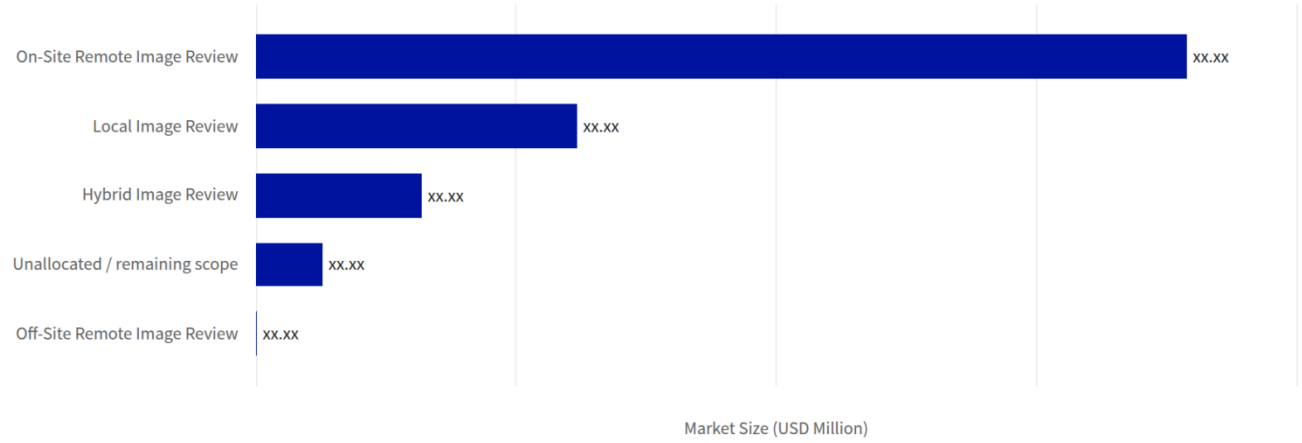

Table 172. Global Airport Baggage Screening Systems Market, by Image Review Location growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Hybrid Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Local Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Off-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
On-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 173. Global Airport Baggage Screening Systems Market Size, by Image Review Location, 2017-2040 (USD Million)

Image Review Location	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Hybrid Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Local Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Off-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
On-Site Remote Image Review	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice

· The contracting entity and installation site are Newcastle International Airport. The award includes CT scanners, automated tray return and central image processing, without specifying the physical review-room location.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Taxonomy evidence: The notice specifies central image-processing capability without stating the interpretation room's physical location; centralized processing cannot alone establish local, on-site remote, or off-site allocation.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Taxonomy evidence: Central image-processing capability is expressly included in the awarded screening-system package, supporting image-review functionality as a commercial procurement distinction; the notice does not specify the review room's location.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification.
([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))

2. International Remote Baggage Screening

· PNNL describes international checked-baggage images being reviewed remotely by U.S. authorities and identifies named airline-airport pilots. The described collaboration is institution- and arrangement-specific.
([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

· Taxonomy evidence: The account links image review to both CBP and TSA and describes cloud-based integrations. Physical review location must therefore be classified separately from agency mission and from whether a system uses centralized image processing.
([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

3. 델타항공-대한항공, 인천발 애틀랜타 노선 대상 위탁수하물 원격 검색 방식 신규 도입

   · Delta and Korean Air announced an Incheon-Atlanta remote checked-baggage initiative beginning August xx.xx 2025, involving review by CBP before arrival. This establishes a named route arrangement, not transferable permission for other routes. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 announcement identifies the Incheon-Atlanta IRBS arrangement, anchoring a second sampled connection and a partial-year commercial-activity assumption without establishing contract value. ([news.delta.com](https://news.delta.com/delta-and-koreanair-launch-remote-baggage-screening-on-icn-atl-KR))

4. Centralised Image Processing: The Impact on Security Checkpoints

   · CASRA's 2017 article distinguishes image review within the checkpoint from separate review rooms and describes arrangements combining those locations. These historical examples do not establish a prospective supplier's contracted package. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Taxonomy evidence: The research article distinguishes screening stations within the checkpoint from separate screening rooms and describes combined configurations. The taxonomy adapts these physical-location distinctions rather than treating centralized processing as necessarily remote. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

5. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

6. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
7. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
8. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
9. Smiths Group PLC - Annual Report & Accounts FY2023
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
10. Smiths Group PLC - Annual Report FY2022
   · Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   · Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))

11. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
12. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
13. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
14. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))

15. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))

16. CATSA 2025 Annual Report - Overview of Activities

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

17. Annual Report 2024 - CATSA's Operating Environment

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

18. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))

19. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorizes up to USD xx.xx for baggage-system and Remote Screening Facility network/server separation. Half this ceiling is an explicitly assumed deployment-cost comparator, not observed off-site receipts. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

20. American and U.S. Customs and Border Protection pilot innovative baggage screening initiative

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: American's April xx.xx 2025 announcement identifies a daily Sydney-Los Angeles IRBS pilot and unchanged screening requirements. It anchors one sampled connection and an assumed partial-year licensing period, not disclosed revenue. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_news/American-and-US-Customs-and-Border-Protection-pilot-innovative-baggage-screening-initiative-OPS-OTH-xx.xx-2025.pdf))

21. United Launches CBP's International Remote Baggage Screening on Select International Flights

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: United's September xx.xx 2025 announcement identifies daily Sydney-San Francisco service and named technology partners, anchoring a third sampled connection. It reports no attributable software or integration receipts. ([united.mediaroom.com](https://united.mediaroom.com/2025-xx.xx-xx.xx-United-Launches-CBPs-International-Remote-Baggage-Screening-on-Select-International-Flights))

22. Airline Passengers Face Fewer Bag Checkpoints, Thanks to PNNL, Partners

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2026 laboratory release describes implementation on additional routes, including Seoul arrivals at Minneapolis-St. Paul and Detroit. This supports expansion direction, not the forecast connection count, realization or global share. ([pnnl.gov](https://www.pnnl.gov/news-media/airline-passengers-face-fewer-bag-checkpoints-thanks-pnnl-partners))

13.1. On-Site Remote Image Review

Table 174. Global Airport Baggage Screening Systems Market Size, by On-Site Remote Image Review, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Centralised Image Processing: The Impact on Security Checkpoints - Milena Kuhn, Aviation Security International, October/November 2017

   · Taxonomy evidence: The article describes separate image-review rooms near or farther from the checkpoint, supporting remote-room review within an airport. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes separate screening rooms and established remote hold-baggage review at larger airports; supports the cohort-maturity premise, not a numerical global share. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central image processing is included, but a separate on-site room is not specified; constrains classification rather than supplying a remote-review sales weight. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
30. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies remote screening within CATSA Plus and quantifies deployment; constrains the commercial-adoption premise but does not establish each review room's location. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

31. Annual Report 2024 - CATSA's Operating Environment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Together with the subsequent annual report, supports a seven-line deployment increase without a corresponding increase in reported passenger coverage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
32. L22020-T-TG Upgrades to the Passenger Search Area, body scanners, EDS C3 cabin baggage screening - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2023 Luton award expressly includes construction of a remote screening room at the airport terminal, supporting separate-room commercial procurement. Its broader scope is not treated as baggage-only annual revenue. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2023))
33. Greater Orlando Aviation Authority - Minutes of the February 19, 2025 Meeting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides the commercial networking-cost anchor for the modeled transfer from existing on-site pools, avoiding additional market value or duplicate host-equipment attribution. ([assets.ctfassets.net](https://assets.ctfassets.net/qiecpoxp4bka/6BCjKImOwJmeZxqtGVdpYR/1e2d759a2c44b5b6d71193cb9927ec75/2025-xx.xx-19_Board_Minutes.pdf))

13.2. Local Image Review

Table 177. Global Airport Baggage Screening Systems Market Size, by Local Image Review, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 178. Global Airport Baggage Screening Systems Market Size, by Local Image Review, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Centralised Image Processing: The Impact on Security Checkpoints - Milena Kuhn, Aviation Security International, October/November 2017

   · Taxonomy evidence: The article identifies local matrix screening within the checkpoint, demonstrating that network-distributed images can still be reviewed locally. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes checkpoint-local image review from separate-room arrangements; supports retaining networked local activity rather than automatically assigning it to remote review. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))

4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))

7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The integrated Newcastle procurement reports a GBP xx.xx-xx.xx offer range but no physical review-room location; its value cannot be assigned automatically to local review. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
30. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2024/xx.xx; provides a Canadian adoption comparator, not a global local-review revenue weight. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

31. Annual Report 2024 - CATSA's Operating Environment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CATSA Plus lines and more than xx.xx% passenger coverage in 2023/xx.xx providing the historical comparison rather than a global location allocation. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

13.3. Hybrid Image Review

Table 180. Global Airport Baggage Screening Systems Market Size, by Hybrid Image Review, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 181. Global Airport Baggage Screening Systems Market Size, by Hybrid Image Review, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 182. Global Airport Baggage Screening Systems Market Size, by Hybrid Image Review, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Centralised Image Processing: The Impact on Security Checkpoints - Milena Kuhn, Aviation Security International, October/November 2017

   · Taxonomy evidence: The article describes combining a remote screening room during busy periods with checkpoint matrix-screening stations during quieter periods. This supports a mixed-location configuration, but not a particular commercial package or price allocation. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes combined checkpoint and remote-room arrangements, establishing a mixed-location commercial configuration without measuring its prevalence or price. ([casra.ch](https://casra.ch/wp-content/uploads/2021/xx.xx/Kuhn-2017.-Centralised-image-processing.pdf))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption. ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand. ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast. ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
24. Smiths Detection - DAEP checkpoint screening contract for Dubai International Airport, 7 May 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Purchaser-specific award evidence supports a bounded premium-mix premise, not a GCC-wide allocation.
25. Airports Company South Africa - Airport statistics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides an operating-network commercial anchor for the regional installed-base premise.

26. CAAC - 2025 Civil Aviation Industry Development Statistical Bulletin, 17 April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx mainland airport movements and xx.xx transport airports in 2025; the Hong Kong/Macao extension is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-market traffic and airport-network scale constrain the regional demand model.
27. Sydney Airport - Traffic and Operational Performance Q4 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sydney's xx.xx-million traffic and staged xx.xx-lane/six-of-seven-lane deployment constrain national scale and modernization assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified staged deployment supports regional heterogeneity, not a common modernization timetable.
28. U.S. Senator Michael Bennet - SAFEGUARDS Act announcement, 23 July 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-airport and xx.xx-lane national footprint constrains minimum network support; proposed funding is not counted as realized revenue.
29. Procurement of Next Generation Security Checkpoint Equipment - Contract Award Notice
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bundled award does not identify a mixed-location package or its attributable price, preventing automatic hybrid classification. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=NOV417275))
30. CATSA 2025 Annual Report - Overview of Activities
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Deployment coverage constrains the addressable network-enabled pool; it does not disclose hybrid contracts or justify the modeled hybrid percentage. ([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/2025-annual-report/overview-activities))

31. Annual Report 2024 - CATSA's Operating Environment
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides a historical network-enabled deployment anchor, while leaving the physical mixed-location contract share unmeasured.
([catsa-acsta.gc.ca](https://www.catsa-acsta.gc.ca/en/publications/catsa-s-operating-environment))

13.4. Off-Site Remote Image Review

Table 183. Global Airport Baggage Screening Systems Market Size, by Off-Site Remote Image Review, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 184. Global Airport Baggage Screening Systems Market Size, by Off-Site Remote Image Review, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 185. Global Airport Baggage Screening Systems Market Size, by Off-Site Remote Image Review, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. International Remote Baggage Screening - Pacific Northwest National Laboratory

   · Taxonomy evidence: The public laboratory describes checked-baggage images acquired abroad and reviewed by U.S. border/security officers before arrival, including completed pilots. This supports a cross-site review configuration, not an unrestricted commercial primary-screening deployment or separately attributable system revenue. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

   · Taxonomy evidence: The public laboratory describes transmission of checked-baggage images from international departure airports for remote U.S. review and reports completed pilots. This establishes cross-site review configurations, not separately attributable commercial system revenue. ([pnnl.gov](https://www.pnnl.gov/projects/international-remote-baggage-screening))

2. House Report 119-173 - Department of Homeland Security Appropriations Bill, 2026

   · Evidence informing the 2030 market-value input; displayed series and growth include calculations: The aging installed fleet supports replacement demand, but does not establish the forecast's realization dates or annual purchasing rate. ([govinfo.gov](https://www.govinfo.gov/content/pkg/CRPT-119hrpt173/html/CRPT-119hrpt173.htm))

3. GAO-24-106573 - DHS Annual Assessment: Most Programs Are Meeting Current Goals, but Some Continue to Face Cost and Schedule Challenges
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports plans for xx.xx checkpoint systems and xx.xx increment-one deployments by September 2023; supports an incomplete replacement cycle rather than universal CT adoption.
   ([gao.gov](https://www.gao.gov/assets/gao-xx.xx-xx.xx.pdf))
4. Global Airport Passenger Traffic Reaches Record 9.8 Billion in 2025, Airports Council International World reports
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports cooling passenger-growth momentum in 2026, supporting moderation of traffic-driven equipment expansion despite continuing replacement demand.
   ([aci.aero](https://aci.aero/2026/xx.xx/xx.xx/global-airport-passenger-traffic-reaches-record-xx.xx-xx.xx-billion-in-2025-airports-council-international-world-reports/))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year 2025 traffic weakness qualifies the mature-market expansion assumption.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year growth provides a regional direction check, not an equipment-share observation.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Full-year traffic growth constrains the regional demand premise.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported first-half 2026 decline of xx.xx% constrains the recovery scenario.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 growth provides a demand-direction check; procurement intensity remains assumed.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported traffic momentum supports differentiated demand, not the final modeled forecast share.
5. Smiths Group PLC - Full Year Results for the 12 Months Ended 31 July 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Discloses aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx for FY2024; supplies historical cycle proxies.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Reports approximately xx.xx cumulative CTiX sales and continuing aviation upgrade demand; supports replacement activity, not an observed global forecast.
   ([www-live.smiths.com](https://www-live.smiths.com/media/snqpxwkd/smiths-group-plc-annual-results-2025-press-release.pdf))

6. Smiths Group PLC - Annual Report & Accounts FY2023
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation original-equipment revenue of xx.xx, used as a dimensionless historical capital-cycle proxy. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports FY2023 aviation original-equipment revenue of xx.xx and aftermarket revenue of xx.xx; supports the modeled recovery direction. ([www-live.smiths.com](https://www-live.smiths.com/media/phjp1j44/smiths-annual-report-2023.pdf))
7. Smiths Group PLC - Annual Report FY2022
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports FY2021 aviation revenue of xx.xx, providing a historical purchasing-cycle reference rather than a global observation. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Reports FY2022 aviation revenue of xx.xx and continued weakness in aviation original equipment; supports a delayed capital-spending trough. ([www-live.smiths.com](https://www-live.smiths.com/media/xjvdpblr/smiths-annual-report-2022-report.pdf))
8. Smiths Group PLC - Annual Results for the Year Ended 31 July 2019
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Reports FY2018 aviation revenue of xx.xx, supplying the historical comparison underlying the backcast. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Reports FY2019 aviation revenue of xx.xx and customer delivery deferrals, qualifying a traffic-only growth model. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Identifies deliveries deferred into FY2020; supports the possibility of backlog-supported spending despite a contemporaneous traffic shock, not the exact modeled growth rate. ([smiths.com](https://www.smiths.com/media/u4wla1bw/smiths-group-plc-annual-results-2019-press-release.pdf))
9. ACI World - The High-Wire Balancing Act: Global Air Transport Demand in 2018 and 2019
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers and xx.xx% growth in 2018; the growth observation informs the 2017 backcast bridge. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Provides the observed 2018 traffic-growth reference, not an equipment-market growth observation. ([blog.aci.aero](https://blog.aci.aero/airport-economics/the-high-wire-balancing-act-global-air-transport-demand-in-2018-and-2019/))
10. ICAO A42-WP/556 - State of the Industry and Outlook for Airport Traffic, Presented by ACI
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Records the collapse from xx.xx airport passengers in 2019 to xx.xx in 2020; constrains the shock and funding-risk interpretation. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2021, supporting a prolonged funding and activity shock. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2023; traffic recovery is distinguished from equipment purchasing. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports xx.xx airport passengers in 2024, providing a demand recovery cross-check. ([icao.int](https://www.icao.int/sites/default/files/Meetings/a42/Documents/WP/wp_556_en.pdf))

11. Port of Seattle - Baggage Handling System Optimization
    - Evidence informing the 2029 market-value input; displayed series and growth include calculations: Seattle plans to consolidate six baggage-screening systems, increase supported passenger capacity, and reduce screening-machine demand. Supports integration spending without one-for-one detector growth. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The consolidation example constrains equipment-volume assumptions; its whole baggage-handling project value is excluded from market sizing. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Provides a commercial counterexample to extrapolating passenger growth directly into machine counts throughout the long-range forecast. ([portseattle.org](https://www.portseattle.org/projects/baggage-handling-system-optimization))
12. Smiths Group PLC - Half Year Results for the Six Months Ended 31 January 2026
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Reports xx.xx% organic growth for Smiths Detection in HY2026, with aviation checkpoint upgrades contributing. Supports a positive 2026 nowcast, not a directly observed global growth rate. ([www-live.smiths.com](https://www-live.smiths.com/media/villk35h/smiths-hy26-results-press-release.pdf))
13. ACI World - Biannual global air travel demand update, 30 September 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; geographic rebasing and spending intensities are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; Mexico is reassigned to its captured North American parent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input; source membership differs from the captured hierarchy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic-scale input before the modeled Turkey and Israel bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million 2025 traffic estimate constrains the regional demand proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-billion 2025 traffic estimate constrains regional scale; forecast purchasing convergence is assumed.

14. CATSA - 2025 Annual Report, Management's Discussion and Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: C$xx.xx EDS capital expenditure constrains the Canadian expenditure calibration; baggage attribution is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Buyer-spending calibration supports a premium regional equipment/support intensity, not an observed regional share.
15. Leidos - Leidos wins TSA logistics contract, 23 January 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The eight-year, USD xx.xx maximum sustainment award covers xx.xx units at over xx.xx locations; scope and realization adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports recurring-support scale and manufacturer-coordination constraints, not unrestricted service access.
16. ACI-LAC - Air Traffic in Latin America and the Caribbean Maintains Growth Trajectory with a 5% Increase in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil's xx.xx-million airport-traffic aggregate constrains its demand scale; equipment intensity remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional traffic evidence constrains the common country model while leaving uncatalogued activity.
17. Eurostat - Air passenger transport statistics, December 2025, Table 1: 2024 country traffic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Traffic primitive.
18. Eurostat - Air passenger transport: data by month
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim country changes inform assumed 2025 bridges; domestic endpoint and expenditure adjustments remain modeled.

19. ACI EUROPE - 2025 all about traffic resilience as Europe's airports welcomed an additional 100 million passengers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country growth heterogeneity constrains the shared European purchasing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Russian weakness constrains, rather than validates, its working scale.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Annual growth input to the 2025 bridge.
20. UK Civil Aviation Authority - UK aviation officially breaks records with over 300m passenger journeys in 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-million UK-and-Crown-Dependency headline constrains the modeled UK country traffic bridge.
21. Fraport - AI for Monitoring Aviation Security, 22 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx CT scanners and approximately EUR xx.xx cumulative checkpoint investment support a premium installed-mix premise, not annual national revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quantified national deployment provides an independent test of heterogeneous European modernization.
22. ECAC - Common Evaluation Process of security equipment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Evaluation is not national approval; no uniform cross-country market-access premium is assumed.
23. DHMİ - Havayolunda Cumhuriyet Tarihinin Rekoru, 9 January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the traffic rebasing into the captured Middle Eastern parent.
