   4.1. Introduction 42
   4.2. Key Growth Contribution 45
   4.3. Industry Ecosystem & Value Chain Analysis 79
      4.3.1. Supply-Side Analysis 80
      4.3.2. Demand-Side Analysis 81
      4.3.3. Stakeholder Analysis 81
   4.4. Market Dynamics 82
      4.4.1. Key Drivers 83
         4.4.1.1. Backlist availability supports differentiated replenishment purchasing 83
         4.4.1.2. Creator-owned storefronts connect audience demand to production-linked fulfillment 83

4.4.1.3. Academic calendars create time-bound institutional commissioning requirements .83
4.4.2. Key Restraints 84
4.4.2.1. Wholesale returnability can preserve publisher exposure after order-triggered printing 84
4.4.2.2. Digital access creates a use-dependent alternative to physical commissioning 84
4.4.2.3. Children's-book classifications create format-specific market-access obligations 84
4.4.3. Key Opportunities 85
4.4.3.1. Title-specific replenishment accountability for continuing publications 85
4.4.3.2. Production-linked fulfillment for audience-owning creators 85
4.4.3.3. Separately commissioned packaging around established printing relationships 85
4.4.3.4. Rights-cleared territorial ordering access 85
4.4.4. Key Challenges 86
4.4.4.1. Customer-facing arrival promises can exceed the production provider's commitment 86
4.4.4.2. Multicomponent book-and-pack orders require explicit coordination accountability 86
4.4.4.3. Finished-book sourcing claims depend on the applicable certification arrangement 86
4.5. Porter’s Five Forces Analysis 87
4.6. PESTLE Analysis 88

1. Preface

1.1. Objectives of the Study

- Which providers have documented offerings in the accepted book-production and book-associated packaging services, and which act as integrated contractors, specialists, or intermediaries?
- What qualification, content-permission, onboarding, contractual-assurance, and delivery requirements must a provider satisfy for the relevant buyer and commissioned book format?
- How do Direct Provider Contracting and Intermediary-Led Contracting allocate purchasing authority, subcontracting visibility, accountability, and the conditions for changing providers?
- Which combinations of Service Offering, Book Format, Packaging Format, Printing Technology, and Interior Color are supported by documented capabilities rather than inferred from general company participation?
- How do Print-on-Demand, Stock Replenishment, and Planned Stock Production interact with fulfillment obligations, inventory exposure, scheduling flexibility, and service continuity?
- Which jurisdiction-specific purchasing, trade, accessibility, product-safety, or environmental conditions, where applicable, affect access for the accepted book and packaging categories?
- What evidence is needed to compare competing service arrangements and switching alternatives without treating category inclusion, an advertised offering, or a broader corporate portfolio as proof of buyer suitability?

1.2. Market Definition

Book Printing & Packaging Services covers commercially supplied services for physical books and their associated packaging across the Global market. The included activities are Prepress Services, Book Printing, Bookbinding & Finishing, Book Packaging Production, Book Packing & Kitting, Production-Linked Fulfillment, and Print Production Management. These services are included whether commissioned separately or supplied through an integrated arrangement.

The scope includes every accepted book format, including non-paper formats, and every accepted packaging and printing category. Buyers include publishing organizations, authors and creators, institutions, public bodies, commercial and nonprofit organizations, households, and production-service businesses commissioning work from other providers. The commercial relationship, rather than ownership of a printing facility, determines the relevant buyer, contractor, and service responsibilities.

Book-associated packaging and production-linked fulfillment remain included when supplied by a different party from the book printer. Standalone equipment and raw-material sales, content rights and royalties, electronic publications, book resale, unrelated packaging, and

logistics unrelated to the included production relationship are adjacent activities rather than additional services within this definition. Their relevance is limited to explaining supply relationships, buyer choices, or access conditions affecting the included services.

1.3. Market Segmentation & Coverage

Service Offering distinguishes the commissioned responsibilities: Prepress Services; Book Printing; Bookbinding & Finishing; Book Packaging Production; Book Packing & Kitting; Production-Linked Fulfillment; and Print Production Management. This axis supports comparison of specialist and integrated arrangements without assuming that every provider supplies the complete service chain.

Book Format includes Hardcover Books; Paperback & Softcover Books; Board Books; Wire, Coil & Comb-Bound Books; Loose-Leaf Books; Saddle-Stitched Booklets; Slide-Bound Books; Accordion-Fold Books; Textile Books; Bath Books; and Foam Books. These are affirmative coverage categories for assessing commercial capability and buyer fit, not claims that the formats are interchangeable.

Packaging Format includes Slipcases; Boxes & Lidded Cases; Sleeves & Wraparound Bands; Envelopes, Wallets & Folders; Bags & Pouches; Film & Paper Wraps; Blister & Clamshell Packs; Protective Inserts & Cushioning; and Seals & Strapping. The axis concerns these formats in their book-associated commercial role, including separately commissioned packaging.

Printing Technology includes Offset Lithography, comprising Sheetfed Offset Printing and Web Offset Printing; Digital Printing, comprising Inkjet Printing, Electrophotographic Printing, and Thermal Printing; Gravure Printing; Flexographic Printing; Screen Printing; Letterpress Printing; Stencil Duplicator Printing; Silver-Halide Photographic Printing; and Braille Embossing. Technology classification identifies the relevant offering category without establishing universal supplier capability or equivalence between categories.

Publication Application includes General-Interest Books; Educational & Training Books, comprising School Textbooks & Workbooks, Higher Education Textbooks, and Vocational & Continuing Education Books; Scholarly & Professional Books, comprising Scholarly Research Books and Professional & Technical Reference Books; Religious & Devotional Books; Art & Photography Books; Activity & Puzzle Books; Music Books & Scores; Commemorative & Personal Books, comprising Yearbooks & Organizational Commemoratives and Personal Photo & Memory Books; and Institutional & Corporate Books. This axis distinguishes the purpose of the commissioned publication from the identity of its buyer.

Buyer Type includes Publishing Organizations; Self-Publishing Authors & Creators; Educational & Research Institutions; Government & Intergovernmental Bodies; Corporate & Commercial Buyers; Nonprofit & Membership Organizations; Private Individuals & Households; and Print & Production Service Providers. The classification concerns the commissioning party, including a production provider purchasing another provider's services.

Production Model distinguishes Print-on-Demand, Stock Replenishment, and Planned Stock Production. Its commercial purpose is to frame commissioning logic and inventory responsibility separately from the technology used.

Fulfillment Model distinguishes Consolidated Handoff, Distribution-List Delivery, and Order-Level Fulfillment. This axis identifies the agreed delivery responsibility associated with the production relationship rather than assuming that printing and fulfillment have the same contracting party.

Procurement Channel distinguishes Direct Provider Contracting and Intermediary-Led Contracting. It supports examination of purchasing authority, coordination, and accountability without determining which party performs each included service.

Print Run Length includes Single-Copy Runs, Short Runs, Medium Runs, and Long Runs. These accepted labels provide a commercial classification for comparing requirements; they do not independently establish the appropriate technology or supplier.

Interior Color distinguishes Black-and-White Interiors, Spot-Color Interiors, and Full-Color Interiors. It describes an attribute of the commissioned book separately from its application, format, and procurement arrangement. All segmentation axes are independent analytical lenses and must not be added together as separate opportunities.

Sources & Evidence

1. 2022 North American Industry Classification System - United States

- Taxonomy evidence: NAICS xx.xx distinguishes book printing or combined printing-and-binding without publishing from publishing and separately performed binding. This is an activity crosswalk, not the composite market's complete scope.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Books printing, integrated printing-and-binding, and trade binding are distinguished from publishing and from one another.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Book and pamphlet printing, including integrated printing-and-binding, is explicitly recognized. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The support-activities class recognizes production preparation services.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Separately performed bookbinding and postpress services are distinguished from integrated book printing.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Printing brokers are classified separately from performing book-printing establishments, supporting a relationship-based channel distinction.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The 2022 classification separately identifies book printing and printing brokers, supplying an official activity distinction between performing production and intermediating its procurement.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The index explicitly recognizes printing brokers; this establishes an intermediary activity, not a share or particular platform's role.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Printing brokers are separately indexed under support-service activity rather than book-printing manufacturing. This supports a distinct intermediary role, not a market-share estimate.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Performing book-printing establishments constitute a distinct production activity from brokerage. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The index assigns printing books without publishing, and printing and binding books without publishing, to book-printing activity.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The manual distinguishes book publishers from independent authors acting as their own publishers. This supports purchaser-role identity, not verified printing expenditures.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: NAICS separately identifies book publishers, printing without publishing, institutional issuers, and independent authors acting as their own publishers.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: The printing subsector recognizes lithographic, gravure, screen, flexographic, digital, and letterpress families independently of product purpose.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Screen printing is a separate recognized printing family; this broad classification does not quantify its book-specific activity.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Letterpress is separately recognized rather than subsumed under flexography.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Book publishers undertake the design, editing, and marketing activities associated with producing and distributing books; music publishing is separately recognized.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Independent authors acting as their own publishers are explicitly distinguished from book-publishing establishments.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Schools and universities issuing books outside a dedicated publishing business retain their primary institutional classification.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Trade associations and social-welfare organizations issuing books are distinguished from dedicated book publishers.
([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

2. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312

- Taxonomy evidence: The official production questionnaire separates textbooks, technical/scientific/professional books, religious books, and general books. It supplies category recognition rather than current global quantities. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The official printing schedule distinguishes textbook, technical/scientific/professional, religious, and general-book production, supporting purpose-related commercial distinctions. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The general-book line includes trade books for adults and juveniles. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: General-book printing includes trade books for adult and juvenile audiences. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The textbook line includes teacher editions and workbooks. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Textbook production expressly includes teacher editions and workbooks. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Technical, scientific, and professional book production is separately identified. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Religious-book production has a separate product line. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Religious-book printing and binding is separately identified. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Coloring books are included in recognized book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The general-book product line expressly includes coloring books. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Music books are recognized within book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The schedule recognizes music books within book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Contract-work expenses and binding of material printed elsewhere establish trade-production relationships, without isolating their book-only purchaser mix. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The questionnaire records outsourced production expenses and bookbinding of material printed elsewhere, supporting a trade-purchasing role without establishing its book-only size. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The economic-census questionnaire distinguishes printed-and-bound books, printing-only books, and binding of material printed elsewhere. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Book-production reporting includes both complete printed-and-bound products and unbound printing-only output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: Hardcover and softcover binding of books printed elsewhere are identifiable product activities. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
- Taxonomy evidence: The questionnaire separately identifies rigid paperboard-box manufacturing rather than treating every receipt as book printing. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))

3. EDItEUR - ONIX Codelists Issue 75, List 150: Product Form
   - Taxonomy evidence: The inspected vocabulary separates principal physical forms and favors conventional form coding over a generic novelty designation where applicable. The study's hybrid precedence is an adaptation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: The book-trade product-form vocabulary recognizes conventional bindings and explicit specialty physical forms; its novelty-book guidance favors an applicable conventional form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BB identifies hardback or cased books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BC identifies paperback and softback books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BH identifies books with board pages. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BE groups spiral, comb, and coil binding. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BD recognizes loose-leaf books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BF includes stapled, low-extent wire-stitched books without a distinct spine. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BL recognizes slide-bound books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BO recognizes concertina-folded booklets as well as nonbook charts; only book applications are retained. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BI identifies textile-page books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Code BI recognizes books whose pages are textile, distinct from cloth-covered conventional books. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BJ recognizes books printed on waterproof material. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: BP recognizes books with foam covers and pages. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
4. EDItEUR - ONIX Codelists Issue 75, List 175: Product Form Detail
   - Taxonomy evidence: Form-detail coding distinguishes binding features from the principal product form, supporting construction-based rather than decorative-feature allocation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Form-detail codes distinguish binding and novelty features from the principal product-form field. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Binding details recognize comb, coil, twin-loop wire, and concealed-wire variants within the wire/spiral family. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Comb, twin-loop wire, coil, and concealed-wire details map to the spiral-bound parent form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Loose-leaf sheets and binder/component combinations are separately identifiable details. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Separate codes identify loose-leaf sheets and binder/component combinations. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: A saddle-sewn/stitched form detail is separately recognized. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

5. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Outer-packaging coding is separate from physical book form. The vocabulary covers multiple publishing media, so recognition alone does not prove book-specific purchasing. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: The product-packaging vocabulary separates external enclosures from the book's physical form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Separate entries recognize single-item and multivolume slipcases. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Lidded boxes, carrying cases, and tins are recognized constructions. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Wraparound sleeves leave opposing ends uncovered, distinguishing them from enclosed wraps. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Wallet/folder packaging is recognized; the slip-sleeve description can also denote an envelope, requiring construction-based allocation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Wallet/folder packaging is explicitly recognized. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Pouch/bag packaging has a separate entry. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Pouch/bag packaging has a distinct standardized entry. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Shrink wrapping is separately recognized. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Shrink wrapping is recognized independently of boxes and slipcases. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Formed-plastic clamshell and card-backed blister packs are distinct named constructions. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Codes distinguish formed-plastic clamshell packaging from card-backed blister packaging. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Browse-prevention tape is an explicit book-related closure. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Browse-prevention tape is an explicit book-related closure category. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

6. U.S. Government Publishing Office - Print Order Form 2511 Instructions
   - Taxonomy evidence: Order quantity is expressed as finished assembled products, supporting finished-copy rather than sheet counts; no universal run bands are prescribed. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Quantity is the number of finished assembled products, including books, rather than constituent items; this supports a finished-copy allocation unit, not universal run-band thresholds. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Interior inks are specified separately from cover inks. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Text inks are specified for internal book or pamphlet pages separately from cover inks, with black, full process color, and Pantone examples. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Black is an explicit interior-ink specification. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Black is explicitly listed as an interior text-ink specification. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Designated Pantone colors are permitted for interiors. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Pantone-number specifications are explicitly permitted for interior text inks, supporting designated spot-color interiors. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Four-color process is identified as full color for interiors. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Four-color process, identified as full color, is explicitly listed for interior text inks. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: A nominated delivery address supports consolidated receiving-point handoff. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: The print-order instructions provide a delivery-address field and separately recognize publications shipped to warehouses, supporting consolidated receiving-point handoff. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Multiple destinations can be supplied through an attached distribution list. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: The instructions permit multiple destinations through an attached distribution list, independently of the ordered book quantity. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Paper-banded sets are an identifiable packaging configuration, strengthening support for the retained band grouping. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Shrink wrapping is specified separately from cartons. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Taxonomy evidence: Banding, wrapping, and container packing are identifiable output-handling requirements, distinct from binding. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))

7. Scottish Government - Print and Associated Services Framework, Lot 1 Buyer Guide: Framework Objectives
   - Taxonomy evidence: The April xx.xx 2024 buyer guide includes bound books and associated services within a print-services framework. This is a public purchasing example, not a worldwide market definition. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: The April xx.xx 2024 buyer guide purchases printing alongside named supporting activities; it is a procurement example, not a worldwide market definition. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Production management is an explicitly purchased associated service. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Production management is an explicit purchased service within the print framework. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Printed packaging and paper-over-board slipcases are identified deliverables. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: The framework includes printed packaging and paper-over-board slipcases among deliverables. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Finished-goods stock holding and call-off may be included in the print-job cost. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Stock holding and stock call-off may be included in the print-job cost, supporting contract-linked rather than unrestricted logistics coverage. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Stock holding, call-off, and distribution are recognized production-linked arrangements. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: The April xx.xx 2024 buyer guide includes bound books, stock holding, stock call-off, and fulfillment within a print-services framework, establishing production-linked handoff arrangements. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: The contractor uses nominated addresses and distribution lists, with copies per addressee specified for the job. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: The contractor must maintain distribution lists and deliver to nominated addresses; the buyer specifies copies per addressee for each job. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Finished goods may be held for customer call-off and distribution on demand. This supports releases from existing stock, but does not establish that every call-off is a separate recipient order. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))

8. U.S. Census Bureau - NAPCS Product List for NAICS 51113: Book Publishers
   - Taxonomy evidence: The official product crosswalk distinguishes printed professional/technical books from printed scholarly books. It is a historical classification document, not current manufacturing-revenue evidence. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: Professional/technical printed books are defined around information used in occupational practice and expressly include specialized references. This directly supports the retained child under Scholarly & Professional Books. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: Printed scholarly books are aimed primarily at academic and research communities, supporting their distinction from occupational-practice references. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: Printed-book definitions explicitly include braille editions. This supports physical-book inclusion, not any particular reproduction method or current commercial quantity. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: The official product definitions distinguish printed school and postsecondary textbooks and include workbooks and teacher resources. This is a classification crosswalk, not current market-volume evidence. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: Printed elementary and secondary textbooks include preschool instructional material. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
   - Taxonomy evidence: Printed postsecondary textbooks are defined by their primary use in college and university study programs. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))

9. U.S. Government Publishing Office - Organizational Transformation Evaluation, Report 22-06, May 19, 2022

   · Taxonomy evidence: The May xx.xx 2022 evaluation discusses initial sales inventory, stock replenishment, and print-on-demand as distinct commercial arrangements. It is historical evidence, not a current adoption measure. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: The May xx.xx 2022 evaluation discusses initial sales inventory, small-quantity stock replenishment, and print-on-demand, supporting separation of inventory policy from printing technology. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: A footnote describes print-on-demand as production after an order is placed, avoiding stock for that fulfillment arrangement. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: The report defines print-on-demand as printing after an order is placed, without maintaining stock for that order-fulfillment model. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: A print-on-demand vendor is also described as replenishing stock in small quantities, showing why supplier terminology alone cannot determine the study's production-trigger allocation. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: The report describes using a print-on-demand vendor to replenish stock in small quantities, demonstrating that vendor terminology can encompass inventory replenishment. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: Ordering copies for sales inventory at initial production establishes an inventory-building counterpart to recipient-order production. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: The report describes ordering copies for sales inventory at initial printing, providing an observed inventory-building counterpart to order-triggered printing. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

   · Taxonomy evidence: Print-on-demand is explicitly discussed as an order-fulfillment method; the report does not fully specify recipient-level picking and packing from existing inventory. ([oversight.gov](https://www.oversight.gov/sites/default/files/documents/reports/2022-xx.xx/GPOOTEReport-xx.xx-0619May2022Final.pdf))

10. Government Commercial Agency - Print and Digital Communications, RM6297

    · Taxonomy evidence: The inspected framework distinguishes customers needing a print manager from simpler print purchasing. Direct award is an award procedure, not proof of direct manufacturer contracting. ([webprod-cms.crowncommercial.gov.uk](https://www.webprod-cms.crowncommercial.gov.uk/agreements/RM6297))

    · Taxonomy evidence: The managed service includes supply-chain sourcing and management, corroborating a separate intermediary-led procurement role. ([webprod-cms.crowncommercial.gov.uk](https://www.webprod-cms.crowncommercial.gov.uk/agreements/RM6297))

    · Taxonomy evidence: Print management is commercially purchased alongside production, finishing, stock management, and distribution. The framework does not establish a global separately billed management-fee convention. ([webprod-cms.crowncommercial.gov.uk](https://www.webprod-cms.crowncommercial.gov.uk/agreements/RM6297))

11. HM Revenue & Customs - VBOOKS3130: Books and Booklets, Function

- Taxonomy evidence: The official manual recognizes photobooks with book characteristics and distinguishes them from supplies dominated by photographic services. National tax treatment is not used as a global inclusion rule. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
- Taxonomy evidence: The manual recognizes qualifying photobooks and discusses a wedding-book example, while distinguishing book products from predominantly photographic-service supplies. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
- Taxonomy evidence: Crossword and puzzle books are explicitly recognized, supporting product identity alongside content-bearing workbooks. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
- Taxonomy evidence: The official manual separately discusses crossword and puzzle books for adults and children, supporting their product identity. National tax treatment is not applied as a global market-inclusion rule. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
- Taxonomy evidence: The manual discusses primary function and multipurpose products, corroborating the need for an explicit purpose-based allocation rule without prescribing this global partition. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
- Taxonomy evidence: The wedding-book example establishes a customer-facing personal-event product, but not a separately attributable household manufacturing purchase. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))

12. Library of Congress, National Library Service - About Braille

- Taxonomy evidence: The official library publication distinguishes duplicating/embossing copies and binding braille books, establishing a physical reproduction activity. It also identifies volunteer activity, which must not be counted as paid market receipts. ([loc.gov](https://www.loc.gov/nls/services-and-resources/informational-publications/about-braille/))
- Taxonomy evidence: Physical braille reproduction is distinguishable from preparing materials for electronic refreshable displays, supporting a physical-content technology distinction within the retained book-production boundary. ([loc.gov](https://www.loc.gov/nls/services-and-resources/informational-publications/about-braille/))

13. Library of Congress, National Library Service - Contract Specifications

- Taxonomy evidence: The currently inspected contract-specifications catalog separately lists Braille Books Pamphlets and Print/Braille Books. It establishes public purchasing-category recognition, not a current award or paid receipt. ([loc.gov](https://www.loc.gov/nls/who-we-are/guidelines-and-specifications/contract-specifications/))
- Taxonomy evidence: Physical braille books appear in the library's contract-category catalog, complementing the official description of embossing activity. The linked production specifications were not used for operational details. ([loc.gov](https://www.loc.gov/nls/who-we-are/guidelines-and-specifications/contract-specifications/))

14. Library of Congress, National Library Service - Braille on Demand

- Taxonomy evidence: The inspected program page offers hard-copy braille books in response to individual patron requests, corroborating request-triggered physical-book output. It does not establish the quantity or billing of each manufacturing release. ([loc.gov](https://www.loc.gov/nls/services-and-resources/braille-on-demand/))
- Taxonomy evidence: Patrons request particular physical books for personal retention, supporting a recipient-requested arrangement rather than only a commissioner-preallocated distribution list. Separate picking/packing revenue is not established. ([loc.gov](https://www.loc.gov/nls/services-and-resources/braille-on-demand/))
- Taxonomy evidence: The page provides an active public application for hard-copy braille books, supplementing category recognition without establishing commercial market size. ([loc.gov](https://www.loc.gov/nls/services-and-resources/braille-on-demand/))

15. U.S. Government Publishing Office - Digital Printing
    - Taxonomy evidence: The procurement flyer permits conventional offset or digital production against the same specified output-quality requirement. Its national quality levels therefore do not justify treating printing technology as a global quality-tier proxy. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))
    - Taxonomy evidence: Conventional offset is explicitly recognized as an eligible production alternative independent of the stated quality requirement. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))
    - Taxonomy evidence: Digital production is explicitly recognized as an alternative under the same output-quality requirement. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))
16. UNSD - ISIC Rev. 4, Code 1811: Printing
    - Taxonomy evidence: ISIC Rev. xx.xx class xx.xx includes book printing and distinguishes it from publishing. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: The class recognizes printing of books and brochures across multiple press families. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: Photogravure is a named printing family in the class covering books and printed publications. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: Letterpress is explicitly named among the printing families covered by the book-inclusive classification. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: Flexographic printing is explicitly distinguished as a named printing family. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
17. UNSD - ISIC Rev. 4, Code 1812: Service Activities Related to Printing
    - Taxonomy evidence: ISIC xx.xx distinguishes preparation and postpress support from printing itself. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: Recognized preparation services include typesetting, prepress data work, printing-form preparation, and proofs. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
    - Taxonomy evidence: The classification separately recognizes binding printed sheets and finishing activities, including decorative and protective finishes. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
18. ONIX Codelists Issue 74 - List 150, Code BB: Hardback
    - Taxonomy evidence: Code BB identifies the hardback/cased physical-book form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BB))
19. ONIX Codelists Issue 75 - List 150, Code BC: Paperback / Softback
    - Taxonomy evidence: Code BC identifies paperback and softback books as a physical form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BC))
20. ONIX Codelists Issue 74 - List 150, Code BH: Board Book
    - Taxonomy evidence: Code BH distinguishes board-page books from books defined only by their covers. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BH))
21. ONIX Codelists Issue 74 - List 150, Code BD: Loose-Leaf
    - Taxonomy evidence: Code BD explicitly recognizes the loose-leaf book form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BD))
22. ONIX Codelists Issue 74 - List 150, Code BF: Pamphlet
    - Taxonomy evidence: Code BF identifies stapled pamphlets and short wire-stitched books without a conventional spine. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BF))
23. ONIX Codelists Issue 72 - List 150, Code BL: Slide Bound
    - Taxonomy evidence: Code BL explicitly recognizes slide-bound books as a physical form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/BL))

24. ONIX Codelists Issue 73 - List 150, Code BO: Fold-Out Book or Chart

1.4. Years Considered for the Study

The study uses 2024 as the historical year, 2025 as the base year, and 2026 as the estimated year, with a forecast horizon ending in 2032.

Figure 1. Global Book Printing & Packaging Services Market, Years Considered for the Study

1.5. Currency Considered for the Study

The reporting currency is the United States dollar (USD), with monetary values expressed on an absolute-value basis.

1.6. Language Considered for the Study

The publication language is American English.

1.7. Key Stakeholders

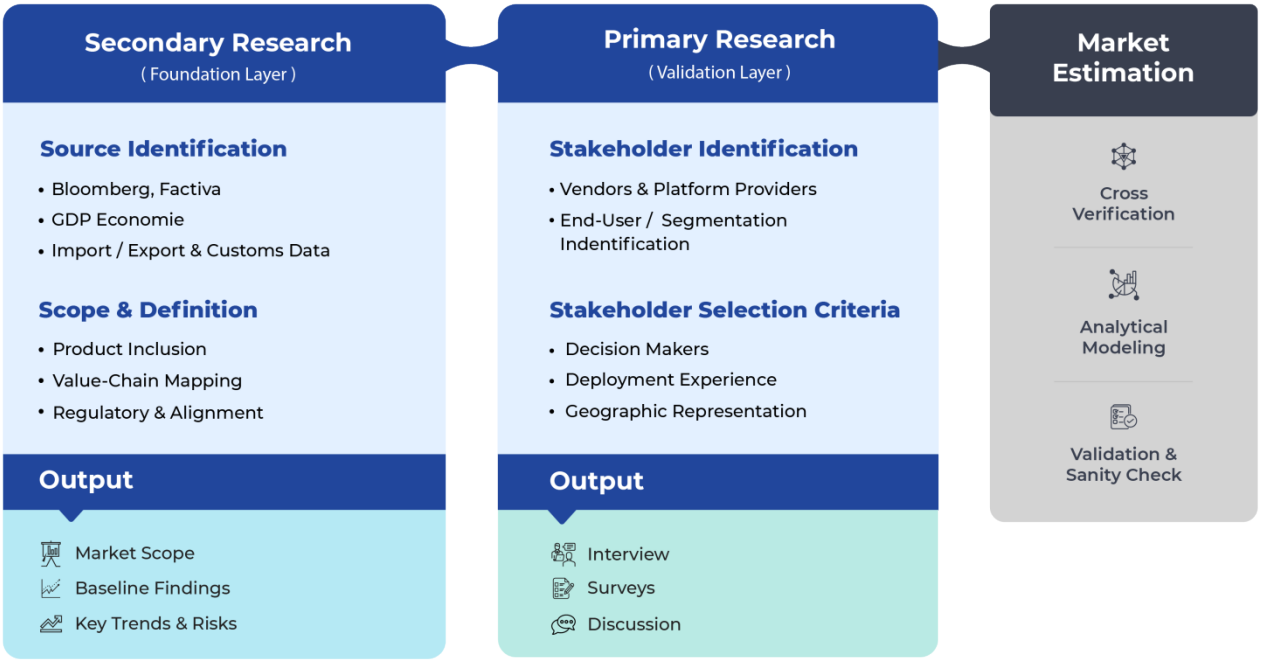
- Publishing Organizations: decisions about production partners, permissions, service bundles, scheduling, and accountability for commissioned books.
- Self-Publishing Authors & Creators and Private Individuals & Households: selection of accessible commissioning routes, suitable book formats, and clearly assigned production and delivery responsibilities.
- Educational & Research Institutions: procurement decisions for textbooks, research publications, training materials, and institutional books, including supplier eligibility and continuity requirements.
- Government & Intergovernmental Bodies: purchasing-rule compliance, contractor qualification, and accountability for institutional publication requirements.
- Corporate & Commercial Buyers and Nonprofit & Membership Organizations: commissioning decisions for institutional, professional, commemorative, and member-facing publications and their associated packaging.

- Book-production and book-packaging providers: decisions about service coverage, buyer qualification, delivery commitments, subcontracting, and the capabilities required for particular commercial orders.
- Print & Production Service Providers acting as buyers: make-or-buy choices, specialist subcontractor selection, and allocation of responsibility across the production relationship.
- Procurement intermediaries and production-linked fulfillment partners: decisions about contracting authority, coordination responsibilities, handoff obligations, and service accountability.
- Equipment and material suppliers: assessment of book-service customer requirements and commercial relationships, while their standalone equipment and material businesses remain adjacent to the studied services.
- Investors, advisers, and industry bodies: evaluation of business boundaries, capability evidence, buyer access, and contractual dependencies without equating value-chain participation with competitive strength.

2. Research Methodology

2.1. Introduction

The study approaches Book Printing & Packaging Services through the commercial relationships connecting book-service buyers, production providers, and book-associated packaging and delivery responsibilities. Its organizing questions are what is supplied, who commissions it, and which party is accountable for the agreed outcome.



This approach supports comparison between integrated providers, specialists, and intermediaries while preserving their different roles. It establishes the scope and evidence conditions for commercial judgment without presuming a preferred technology, procurement route, or production model.

2.2. Research Design

The research design separates commercial participation, buyer access, and economic interpretation. Participation concerns an identifiable provider and an included book-related offering. Access concerns the buyer, jurisdiction, contracting route, and obligations attached to that offering. Economic interpretation considers how those conditions affect purchasing choices without treating advertised capability as proof of adoption or buyer preference.

Coverage follows the accepted service, format, technology, application, buyer, production, fulfillment, procurement, run-length, and color classifications. A claim about one combination is not extended automatically to other combinations, and a company's broader portfolio does not redefine the study boundary.

Figure 2. Global Book Printing & Packaging Services Market, Research Design

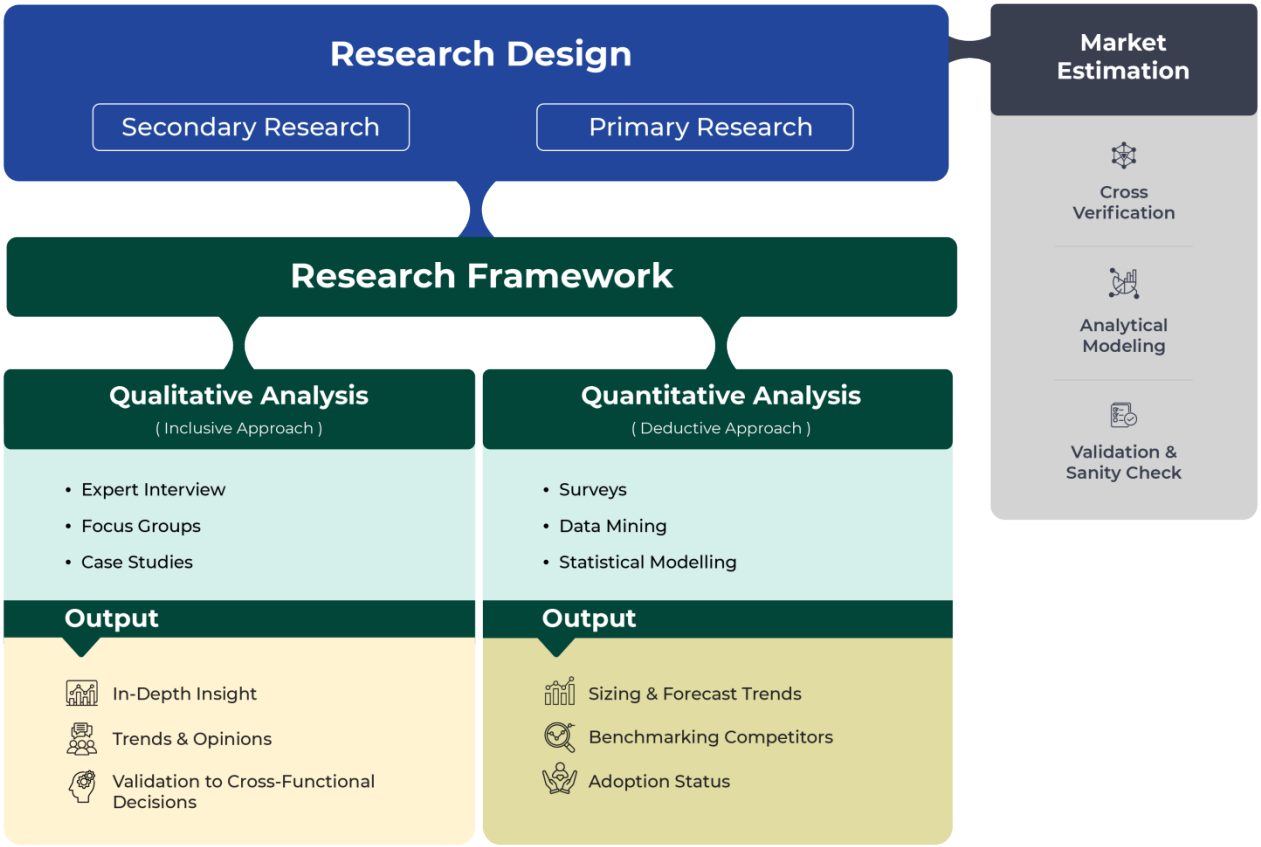
2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Public commercial records have distinct evidentiary roles. Official company portfolios can establish advertised offerings and stated service responsibilities. Mandatory filings can establish disclosed ownership, transactions, and business facts within their reporting perimeter. Regulatory and legal records can establish applicable status or obligations in a particular jurisdiction. Public purchasing records can establish the terms and parties of the purchasing relationship they describe.



These roles are not interchangeable: an offering description does not establish contract eligibility, a public award does not establish access for every buyer, and a regulatory status does not establish adoption. Interpretation should remain tied to the legal entity, activity, jurisdiction, and effective period addressed by the record.

2.3. Research Framework

The framework links each business question to an included offering, an identifiable buyer or supplier role, and the relevant commercial relationship. The accepted taxonomy determines study coverage, while the evidence determines whether a particular provider, contract, or business right supports a conclusion within that coverage.

Competitive comparison distinguishes the contracting party from the party performing the work and from adjacent equipment, material, publishing, or distribution businesses. This distinction supports decisions about supplier fit and accountability without assigning a book-service capability solely from an upstream or downstream affiliation.

Figure 3. Global Book Printing & Packaging Services Market, Research Framework

2.3.1. Qualitative Analysis

Qualitative analysis focuses on the conditions governing a book-service relationship: buyer qualification, permissions to reproduce commissioned content, responsibility for approvals and corrections, subcontracting visibility, delivery obligations, and the practical requirements for changing providers. These questions apply to the relevant service combination rather than assuming that an integrated provider and a specialist subcontractor are interchangeable.

Buyer economics are considered through inventory exposure, scheduling flexibility, coordination effort, service continuity, and contractual responsibility. The framework asks whether a purchasing arrangement improves these conditions and what dependencies it introduces, rather than presuming that bundling, outsourcing, or on-demand commissioning is preferable.

2.3.2. Quantitative Analysis

Quantitative interpretation uses the specified study periods, USD reporting currency, absolute-value presentation, and Global boundary as common reference points. The accepted segmentation axes describe different attributes of commercial activity; comparisons therefore require consistent activity boundaries rather than treating classifications under different axes as additional economic activity.

Observed business facts, analytical assumptions, estimated-year assessments, and future scenarios retain distinct meanings. Changes in a provider's disclosed business perimeter, service bundle, or contractual role should not automatically be interpreted as changes in comparable market conditions.

2.4. Market Size Estimation

Market-value interpretation is bounded by the included book-related services, not by the full business of every participating company. Separately commissioned prepress, binding, packaging, packing, production management, and production-linked fulfillment remain within scope alongside integrated book-production arrangements.

Any monetary conclusion requires evidence corresponding to the activity and period being measured. Category inclusion establishes coverage, but it does not establish a supplier's contribution or make overlapping service descriptions additive. Qualitative judgments about capability or buyer needs are not substitutes for activity-specific monetary support.

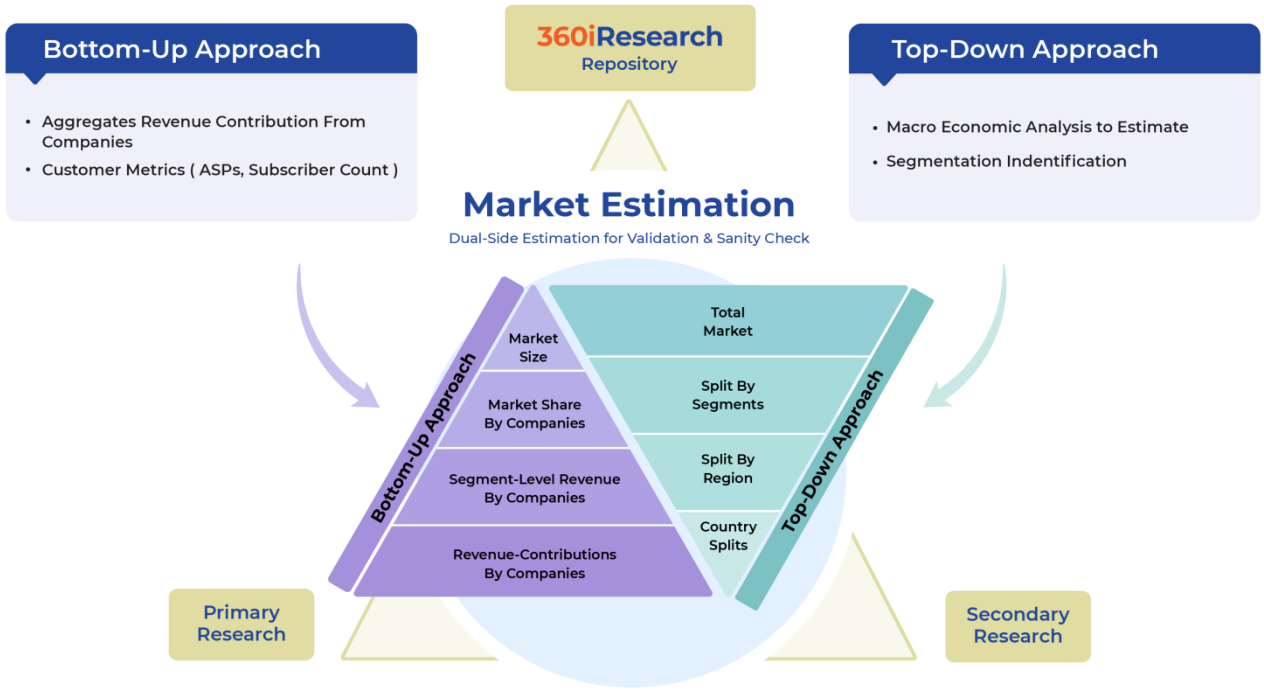
2.4.1. Top-Down Approach

The top-down perspective is a boundary check against broader publishing, commercial-printing, packaging, or logistics activity. A wider sector aggregate is relevant only to the extent that its coverage can be related to the included book services; its full scope cannot be assigned to this market merely because participating businesses overlap.

Comparability depends on the activity covered, the period, the geography, and whether the description concerns an integrated service or a component of it. A broader classification can provide context without establishing an equivalent measurement perimeter.

2.4.2. Bottom-Up Approach

The bottom-up perspective concerns the relationship between a provider's documented activity and the included book services. An integrated producer, specialist binder, book-packaging provider, and contracting intermediary can have different roles in the same order; identifying those roles is necessary before interpreting their activities together.



Contract scope and subcontracting relationships are therefore important comparison conditions. A provider's presence in the value chain or its broader business turnover does not by itself establish the contribution of the included activity.

2.5. Data Triangulation

Triangulation concerns whether different records address the same service, commercial party, jurisdiction, and effective period. A portfolio, a financial disclosure, and a purchasing record answer different questions; agreement on a company name does not make their claims interchangeable.

When accounts differ, interpretation should preserve material differences in legal entity, bundled scope, eligibility, or timing rather than blend them into an unsupported conclusion. Repetition of the same underlying announcement is not independent corroboration.

Figure 4. Global Book Printing & Packaging Services Market, Data Triangulation

2.6. Research Outcomes

The intended outcome is a defensible basis for comparing book-service providers, commissioning arrangements, and procurement alternatives within the accepted Global scope. Decision support should distinguish documented offerings from conditional suitability, identify who controls purchasing and delivery obligations, and clarify which contractual or jurisdiction-specific conditions require verification before commitment.

The analysis is intended to help buyers assess supplier fit and switching requirements, help providers evaluate the capabilities required to serve particular buyer needs, and help investors distinguish participation in the book value chain from an evidenced position in the included services.

2.7. Research Assumptions

- An included activity is treated as book-related when its documented commercial purpose concerns a physical book or associated preparation, packaging, packing, production management, or production-linked fulfillment. General printing or packaging capability alone is not assumed to establish that relationship.
- Separately commissioned and bundled services both remain within scope. Interpretation depends on identifying the service and the parties' responsibilities rather than assuming that a separate contract creates an unrelated market.
- The segmentation axes describe different attributes of the same commercial activity. Classification under multiple axes does not create additional economic activity.

- Production Model and Printing Technology are separate classifications. Neither is assumed to determine the other or establish a provider's suitability for a particular buyer requirement.
- A provider's stated location is not assumed to establish buyer access, delivery responsibility, or service availability in another jurisdiction. Geographic interpretation must follow the commercial relationship being assessed.

2.8. Research Limitations

- Where a business disclosure combines book services with unrelated printing, publishing, packaging, or logistics activities, the combined disclosure cannot establish the contribution or competitive position of the included services. Conclusions must remain within the separable activity it supports.
- An advertised service does not establish that every accepted format, technology, buyer category, and delivery route is offered together. Supplier fit remains specific to the required combination and contractual commitment.
- A portfolio example or purchasing record supports the relationship and period it describes. It does not by itself establish renewal intentions, exclusivity, ease of switching, or equivalent access for another buyer.
- Where providers use different service or run-length labels, matching terminology cannot establish equivalent purchasing conditions. Comparisons require alignment with the accepted categories and the commercial scope behind each description.

3. Executive Summary

3.1. Introduction

Global Book Printing & Packaging Services is a contract-defined ecosystem spanning preparation, printing, binding, book-associated packaging, packing, production-linked fulfillment, and production management. These responsibilities can be commissioned separately or bundled. Included specialist formats and Braille Embossing remain part of the market without implying interchangeable supplier offerings.

IngramSpark's distinction between printing-only and distribution-enabled titles, Lakeside Book Company's packaging-and-kitting offer, and Bubu's external binding service illustrate different purchasing choices. The decisive buyer problem is securing the required finished book, package, and delivery obligation from an accountable contractor. Integration can reduce handoffs; modular sourcing preserves specialist relationships but requires explicit coordination. Channel access is a separate condition: Barnes & Noble retains placement discretion even when a title's purchasing terms are changed. Commercial positioning therefore depends on the responsibility and access gap a supplier can actually close, not equipment ownership or catalog breadth alone.

3.2. CXO Perspective

Publisher CFOs should tie stocked-edition and replenishment commitments to title-specific availability and edition stability. A fixed arrival requirement can justify Planned Stock Production despite unsold-edition exposure; postponing production is more suitable where the customer accepts the resulting wait. Broader service commitments should follow an accepted availability or handoff obligation, not a provider's portfolio breadth.

For service-provider leaders, a named binding or book-packaging gap offers a more defensible entry position than an unconfirmed integrated promise. Bubu and Showcase Creative advertise specialist contributions, not ready-made partnerships. Taking responsibility for the

complete order requires accepted subcontract obligations; remaining a specialist preserves a narrower responsibility boundary but leaves the wider commission with the prime contractor.

U.S. children's-book accounts require classification-specific compliance ownership; the ordinary-book lead-testing exemption is not a blanket rule for specialty formats. Separately, unresolved contracting identities and complete-service boundaries among some regional, specialist, and legacy alternatives limit backup qualification. Buyers should confirm the seller and accepted commission before relying on those alternatives for continuity.

Sources & Evidence

1. How Do Lulu Direct Orders Work?
   · Lulu Direct prints after purchase, leaving production before shipping; this supports the conditional availability-versus-stock choice. ([help.luludirect.lulu.com](https://help.luludirect.lulu.com/en/support/solutions/articles/xx.xx-how-do-lulu-direct-orders-work-))
2. Terms and Conditions | CPI Print Germany

7. Print Finishing for B2B Print | Bubu
   · The external binding offer establishes a potential specialist contribution, not an accepted partnership or complete-order undertaking. ([bubu.ch](https://www.bubu.ch/en/solutions/b2b-print/))

3.3. New Revenue Opportunities

The assessed revenue themes are continuing-title replenishment for established publishing accounts, production-linked fulfillment for audience-owning creators, separately commissioned packaging around retained printers, and rights-cleared local ordering access. Institutional work remains conditional on the selecting authority's purchasing route and a confirmed commission, rather than reader need alone. These are account-specific service additions: audience access, accepted book-and-destination coverage, and complete-order accountability remain prerequisites. The Opportunity Mapping section provides the detailed

assessment of these routes and their integrated or direct-contract alternatives; none establishes demand or a commercial advantage for every provider.

   · The separately offered publishing-packaging service supports the assessed route around a retained book printer, subject to project acceptance.
   ([showcasecreative.com](https://showcasecreative.com/publishing-packaging))

3.4. Next-Generation Business Models

Established offerings combine book production with different continuing relationships. CPI Print's German ASR supports publisher-controlled replenishment; Acutrack connects advance-stock inventory to ecommerce fulfillment; Lulu Direct produces books after purchase. These models allocate inventory commitment and order handling differently despite their use of automated interfaces. Selection should follow the required title availability, delivered package, and accepted response obligation, rather than a common on-demand label.

Retail administration can also be separated from physical fulfillment. Lulu Direct Standard leaves the creator as merchant of record, while Buy Button gives that role to Lulu; general creator duties for buyer support remain. Creators should choose retained storefront control or

delegated payment administration according to the duties they can sustain, rather than assume outsourced shipment transfers the entire retail promise.

Sources & Evidence

1. How Do Lulu Direct Orders Work?
   · Lulu Direct's documented model produces each book after its order rather than dispatching a previously stocked edition. ([help.luludirect.lulu.com](https://help.luludirect.lulu.com/en/support/solutions/articles/xx.xx-how-do-lulu-direct-orders-work-))
2. Terms and Conditions | CPI Print Germany

3. Terms & Conditions | Lulu
   · Standard leaves the creator as merchant of record; Buy Button assigns that role to Lulu. General creator buyer-support and connectivity responsibilities remain. ([lulu.com](https://www.lulu.com/terms-and-conditions))
4. Automatisiertes Lagermanagement | Dienstleistungen | CPI Print Deutschland
   · ASR connects publisher-defined inventory and reprint controls with delivery to distribution centers or another requested destination. ([cpi-print.de](https://cpi-print.de/de/service/automatisiertes-lagermanagement/))
5. Print On-Demand Books | Just-in-Time vs. Book Printing On Demand | Acutrack
   · Acutrack connects stocked books to ecommerce orders rather than printing after each purchase. This supports a different inventory commitment, not demonstrated superior outcomes. ([acutrack.com](https://www.acutrack.com/book-printing/on-demand/))

3.5. Industry Roadmap

For 2026-2027, deadline-sensitive buyers should obtain destination-arrival acceptance, retain planned stock, or narrow the customer promise: Lulu Direct's published production and delivery dates are estimates. EU-facing book-pack contracts should allocate applicable packaging responsibilities following PPWR's general application on August xx.xx 2026, while distinguishing individual requirement schedules.

For 2028-2029, institutional commitments should follow confirmed publication selection and commissioning. Brazil's March xx.xx 2026 notice for PNLD Anos Finais 2028-2031 supplies a program milestone, not a printing award. Network extensions likewise require accepted coverage: Cloudprinter.com's posted site-acceptance conditions illustrate why book-and-destination commitments and backup responsibilities should precede broader integration. Direct contracting remains an alternative when a specialist undertaking matters more than routing convenience.

For 2030-2032, renewals should settle required independent reuse rights and provide for reassessment of applicable packaging obligations. Jostens' published tool terms restrict third-party printing of tool-created materials; Scotland's public print framework demonstrates a buyer-specific file-handover alternative. The EU's 2030 packaging recyclability objective makes official implementation measures and revised buyer briefs review triggers, without implying simultaneous requirements or uniform supplier displacement.

Sources & Evidence

1. How Do Lulu Direct Orders Work?

   · Lulu states that production and delivery dates are estimates and are not guaranteed, supporting the fixed-arrival qualification. ([help.luludirect.lulu.com](https://help.luludirect.lulu.com/en/support/solutions/articles/xx.xx-how-do-lulu-direct-orders-work-))

2. Packaging waste - European Commission

4. Terms & Conditions - Cloudprinter.com

   · Cloudprinter.com's posted terms, effective August xx.xx 2021, retain site-specific product, location, and shipping acceptance and possible direct agreements. Backup routing does not establish acceptance by a substitute. ([cloudprinter.com](https://www.cloudprinter.com/terms-conditions))

5. Jostens Yearbook Agreement Printing Terms

   · Jostens' published agreement restricts third-party printing and reuse of production materials created with its digital tools; actual executed terms and exceptions require confirmation. ([jostens.my.salesforce-sites.com](https://jostens.my.salesforce-sites.com/terms?Lid=YBKUS))

6. Edital Nº 1/2026 - MEC/FNDE: PNLD Anos Finais 2028-2031

Sources & Evidence

1. Frequently Asked Questions | IngramSpark
   - IngramSpark distinguishes printing-only titles from titles enabled for wholesale distribution. ([ingramspark.com](https://www.ingramspark.com/faqs))
2. Paper Products | Leo Paper Group
   - Leo Paper Group's advertised portfolio includes books and packaging; this establishes portfolio categories, not a particular bundled commitment. ([leo.com.hk](https://www.leo.com.hk/products-services/products.html))
3. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
4. The Global Publishing Industry in 2022
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
5. 2024 年新闻出版统计公报
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
6. Foreign Exchange Rates - G.5A Annual, January 5, 2026
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
7. Book publishing industry, 2024 - Statistics Canada
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

4.2. Key Growth Contribution

Continuing backlist availability can prompt repeat commissioning of supply-chain services alongside book printing. Clays' differentiated backlist arrangements and publisher-warehouse information links demonstrate a proposition built around title-specific availability rather than a uniform stock decision. Serving that need requires usable inventory information, clear replenishment authority, and an accepted response commitment. The counterforce is the customer's arrival requirement: where it cannot accommodate the proposed response, planned stock or a separately agreed service arrangement can be more suitable than postponing production.

Sources & Evidence

1. Supply Chain - Clays

- Clays advertises differentiated backlist arrangements and links to publisher and warehouse systems that provide inventory and distribution visibility. These offerings support the stated commissioning mechanism, not demonstrated title-level performance. ([clays.co.uk](https://www.clays.co.uk/services/supply-chain/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Clays describes differentiated backlist arrangements and stock visibility, supporting a separate inventory-replenishment cohort without establishing its numerical prevalence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Clays describes differentiated backlist arrangements and stock visibility, supporting a separate inventory-replenishment cohort without establishing its numerical prevalence.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New-title consolidation and predictable annual backlist demand support retaining planned inventory commitments; short-run printing is explicitly not necessarily POD.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New-title consolidation and predictable annual backlist demand support retaining planned inventory commitments; short-run printing is explicitly not necessarily POD.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Clays explicitly distinguishes short-run work from POD, supporting category separation rather than a technological proxy for value share.

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2024 output of xx.xx copies/sheets constrains total modeled publisher activity; it does not disclose single-copy production.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2024 output of xx.xx copies/sheets constrains total modeled publisher activity; it does not disclose single-copy production.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate copies and annual title output constrain the shared activity model, not an observed short-run share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate copies and annual title output constrain the shared activity model, not an observed short-run share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate production provides a scale check for the medium-run assumption; annual copies per title are not individual batches.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate production provides a scale check for the medium-run assumption; annual copies per title are not individual batches.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx annual copies per title constrain the long-run scenario without proving its batch mix or forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx annual copies per title constrain the long-run scenario without proving its batch mix or forecast.

5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring separate protection.

8. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Outsourced manufacturing coexists with company-operated distribution. Fiscal-2025 production-related costs were xx.xx% of revenue, constraining the inherited spending bridge rather than directly measuring the assumed route fraction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Outsourced manufacturing coexists with company-operated distribution. Fiscal-2025 production-related costs were xx.xx% of revenue, constraining the inherited spending bridge rather than directly measuring the assumed route fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Book-club revenue was xx.xx% online-ordered and xx.xx% parent-ordered, while products typically went to classrooms. This challenges the use of online sales as a proxy for the external contractor's delivery model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Book-club revenue was xx.xx% online-ordered and xx.xx% parent-ordered, while products typically went to classrooms. This challenges the use of online sales as a proxy for the external contractor's delivery model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct printer-to-customer fulfillment is a disclosed option. Broader logistics/other costs were xx.xx% of revenue versus xx.xx% previously, providing a cost-boundary check but no global order-level share or service-price growth observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct printer-to-customer fulfillment is a disclosed option. Broader logistics/other costs were xx.xx% of revenue versus xx.xx% previously, providing a cost-boundary check but no global order-level share or service-price growth observation.

9. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The photobook observation constrains the shared demand pool used in the silver-halide model; it is not silver-halide output or proof of future adoption.

10. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inspected U.S. regular-trim black-ink schedule charges USD xx.xx plus USD xx.xx per page. It is a contemporary production-charge comparison for the modeled USD xx.xx receipt, not an observed historical Global average.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inspected U.S. regular-trim black-ink schedule charges USD xx.xx plus USD xx.xx per page. It is a contemporary production-charge comparison for the modeled USD xx.xx receipt, not an observed historical Global average.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The relevant current U.S. paperback printing schedule is USD xx.xx plus USD xx.xx per page, giving USD xx.xx at xx.xx pages. This is a commercial price comparison for creator-production receipts, not proof of 2025 realization, volume or fulfillment mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The relevant current U.S. paperback printing schedule is USD xx.xx plus USD xx.xx per page, giving USD xx.xx at xx.xx pages. This is a commercial price comparison for creator-production receipts, not proof of 2025 realization, volume or fulfillment mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule of USD xx.xx plus USD xx.xx per page gives USD xx.xx at xx.xx pages, a magnitude check for modeled single-copy receipts. It establishes neither global volume nor historical or forecast share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule of USD xx.xx plus USD xx.xx per page gives USD xx.xx at xx.xx pages, a magnitude check for modeled single-copy receipts. It establishes neither global volume nor historical or forecast share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule charges USD xx.xx plus USD xx.xx per page, yielding USD xx.xx for xx.xx pages. This is a contemporary price comparator, not a historical global average. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834340))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule charges USD xx.xx plus USD xx.xx per page, yielding USD xx.xx for xx.xx pages. 16. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
17. Hardcover Printing Cost - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
18. User Fees - University of Wisconsin-Milwaukee Print & Copy Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.

19. How Much Does It Cost to Print a Book? - QinPrinting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Softcover prices provide a commercial comparison, not a historical global average.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Softcover prices provide a commercial comparison, not a historical global average.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mechanical-binding quotations constrain the unit-receipt assumption, not incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mechanical-binding quotations constrain the unit-receipt assumption, not incidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.
20. Book Wrap Mailers / Book Boxes - Packaging ONE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.

21. Optional Book Publishing Services - InstantPublisher
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
22. How Does Merchant Pricing Work for Ecommerce Stores? - Lulu Direct
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Merchant retail receipts are separate from payments for printing and fulfillment. The current page lists a USD xx.xx fulfillment fee, with shipping and taxes separately calculated. This supports the service-value boundary, not a historical average fee or global order volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Merchant retail receipts are separate from payments for printing and fulfillment. The current page lists a USD xx.xx fulfillment fee, with shipping and taxes separately calculated. This supports the service-value boundary, not a historical average fee or global order volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lulu identifies separate retail and production/fulfillment transactions and a USD xx.xx fulfillment fee. This supports excluding merchant retail margins from production-service value and avoiding automatic procurement-channel classification from the storefront.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lulu identifies separate retail and production/fulfillment transactions and a USD xx.xx fulfillment fee. This supports excluding merchant retail margins from production-service value and avoiding automatic procurement-channel classification from the storefront.

23. AAP December 2025 StatShot Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported paperback revenue of approximately USD xx.xx plus USD xx.xx mass-market revenue supplies the comparison input. Reported annual movements qualify the forecast starting mix, not its future persistence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported paperback revenue of approximately USD xx.xx plus USD xx.xx mass-market revenue supplies the comparison input. Reported annual movements qualify the forecast starting mix, not its future persistence.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.

24. Print and Associated Services Framework - Lot 1 Buyer Guide: Framework Objectives
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished goods may be held for call-off, with storage included in the print job where required. This supports consolidated releases as a production-linked arrangement without assuming every release is an individual order.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished goods may be held for call-off, with storage included in the print job where required. This supports consolidated releases as a production-linked arrangement without assuming every release is an individual order.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractors maintain designated distribution lists, deliver to nominated addresses and receive job-specific copy allocations, supporting the modeled list-delivery category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractors maintain designated distribution lists, deliver to nominated addresses and receive job-specific copy allocations, supporting the modeled list-delivery category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The coexistence of stock holding, call-off and distribution-list obligations supports separating production trigger from fulfillment responsibility; call-off alone does not establish transaction-level fulfillment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The coexistence of stock holding, call-off and distribution-list obligations supports separating production trigger from fulfillment responsibility; call-off alone does not establish transaction-level fulfillment.

25. Frequently Asked Questions - IngramSpark
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IngramSpark states that it does not provide editing, typesetting or design services. This counterexample prevents treating all platform manufacturing commissions as purchases of professional preparation services.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: IngramSpark states that it does not provide editing, typesetting or design services. This counterexample prevents treating all platform manufacturing commissions as purchases of professional preparation services.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider permits nonexclusive sourcing when the customer owns its ISBN and does not offer editing, typesetting or design. These terms constrain the author service boundary, not adoption or revenue growth.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider permits nonexclusive sourcing when the customer owns its ISBN and does not offer editing, typesetting or design. These terms constrain the author service boundary, not adoption or revenue growth.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IngramSpark permits nonexclusive use of other printers, distributors and fulfillment providers when publishers own their ISBN. This establishes an alternative-sourcing option, not observed switching or a numerical channel allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: IngramSpark permits nonexclusive use of other printers, distributors and fulfillment providers when publishers own their ISBN. This establishes an alternative-sourcing option, not observed switching or a numerical channel allocation.
26. Packaging Printing & Production - Imago Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies book slipcases, clamshell cases, tray-and-lid constructions and multicomponent publisher packaging. This supports the enclosure-production boundary and the limitation of a simple mailer-price proxy; it does not supply sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies book slipcases, clamshell cases, tray-and-lid constructions and multicomponent publisher packaging. This supports the enclosure-production boundary and the limitation of a simple mailer-price proxy; it does not supply sales weights.
27. Services - Bridgeport National Bindery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.
28. Terms and Conditions - CPI Print Germany
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.

29. ONIX Codelists Issue 75 - List 150: Product Form
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BB identifies hardback/cased books.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BB identifies hardback/cased books.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BC identifies paperback/softback books.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BC identifies paperback/softback books.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BH distinguishes board-page books from conventional books with rigid covers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BH distinguishes board-page books from conventional books with rigid covers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BE groups spiral, comb and coil forms.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BE groups spiral, comb and coil forms.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BD identifies loose-leaf books.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BD identifies loose-leaf books.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BF includes stapled short books; nonbook uses are excluded from the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BF includes stapled short books; nonbook uses are excluded from the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BL recognizes slide-bound books without measuring current sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BL recognizes slide-bound books without measuring current sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BO recognizes continuous concertina-fold books; nonbook charts are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BO recognizes continuous concertina-fold books; nonbook charts are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BI identifies textile-page books, not cloth-covered paper books.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BI identifies textile-page books, not cloth-covered paper books.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BJ identifies waterproof bath-book forms.

30. Thomson Reuters - Fourth-Quarter and Full-Year 2025 Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Global Print revenue and contraction constrain professional-print scale and substitution direction; content receipts are not treated as loose-leaf service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Global Print revenue and contraction constrain professional-print scale and substitution direction; content receipts are not treated as loose-leaf service revenue.
31. Lulu - Discontinuing Saddle Stitch in Global Distribution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.
32. MAGACOPY Sofia - Copying and Printing Prices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A current EUR xx.xx binding-only charge establishes a live commercial service and a price-scope comparison; full-book USD receipts and incidence remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A current EUR xx.xx binding-only charge establishes a live commercial service and a price-scope comparison; full-book USD receipts and incidence remain assumed.
33. Imago Group - Spotlight on Children's Books for National Young Readers Week
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bath-book offerings support a separate commercial category; sales and service receipts are undisclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bath-book offerings support a separate commercial category; sales and service receipts are undisclosed.
34. Pegasus - My First Book of Shapes: EVA Foam Book
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.

35. U.S. Consumer Product Safety Commission - Children's Books
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product classification and intended audience affect commercial compliance accountability; no numerical surcharge is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product classification and intended audience affect commercial compliance accountability; no numerical surcharge is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliance classification is retained as an uncertainty, not an exclusion or measured price premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliance classification is retained as an uncertainty, not an exclusion or measured price premium.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.
36. Puget Bindery - Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider identifies training manuals and reference guides as mechanical-binding applications, supporting the commissioning premise without measuring sales incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider identifies training manuals and reference guides as mechanical-binding applications, supporting the commissioning premise without measuring sales incidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists commercial letterpress book plates and specialty inserts, supporting a component-service model rather than attribution of the entire book price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists commercial letterpress book plates and specialty inserts, supporting a component-service model rather than attribution of the entire book price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bindery identifies commercial printers, publishers and corporate print buyers as customers and excludes direct-to-consumer sales. This supports trade-purchasing attribution but supplies no sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bindery identifies commercial printers, publishers and corporate print buyers as customers and excludes direct-to-consumer sales. This supports trade-purchasing attribution but supplies no sales percentage.

37. ONIX Codelists Issue 75 - List 80: Product Packaging Type
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes lidded boxes from slipcase-style boxed sets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes lidded boxes from slipcase-style boxed sets.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes shrink-wrapped products and bundles.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes shrink-wrapped products and bundles.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Explicitly recognizes book browse-prevention closures.

40. GPOExpress Program Pricing Guide - November 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx hand folding provides a handling-cost comparison; the complete band realization remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx hand folding provides a handling-cost comparison; the complete band realization remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
41. Hardcover Book Protection: Dust Jackets or Slipcases?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.
42. Book Printing Cost in China: How Printing Prices Are Calculated
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its closure split is assumed.

43. Make Believe Ideas - Independent Retail Catalog 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
44. Bookmobile - Request Book Printing Quotes the Right Way to Save Money
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.

45. Digital Book Printing - Bookmobile
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
46. Sell Books on Shopify - Lulu
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offered storefront-to-print-and-ship route supports an accessible production-linked parcel channel, not assumed demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct fulfillment availability supports the parcel-use scenario without establishing envelope mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct fulfillment availability supports the parcel-use scenario without establishing bag mix.
47. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional packaging minimization supports a directional right-sizing premise, not a measured global box-price effect.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Waste-reduction requirements inform the bounded substitution scenario; they do not quantify band adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional circularity requirements inform lower lightweight-bag exposure without implying a global book-bag ban.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material substitution remains partly internal to the combined film-and-paper category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional recyclability pressure informs the niche substitution scenario, not an observed blister-sales decline.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Empty-space reduction provides a directional premise for lower cushioning allowance per individual box.
48. Digital Printing - U.S. Government Publishing Office
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The purchasing guidance supports conditional digital substitution, not unrestricted interchangeability or an observed forecast allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing guidance supports conditional digital substitution, not unrestricted interchangeability or an observed forecast allocation.

49. Clays demonstrate dedication to digital investment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capacity/output comparison is a limited commercial check on continued conventional book production, not a direct offset revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capacity/output comparison is a limited commercial check on continued conventional book production, not a direct offset revenue observation.
50. ISO/TC 130 - Guidelines for Using Print Production Standards, Version 1.0, 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies flexographic packaging applications; the book-specific spending budget and process coefficients remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies flexographic packaging applications; the book-specific spending budget and process coefficients remain modeled.
51. Premium Layflat Photo Books - PhotobookShop
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.
52. The Cormac McCarthy Collection - The Folio Society
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents screen-printed cloth covers on physical book editions, supporting component-level commercial attribution. It does not measure supplier component receipts or global uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents screen-printed cloth covers on physical book editions, supporting component-level commercial attribution. It does not measure supplier component receipts or global uptake.
53. Risograph Digital Duplicator Order Form, 2026 - Minneapolis College of Art and Design
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.

54. American Printing House - 2024 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.
55. 二〇二一年全国新闻出版业基本情况
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2021 aggregate textbook output distinguishes school, tertiary and vocational/adult activity; historical volumes require value and global-scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2021 aggregate textbook output distinguishes school, tertiary and vocational/adult activity; historical volumes require value and global-scope adjustments.
56. Music, printed or in manuscript imports by country, 2024 - World Integrated Trade Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.
57. Bloomsbury Publishing - 2024/25 Results Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.
58. HDSB - RFSQ 26-013: Yearbook Software and Printing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The yearbook qualification notice restricts supply to prequalified vendors while permitting school bulk orders and individual ordering. It supports separating commissioning authority from ultimate payment, but discloses no fulfilled-order value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The yearbook qualification notice restricts supply to prequalified vendors while permitting school bulk orders and individual ordering. It supports separating commissioning authority from ultimate payment, but discloses no fulfilled-order value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The individual-ordering option establishes an attribution uncertainty relevant to the modeled household portion; it does not establish the assumed xx.xx% proportion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The individual-ordering option establishes an attribution uncertainty relevant to the modeled household portion; it does not establish the assumed xx.xx% proportion.

59. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.
60. 2022 North American Industry Classification System - United States
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated book-publishing activity is separated from institutional primary activities and printing without publishing, constraining the Publishing Organizations numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated book-publishing activity is separated from institutional primary activities and printing without publishing, constraining the Publishing Organizations numerator.
61. U.S. Census Bureau - Books Printing: 2002
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Table xx.xx reports 2002 U.S. books-printing contract-work costs of USD xx.xx and shipments of USD xx.xx. Their ratio supplies a dated manufacturing-subcontract proxy, held constant within the forecast component.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Table xx.xx reports 2002 U.S. books-printing contract-work costs of USD xx.xx and shipments of USD xx.xx. Their ratio supplies a dated manufacturing-subcontract proxy, held constant within the forecast component.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical subcontract-cost input constrains the modeled transfer from publisher-origin commissioning to performing suppliers, without adding another gross contract value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical subcontract-cost input constrains the modeled transfer from publisher-origin commissioning to performing suppliers, without adding another gross contract value.
62. Samfine Creation Holdings Group Limited - Form 20-F for the year ended December 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company reports USD xx.xx of 2025 book-product revenue and principally serves book traders that secure printing contracts and outsource production. This is a supplier-specific quantitative role check, not a Global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company reports USD xx.xx of 2025 book-product revenue and principally serves book traders that secure printing contracts and outsource production. This is a supplier-specific quantitative role check, not a Global allocation weight.
63. Ministry of Education - NCERT and Amazon Letter of Engagement, October 7, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2024 announcement targeted xx.xx NCERT books for academic 2025-xx.xx. This is a planned institutional activity anchor; realization, eligible receipts and subsequent growth are modeled separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2024 announcement targeted xx.xx NCERT books for academic 2025-xx.xx. This is a planned institutional activity anchor; realization, eligible receipts and subsequent growth are modeled separately.

64. Bangladesh e-GP - NCTB/TEXTBOOK/2025, Package GD.102_SEC_8.031
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The government-funded procurement plan specifies xx.xx academic-2025 textbook copies and an estimated BDT xx.xx for printing, binding and supply. It constrains commercial order scale and local unit-budget plausibility, not realized annual revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The government-funded procurement plan specifies xx.xx academic-2025 textbook copies and an estimated BDT xx.xx for printing, binding and supply. It constrains commercial order scale and local unit-budget plausibility, not realized annual revenue.
65. Students suffer as NCTB fails to deliver books - The Daily Star, January 17, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 report corroborates the dated approximately xx.xx-copy textbook target and early-year delivery disruption. Target realization and supplier receipts remain modeled.
66. Secondary-level students: A new year without full set of books for many - The Daily Star, December 28, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2025 report corroborates the approximately xx.xx-copy academic-2026 target and continued delivery slippage. It informs a normalization assumption, not an observed 2032 share.
67. Business Books - Print Professional, Custom Corporate Books | Blurb
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The business-book offering includes organizational presentation and corporate-gift applications. It establishes an in-scope commissioning proposition, not the modeled global copy quantity or spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The business-book offering includes organizational presentation and corporate-gift applications. It establishes an in-scope commissioning proposition, not the modeled global copy quantity or spending.
68. How to Use Lulu to Support Your Nonprofit | Lulu
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform permits an organization or charity to receive creator proceeds. This supports excluding beneficiary-only arrangements from nonprofit commissioning; it does not measure nonprofit printing purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform permits an organization or charity to receive creator proceeds. This supports excluding beneficiary-only arrangements from nonprofit commissioning; it does not measure nonprofit printing purchases.
69. News Corp - Form 10-K for the fiscal year ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2025 consumer backlist revenue of xx.xx% and digital revenue of xx.xx% anchor the assumed physical-backlist bridge and its forecast starting model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2025 consumer backlist revenue of xx.xx% and digital revenue of xx.xx% anchor the assumed physical-backlist bridge and its forecast starting model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed backlist mix constrains recurring-title demand; its division into replenishment and POD remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed backlist mix constrains recurring-title demand; its division into replenishment and POD remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complementary frontlist population supports the launch-stock cohort after physical-format adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The complementary frontlist population supports the launch-stock cohort after physical-format adjustments.

70. News Corp - Form 10-K for the fiscal year ended June 30, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2026 backlist revenue of xx.xx% and digital revenue of xx.xx% lower the forecast physical-backlist proxy instead of assuming continued backlist expansion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The updated catalog mix changes the forecast population available for repeat inventory releases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The updated frontlist/backlist bridge changes the forecast planned-production weight; no 2032 share is disclosed.
71. How Do Lulu Direct Orders Work?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lulu describes printing after customer purchase and distinguishes production from subsequent shipment, supporting recipient-order attribution rather than technology-based classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lulu describes printing after customer purchase and distinguishes production from subsequent shipment, supporting recipient-order attribution rather than technology-based classification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: No minimum order and one-copy ordering establish commercial feasibility, not the number or value of single-copy releases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: No minimum order and one-copy ordering establish commercial feasibility, not the number or value of single-copy releases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One POD offering accepts hundreds of copies, independently challenging a POD-equals-single-copy allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One POD offering accepts hundreds of copies, independently challenging a POD-equals-single-copy allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Orders can extend into thousands within the same offering; the production trigger therefore does not uniquely identify the working run band.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Orders can extend into thousands within the same offering; the production trigger therefore does not uniquely identify the working run band.
72. Smart Backlist Management: When to Hold and When to Print-on-Demand
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sheridan describes low-volume titles moving to POD while other titles retain inventory, supporting differentiated release-policy assumptions rather than a uniform backlist-to-POD conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sheridan describes low-volume titles moving to POD while other titles retain inventory, supporting differentiated release-policy assumptions rather than a uniform backlist-to-POD conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A disclosed customer example uses a stock threshold to trigger a 2,000-copy replenishment order. It establishes the commercial mechanism, not a market-wide share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A disclosed customer example uses a stock threshold to trigger a 2,000-copy replenishment order. It establishes the commercial mechanism, not a market-wide share.

73. Shortage of NCERT textbooks - Rajya Sabha Unstarred Question No. 1941, December 17, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advance enrollment-based forecasting, academic-session readiness and a fiscal 2025-xx.xx plan for approximately xx.xx textbooks support a substantial calendar-driven stock cohort. The target is not realized production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advance enrollment-based forecasting, academic-session readiness and a fiscal 2025-xx.xx plan for approximately xx.xx textbooks support a substantial calendar-driven stock cohort. The target is not realized production.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Phased supply and inventory monitoring support distinguishing ongoing availability obligations from individual-recipient POD, without quantifying replenishment's global prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phased supply and inventory monitoring support distinguishing ongoing availability obligations from individual-recipient POD, without quantifying replenishment's global prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official answer distinguishes printer empanelment from approximately xx.xx distribution vendors and describes planned fiscal 2025-xx.xx printing of approximately xx.xx textbooks. It supports commissioning-versus-distribution separation, not a realized monetary channel split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official answer distinguishes printer empanelment from approximately xx.xx distribution vendors and describes planned fiscal 2025-xx.xx printing of approximately xx.xx textbooks. It supports commissioning-versus-distribution separation, not a realized monetary channel split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Phased textbook supply supports treating annual institutional quantities separately from production batches; it does not disclose the medium-run allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Phased textbook supply supports treating annual institutional quantities separately from production batches; it does not disclose the medium-run allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2025 answer identifies a xx.xx-million-copy FY2025-xx.xx printing decision versus approximately xx.xx in recent years, a counterforce to assuming rapid long-run disappearance. Planned copies are not realized service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December xx.xx 2025 answer identifies a xx.xx-million-copy FY2025-xx.xx printing decision versus approximately xx.xx in recent years, a counterforce to assuming rapid long-run disappearance. Planned copies are not realized service revenue.
74. Fulfillment Fee - Lulu Direct
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2026 schedule lists USD xx.xx per order regardless of item count, supporting an order-frequency effect on associated-service value. It does not verify the assumed historical or forecast multiplier.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 schedule lists USD xx.xx per order regardless of item count, supporting an order-frequency effect on associated-service value. It does not verify the assumed historical or forecast multiplier.

75. InnerWorkings, Inc. - Form 10-K for the year ended December 31, 2019
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2019 filing reports USD xx.xx gross profit on USD xx.xx revenue and describes purchased-product and direct-service costs. Historical reported margins constrain the modeled xx.xx% retained-fee ratio; they do not directly measure book-channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2019 filing reports USD xx.xx gross profit on USD xx.xx revenue and describes purchased-product and direct-service costs. Historical reported margins constrain the modeled xx.xx% retained-fee ratio; they do not directly measure book-channel share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement-service margin comparison supports the fee-to-managed-spending bridge underlying the direct-channel complement. Carrying the normalized ratio into 2032 is explicitly a forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement-service margin comparison supports the fee-to-managed-spending bridge underlying the direct-channel complement. Carrying the normalized ratio into 2032 is explicitly a forecast assumption.
76. Simplified Purchase Agreement - U.S. Government Publishing Office
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SPA permits agency awards directly to certified vendors for purchases up to USD xx.xx while GPO pays vendors and invoices agencies. This supports classifying by the contracting relationship rather than the invoice payer, not a numerical global weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SPA permits agency awards directly to certified vendors for purchases up to USD xx.xx while GPO pays vendors and invoices agencies. This supports classifying by the contracting relationship rather than the invoice payer, not a numerical global weight.
77. Global Print Services | China, Europe, SE Asia, USA & India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Imago describes sourcing suppliers and coordinating multiple manufacturers for book-related projects. Its cumulative customer relationships establish the offered intermediary role but are not annual revenue or allocation weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Imago describes sourcing suppliers and coordinating multiple manufacturers for book-related projects. Its cumulative customer relationships establish the offered intermediary role but are not annual revenue or allocation weights.
78. Lion Rock Group Limited - Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-business 2025 turnover changes of minus xx.xx% for APOL and minus xx.xx% for Regent challenge uniform intermediary growth; Regent's non-book focus limits its relevance. These observations support avoiding an additional adoption uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-business 2025 turnover changes of minus xx.xx% for APOL and minus xx.xx% for Regent challenge uniform intermediary growth; Regent's non-book focus limits its relevance. These observations support avoiding an additional adoption uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturing turnover changes of minus xx.xx% at xx.xx Printing and plus xx.xx% at Papercraft demonstrate differing supplier trajectories rather than a simple common channel-growth pattern; these are not direct-contracting market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturing turnover changes of minus xx.xx% at xx.xx Printing and plus xx.xx% at Papercraft demonstrate differing supplier trajectories rather than a simple common channel-growth pattern; these are not direct-contracting market shares.

79. Imprint Digital - Book Printing Prices UK

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inspected schedule quotes GBP xx.xx at xx.xx copies for one paperback specification, supporting a relative-price input, not a historical global realization.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inspected schedule quotes GBP xx.xx at xx.xx copies for one paperback specification, supporting a relative-price input, not a historical global realization.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: GBP xx.xx at xx.xx copies supplies the medium-run reference index; format and delivery differences require separate treatment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GBP xx.xx at xx.xx copies supplies the medium-run reference index; format and delivery differences require separate treatment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The quantity-price curve anchors the reference from which the long-run discount is assumed; no long-run price or future share is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The quantity-price curve anchors the reference from which the long-run discount is assumed; no long-run price or future share is disclosed.

80. 2021 年新闻出版产业分析报告

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's official 2021 textbook share was xx.xx% of book copies. It supplies an older educational-activity proxy, not a monochrome share. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020230530667517704140.pdf))

4.3. Industry Ecosystem & Value Chain Analysis

[redacted] IngramSpark states that it does not provide editing, typesetting, or design services, illustrating why a printing-and-distribution relationship can still require separately commissioned preparation. The buyer must identify who approves the content and who is accountable for making it ready for the contracted service.

Integration can add coordination value without eliminating specialist procurement. Clays advertises consolidation of third-party books and links with publishing and warehouse systems. [redacted]

4.3.1. Supply-Side Analysis

Supply can be assembled through a managed network as well as an integrated producer. [illegible] The remaining question is which obligations the intermediary actually accepts and which remain with the buyer or subcontractor.

[illegible] These examples show distinct commercial propositions, not equivalent coverage. A buyer must confirm the required book format, finishing, packaging, and fulfillment combination; the presence of a printing technology or broad product label is insufficient.

Fulfillment also depends on upstream and transport relationships. Bloomsbury's 2026 disclosures identify reliance on printing partners and raw-material availability, alongside supplier diversification and local printing responses. [illegible]

4.4. Market Dynamics

[redacted] Bloomsbury's 2026 disclosures describe increased local printing to mitigate shipping disruption, while IngramSpark explains that printing on demand does not prevent bookstore returns. A change in production location or ordering cadence can therefore reduce one exposure without transferring the others.

[redacted] Likewise, order-triggered production does not resolve retailer acceptance or the merchant's obligations to its customer. A defensible commissioning decision identifies the binding constraint rather than assuming that one production model solves the entire relationship.

4.4.1.2. Creator-owned storefronts connect audience demand to production-linked fulfillment

Lulu's Shopify offering connects a creator's storefront to printing and shipment, with white-label fulfillment and retained customer data. This creates a purchasing route for authors and organizations that already reach their own readers without first securing physical bookstore placement. ■■ ■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■

Suppliers must align with the commissioning body's purchasing and distribution arrangements; the educational need alone does not establish access to its contracts.

Sources & Evidence

1. Shortage of NCERT textbooks - Rajya Sabha Unstarred Question No. 1941
   · NCERT's described planning and distribution arrangements establish a calendar-linked institutional requirement, not access for a particular supplier. ([sansad.in](https://sansad.in/getFile/annex/xx.xx/AU1941_pt7nrR.pdf?source=pqars))

4.4.2. Key Restraints

4.4.2.1. Wholesale returnability can preserve publisher exposure after order-triggered printing

[illegible] Choosing non-returnable terms can limit that exposure, but may conflict with a desired retailer's purchasing conditions. Production timing and channel-risk acceptance must therefore be evaluated separately.

4.4.2.2. Digital access creates a use-dependent alternative to physical commissioning

NCERT makes digital textbook versions available while also arranging physical supply. [illegible] Substitution must be assessed against the buyer's intended use and access requirements.

Sources & Evidence

1. Shortage of NCERT textbooks - Rajya Sabha Unstarred Question No. 1941

4.4.2.3. Children's-book classifications create format-specific market-access obligations

4.4.3. Key Opportunities

4.4.3.1. Title-specific replenishment accountability for continuing publications

4.4.4. Key Challenges

4.4.4.1. Customer-facing arrival promises can exceed the production provider's commitment

[redacted] A merchant promising arrival for a launch, course, or personal event must reconcile the customer-facing date with the provider's actual commitment. Waiting for confirmed demand limits stock exposure but can be unsuitable for an immovable arrival date unless sufficient scheduling allowance or a separate commitment is secured.

Sources & Evidence

4.4.4.2. Multicomponent book-and-pack orders require explicit coordination accountability

[redacted] For books supplied with cases, inserts, or other associated items, the execution challenge is assigning responsibility for matching the commissioned components and completing the contracted handoff. An integrated coordinator can reduce interfaces, but the buyer still needs clarity on subcontracting, approval authority, and responsibility when one component delays the complete order.

   · Imago identifies multimanufacturer complexity and offers coordination; the page does not establish a particular contractual liability allocation. ([imagogroup.com](https://imagogroup.com/global-print-services/))

4.4.4.3. Finished-book sourcing claims depend on the applicable certification arrangement

FSC states that labeled printed products must be produced and labeled under a valid chain-of-custody certificate. [redacted] Buyers must confirm the certificate scope and the party responsible for the finished-product claim without unnecessarily excluding a valid outsourcing arrangement.

   · FSC requires labeled printed products to be produced and labeled under valid chain-of-custody certification and describes a certified-publisher outsourcing alternative. ([uk.fsc.org](https://uk.fsc.org/paper-print))

4.5. Porter's Five Forces Analysis

[redacted] Imago's supplier-network model also demonstrates that participation need not depend on owning the production facility. An intermediary can provide supplier access and coordination, but must still secure commitments for the required format, destination, and delivery responsibility.

Buyer power is exercised through purchasing rules and channel selection. [redacted] Suppliers must distinguish administrative eligibility from the buyer's subsequent commercial decision.

[redacted] Their coexistence challenges both a universal print-replacement thesis and the assumption that all publishing expenditure creates physical-production work. Buyers should compare alternatives against the publication's actual use, required format, and channel obligations.

4.6. PESTLE Analysis

Cross-border contracting requires a separate allocation of customs exposure. ■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ A printing-service description does not settle those questions, and a contractual allocation of charges does not establish the applicable tariff treatment.

4.7. Market Outlook

The outlook for Global Book Printing & Packaging Services is conditional on buyers converting continuity and coordination needs into accepted service obligations. Bloomsbury's 2026 disclosure establishes supply-chain continuity as a purchasing concern, while Lakeside Book Company's packaging-and-kitting offer demonstrates incumbent competition for broader commissioned scope. ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪

4.7.1. Near-Term Market Outlook (0-2 Years)

For 2026-2027, deadline-sensitive buyers should prioritize gaps between their customer promise and the provider's accepted obligation. Lulu Direct's published estimates illustrate why order-triggered production should not automatically support an immovable arrival date. ▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪

2. Packaging waste - European Commission
   · The European Commission identifies August xx.xx 2026 as PPWR's general application date and describes coverage of packaging irrespective of material or origin, with distinct implementation measures and schedules. ([environment.ec.europa.eu](https://environment.ec.europa.eu/topics/waste-and-recycling/packaging-waste_en))

4.7.2. Medium-Term Market Outlook (3-5 Years)

For 2028-2029, institutional prospects should follow confirmed publication-program milestones rather than an assumed curriculum-led printing opportunity. Brazil's 2026 notice for PNLD Anos Finais 2028-2031 establishes a registration and evaluation process for publishers, not a printing award. ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪

Broader network integration is a separate medium-term option for recurring book requirements. ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ A direct supplier relationship remains preferable when a specialist configuration or a particular delivery undertaking matters more than routing convenience.

4.7.3. Long-Term Market Outlook (5-10 Years)

For 2030-2032, renewal decisions could increasingly distinguish interface convenience from independent reuse rights. ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ Observable decision points are renewal terms, reuse permissions, and acceptance by the intended replacement contractor, not merely the existence of another printer.

This is a conditional purchasing scenario, not a prediction of uniform packaging substitution or supplier displacement.

Sources & Evidence

1. Packaging waste - European Commission
   · The Commission states a policy objective of economically viable recyclability for packaging by 2030. This supports a conditional procurement-planning scenario, not a claim that every individual obligation begins simultaneously. 2. Procurement - Framework Agreement for Print and Associated Services (2023), Lot 1 Buyer Guide: Framework Objectives

The executed agreement and any exceptions determine the actual restriction. ([jostens.my.salesforce-sites.com](https://jostens.my.salesforce-sites.com/terms?Lid=YBKUS))

4.8. Go-to-Market Strategy

[illegible] Before selling a combined undertaking, the entrant must obtain accepted subcontract scope and allocate handoff acceptance, complete-order delivery, and remedies. Remaining a specialist subcontractor is preferable when it cannot responsibly control the wider commission.

An intermediary route is defensible when the buyer lacks supplier relationships or local coordination resources. Imago Group's evidenced contribution is supplier access, representation, and multimanufacturer coordination. [illegible]

Institutional selling requires a separate access sequence. [illegible] Providers should establish the selecting authority and procurement relationship before dedicating account-specific resources; reader need or administrative registration is not an award.

[illegible] CPI's German-group terms demonstrate why printing-only and delivered book-and-pack offers are not automatically comparable. The execution sequence is to settle buyer authority and rights, secure the accepted service scope, allocate retained obligations, and only then make the customer-facing promise.

5. Market Insights

5.1. Consumer Insights & End-User Perspective

[illegible] The commercial job is approved-title availability through the designated supply arrangement, not simply production of a readable copy. Prospective providers should establish access to the commissioning relationship and its delivery allocation before treating a school's or student's need as an available contract.

[illegible] Suppliers should identify the applicable route and qualification expectations rather than assuming either that registration guarantees work or that incomplete registration prevents every bid. Procurement approval and the end user's publication requirement are separate decision points.

Switching freedom requires more than permission to use another provider. IngramSpark permits nonexclusive relationships when the publisher owns its ISBN, giving publishers a documented alternative-sourcing choice. [illegible]

Sources & Evidence

1. Frequently Asked Questions | IngramSpark

5.2. Consumer Experience Benchmarking

For comparable order-level book fulfillment, support ownership and remedies are more defensible benchmarks than an unsupported supplier quality ranking. [illegible]

[redacted]

A commissioning buyer should establish the escalation owner, permitted changes, and remedy offered to the reader before adopting either route; these published policies do not establish comparative satisfaction or defect performance.

Managed replenishment requires a different benchmark from an individual customer order. Clays advertises stock and distribution-history visibility through publisher and warehouse links, alongside backlist management and consolidation. [redacted]

Sources & Evidence

1. Supply Chain - Clays

   · Clays advertises backlist management, consolidation of third-party books, and links to publisher and warehouse systems providing stock and distribution-history visibility. These are advertised capabilities, not measured service outcomes. ([clays.co.uk](https://www.clays.co.uk/services/supply-chain/))

2. How Do Lulu Direct Orders Work?

   · Lulu Direct identifies the merchant as the customer's support contact, separates production from transport, and describes production and delivery dates as estimates rather than guarantees. Merchant return policies can differ from Lulu's own policy. ([help.luludirect.lulu.com](https://help.luludirect.lulu.com/en/support/solutions/articles/xx.xx-how-do-lulu-direct-orders-work-))

3. Frequently Asked Questions - Ecommerce | IngramSpark

   · IngramSpark's purchase-link FAQ directs order problems to its customer-service team, does not support refunds, and offers a replacement-request route. Submitted orders cannot be edited or canceled. ([ingramspark.com](https://www.ingramspark.com/ecommerce-faq))

5.3. Opportunity Mapping

For an established publisher, continuing-title replenishment is a defensible first opportunity to assess when usable inventory information and an existing commissioning relationship are already present. CPI Print's German ASR offer demonstrates publisher-controlled replenishment settings. [redacted]

[redacted]

[redacted] Both require accepted format and destination coverage and adequate buyer support. Without audience access, adopting the interface alone is not a defensible customer-acquisition strategy.

[redacted] Integration is preferable when an identified contractor accepts those interfaces and the buyer cannot manage them economically. Neither the historical project nor an advertised integrated portfolio establishes acceptance of a new commission.

Territorial ordering access is relevant where a publisher holds the necessary rights but lacks the intended local bookseller relationship. [redacted] Barnes & Noble's placement discretion is a material counterforce: an additional ordering route does not establish purchasing demand or shelf presence.

Institutional work should be assessed against the selecting authority rather than the eventual reader. [redacted] Unconfirmed specialist configurations and unresolved supplier identities remain possible alternatives, but cannot be counted as qualified backups; their inclusion in the market does not establish a contracting undertaking.

5.4. Distribution Channel Analysis

Wholesale access and creator-controlled selling address different purchasing barriers. Barnes & Noble's ordinary local-store route requires returnable status but retains placement

discretion, with a separate possibility of local consignment for B&N Press print-on-demand books. [illegible]

International reach can depend on a partner's local bookseller relationships, not simply its printing location. [illegible] Network participation establishes an ordering route, not assured demand or equivalent support for every accepted book and packaging format.

[illegible] The buyer must nevertheless establish who accepts responsibility for subcontractors, complete-order delivery, and remedies. Direct Provider Contracting remains a defensible alternative when the buyer can manage those interfaces and wants direct control of individual supplier relationships.

Sources & Evidence

1. Global Print Services | China, Europe, SE Asia, USA & India

2. Sell Books On Shopify | Lulu
   · Lulu's Shopify offering connects the merchant's storefront with printing and shipment, advertises white-label fulfillment, and states that the merchant retains customer data. It does not establish customer acquisition or bookstore placement. ([lulu.com](https://www.lulu.com/sell/sell-on-your-site/shopify))
3. Local Interest in Selling Your Book - B&N Press
   · Barnes & Noble describes returnable status as a condition for the ordinary local-store route, identifies possible local consignment arrangements for B&N Press print-on-demand books, and states that changing terms does not guarantee placement. ([help-press.barnesandnoble.com](https://help-press.barnesandnoble.com/hc/en-us/articles/xx.xx-Local-Interest-in-Selling-Your-Book))
4. Global Connect | Ingram Content Group
   · Global Connect uses local print-on-demand providers with bookseller relationships. Participation depends on an agreement, title information, and market-specific rights; the local network prints and supplies the retailer. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))

5.5. Pricing Trend Analysis

[illegible]

[illegible] Buyers should therefore compare equivalent delivered responsibilities and adjustment rights, rather than treating a printing quotation as a complete book-and-pack commitment. Negotiated terms can differ from this published example.

[illegible] This supports negotiating continuity and cost-adjustment provisions together, but does not establish that a long-term agreement fixes every charge. Buyers seeking certainty must identify the covered services, adjustment triggers, and treatment of customer-requested changes before committing.

Retail receipts and production-service payments are separate commercial flows. [illegible] Comparing providers requires matching the complete charge structure and payment responsibility, not assuming that customer checkout automatically settles the production obligation.

5.6. Regulatory Compliance & Standards Framework

U.S. children's-book access depends on product classification, not the book label alone. [illegible] Commissioning buyers should establish the applicable classification and responsible compliance party before treating format quotations as equivalent.

[redacted] That change does not determine the treatment of associated packaging or separately supplied materials. Buyers should assign responsibility for applicable packaging requirements and confirm the relevant product boundary rather than treating the book-specific exclusion as a general exemption.

[redacted] Before an import commitment, the contracting parties must confirm classification, origin, applicable additional duties, and importer responsibility. No shipment-specific conclusion is defensible without those facts; allocating customs charges commercially does not settle the legal treatment.

[redacted] For Prepress Services or Print Production Management dependent on proprietary platforms, buyers should secure the required access and reuse rights. Where proprietary packaging features are material, supplier-specific rights and contractual assurances require confirmation; neither a patent claim nor a service purchase alone resolves them.

5.7. ESG & Sustainability Analysis

[redacted] This is a dated buyer-specific example, not evidence of a uniform Global purchasing rule. For suppliers approaching such accounts, the commercial requirement is demonstrable compliance with the buyer's policy rather than an unsupported sustainability claim.

Finished-book claims also influence the available contracting route. [redacted] Buyers should confirm certificate scope and claim ownership before supplier selection; certification alone does not establish the complete environmental performance of the commissioned book and packaging.

Social responsibility extends beyond paper sourcing. Penguin Random House applies the Bertelsmann supplier code to relevant business partners and subcontracted work; the code addresses labor conditions, human rights, environmental responsibility, and consequences for violations. [redacted]

2. Worldwide Environmental Sourcing Policy | Penguin Random House

A product-classification mismatch can prevent a specialty children's-book offer from satisfying the intended market-access requirement. 1. Annual Financial Report - Bloomsbury Publishing Plc
   · The disclosure establishes shipping disruption and counterparty failure as recognized risks, supporting a conditional scenario rather than a prediction of a particular interruption. ([bloomsbury-ir.co.uk](https://www.bloomsbury-ir.co.uk/media/press_releases/2026/xx.xx.asp))
2. Understanding Book Returns with IngramSpark
   · IngramSpark permits non-returnable and returnable arrangements; enabled returns can create publisher reimbursement and associated handling obligations after supply. ([ingramspark.com](https://www.ingramspark.com/blog/making-your-book-returnable))
3. Children's Books | CPSC.gov
   · CPSC distinguishes qualifying ordinary books from books with inherent play value, younger-child products, and relevant non-paper articles or components for the specified exemption. This supports classification-specific commercial-access responsibility. ([cpsc.gov](https://www.cpsc.gov/FAQ/Childrens-Books))
4. Local Interest in Selling Your Book - B&N Press

[redacted] Wholesale returns remain a separate exposure. Commitment is justified only when the chosen arrangement addresses the title's binding requirement more effectively than retaining the existing model.

[redacted] The investment case should include the work required to sustain the customer promise and manage exceptions, not merely the convenience of automated order transfer. Deferral is appropriate when the merchant lacks audience access, support ownership, or a dependable payment-release arrangement; delegating payment administration alone does not resolve all of those needs.

[redacted] CPI's scope exclusions and adjustment provisions show why the comparison must include retained freight, packaging, customs, and change exposure. Supplier investment in broader coordination should follow an accepted customer mandate rather than an assumption that catalog breadth will generate profitable work.

1. How Do Lulu Direct Orders Work?
   · Production occurs before shipment, and the merchant remains the customer's support contact. These retained obligations qualify the economic case for outsourced fulfillment. 7. Book Printing & Packaging Services Market, by Service Offering

Service Offering changes where the commissioning buyer must supply expertise and retain approval responsibility. ■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ A printing-and-distribution relationship is not automatically a publication-development service.

An integrated printing-and-binding contract is preferable when the buyer cannot manage that interface or the proposed binder requires an integrated order.

Book Packaging Production and Book Packing & Kitting solve different purchasing problems. Imago advertises publisher slipcases, cases, and multicomponent presentation packaging; Bridgeport separately lists set packing and shrink-wrapping among its book services. ■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■

■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ Advice on the appropriate job does not itself establish responsibility for stock release or delivery to individual recipients. The purchasing decision should specify which responsibilities are bundled and which remain separate; integration reduces buyer-managed interfaces, while specialist contracts preserve control over individual service relationships.

   · Puget advertises trade binding and finishing for commercial customers. ([pugetbindery.com](https://www.pugetbindery.com/services))

4. Services - Bridgeport National Bindery, Inc.

   · Bridgeport National Bindery excludes binding-only services for supplied text pages and separately lists set packing and shrink-wrapping among its book-service options. ([bnbindery.com](https://www.bnbindery.com/services))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.

5. Procurement - Framework Agreement for Print and Associated Services (2023), Lot 1 Buyer Guide: Framework Objectives

   · The Scottish Government's April xx.xx 2024 guide specifies production-management advice and finished-goods stock holding and call-off facilities within its print framework. This is a purchasing example, not a universal service bundle. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))

   · Taxonomy evidence: The April xx.xx 2024 buyer guide includes bound books and associated services within a print-services framework. This is a public purchasing example, not a worldwide market definition. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.

6. Packaging Printing & Production | Imago Group

   · Imago advertises publisher slipcases, clamshell cases, tray-and-lid constructions, and multicomponent gift-set packaging. ([imagogroup.com](https://imagogroup.com/packaging/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies book slipcases, clamshell cases, tray-and-lid constructions and multicomponent publisher packaging. This supports the enclosure-production boundary and the limitation of a simple mailer-price proxy; it does not supply sales weights.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier identifies book slipcases, clamshell cases, tray-and-lid constructions and multicomponent publisher packaging. This supports the enclosure-production boundary and the limitation of a simple mailer-price proxy; it does not supply sales weights.

7. 2022 North American Industry Classification System - United States

11. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
12. The Global Publishing Industry in 2022
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
13. 2024 年新闻出版统计公报
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
14. Foreign Exchange Rates - G.5A Annual, January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
15. Book publishing industry, 2024 - Statistics Canada
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

16. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
17. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
18. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.

19. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
20. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
21. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

22. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
23. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
24. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
25. Hardcover Printing Cost - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
26. User Fees - University of Wisconsin-Milwaukee Print & Copy Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.

27. How Much Does It Cost to Print a Book? - QinPrinting

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.

28. Book Wrap Mailers / Book Boxes - Packaging ONE

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.

29. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual average is USD xx.xx per GBP. It converts the GBP packaging comparator into the common monetary basis used in the starting allocation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual average is USD xx.xx per GBP. It converts the GBP packaging comparator into the common monetary basis used in the starting allocation.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same conversion supports the common-currency packaging/packing denominator inherited by the forecast; no 2032 exchange rate is asserted.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same conversion supports the common-currency packaging/packing denominator inherited by the forecast; no 2032 exchange rate is asserted.

30. Optional Book Publishing Services - InstantPublisher
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
31. How Does Merchant Pricing Work for Ecommerce Stores? - Lulu Direct
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
32. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.
33. Terms and Conditions - CPI Print Germany
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.

Sources & Evidence

1. 2022 North American Industry Classification System - United States
   · Taxonomy evidence: Book and pamphlet printing, including integrated printing-and-binding, is explicitly recognized. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
2. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
   · Taxonomy evidence: Book-production reporting includes both complete printed-and-bound products and unbound printing-only output.
   ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
3. U.S. Census Bureau - NAPCS Product List for NAICS 51113: Book Publishers
   · Taxonomy evidence: Printed-book definitions explicitly include braille editions. This supports physical-book inclusion, not any particular reproduction method or current commercial quantity.

   · Taxonomy evidence: The class recognizes printing of books and brochures across multiple press families. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
6. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 7. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

8. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

9. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

10. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 11. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
12. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
13. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 product, service, production and inventory-reserve costs were xx.xx% of revenue. The broader cost category constrains the manufacturing spending boundary but does not directly disclose printing-service revenue.

14. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CEWE reports xx.xx photobooks in 2025 compared with xx.xx in 2024. This independently establishes specialty-book activity underlying the nonpublisher model, without establishing a global expansion factor.
15. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim black-ink schedule uses USD xx.xx plus USD xx.xx per page for the relevant page band, yielding the USD xx.xx representative manufacturing comparator. It anchors relative weights, not an observed global 2025 price or future share.
16. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

17. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
18. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
19. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
20. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
21. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
22. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

25. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
26. Hardcover Printing Cost - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current U.S. regular-trim hardcover schedule uses USD xx.xx plus USD xx.xx per page in the relevant band. Comparison with paperback charges constrains the premium-equivalent manufacturing model.
27. How Much Does It Cost to Print a Book? - QinPrinting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's delivered xx.xx-page, xx.xx-copy color-book examples list USD xx.xx for softcover and USD xx.xx for hardcover. They provide a commercial-run countercheck, with delivery and product differences preventing direct substitution.
28. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The primary monthly reporting panel's full-year 2025 trade figures show paperback revenue down xx.xx%. This qualifies broad physical-book growth assumptions and supplies directional mix evidence only.

29. Terms and Conditions - CPI Print Germany

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published terms distinguish ex-works production prices from packaging, freight and postage and reserve specified input-cost adjustment rights. They support comparable-scope valuation but do not establish realized inflation.

4. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032.     - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports retaining premium specialty commissions in the manufacturing mix; the binding allocation and unchanged future cohort profile remain assumptions.
13. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The paperback manufacturing comparator supplies the baseline from which the modeled binding component and hardcover increment are separated.
14. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
15. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

20. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

23. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
24. Hardcover Printing Cost - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx fixed-charge difference supplies the POD premium input; the xx.xx% commercial-run realization and premium incidence are explicitly modeled rather than disclosed.
25. User Fees - University of Wisconsin-Milwaukee Print & Copy Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Perfect binding is listed at USD xx.xx-xx.xx per book. The lower endpoint is the model's basic-binding comparator, not a measured worldwide realization.
26. How Much Does It Cost to Print a Book? - QinPrinting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The smaller hardcover premium in this offset example qualifies extrapolation of the full POD hardcover increment into binding revenue.
27. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same approximately xx.xx-publisher panel shows hardcover revenue up xx.xx%. It supports a modest premium-mix hypothesis but neither measures global binding spending nor proves the forecast.

Sources & Evidence

1. Scottish Government - Print and Associated Services Framework, Lot 1 Buyer Guide: Framework Objectives

   · Taxonomy evidence: Finished-goods stock holding and call-off may be included in the print-job cost. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))

   · Taxonomy evidence: Stock holding and stock call-off may be included in the print-job cost, supporting contract-linked rather than unrestricted logistics coverage. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The framework also specifies finished-goods stock holding and call-off, with required holding costs included in the print-job price. This supports allocating embedded production-linked fulfillment rather than restricting the category to standalone invoices.

2. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Postage, freight, shipping, fulfillment and other costs were xx.xx% of revenue in fiscal 2025 versus xx.xx% in fiscal 2024. This is a broad buyer-cost check, not an eligible outsourced-fulfillment share.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
14. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
15. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

21. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
22. How Does Merchant Pricing Work for Ecommerce Stores? - Lulu Direct
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2026 merchant-pricing explanation identifies a USD xx.xx fulfillment fee and separates merchant retail receipts from payments for supplier production, shipping and taxes. The fee is a contemporary feasibility comparator, not verified 2025 penetration or a future charge.
23. Terms and Conditions - CPI Print Germany
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate treatment of forwarding and storage responsibilities supports the eligible production-linked service boundary; contractual rights do not prove the assumed future fee-growth rate.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Prepublication amortization is disclosed separately from production costs, supporting exclusion of adjacent amortization rather than equating it with externally purchased prepress.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. User Fees - University of Wisconsin-Milwaukee Print & Copy Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The university service schedule separately prices preflight/prepress preparation at USD xx.xx per hour, establishing a paid preparation activity rather than an automatic component of every printing-platform purchase.
24. Optional Book Publishing Services - InstantPublisher
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider lists layout/typesetting at USD xx.xx per page with a USD xx.xx minimum. This supports the preparation-spending feasibility check, with purchase incidence and copies per job remaining assumptions.
25. Frequently Asked Questions - IngramSpark
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IngramSpark states that it does not provide editing, typesetting or design services. This counterexample prevents treating all platform manufacturing commissions as purchases of professional preparation services.

3. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual average is USD xx.xx per GBP. It converts the GBP packaging comparator into the common monetary basis used in the starting allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual average is USD xx.xx per GBP. It converts the GBP packaging comparator into the common monetary basis used in the starting allocation.
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Book Wrap Mailers / Book Boxes - Packaging ONE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer lists MP2 book mailers at GBP xx.xx each for xx.xx packs of xx.xx excluding VAT. The converted unit price supplies the packaging-creation value proxy, not a global average or a historical quote.
24. Packaging Printing & Production - Imago Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier identifies book slipcases, clamshell cases, tray-and-lid constructions and multicomponent publisher packaging. This supports the enclosure-production boundary and the limitation of a simple mailer-price proxy; it does not supply sales weights.

3. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same conversion supports the common-currency packaging/packing denominator inherited by the forecast; no 2032 exchange rate is asserted.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same conversion supports the common-currency packaging/packing denominator inherited by the forecast; no 2032 exchange rate is asserted.
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Book Wrap Mailers / Book Boxes - Packaging ONE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The enclosure price forms the other side of the creation-versus-packing ratio. One comparable enclosure per packing unit is an explicit activity-matching assumption.
24. Optional Book Publishing Services - InstantPublisher
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Individual shrink-wrapping is listed at USD xx.xx each plus USD xx.xx setup. Amortizing setup over an assumed xx.xx copies gives the USD xx.xx packing comparator.
25. Services - Bridgeport National Bindery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The short-run book-production portfolio separately lists shrink-wrapping and set packing. It establishes commercial packing activity distinct from enclosure manufacture and binding, without measuring its revenue.

Sources & Evidence

1. Scottish Government - Print and Associated Services Framework, Lot 1 Buyer Guide: Framework Objectives
   - Taxonomy evidence: Production management is an explicitly purchased associated service. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Taxonomy evidence: Production management is an explicit purchased service within the print framework. ([gov.scot](https://www.gov.scot/publications/procurement-framework-agreement-for-print-and-associated-services-2023-lot-xx.xx-buyer-guide/pages/framework-overview/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public purchasing framework separately specifies production-management advice. It establishes a purchased responsibility but not a global fee rate or permission to count subcontract pass-through as retained revenue.
2. Government Commercial Agency - Print and Digital Communications, RM6297
   - Taxonomy evidence: Print management is commercially purchased alongside production, finishing, stock management, and distribution. The framework does not establish a global separately billed management-fee convention. ([webprod-cms.crowncommercial.gov.uk](https://www.webprod-cms.crowncommercial.gov.uk/agreements/RM6297))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

8. Book Printing & Packaging Services Market, by Book Format

Book Format can determine channel access independently of a provider's ability to produce the book. ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■ Changing to an eligible edition may preserve a desired channel, but retaining the preferred format may instead require direct audience access.

Wire, Coil & Comb-Bound Books have a documented specialist service proposition: Puget markets mechanical binding for manuals and reference materials that need to lie flat. Loose-Leaf Books can support a different continuing relationship, illustrated by Thomson Reuters subscriptions that deliver replacement loose-leaf pages and other supplements. ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■

Board Books, Textile Books, Bath Books, and Foam Books require a different supplier-fit assessment from conventional paper-page editions. ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■ These distinctions support separate commercial qualification of the intended product; they do not establish that a supplier accepts every specialty construction or destination.

For U.S.-facing children's products, intended age and play value can change access obligations even within the same format. ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ Paper or board construction alone is not sufficient to inherit the exemption, while a specialty format remains eligible for consideration under its applicable requirements.

Sources & Evidence

1. Spotlight on Children's Books for National Young Readers Week with Imago Group

   · Imago's November 2024 children's-book portfolio describes board, bath, and cloth books. The historical portfolio does not establish acceptance of a particular order. ([imagogroup.com](https://imagogroup.com/children-books-young-readers/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bath-book offerings support a separate commercial category; sales and service receipts are undisclosed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bath-book offerings support a separate commercial category; sales and service receipts are undisclosed.

2. Children's Books | CPSC.gov
   - CPSC's ordinary-book exemption from specified lead-content testing requirements excludes books intended for children aged three or younger and books with inherent play value. Product classification therefore matters beyond paper or cardboard construction. ([cpsc.gov](https://www.cpsc.gov/FAQ/Childrens-Books))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product classification and intended audience affect commercial compliance accountability; no numerical surcharge is inferred.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Product classification and intended audience affect commercial compliance accountability; no numerical surcharge is inferred.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliance classification is retained as an uncertainty, not an exclusion or measured price premium.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliance classification is retained as an uncertainty, not an exclusion or measured price premium.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.
3. Services | Puget Bindery
   - Puget markets wire, coil, and comb binding for manuals and reference applications requiring flat opening. ([pugetbindery.com](https://www.pugetbindery.com/services))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider identifies training manuals and reference guides as mechanical-binding applications, supporting the commissioning premise without measuring sales incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider identifies training manuals and reference guides as mechanical-binding applications, supporting the commissioning premise without measuring sales incidence.

4. ONIX Codelists, List 150: Product Form
   - ONIX recognizes the accepted conventional and specialty physical forms, including loose-leaf, slide-bound, concertina-folded, textile-page, bath, and foam books. These codes establish product identity rather than supplier commitments. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: The inspected vocabulary separates principal physical forms and favors conventional form coding over a generic novelty designation where applicable. The study's hybrid precedence is an adaptation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: The book-trade product-form vocabulary recognizes conventional bindings and explicit specialty physical forms; its novelty-book guidance favors an applicable conventional form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BB identifies hardback/cased books.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BB identifies hardback/cased books.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BC identifies paperback/softback books.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BC identifies paperback/softback books.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BH distinguishes board-page books from conventional books with rigid covers.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BH distinguishes board-page books from conventional books with rigid covers.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BE groups spiral, comb and coil forms.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BE groups spiral, comb and coil forms.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BD identifies loose-leaf books.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BD identifies loose-leaf books.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BF includes stapled short books; nonbook uses are excluded from the model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BF includes stapled short books; nonbook uses are excluded from the model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BL recognizes slide-bound books without measuring current sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BL recognizes slide-bound books without measuring current sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BO recognizes continuous concertina-fold books; nonbook charts are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BO recognizes continuous concertina-fold books; nonbook charts are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BI identifies textile-page books, not cloth-covered paper books.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BI identifies textile-page books, not cloth-covered paper books.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BJ identifies waterproof bath-book forms.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BJ identifies waterproof bath-book forms.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BP identifies foam-page and foam-cover books.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BP identifies foam-page and foam-cover books.

5. Custom Book Sizes & Book Binding Options | Lulu

· Lulu's product catalog identifies paperback, coil-bound, saddle-stitched, and hardcover binding options. Catalog inclusion does not itself settle distribution eligibility. ([lulu.com](https://www.lulu.com/products))

6. Discontinuing Saddle Stitch in Global Distribution | Lulu

· Lulu excludes saddle-stitched projects from Global Distribution but retains its bookstore and direct-selling alternatives. The stated distribution change took effect March xx.xx 2021. ([help.lulu.com](https://help.lulu.com/en/support/solutions/articles/xx.xx-discontinuing-saddle-stitch-in-global-distribution))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.

7. Thomson Reuters Legal Subscription Services

· Thomson Reuters describes print subscriptions that automatically supply supplements, including replacement volumes and loose-leaf pages. ([thomsonreuters.com](https://www.thomsonreuters.com/en-us/help/account-management/licenses-subscriptions/legal-products/subscriptions-thomson-reuters-legal))

8. EDItEUR - ONIX Codelists Issue 75, List 175: Product Form Detail

· Taxonomy evidence: Form-detail coding distinguishes binding features from the principal product form, supporting construction-based rather than decorative-feature allocation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

· Taxonomy evidence: Form-detail codes distinguish binding and novelty features from the principal product-form field. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

9. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

10. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary survey sector differences constrain the education-adjusted hardcover proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary survey sector differences constrain the education-adjusted hardcover proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Educational/trade differences qualify extrapolation of U.S. consumer-format revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Educational/trade differences qualify extrapolation of U.S. consumer-format revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx of surveyed children's publishing revenue anchors the modeled specialty demand pool, not supplier receipts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx of surveyed children's publishing revenue anchors the modeled specialty demand pool, not supplier receipts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sector data constrain the commissioning-pool proxy; mechanical incidence remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sector data constrain the commissioning-pool proxy; mechanical incidence remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Educational demand supplies a common economic anchor; loose-leaf incidence remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Educational demand supplies a common economic anchor; loose-leaf incidence remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sector observations constrain the educational short-book commissioning pool.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sector observations constrain the educational short-book commissioning pool.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commissioning-pool anchor supports an explicit sparse-format incidence model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commissioning-pool anchor supports an explicit sparse-format incidence model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Children's demand anchors the accordion working estimate, not observed accordion orders.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Children's demand anchors the accordion working estimate, not observed accordion orders.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed textile-book order incidence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed textile-book order incidence.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed bath-book order incidence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed bath-book order incidence.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed foam-book order incidence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Children's demand anchors assumed foam-book order incidence.

11. 2024 年新闻出版统计公报
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
12. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
13. Book publishing industry, 2024 - Statistics Canada
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
14. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
15. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
16. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

17. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
18. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
19. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
20. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

21. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

22. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

23. How Much Does It Cost to Print a Book? - QinPrinting

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Softcover prices provide a commercial comparison, not a historical global average.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Softcover prices provide a commercial comparison, not a historical global average.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mechanical-binding quotations constrain the unit-receipt assumption, not incidence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mechanical-binding quotations constrain the unit-receipt assumption, not incidence.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.

24. AAP December 2025 StatShot Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported paperback revenue of approximately USD xx.xx plus USD xx.xx mass-market revenue supplies the comparison input. Reported annual movements qualify the forecast starting mix, not its future persistence.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported paperback revenue of approximately USD xx.xx plus USD xx.xx mass-market revenue supplies the comparison input. Reported annual movements qualify the forecast starting mix, not its future persistence.

25. Thomson Reuters - Fourth-Quarter and Full-Year 2025 Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Global Print revenue and contraction constrain professional-print scale and substitution direction; content receipts are not treated as loose-leaf service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Global Print revenue and contraction constrain professional-print scale and substitution direction; content receipts are not treated as loose-leaf service revenue.
26. MAGACOPY Sofia - Copying and Printing Prices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A current EUR xx.xx binding-only charge establishes a live commercial service and a price-scope comparison; full-book USD receipts and incidence remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A current EUR xx.xx binding-only charge establishes a live commercial service and a price-scope comparison; full-book USD receipts and incidence remain assumed.
27. Pegasus - My First Book of Shapes: EVA Foam Book
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032.     - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Photobook activity supports the separate personal-book commissioning block; its softcover fraction remains assumed.
12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The separately identified paperback printing charge constrains the self-publishing production-receipt model and its distinction from retail proceeds.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

19. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook volumes constrain personal-book activity and the nonpublisher starting condition, not hardcover prevalence or future share.
12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

19. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. How Much Does It Cost to Print a Book? - QinPrinting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Comparable hardcover and softcover quotations constrain the assumed relative manufacturing realization after scope adjustments.
24. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct-participant 2025 hardback revenue of approximately USD xx.xx anchors the adjusted conventional-format model; it is not printing revenue or a global share.

4. The Global Publishing Industry in 2022

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx of surveyed children's publishing revenue anchors the modeled specialty demand pool, not supplier receipts.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx of surveyed children's publishing revenue anchors the modeled specialty demand pool, not supplier receipts.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))

23. How Much Does It Cost to Print a Book? - QinPrinting
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-book quotations constrain the assumed production receipt; delivery and duties require adjustment.

24. Imago Group - Spotlight on Children's Books for National Young Readers Week
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's children's portfolio supports board-book commercial classification, not order volumes.

25. U.S. Consumer Product Safety Commission - Children's Books
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Product classification and intended audience affect commercial compliance accountability; no numerical surcharge is inferred.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sector data constrain the commissioning-pool proxy; mechanical incidence remains assumed.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024

6. 2024 年新闻出版统计公报

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 13. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
14. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
15. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
16. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
17. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

23. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
24. How Much Does It Cost to Print a Book? - QinPrinting
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Short-booklet quotations constrain the lower realization used for eligible saddle-stitched books.
25. Lulu - Discontinuing Saddle Stitch in Global Distribution
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provider-specific wholesale distribution restrictions establish a channel constraint, not a global sales weight or measured forecast decline.

4. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

13. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
14. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
15. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
16. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
17. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 2. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
14. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
15. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

21. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
22. Imago Group - Spotlight on Children's Books for National Young Readers Week
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloth-book offerings support the textile-page category premise, not its modeled incidence.
23. U.S. Consumer Product Safety Commission - Children's Books
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exemption boundary supports separate classification rather than assumed conventional-book treatment.

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

20. Ministry of Education - Press conference release, December 17, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Pegasus - My First Book of Shapes: EVA Foam Book
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated 2025 product identifies foam pages and supports commercial-status and classification checks, not global volume or supplier realization.
24. U.S. Consumer Product Safety Commission - Children's Books
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty construction does not itself establish ordinary-book exemption eligibility or market inactivity.

9. Book Printing & Packaging Services Market, by Packaging Format

[illegible] They do not, without a further commitment, establish the packaging needed for shipment to a warehouse, retailer, or individual reader. Buyers should specify whether Boxes & Lidded Cases belong to the saleable edition, the delivery arrangement, or both.

[illegible] The implication is layered purchasing: the chosen outer enclosure does not automatically replace Protective Inserts & Cushioning or Seals & Strapping. A delivered-service agreement should identify responsibility for the complete protective arrangement and the condition of the book at handoff.

[illegible] Where packaging also groups books into a set, the buyer should align the packaging description with the agreed kitting responsibility. A simpler presentation component may be appropriate, but only if it still satisfies the buyer's delivery and set-integrity requirements.

Blister & Clamshell Packs need particularly precise terminology. [illegible] The shared word clamshell is not sufficient evidence of equivalent capability or commercial availability.

Sources & Evidence

1. Packaging Printing & Production | Imago Group

   · Imago identifies publishing presentation packaging and transport packaging as offerings. Its publisher clamshell terminology does not establish an exact formed-plastic or blister-pack commitment. ([imagogroup.com](https://imagogroup.com/packaging/))

2. ONIX Codelists, List 80: Product Packaging Type
   - ONIX distinguishes sleeves, boxes, slipcases, wallets, pouches, wrapping, formed-plastic clamshells, and card-backed blister packs. It also recognizes book browse-prevention closures. Vocabulary recognition does not establish a book-specific supplier offer. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Outer-packaging coding is separate from physical book form. The vocabulary covers multiple publishing media, so recognition alone does not prove book-specific purchasing. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: The product-packaging vocabulary separates external enclosures from the book's physical form. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes lidded boxes from slipcase-style boxed sets.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes lidded boxes from slipcase-style boxed sets.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes shrink-wrapped products and bundles.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes shrink-wrapped products and bundles.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Explicitly recognizes book browse-prevention closures.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Explicitly recognizes book browse-prevention closures.

3. Program 827-S: Federal Aviation Administration Books - General Terms, Conditions, and Specifications
   - The published FAA book procurement distinguishes envelopes, shipping bags, wrapping, protective packing and filler, and closures. It establishes a documented layered purchasing requirement, not a current award. ([gpo.gov](https://www.gpo.gov/docs/default-source/contract-pricing/ab0827s.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical evaluation quantities provide a container-heavy institutional purchasing counterexample, not global shipment shares.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical evaluation quantities provide a container-heavy institutional purchasing counterexample, not global shipment shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies kraft-envelope packing within the book procurement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies kraft-envelope packing within the book procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies cushioned shipping bags as an eligible book-order enclosure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies cushioned shipping bags as an eligible book-order enclosure.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes wrapped shipping bundles as an alternative purchasing configuration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes wrapped shipping bundles as an alternative purchasing configuration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires packing and filler separately from the external enclosure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires packing and filler separately from the external enclosure.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies closure tape and securing straps independently of container construction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies closure tape and securing straps independently of container construction.
4. Print Order Form 2511 Instructions | U.S. Government Publishing Office
   - GPO's print-order instructions distinguish paper-banded sets from shrink-wrapped sets, with both described in conjunction with carton packing. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specifies paper-banded sets separately from shrink-wrapped sets.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specifies paper-banded sets separately from shrink-wrapped sets.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes shrink-wrapped units nested within cartons, supporting component attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes shrink-wrapped units nested within cartons, supporting component attribution.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes internal packaging, container quantities and pallet requirements.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes internal packaging, container quantities and pallet requirements.
5. U.S. Government Publishing Office - Jacket 420-111 R2: Vol. V in History of Acquisition in the Department of Defense
   - Taxonomy evidence: The 2022 solicitation purchases a casebound book, dust jacket, individual mailing containers, and nested wrapping/boxing as distinguishable deliverables. ([gpo.gov](https://www.gpo.gov/docs/default-source/contracts/xx.xx-r2ae071430b44a64308413ff08001d133d.pdf))

6. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
7. The Global Publishing Industry in 2022
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
8. 2024 年新闻出版统计公报
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
9. Foreign Exchange Rates - G.5A Annual, January 5, 2026
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

10. Book publishing industry, 2024 - Statistics Canada
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring separate protection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring separate protection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring closures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring closures.
11. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.

12. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
13. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
14. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.
15. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
16. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

17. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
18. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
19. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
20. GPOExpress Program Pricing Guide - November 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx hand folding provides a handling-cost comparison; the complete band realization remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx hand folding provides a handling-cost comparison; the complete band realization remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
21. Hardcover Book Protection: Dust Jackets or Slipcases?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.

22. Book Printing Cost in China: How Printing Prices Are Calculated
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its closure split is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its closure split is assumed.
23. Make Believe Ideas - Independent Retail Catalog 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
24. Bookmobile - Request Book Printing Quotes the Right Way to Save Money
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.
25. Digital Book Printing - Bookmobile
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
26. Sell Books on Shopify - Lulu
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offered storefront-to-print-and-ship route supports an accessible production-linked parcel channel, not assumed demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct fulfillment availability supports the parcel-use scenario without establishing envelope mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct fulfillment availability supports the parcel-use scenario without establishing bag mix.

27. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional packaging minimization supports a directional right-sizing premise, not a measured global box-price effect.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Waste-reduction requirements inform the bounded substitution scenario; they do not quantify band adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional circularity requirements inform lower lightweight-bag exposure without implying a global book-bag ban.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material substitution remains partly internal to the combined film-and-paper category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional recyclability pressure informs the niche substitution scenario, not an observed blister-sales decline.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Empty-space reduction provides a directional premise for lower cushioning allowance per individual box.

4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Canadian online versus other print-sales values constrain parcel exposure, with explicit value-to-unit and geographic limitations.
9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.

10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specialty-book activity constrains the presentation-demand scenario but does not measure gift-box attachment.

13. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
14. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
15. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
16. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
17. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 21. Ministry of Education - Press conference release, December 17, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. 22. Global Connect - Ingram Content Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
23. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
24. U.S. Government Publishing Office - Program 827-S: Federal Aviation Administration Books, Contract Pricing and Specifications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical evaluation quantities provide a container-heavy institutional purchasing counterexample, not global shipment shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical evaluation quantities provide a container-heavy institutional purchasing counterexample, not global shipment shares.
25. U.S. Government Publishing Office - Print Order Form 2511 Instructions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes internal packaging, container quantities and pallet requirements.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes internal packaging, container quantities and pallet requirements.

26. Book Printing Cost in China: How Printing Prices Are Calculated
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx per export carton including basic packing materials constrains the bulk-package budget; the container allocation is modeled.
27. Sell Books on Shopify - Lulu
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offered storefront-to-print-and-ship route supports an accessible production-linked parcel channel, not assumed demand.
28. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional packaging minimization supports a directional right-sizing premise, not a measured global box-price effect.

5. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 6. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

7. 2024 年新闻出版统计公报

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 8. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

9. Book publishing industry, 2024 - Statistics Canada

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Modest observed online-print growth qualifies aggressive parcel-related wrapping assumptions.

10. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
11. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
12. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

13. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
14. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
15. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
16. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
17. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
18. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

19. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
20. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
21. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 25. GPOExpress Program Pricing Guide - November 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx per shrink wrap anchors a small-run comparison, not the assumed global realization.
26. Bookmobile - Request Book Printing Quotes the Right Way to Save Money
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The printer's bookstore-oriented purchasing guidance cautions against universal shrink-wrap attachment.
27. Digital Book Printing - Bookmobile
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current portfolio offers shrink-wrap independently of other finishing options.
28. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material substitution remains partly internal to the combined film-and-paper category.

Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   · Taxonomy evidence: Separate entries recognize single-item and multivolume slipcases. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates single-item and multivolume slipcases; supplies classification, not sales weights.
2. ONIX Codelists Issue 73 - List 80, Code 10: Slip-Cased
   · Taxonomy evidence: Code xx.xx identifies a slipcase for an individual item; the complete list also distinguishes multivolume slipcases. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/xx.xx))
3. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported photobook copies rose from xx.xx to xx.xx; the narrower 2026 target qualifies strong specialty-growth assumptions.
12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

19. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Hardcover Book Protection: Dust Jackets or Slipcases?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-product EXW slipcase prices of USD xx.xx, USD xx.xx and USD xx.xx at xx.xx xx.xx and xx.xx units constrain relative realizations.

Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Wallet/folder packaging is recognized; the slip-sleeve description can also denote an envelope, requiring construction-based allocation. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Wallet/folder packaging is explicitly recognized. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes envelope-like slip-sleeves and wallets or folders.
2. U.S. Government Publishing Office - Program 827-S: Federal Aviation Administration Books
   - Taxonomy evidence: The FAA book solicitation distinguishes kraft envelopes from cushioned bags and shipping bundles. ([gpo.gov](https://www.gpo.gov/docs/default-source/contract-pricing/ab0827s.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies kraft-envelope packing within the book procurement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies kraft-envelope packing within the book procurement.
3. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed envelope purchases.

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Pouch/bag packaging has a separate entry. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Pouch/bag packaging has a distinct standardized entry. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes pouch and bag packaging independently.
2. U.S. Government Publishing Office - Program 827-S: Federal Aviation Administration Books
   - Taxonomy evidence: Cushioned shipping bags are explicit book-order packaging components. ([gpo.gov](https://www.gpo.gov/docs/default-source/contract-pricing/ab0827s.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies cushioned shipping bags as an eligible book-order enclosure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies cushioned shipping bags as an eligible book-order enclosure.

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The print-channel value mix supplies a limited parcel-demand proxy, not observed bag purchases.

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

21. Global Connect - Ingram Content Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Digital Book Printing - Bookmobile
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current book-production portfolio separately offers poly bags, supporting commercial category participation rather than a sales weight.
24. Sell Books on Shopify - Lulu
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct fulfillment availability supports the parcel-use scenario without establishing bag mix.
25. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional circularity requirements inform lower lightweight-bag exposure without implying a global book-bag ban.

Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Browse-prevention tape is an explicit book-related closure. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Browse-prevention tape is an explicit book-related closure category. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Explicitly recognizes book browse-prevention closures.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Explicitly recognizes book browse-prevention closures.
2. U.S. Government Publishing Office - Program 827-S: Federal Aviation Administration Books
   - Taxonomy evidence: Closure tape and securing straps are specified separately from containers. ([gpo.gov](https://www.gpo.gov/docs/default-source/contract-pricing/ab0827s.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies closure tape and securing straps independently of container construction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies closure tape and securing straps independently of container construction.
3. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring closures.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring closures.

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix.    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring separate protection.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Channel activity constrains the modeled delivery-pack population requiring separate protection.

7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

22. GPOExpress Program Pricing Guide - November 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx auxiliary insertion supplies a handling-price comparison, not protective-material sales.
23. Book Printing Cost in China: How Printing Prices Are Calculated
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The inclusive carton quotation constrains combined spending; its cushioning split is assumed.
24. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Empty-space reduction provides a directional premise for lower cushioning allowance per individual box.

Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Wraparound sleeves leave opposing ends uncovered, distinguishing them from enclosed wraps. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Open-ended wraparound sleeves are distinct from enclosed wrapping.
2. U.S. Government Publishing Office - Print Order Form 2511 Instructions
   - Taxonomy evidence: Paper-banded sets are an identifiable packaging configuration, strengthening support for the retained band grouping. ([gpo.gov](https://www.gpo.gov/docs/default-source/forms-standards-pdf-files/2511_instructions.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specifies paper-banded sets separately from shrink-wrapped sets.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specifies paper-banded sets separately from shrink-wrapped sets.
3. ONIX Codelists Issue 75 - List 80, Code 04: Wraparound Sleeve
   - Taxonomy evidence: Code xx.xx identifies a wraparound sleeve that leaves opposing ends open, supporting distinction from full wrapping and closed containers. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx/xx.xx))
4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

13. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

14. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

15. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

Sources & Evidence

1. EDItEUR - ONIX Codelists Issue 75, List 80: Product Packaging Type
   - Taxonomy evidence: Formed-plastic clamshell and card-backed blister packs are distinct named constructions. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Taxonomy evidence: Codes distinguish formed-plastic clamshell packaging from card-backed blister packaging. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines formed-plastic clamshells and card-backed blister packaging as distinct constructions.

2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

21. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
22. Make Believe Ideas - Independent Retail Catalog 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 catalog identifies activity books with cover-mounted blisters, establishing book-specific participation but not packaging revenue or volume.
23. European Commission - New EU Rules on Packaging Enter into Application
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regional recyclability pressure informs the niche substitution scenario, not an observed blister-sales decline.

10. Book Printing & Packaging Services Market, by Printing Technology

[redacted] GPO's digital-printing guidance permits offset or digital alternatives in example purchasing language but also illustrates exclusions of particular digital variants. Buyers should establish which alternatives the actual purchasing requirement permits before treating advertised technologies as interchangeable.

The relevant technology may apply to a component rather than the whole book. ISO's buyer-oriented guide identifies Gravure Printing and Flexographic Printing in packaging applications. [redacted]

[redacted] Buyers seeking that route should confirm a named provider's complete book and delivery commitment before relying on it as an alternative. Neither example establishes equivalent distribution support or comparative commercial performance.

[redacted] Within that institutional service setting, a buyer needing a finished bound book must arrange the remaining included services separately. The documented ordering route should not be generalized into unrestricted public access.

[redacted] That purchasing-category recognition does not establish an award or eligibility for a particular supplier. Buyers should identify the

physical-book deliverable and applicable procurement relationship rather than assuming that a conventional printer or an electronic-braille service supplies an equivalent commitment.

Sources & Evidence

1. Services | Puget Bindery

   · Puget lists letterpress book plates and specialty inserts, establishing a component-level application. ([pugetbindery.com](https://www.pugetbindery.com/services))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists commercial letterpress book plates and specialty inserts, supporting a component-service model rather than attribution of the entire book price.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists commercial letterpress book plates and specialty inserts, supporting a component-service model rather than attribution of the entire book price.

2. ISO 12647-2:2013 - Offset Lithographic Processes

   · ISO's offset standard explicitly recognizes sheet-fed and web-fed offset printing within its scope. Only technology-category identity is used here. ([iso.org](https://www.iso.org/standard/xx.xx.html))

3. ISO 18902:2013 - Imaging Materials: Albums, Framing and Storage Materials

   · ISO distinguishes inkjet, thermal-transfer, electrophotographic, and silver-halide imaging categories. This supports category separation, not book-service availability or comparative performance. ([iso.org](https://www.iso.org/standard/xx.xx.html))

   · Taxonomy evidence: The imaging standard distinguishes photographic materials from named digital imaging families; it does not establish book-market shares. ([iso.org](https://www.iso.org/standard/xx.xx.html))

4. Printing Our Past, Present and Future - CPI Corporate Brochure

   · CPI's corporate brochure documents web-offset and inkjet book services within its portfolio. The brochure is not a title-specific commitment. ([cpi-print.co.uk](https://www.cpi-print.co.uk/wp-content/uploads/2023/xx.xx/Corporate-brochure-UK_LowDef-2023.pdf))

5. Digital Printing | U.S. Government Publishing Office

   · GPO's guidance illustrates purchasing language allowing conventional offset or digital alternatives while also showing restrictions on particular digital variants. These are procurement examples rather than a universal technology-quality ranking. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))

   · Taxonomy evidence: The procurement flyer permits conventional offset or digital production against the same specified output-quality requirement. Its national quality levels therefore do not justify treating printing technology as a global quality-tier proxy. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The purchasing guidance supports conditional digital substitution, not unrestricted interchangeability or an observed forecast allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing guidance supports conditional digital substitution, not unrestricted interchangeability or an observed forecast allocation.

6. ISO/TC 130 - Guidelines for Using Print Production Standards, 2019

· ISO's buyer-oriented guide identifies flexographic and gravure applications in packaging, supporting a component-specific comparison rather than an assumption of complete-book substitution. ([committee.iso.org](https://committee.iso.org/files/live/sites/tc130/files/Resources/Guidelines%20for%20using%20print%20production%20standards%20v1.xx.xx%xx.xx.pdf))

· Taxonomy evidence: The standards-body guide distinguishes product use cases from printing processes and notes that digital technology can serve the listed production categories. ([committee.iso.org](https://committee.iso.org/files/live/sites/tc130/files/Resources/Guidelines%20for%20using%20print%20production%20standards%20v1.xx.xx%xx.xx.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies flexographic packaging applications; the book-specific spending budget and process coefficients remain modeled.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies flexographic packaging applications; the book-specific spending budget and process coefficients remain modeled.

7. The Cormac McCarthy Collection | The Folio Society

· The Folio Society documents screen-printed cloth covers on editions in its Cormac McCarthy collection, establishing a book-component application. ([foliosociety.com](https://www.foliosociety.com/usa/the-cormac-mccarthy-collection))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents screen-printed cloth covers on physical book editions, supporting component-level commercial attribution. It does not measure supplier component receipts or global uptake.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents screen-printed cloth covers on physical book editions, supporting component-level commercial attribution. It does not measure supplier component receipts or global uptake.

8. DNP DX1 Photo-Book Printing Brochure, 2013

· DNP's brochure marked 2013 identifies thermal dye-sublimation and photo-book applications. It establishes a historical equipment application, not an available book-production service contract. ([dnpphoto.com](https://dnpphoto.com/Portals/xx.xx/Resources/DNP-DX1.pdf))

9. Premium Layflat Photo Books | PhotobookShop

· PhotobookShop advertises bound silver-halide photographic books and distinguishes them from its digitally printed alternatives. Supplier claims of superior quality are not adopted. ([photobookshop.com](https://www.photobookshop.com/photo-books/premium-lay-flat))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.

10. Risograph Digital Duplicator Order Form, 2026 | Minneapolis College of Art and Design

· MCAD's 2026 Risograph order form accepts book and booklet requests but expressly excludes assembly. Its institutional ordering relationship does not establish unrestricted external access. ([intranet.mcad.edu](https://intranet.mcad.edu/sites/default/files/knowledgeBase/risograph-orderform-2026_0.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.

11. RISO MH Series | RISO

· RISO identifies its MH digital duplicator as a stencil-printing product. Only the technology classification is used. ([riso.com](https://www.riso.com/product/mh/index.html))

12. Contract Specifications | National Library Service, Library of Congress

· NLS separately lists Braille Books and Pamphlets and Print/Braille Books in its contract-specifications catalog. This establishes purchasing-category recognition, not an award or supplier eligibility. ([loc.gov](https://www.loc.gov/nls/who-we-are/guidelines-and-specifications/contract-specifications/))

13. 2022 North American Industry Classification System - United States

· Taxonomy evidence: The printing subsector recognizes lithographic, gravure, screen, flexographic, digital, and letterpress families independently of product purpose. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

14. Library of Congress, National Library Service - About Braille

· Taxonomy evidence: Physical braille reproduction is distinguishable from preparing materials for electronic refreshable displays, supporting a physical-content technology distinction within the retained book-production boundary. ([loc.gov](https://www.loc.gov/nls/services-and-resources/informational-publications/about-braille/))

15. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

16. The Global Publishing Industry in 2022

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

17. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
19. Book publishing industry, 2024 - Statistics Canada
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
20. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
21. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
22. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

23. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The photobook observation constrains the shared demand pool used in the silver-halide model; it is not silver-halide output or proof of future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The photobook observation constrains the shared demand pool used in the silver-halide model; it is not silver-halide output or proof of future adoption.
24. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
25. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
26. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
27. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

28. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
29. Clays demonstrate dedication to digital investment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capacity/output comparison is a limited commercial check on continued conventional book production, not a direct offset revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The capacity/output comparison is a limited commercial check on continued conventional book production, not a direct offset revenue observation.
30. American Printing House - 2024 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.

Sources & Evidence

1. U.S. Government Publishing Office - Digital Printing

   · Taxonomy evidence: Conventional offset is explicitly recognized as an eligible production alternative independent of the stated quality requirement. ([gpo.gov](https://www.gpo.gov/docs/default-source/guides-and-instructions/pdf/digital-printing-flyer.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Procurement examples allow offset or digital alternatives while restricting some digital variants, supporting an acceptance- and run-mix model rather than a universal quality ranking. This is a modeling premise, not an observed process share.

2. ISO/TC 130 - Guidelines for Using Print Production Standards, Version 1.0, 2019

   · Taxonomy evidence: Its buyer-oriented examples associate books with offset printing. ([committee.iso.org](https://committee.iso.org/files/live/sites/tc130/files/Resources/Guidelines%20for%20using%20print%20production%20standards%20v1.xx.xx%xx.xx.pdf))

3. ISO 12647-2:2013 - Graphic Technology: Offset Lithographic Processes

   · Taxonomy evidence: The standard covers offset-lithographic printing and explicitly includes packaging-board applications. ([iso.org](https://www.iso.org/standard/xx.xx.html))

4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
   ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 13. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

14. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

15. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

Sources & Evidence

1. ISO 12647-2:2013 - Graphic Technology: Offset Lithographic Processes

   · Taxonomy evidence: Sheetfed offset is an explicitly recognized platform within the standard's scope. ([iso.org](https://www.iso.org/standard/xx.xx.html))

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

3. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx CEWE PHOTOBOOK units in 2025 versus xx.xx in 2024, constraining the specialty-book demand budget without establishing a global process split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports the common photographic-demand input; electrophotographic attribution remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports the common photographic-demand input; electrophotographic attribution remains an explicit assumption.
12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

19. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Clays demonstrate dedication to digital investment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx books annually and xx.xx books of digital capacity in an older investment statement; this constrains scale but is not a 2025 realized output mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's inkjet investment supports an existing book-production application and a conditional adoption premise, not a quantified global forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's inkjet investment supports an existing book-production application and a conditional adoption premise, not a quantified global forecast.
24. Kodak Moments Kiosk - Kodak Alaris
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises book-capable retail kiosk equipment and a photographic-printing portfolio. Used only as a commercial-route premise for the thermal working estimate, not as evidence of thermal book-service sales, utilization or the final share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises book-capable retail kiosk equipment and a photographic-printing portfolio. Used only as a commercial-route premise for the thermal working estimate, not as evidence of thermal book-service sales, utilization or the final share.

   · Taxonomy evidence: Dye- and pigment-based inkjet prints are explicitly recognized. ([iso.org](https://www.iso.org/standard/xx.xx.html))
2. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports the common photographic-demand input; electrophotographic attribution remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed photobook activity supports the common photographic-demand input; electrophotographic attribution remains an explicit assumption.
11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

18. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

2. DNP - DX1 Photo Book Printing Brochure, 2013
   · Taxonomy evidence: The 2013 company brochure explicitly markets thermal dye-sublimation output for bound photo books. This establishes a commercial application, not current equipment sales or 2025 printing receipts. ([dnpphoto.com](https://dnpphoto.com/Portals/xx.xx/Resources/DNP-DX1.pdf))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Kodak Moments Kiosk - Kodak Alaris
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertises book-capable retail kiosk equipment and a photographic-printing portfolio. Used only as a commercial-route premise for the thermal working estimate, not as evidence of thermal book-service sales, utilization or the final share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advertises book-capable retail kiosk equipment and a photographic-printing portfolio. Used only as a commercial-route premise for the thermal working estimate, not as evidence of thermal book-service sales, utilization or the final share.

Sources & Evidence

1. UNSD - ISIC Rev. 4, Code 1811: Printing
   - Taxonomy evidence: Flexographic printing is explicitly distinguished as a named printing family. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
2. ISO/TC 130 - Guidelines for Using Print Production Standards, Version 1.0, 2019
   - Taxonomy evidence: Flexography is identified for corrugated, label, and flexible-packaging work. ([committee.iso.org](https://committee.iso.org/files/live/sites/tc130/files/Resources/Guidelines%20for%20using%20print%20production%20standards%20v1.xx.xx%xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies flexographic packaging applications; the book-specific spending budget and process coefficients remain modeled.

3. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
20. Ministry of Education - Press conference release, December 17, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))
21. Global Connect - Ingram Content Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))

Sources & Evidence

1. ISO 18902:2013 - Imaging Materials: Processed Imaging Materials - Albums, Framing and Storage Materials

   · Taxonomy evidence: Silver-halide photographic material is identified separately from the digital-print families. ([iso.org](https://www.iso.org/standard/xx.xx.html))

2. PhotobookShop - HD Layflat Hardcover Photo Books

   · Taxonomy evidence: The inspected ordering page explicitly offers content-bearing hardcover photo books using silver-halide photographic output, corroborating an in-scope book application rather than merely loose photographic prints. ([photobookshop.com](https://www.photobookshop.com/photo-books/premium-lay-flat))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offers bound silver-halide photographic books and distinguishes them from digitally printed alternatives, supporting the model's separate photographic category rather than an observed sales weight.

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. Sources & Evidence

1. 2022 North American Industry Classification System - United States

   · Taxonomy evidence: Screen printing is a separate recognized printing family; this broad classification does not quantify its book-specific activity.
   ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
   ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))

9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
14. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
15. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

Sources & Evidence

1. Library of Congress, National Library Service - About Braille
   · Taxonomy evidence: The official library publication distinguishes duplicating/embossing copies and binding braille books, establishing a physical reproduction activity. It also identifies volunteer activity, which must not be counted as paid market receipts.
   ([loc.gov](https://www.loc.gov/nls/services-and-resources/informational-publications/about-braille/))
2. Library of Congress, National Library Service - Contract Specifications
   · Taxonomy evidence: Physical braille books appear in the library's contract-category catalog, complementing the official description of embossing activity. The linked production specifications were not used for operational details.
   ([loc.gov](https://www.loc.gov/nls/who-we-are/guidelines-and-specifications/contract-specifications/))
3. Library of Congress, National Library Service - Braille on Demand
   · Taxonomy evidence: The page provides an active public application for hard-copy braille books, supplementing category recognition without establishing commercial market size.

4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
   ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 13. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
14. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
15. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
16. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
17. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

23. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
24. American Printing House - 2024 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024 product sales were USD xx.xx; braille publications represented xx.xx% of product sales; xx.xx braille volumes were produced. These inputs constrain an adjusted production-realization proxy, not a global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The decline from xx.xx braille volumes in 2022 qualifies a uniform physical-demand growth assumption and informs the slower relative forecast activity weight.

Sources & Evidence

1. UNSD - ISIC Rev. 4, Code 1811: Printing
   - Taxonomy evidence: Photogravure is a named printing family in the class covering books and printed publications. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

2. ISO/TC 130 - Guidelines for Using Print Production Standards, Version 1.0, 2019
   - Taxonomy evidence: Gravure is identified as a packaging-printing family. ([committee.iso.org](https://committee.iso.org/files/live/sites/tc130/files/Resources/Guidelines%20for%20using%20print%20production%20standards%20v1.xx.xx%xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes packaging use cases and printing processes, supporting allocation of gravure to book-associated components rather than the full value of a book.
3. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

Sources & Evidence

1. 2022 North American Industry Classification System - United States
   · Taxonomy evidence: Letterpress is separately recognized rather than subsumed under flexography. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
2. UNSD - ISIC Rev. 4, Code 1811: Printing
   · Taxonomy evidence: Letterpress is explicitly named among the printing families covered by the book-inclusive classification. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

Sources & Evidence

1. Minneapolis College of Art and Design - Risograph Digital Duplicator Order Form

   · Taxonomy evidence: The institutional print-order document explicitly accepts Risograph book/booklet requests while distinguishing printing from assembly, establishing a book-related service application. ([intranet.mcad.edu](https://intranet.mcad.edu/sites/default/files/knowledgeBase/risograph-orderform-2026_0.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 institutional form recognizes Risograph book/booklet orders but excludes assembly. It supports a limited application boundary, not 2025 external commercial volume; internal institutional charges are excluded from the numerator.

2. RISO MH Series - Digital Duplicator

   · Taxonomy evidence: The equipment maker identifies its digital duplicator as a stencil-printing product, corroborating the family distinction without defining the market partition. ([riso.com](https://www.riso.com/product/mh/index.html))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
13. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
14. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
15. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
16. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. Higher Education Textbooks and Vocational & Continuing Education Books require confirmation of their own course, edition, and delivery requirements rather than automatic adoption of NCERT's arrangements.

Scholarly & Professional Books also contain distinct service relationships. ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ A production buyer should distinguish maintaining an approved research edition from supporting an update program; a complete-book delivery commitment does not automatically cover subsequent supplements.

General-Interest Books and Religious & Devotional Books should not inherit one production specification from their subject labels. ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Activity & Puzzle Books likewise require a clear intended purpose: the Census printing questionnaire includes coloring books within general-book production, demonstrating that interactive content alone does not establish an institutional textbook purchasing route.

4. NAPCS Product List for NAICS 51113: Book Publishers | U.S. Census Bureau
   · The historical official product classification distinguishes printed scholarly books for academic and research communities from printed professional and technical books used in occupational practice. It is a category crosswalk, not current purchasing evidence. ([www2.census.gov](https://www2.census.gov/library/reference/napcs/product-list/web-xx.xx-final-reformatted-edited-us082208.pdf))
5. Products | CPI Print UK
   · CPI advertises hardback, paperback, thin-paper Bible and religious-book services. The offering supports edition-specific supplier comparison, not a universal religious-book requirement. ([cpi-print.co.uk](https://www.cpi-print.co.uk/products/))

6. 2022 Economic Census - Books Printing Questionnaire MC-32312 | U.S. Census Bureau
   - The 2022 Books Printing questionnaire includes coloring books within general-book printing. This illustrates category recognition without establishing an institutional educational purchasing route. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Taxonomy evidence: The official production questionnaire separates textbooks, technical/scientific/professional books, religious books, and general books. It supplies category recognition rather than current global quantities. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Taxonomy evidence: The official printing schedule distinguishes textbook, technical/scientific/professional, religious, and general-book production, supporting purpose-related commercial distinctions. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.

12. HM Revenue & Customs - VBOOKS3130: Books and Booklets, Function
    - Taxonomy evidence: The manual discusses primary function and multipurpose products, corroborating the need for an explicit purpose-based allocation rule without prescribing this global partition. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
13. European Book Publishing Statistics 2024
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

14. The Global Publishing Industry in 2022
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The original publishing survey documents country-level trade/education revenue differences used to constrain the modeled physical-publishing mix; it does not directly measure service shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The original publishing survey documents country-level trade/education revenue differences used to constrain the modeled physical-publishing mix; it does not directly measure service shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country educational revenue proportions constrain regional demand-mix assumptions carried into the same forecast model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country educational revenue proportions constrain regional demand-mix assumptions carried into the same forecast model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported children's-book revenue supplies the starting monetary input for the explicitly adjusted activity-book weight, not an observed activity share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported children's-book revenue supplies the starting monetary input for the explicitly adjusted activity-book weight, not an observed activity share.
15. 2024 年新闻出版统计公报
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.
16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
17. Book publishing industry, 2024 - Statistics Canada
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

18. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
19. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
20. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.
21. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 photobook volumes independently constrain the specialty-activity assumption, without establishing global photobook volume or revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 photobook volumes independently constrain the specialty-activity assumption, without establishing global photobook volume or revenue.

22. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
23. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
24. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
25. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
26. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.
27. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.
28. 二〇二一年全国新闻出版业基本情况
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2021 aggregate textbook output distinguishes school, tertiary and vocational/adult activity; historical volumes require value and global-scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2021 aggregate textbook output distinguishes school, tertiary and vocational/adult activity; historical volumes require value and global-scope adjustments.
29. Music, printed or in manuscript imports by country, 2024 - World Integrated Trade Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.

30. Bloomsbury Publishing - 2024/25 Results Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.

Sources & Evidence

1. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
   - Taxonomy evidence: The general-book line includes trade books for adults and juveniles. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Taxonomy evidence: General-book printing includes trade books for adult and juvenile audiences. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official printing questionnaire supports the distinction between textbook and general-book production; recognition is not treated as a revenue weight.
2. EDItEUR - ONIX Codelist 28: Audience Type
   - Taxonomy evidence: ONIX distinguishes nonspecialist adult, children, and teenage audiences from specifically educational audiences; youth readership does not itself establish instructional purpose. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The original publishing survey documents country-level trade/education revenue differences used to constrain the modeled physical-publishing mix; it does not directly measure service shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The original publishing survey documents country-level trade/education revenue differences used to constrain the modeled physical-publishing mix; it does not directly measure service shares.

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. Sources & Evidence

1. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
   · Taxonomy evidence: The textbook line includes teacher editions and workbooks. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   · Taxonomy evidence: Textbook production expressly includes teacher editions and workbooks. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
2. U.S. Census Bureau - NAPCS Product List for NAICS 51113: Book Publishers
   · Taxonomy evidence: The official product definitions distinguish printed school and postsecondary textbooks and include workbooks and teacher resources. This is a classification crosswalk, not current market-volume evidence. 3. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

13. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

14. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

15. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 3. European Book Publishing Statistics 2024

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. 二〇二一年全国新闻出版业基本情况
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tertiary textbook aggregate output supplies the higher-education activity input before an assumed relative-service-value adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tertiary textbook aggregate output supplies the higher-education activity input before an assumed relative-service-value adjustment.

1. EDItEUR - ONIX Codelist 28: Audience Type

   · Taxonomy evidence: Adult education covers formal or semi-formal learning, vocational training, apprenticeships, and practical or recreational learning; additional-language teaching is also recognized. ([ns.editeur.org](https://ns.editeur.org/onix/en/xx.xx))

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
14. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
15. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

Sources & Evidence

1. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

2. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

3. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 4. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

5. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 6. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
7. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
8. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

9. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 photobook volumes independently constrain the specialty-activity assumption, without establishing global photobook volume or revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2024-2025 photobook volumes independently constrain the specialty-activity assumption, without establishing global photobook volume or revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-company photobook copy growth supports the existence and scale of personal-memory production; global quantity, realization and long-term growth remain modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-company photobook copy growth supports the existence and scale of personal-memory production; global quantity, realization and long-term growth remain modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Photobook activity constrains the personal-book component of the conditional denominator, not yearbook demand itself.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Photobook activity constrains the personal-book component of the conditional denominator, not yearbook demand itself.
10. Paperback Printing Cost - Kindle Direct Publishing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
11. European Book Publishing Statistics 2017
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

12. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

13. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

14. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

15. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

16. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

17. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

20. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
21. HDSB - RFSQ 26-013: Yearbook Software and Printing Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The qualification notice establishes a commissioned yearbook scope including printing, binding and school delivery; it supplies no awarded value and is not used as a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The qualification notice establishes a commissioned yearbook scope including printing, binding and school delivery; it supplies no awarded value and is not used as a sales weight.

Sources & Evidence

1. HM Revenue & Customs - VBOOKS3130: Books and Booklets, Function

   · Taxonomy evidence: The official manual recognizes photobooks with book characteristics and distinguishes them from supplies dominated by photographic services. National tax treatment is not used as a global inclusion rule. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))

   · Taxonomy evidence: The manual recognizes qualifying photobooks and discusses a wedding-book example, while distinguishing book products from predominantly photographic-service supplies. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. ([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-company photobook copy growth supports the existence and scale of personal-memory production; global quantity, realization and long-term growth remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-company photobook copy growth supports the existence and scale of personal-memory production; global quantity, realization and long-term growth remain modeled.
11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

18. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

19. Ministry of Education - Press conference release, December 17, 2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))

Sources & Evidence

1. HDSB - RFSQ 26-013: Yearbook Software and Printing Services

   · Taxonomy evidence: The school board's supplier-qualification notice explicitly requests yearbook services including printing. Software is also included in the procurement but remains outside eligible production revenue. ([hdsb.bidsandtenders.ca](https://hdsb.bidsandtenders.ca/Module/Tenders/en/Tender/Detail/bcec7cec-xx.xx-466e-a520-54620f3c0209))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The qualification notice establishes a commissioned yearbook scope including printing, binding and school delivery; it supplies no awarded value and is not used as a sales weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The qualification notice establishes a commissioned yearbook scope including printing, binding and school delivery; it supplies no awarded value and is not used as a sales weight.

2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Photobook activity constrains the personal-book component of the conditional denominator, not yearbook demand itself.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Photobook activity constrains the personal-book component of the conditional denominator, not yearbook demand itself.

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))

18. South African Book Publishing Industry Survey 2023-2024

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 4. European Book Publishing Statistics 2024
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares. 5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

13. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

14. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

15. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

23. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
24. AAP December 2025 StatShot Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported professional-book receipts and their 2025 decline challenge assumptions of automatic growth from recurring reference relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported professional-book receipts and their 2025 decline challenge assumptions of automatic growth from recurring reference relationships.
25. Bloomsbury Publishing - 2024/25 Results Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate Academic & Professional print, digital and rights/service receipts demonstrate the required physical-revenue boundary; company mix is not treated as global market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed physical academic publishing activity supports commercial applicability but does not verify the assumed global research/reference ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed physical academic publishing activity supports commercial applicability but does not verify the assumed global research/reference ratio.

2. European Book Publishing Statistics 2024

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.
12. European Book Publishing Statistics 2017
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.
13. European Book Publishing Statistics 2019
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.
14. 2021 年新闻出版产业分析报告
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.
15. European Book Publishing Statistics 2023
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Canadian physical-book input contributes to the North American demand index; it is publisher revenue, not service receipts. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 21. Global Connect - Ingram Content Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Bloomsbury Publishing - 2024/25 Results Presentation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed physical academic publishing activity supports commercial applicability but does not verify the assumed global research/reference ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed physical academic publishing activity supports commercial applicability but does not verify the assumed global research/reference ratio.

2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
17. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
18. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. 21. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))

22. AAP December 2025 StatShot Report
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct publisher-sample religious and trade physical-format receipts provide a category-intensity proxy, subject to explicit geographic and coverage adjustments.

4. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

5. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

6. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. 7. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

8. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 9. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
10. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
11. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

12. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

13. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

14. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

15. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

16. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

17. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

18. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
19. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
20. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. Sources & Evidence

1. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
   - Taxonomy evidence: Coloring books are included in recognized book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Taxonomy evidence: The general-book product line expressly includes coloring books. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognized coloring-book output supports treating recreational activity commissions separately from institutional textbooks according to purpose.
2. HM Revenue & Customs - VBOOKS3130: Books and Booklets, Function
   - Taxonomy evidence: Crossword and puzzle books are explicitly recognized, supporting product identity alongside content-bearing workbooks. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))
   - Taxonomy evidence: The official manual separately discusses crossword and puzzle books for adults and children, supporting their product identity. National tax treatment is not applied as a global market-inclusion rule. ([gov.uk](https://www.gov.uk/hmrc-internal-manuals/vat-books/vbooks3130))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. 10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. ([ir.cewe.de](https://ir.cewe.de/en/news/cewe-achieves-all-targets-in-2025-and-aims-to-further-increase-revenue-and-earnings-in/70292c17-c943-xx.xx-bd11-4323b6ce54d8))

12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024

2. European Book Publishing Statistics 2024
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

3. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

4. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

5. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

6. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

7. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
8. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))

9. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

10. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 11. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

12. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

13. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

14. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

15. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

16. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))

Sources & Evidence

1. U.S. Census Bureau - 2022 Economic Census, Books Printing Questionnaire MC-32312
   - Taxonomy evidence: Music books are recognized within book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
   - Taxonomy evidence: The schedule recognizes music books within book-printing output. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-32312_su.pdf))
2. International ISMN Agency - Frequently Asked Questions
   - Taxonomy evidence: The international identifier authority recognizes notated-music editions, including printed scores and parts, and explains their distinct commercial identification and distribution requirements. This supports music-publication identity; the proposed category remains limited to eligible physical book-format work. ([ismn-international.org](https://ismn-international.org/ismn/faq/))

3. European Book Publishing Statistics 2024

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.
([fep-fee.eu](https://www.fep-fee.eu/European-Book-Publishing-Statistics-2024))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EUR xx.xx of 2024 publisher revenue and weakening physical volumes constrain the European demand weight and forecast, not directly observed service shares.

4. The Global Publishing Industry in 2022

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country revenue/format proxies constrain commissioning weights. ([wipo.int](https://www.wipo.int/edocs/pubdocs/en/wipo-pub-xx.xx-2023-xx.xx-en-the-global-publishing-industry-in-2022.pdf))

5. 2024 年新闻出版统计公报

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 book-publishing revenue of CNY xx.xx supplies the physical-demand proxy; reported output contraction qualifies growth assumptions. ([nppa.gov.cn](https://www.nppa.gov.cn/xxgk/fdzdgknr/tjxx/xx.xx/P020251218382424228218.pdf))

6. Foreign Exchange Rates - G.5A Annual, January 5, 2026

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.

7. Book publishing industry, 2024 - Statistics Canada

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. ([www150.statcan.gc.ca](https://www150.statcan.gc.ca/n1/daily-quotidien/xx.xx/dq260205b-eng.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: CAD xx.xx plus CAD xx.xx of print sales supplies a physical-book commissioning proxy; digital growth constrains the forecast mix. 8. U.S. Census Bureau - Books Printing: Shipments, annual table
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
9. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official Census revenue-series page defines the publisher-receipt measure underlying the retained U.S. input; the exact 2024 cell was not independently re-extracted. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AIES51113RCT00US))
10. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

11. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
- Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Company photobook activity constrains the materiality of specialty commissions; it does not establish the modeled European specialty multiplier or continued growth through 2032. 12. Paperback Printing Cost - Kindle Direct Publishing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The inspected U.S. paperback schedule charges USD xx.xx plus USD xx.xx per page for the specified regular-trim black-ink category. It provides a contemporary commercial price comparison for the assumed USD xx.xx self-publishing production receipt, not an observed historical price or volume.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The schedule distinguishes printing charges from royalties and retail list prices, supporting the production-receipt boundary used in the estimate.

13. European Book Publishing Statistics 2017

- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The association's primary survey reports approximately EUR xx.xx of European net publisher revenue for 2017, constraining the pre-pandemic demand level.

14. European Book Publishing Statistics 2019

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx of publisher revenue for 2018.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The association reports approximately EUR xx.xx for 2019 and identifies a questionnaire change that limits exact comparability with earlier observations.

15. 2021 年新闻出版产业分析报告

- Evidence informing the 2020 market-value input; displayed series and growth include calculations: The official report's 2021 comparison identifies a substantial rebound from 2020, constraining the pandemic-recovery bridge.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: China reported xx.xx book copies or sheets in 2021, up xx.xx%; the report also distinguishes textbook output and reprints.

16. European Book Publishing Statistics 2023

- Evidence informing the 2022 market-value input; displayed series and growth include calculations: European net publisher revenue was approximately EUR xx.xx in 2022; the association describes paper-cost pressure and price-led growth.

17. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official annual-average exchange-rate methodology supports the frozen common-USD conversion convention; it does not measure service demand. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual currency-conversion convention prevents mixing local-currency demand inputs with USD allocation weights. ([federalreserve.gov](https://www.federalreserve.gov/releases/g5a/xx.xx/))
18. GCC Statistical Center - Education Statistics 2024 announcement, March 23, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx general-school pupils constrain the regional educational customer pool; national apportionment and monetization are assumed. ([gccstat.org](https://www.gccstat.org/news/xx.xx))
19. South African Book Publishing Industry Survey 2023-2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The transparent national publisher survey supplies a regional commercial comparator, not an observed African printing-service total. ([publishsa.co.za](https://publishsa.co.za/wp-content/uploads/2025/xx.xx/South-African-Book-Publishing-Industry-Survey-2023-2024.pdf))
20. Ministry of Education - Press conference release, December 17, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced increase in annual NCERT textbook printing from xx.xx to xx.xx supports an educational-demand mechanism, not realized supplier receipts or the modeled forecast share. ([education.gov.in](https://www.education.gov.in/sites/upload_files/mhrd/files/PIB%20releae%20of%20the%20Press%20Conference%20held%20today.pdf))
21. Global Connect - Ingram Content Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-dependent network access does not quantify Brazilian commissions or guarantee institutional awards. ([resources.ingramcontent.com](https://resources.ingramcontent.com/publishers/global-connect))

22. Paperback and Hardcover Distribution Rights - Kindle Direct Publishing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketplace-specific physical-book distribution restriction is not evidence of zero Mexican printing and packaging demand. ([kdp.amazon.com](https://kdp.amazon.com/en_US/help/topic/G201834280))
23. Music, printed or in manuscript imports by country, 2024 - World Integrated Trade Solution
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official HS xx.xx import observations constrain the music-publication value bridge; domestic supply, physical-book eligibility and the printing-service fraction remain modeled.

12. Book Printing & Packaging Services Market, by Buyer Type

[illegible] A creator without preparation support therefore faces a different purchasing choice from a publishing organization able to supply approved files. Neither buyer's legal identity establishes that it needs a fully bundled service.

[illegible] Suppliers should establish who selects the vendor, who commissions each included service, and who purchases through the resulting arrangement. The institutional selection authority should not be confused with an assumed ultimate payer.

[illegible] These examples support account-specific procurement preparation, not a universal public-sector registration rule. Supplier eligibility, a valid submission, and commercial selection remain separate conditions.

Corporate & Commercial Buyers can commission books as organizational presentation tools, as in Blurb's business-book offering. Nonprofit & Membership Organizations need an additional distinction between commissioning and benefiting: Lulu allows an organization to be designated as a proceeds recipient, which does not establish that it purchased the printing service. [illegible]

Print & Production Service Providers form a separate trade-purchasing relationship. [illegible] Prime and subcontract relationships must remain distinguishable; they are different responsibilities within the same commissioned project, not automatically independent opportunities.

Sources & Evidence

1. Frequently Asked Questions | IngramSpark

   · IngramSpark permits nonexclusive use with other providers when the publisher owns its ISBN; it separately excludes editing, typesetting, and design services. ([ingramspark.com](https://www.ingramspark.com/faqs))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The provider permits nonexclusive sourcing when the customer owns its ISBN and does not offer editing, typesetting or design. These terms constrain the author service boundary, not adoption or revenue growth.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The provider permits nonexclusive sourcing when the customer owns its ISBN and does not offer editing, typesetting or design. These terms constrain the author service boundary, not adoption or revenue growth.

2. Printing and Publishing Contractors - How to Register

   · GPO requires registration for Small Purchases quotations through GPO Publish but permits bids and proposals without completing that registration. ([gpo.gov](https://www.gpo.gov/how-to-work-with-us/vendors/how-to-register/printing-and-publishing-contractors))

3. Services | Puget Bindery

   · Puget expressly serves commercial printers and other business customers and excludes direct-to-consumer sales. ([pugetbindery.com](https://www.pugetbindery.com/services))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The bindery identifies commercial printers, publishers and corporate print buyers as customers and excludes direct-to-consumer sales. This supports trade-purchasing attribution but supplies no sales percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The bindery identifies commercial printers, publishers and corporate print buyers as customers and excludes direct-to-consumer sales. This supports trade-purchasing attribution but supplies no sales percentage.

4. RFSQ 26-013: Yearbook Software and Printing Services | Halton District School Board
   - The notice authorizes only prequalified suppliers while expressing a preference for secure individual ordering by students or families. It does not establish the ultimate payer for every order. ([hdsb.bidsandtenders.ca](https://hdsb.bidsandtenders.ca/Module/Tenders/en/Tender/Detail/bcec7cec-xx.xx-466e-a520-54620f3c0209))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The yearbook qualification notice restricts supply to prequalified vendors while permitting school bulk orders and individual ordering. It supports separating commissioning authority from ultimate payment, but discloses no fulfilled-order value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The yearbook qualification notice restricts supply to prequalified vendors while permitting school bulk orders and individual ordering. It supports separating commissioning authority from ultimate payment, but discloses no fulfilled-order value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The individual-ordering option establishes an attribution uncertainty relevant to the modeled household portion; it does not establish the assumed xx.xx% proportion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The individual-ordering option establishes an attribution uncertainty relevant to the modeled household portion; it does not establish the assumed xx.xx% proportion.
5. Preserve Your History | Friesens
   - The guidance addresses families, communities, organizations, individuals, committees, and small publishers, with routing based on preparation needs rather than buyer identity alone. ([friesens.com](https://www.friesens.com/history-books/))
6. Business Books - Print Professional, Custom Corporate Books | Blurb
   - Blurb's business-book offering establishes a corporate commissioning proposition, without independently proving the reported customer outcomes. ([blurb.com](https://www.blurb.com/business))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The business-book offering includes organizational presentation and corporate-gift applications. It establishes an in-scope commissioning proposition, not the modeled global copy quantity or spending.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The business-book offering includes organizational presentation and corporate-gift applications. It establishes an in-scope commissioning proposition, not the modeled global copy quantity or spending.
7. Invitation to Bid for Printing Services, LITB-2025-9195618 | UNICEF Cambodia
   - UNICEF Cambodia's printing invitation closing February xx.xx 2025 included books and specified an exclusive submission route, invalidating offers submitted otherwise. It is a historical solicitation, not an award. ([unicef.org](https://www.unicef.org/cambodia/km/invitation-bid-printing-services-litb-2025-xx.xx))
8. How to Use Lulu to Support Your Nonprofit | Lulu
   - Lulu permits a creator to designate an organization or nonprofit as a proceeds recipient. This establishes a beneficiary arrangement, not the recipient's role as purchaser of production services. ([blog.lulu.com](https://blog.lulu.com/how-to-use-lulu-to-support-your-nonprofit/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform permits an organization or charity to receive creator proceeds. This supports excluding beneficiary-only arrangements from nonprofit commissioning; it does not measure nonprofit printing purchases.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform permits an organization or charity to receive creator proceeds. This supports excluding beneficiary-only arrangements from nonprofit commissioning; it does not measure nonprofit printing purchases.

9. 2022 North American Industry Classification System - United States

   · Taxonomy evidence: The manual distinguishes book publishers from independent authors acting as their own publishers. This supports purchaser-role identity, not verified printing expenditures. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

   · Taxonomy evidence: NAICS separately identifies book publishers, printing without publishing, institutional issuers, and independent authors acting as their own publishers. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dedicated book-publishing activity is separated from institutional primary activities and printing without publishing, constraining the Publishing Organizations numerator.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dedicated book-publishing activity is separated from institutional primary activities and printing without publishing, constraining the Publishing Organizations numerator.

10. UNESCO - Revised Recommendation concerning the International Standardization of Statistics on the Production and Distribution of Books, Newspapers and Periodicals

    · Taxonomy evidence: The Recommendation distinguishes publishing houses from institutions whose publishing is subsidiary, supporting separation of professional publishing and institutional roles. ([unesco.org](https://www.unesco.org/en/legal-affairs/revised-recommendation-concerning-international-standardization-statistics-production-and))

11. European Book Publishing Statistics 2024

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: European publishers reported approximately EUR xx.xx of net book-sales revenue in 2024. The disclosed ebook and audiobook proportions inform the modeled xx.xx% physical-book revenue proportion; publisher revenue is an input, not printing-service revenue.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 publisher-revenue and format observations provide the European demand input carried into the 2025 estimate.

12. The Global Publishing Industry in 2022

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Table xx.xx supplies country-level publishing revenues and identifies differences between retail-value, publisher-revenue, print-only and prior-year observations. Selected non-European country observations are adjusted for physical formats and period before estimating production spending.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The selected country observations contribute to the demand pool underlying the 2025 working estimate. Nielsen retail datasets elsewhere in the publication are not used.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publishing survey documents differing coverage and retail-versus-publisher valuation. These limitations support an explicit attribution bridge rather than treating the inherited demand pool as a verified legal-buyer split.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The publishing survey documents differing coverage and retail-versus-publisher valuation. These limitations support an explicit attribution bridge rather than treating the inherited demand pool as a verified legal-buyer split.

13. 2024 年新闻出版统计公报

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: For 2024, the official table reports xx.xx book copies or sheets and CNY xx.xx of book-publishing revenue. These constrain the demand bridge and historical contraction, rather than directly measuring printing-service sales.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 book-publishing observation supplies the Chinese demand primitive for the 2025 model.

14. Foreign Exchange Rates - G.5A Annual, January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The official 2024 annual-average conversion inputs are USD xx.xx per EUR, CNY xx.xx per USD and CAD xx.xx per USD.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The exchange-rate table establishes the conversion basis of the preceding-year demand inputs used in the 2025 estimate; subsequent effective-USD price assumptions are modeled separately.
15. Book publishing industry, 2024 - Statistics Canada
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Canadian publishers reported CAD xx.xx of print sales outside the online category and CAD xx.xx of online print sales in 2024. Their sum, rather than total operating revenue, supplies the physical-book demand input.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reported cost of goods sold of CAD xx.xx, up CAD xx.xx from 2022, supplies a cost-pressure cross-check, not a directly attributable printing-services total.
16. U.S. Census Bureau - Books Printing: Shipments, annual table
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2017; this is a national production anchor for the historical model.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2018.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2021.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2022.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: U.S. books-printing shipments were USD xx.xx in 2024. This national industrial measure is narrower than the composite global service boundary.
17. U.S. Census Bureau - Book Publishers, All Establishments: Revenue, annual table
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The Census annual series reports USD xx.xx of U.S. book-publisher revenue for 2024. A modeled xx.xx% physical-book proportion excludes digital and other adjacent receipts.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 Census observation replaces an older survey-based U.S. revenue bridge in the demand pool underlying 2025.
18. Scholastic Corporation - Form 10-K for the year ended May 31, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Scholastic's fiscal 2024 product, service, production and inventory-reserve costs were xx.xx% of revenue; postage, freight, shipping, fulfillment and other costs were xx.xx%. These broad categories constrain, but do not directly establish, eligible outsourced-service spending.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The corresponding fiscal 2025 proportions were xx.xx% and xx.xx%. Royalties and prepublication amortization are separately disclosed, allowing their exclusion from the service-market bridge.

19. CEWE achieves all targets in 2025 and aims to further increase revenue and earnings in 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: CEWE reported xx.xx CEWE PHOTOBOOK copies in 2025 versus xx.xx in 2024, supporting a positive specialty-book volume assumption without establishing global adoption.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Observed 2025 photobook growth informs the specialty-demand assumption for 2026; the market value remains modeled.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The observed specialty-book activity is a starting condition for the forecast, not independent proof of continued growth through 2032.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: The forecast explicitly slows specialty-demand growth after 2032; this source supplies the initial commercial observation, not the long-term growth rate.
