Drone Data Link System Market

Global Forecast 2026-2032

MRR-1A1A064C035F | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 25
   1.5. Currency Considered for the Study 25
   1.6. Language Considered for the Study 25
   1.7. Key Stakeholders 25
2. Research Methodology 27
   2.1. Introduction 27
   2.2. Research Design 27
      2.2.1. Primary Research 28
      2.2.2. Secondary Research 28
   2.3. Research Framework 28
      2.3.1. Qualitative Analysis 29
      2.3.2. Quantitative Analysis 29
   2.4. Market Size Estimation 30
      2.4.1. Top-Down Approach 30
      2.4.2. Bottom-Up Approach 30
   2.5. Data Triangulation 30
   2.6. Research Outcomes 31
   2.7. Research Assumptions 31
   2.8. Research Limitations 32
3. Executive Summary 33
   3.1. Introduction 33
   3.2. CXO Perspective 34
   3.3. New Revenue Opportunities 35
   3.4. Next-Generation Business Models 36
   3.5. Industry Roadmap 36
4. Market Overview 39
   4.1. Introduction 39
   4.2. Key Growth Contribution 42
   4.3. Industry Ecosystem & Value Chain Analysis 60
      4.3.1. Supply-Side Analysis 61
      4.3.2. Demand-Side Analysis 62
      4.3.3. Stakeholder Analysis 62
   4.4. Market Dynamics 63
      4.4.1. Key Drivers 64
         4.4.1.1. Remote mission delivery creates communications purchase triggers 64
         4.4.1.2. Continuity requirements support multibearer evaluation 64
         4.4.1.3. Service packaging broadens procurement alternatives 65

4.4.1.4. Documented qualification supports component consideration 65
4.4.2. Key Restraints 65
4.4.2.1. Jurisdiction-specific permissions constrain deployment access 65
4.4.2.2. Spectrum and network permissions limit usable alternatives 66
4.4.2.3. Installed ecosystem commitments constrain substitution 66
4.4.3. Key Opportunities 67
4.4.3.1. Accountable communications packages for qualified aircraft programs 67
4.4.3.2. Contracted coordination across connectivity counterparties 67
4.4.3.3. Supported continuity for installed equipment and entitlements 67
4.4.3.4. Verified data-bearing offerings for tether-compatible missions 68
4.4.4. Key Challenges 68
4.4.4.1. Assigning accountability across communications providers 68
4.4.4.2. Maintaining compliance through supplier and offering changes 69
4.4.4.3. Maintaining eligibility as component-based access rules change 69
4.4.4.4. Coordinating link delivery with interoperable aviation services 69
4.5. Porter's Five Forces Analysis 70
4.6. PESTLE Analysis 71
4.7. Market Outlook 72
4.7.1. Near-Term Market Outlook (0-2 Years) 73
4.7.2. Medium-Term Market Outlook (3-5 Years) 74
4.7.3. Long-Term Market Outlook (5-10 Years) 75
4.8. Go-to-Market Strategy 76
5. Market Insights 78
5.1. Consumer Insights & End-User Perspective 78
5.2. Consumer Experience Benchmarking 79
5.3. Opportunity Mapping 80
5.4. Distribution Channel Analysis 82
5.5. Pricing Trend Analysis 83
5.6. Regulatory Compliance & Standards Framework 84
5.7. ESG & Sustainability Analysis 85
5.8. Disruption & Risk Scenarios 86
5.9. Return on Investment & Cost-Benefit Analysis 88
6. Cumulative Impact of Artificial Intelligence 2026 90
7. Drone Data Link System Market, by Offering 92
7.1. Data Link Hardware 98
7.1.1. Complete Data Link Systems 107
7.1.2. Data Link Terminals & Modules 115
7.1.3. Link Support Hardware 123
7.2. Integration & Lifecycle Services 131
7.3. Link Management & Transmission Software 139
7.4. Connectivity Services 147
8. Drone Data Link System Market, by Connectivity Technology 156
8.1. Noncellular Radio Communications 164
8.1.1. Digital Radio Links 174
8.1.2. Combined Analog & Digital Radio Links 182

8.1.3. Analog Radio Links 189
8.2. Satellite RF Communications 197
8.3. Hybrid Multibearer Communications 204
8.4. Optical Fiber Communications 212
8.5. Cellular Communications 220
8.6. Wired Electrical Communications 227
8.7. Free-Space Optical Communications 235
9. Drone Data Link System Market, by Network Topology 243
9.1. Point-to-Point Networks 250
9.2. Centralized Multipoint Networks 257
9.3. Decentralized Multipoint Networks 264
9.4. Hybrid Network Topologies 272
10. Drone Data Link System Market, by Link Function 280
10.1. Integrated Flight & Payload Communications 286
10.2. Mission Payload Communications 293
10.3. Flight-Management Communications 301
11. Drone Data Link System Market, by Mission Application 309
11.1. Intelligence, Surveillance & Reconnaissance 320
11.2. Combat Operations 328
11.3. Recreation & Sport 336
11.4. Inspection & Maintenance 344
11.5. Media Production & Entertainment 351
11.6. Search, Rescue & Emergency Response 360
11.7. Agriculture & Forestry 367
11.8. Surveying & Mapping 374
11.9. Education, Training & Technology Development 382
11.10. Transport & Logistics 389
11.10.1. Cargo Transport & Delivery 398
11.10.2. Uncrewed Passenger Transport 405
11.11. Scientific Research & Environmental Monitoring 413
11.12. Communications Relay 420
12. Drone Data Link System Market, by End User 428
12.1. Military & Defense Organizations 435
12.2. Commercial Enterprises & Service Operators 443
12.3. Individual & Household Consumers 450
12.4. Civilian Government & Public Institutions 458
12.5. Nonprofit Institutions 465
13. Drone Data Link System Market, by Deployment Model 473
13.1. Customer-Managed Networks 479
13.2. Hybrid Network Management 487
13.3. Provider-Managed Networks 494
14. Drone Data Link System Market, by Sales Channel 503

14.1. Supplier-Direct Sales 509
14.2. Distribution and Retail Sales 517
14.3. Value-Added Reseller and Integrator Sales 524
15. Drone Data Link System Market, by Operating Envelope 533
15.1. Beyond-Visual-Line-of-Sight Deployments 538
15.2. Visual-Line-of-Sight-Only Deployments 546
16. Drone Data Link System Market, by Spectrum Access 554
16.1. License-Exempt or Generally Authorized Spectrum 561
16.2. Individually Licensed or Assigned Spectrum 569
16.3. Mixed Spectrum Authorization 577
16.4. Non-Radio Links 584
17. Drone Data Link System Market, by Region 592
17.1. Europe 601
17.2. North America 622
17.3. Asia-Pacific 643
17.4. Middle East 665
17.5. Latin America 686
17.6. Africa 707
18. Drone Data Link System Market, by Group 729
18.1. NATO 735
18.2. G7 757
18.3. BRICS 778
18.4. European Union 798
18.5. GCC 820
18.6. ASEAN 841
19. Drone Data Link System Market, by Country 863
19.1. United States 875
19.2. China 894
19.3. Russia 914
19.4. United Kingdom 934
19.5. Germany 954
19.6. France 974
19.7. India 994
19.8. Japan 1014
19.9. Australia 1034
19.10. Brazil 1054
19.11. South Korea 1074
19.12. Canada 1094
19.13. Italy 1114
19.14. Spain 1134
19.15. Mexico 1154
20. Competitive Landscape 1175

20.1. Market Share Analysis, 2025 1175
20.2. Market Concentration Analysis, 2025 1192
20.3. Recent Developments & Impact Analysis, 2025 1194
20.4. Product Portfolio Analysis, 2025 1196
20.5. Benchmarking Analysis, 2025 1203
21. Company Profiles 1208
21.1. Cubic 1208
21.2. Silvus Technologies 1208
21.3. Doodle Labs 1209
21.4. Microhard Systems Inc. 1210
21.5. Mobilicom 1211
21.6. Elsight 1213
21.7. uAvionix 1213
21.8. Viasat 1214
21.9. DJI 1215
21.10. Gore 1216
21.11. Arycom 1217
21.12. Patria 1218
21.13. Elistair 1219
21.14. Videosoft Global Ltd 1220
21.15. Mynaric AG 1221
21.16. Nokia 1222
21.17. S-PLANE Automation 1223
21.18. KDDI SmartDrone Inc. 1224
21.19. Divimath, Inc. 1225
21.20. UXV Technologies 1226
21.21. Advanced Microwave Products 1227
22. Companies Covered 1229
23. Key Experts 1258

1. Preface

1.1. Objectives of the Study

- Define the commercial roles of complete data-link systems, terminals and modules, support hardware, software, connectivity, and integration or lifecycle services, including how their contributions are distinguished within wider aircraft or network offerings.
- Identify which buyer qualification, interoperability, integration, lifecycle, and switching requirements must be satisfied before an included offering can be treated as a practical alternative for a specified end user and mission.
- Assess how connectivity technology, network topology, and link function relate to buyer requirements, without assuming that technology-category membership establishes commercial equivalence or deployment eligibility.
- Examine access conditions across visual-line-of-sight-only and beyond-visual-line-of-sight deployments, network-management arrangements, and spectrum-access categories, distinguishing product availability from permission to deploy.
- Determine how supplier-direct, distribution and retail, and reseller or integrator routes allocate contracting, integration, service, and lifecycle responsibilities among suppliers, intermediaries, and buyers.
- Establish the evidence needed to compare supplier capabilities within the accepted offering categories and to distinguish verified participation from broader aircraft, communications, or mission-related business.
- Frame prospective commercial choices through 2032 around explicit demand, qualification, access, and delivery conditions, using the historical, base, and estimated years consistently rather than treating category inclusion as proof of future procurement.

1.2. Market Definition

The Global Drone Data Link System market covers commercial hardware, software, connectivity, and integration or lifecycle offerings supporting communications between unmanned aircraft and associated control, mission, or network endpoints, including communications among aircraft. The included communication purposes are flight-management, mission-payload, and integrated flight and payload communications.

The offering perimeter includes complete data-link systems, terminals and modules, link support hardware, link-management and transmission software, connectivity services, and integration and lifecycle services. Data-link functions supplied within a wider aircraft or network system remain in scope; the wider system is not automatically treated entirely as a data-link offering.

The study includes noncellular radio, cellular, satellite RF, wired electrical, optical fiber, free-space optical, and hybrid multibearer communications. Both visual-line-of-sight-only and

beyond-visual-line-of-sight deployments are covered, together with customer-managed, provider-managed, and hybrid network management. Military, public-sector, commercial, nonprofit, and individual or household end users are included across the accepted mission applications, including cargo delivery and uncrewed passenger transport.

Complete aircraft, unrelated avionics and sensors, general-purpose upstream materials or infrastructure, and the downstream output of drone missions are adjacent activities rather than standalone data-link market deliverables. Their identifiable included data-link contributions remain within the study. The geographic boundary is Global; country-specific evidence provides context within that boundary rather than redefining the market.

1.3. Market Segmentation & Coverage

The accepted segmentation uses independent commercial lenses to describe the same market. Each axis answers a different question about an offering or deployment; the axes are not additive opportunities, and inclusion does not establish a particular supplier's capability or an offering's authorization.

Offering identifies the deliverable being purchased. Data Link Hardware includes Complete Data Link Systems, Data Link Terminals & Modules, and Link Support Hardware. Link Management & Transmission Software, Connectivity Services, and Integration & Lifecycle Services retain their distinct commercial roles even when supplied together. This lens supports analysis of product identity, service responsibility, and bundled coverage.

Connectivity Technology identifies the communication medium or combination of media. Noncellular Radio Communications comprises Analog Radio Links, Digital Radio Links, and Combined Analog & Digital Radio Links. The remaining categories are Cellular Communications, Satellite RF Communications, Wired Electrical Communications, Optical Fiber Communications, Free-Space Optical Communications, and Hybrid Multibearer Communications. Radio, wired, and optical offerings are all included; their classification does not establish equivalent buyer suitability.

Network Topology covers Point-to-Point Networks, Centralized Multipoint Networks, Decentralized Multipoint Networks, and Hybrid Network Topologies. It distinguishes the arrangement of communication participants, allowing commercial comparisons to account for network relationships without confusing topology with the communication technology or management model.

Link Function distinguishes Flight-Management Communications, Mission Payload Communications, and Integrated Flight & Payload Communications. It connects an offering to the communication purpose evaluated by the buyer, while retaining integrated offerings as a defined category rather than automatically duplicating them across separate functions.

Mission Application covers Intelligence, Surveillance & Reconnaissance; Combat Operations; Search, Rescue & Emergency Response; Inspection & Maintenance; Surveying & Mapping; Agriculture & Forestry; Scientific Research & Environmental Monitoring; Transport & Logistics; Media Production & Entertainment; Communications Relay; Education, Training & Technology Development; and Recreation & Sport. Transport & Logistics includes Cargo Transport &

Delivery and Uncrewed Passenger Transport. This axis identifies the purpose associated with demand for the link, not the entire downstream economic activity of the mission.

End User comprises Military & Defense Organizations, Civilian Government & Public Institutions, Commercial Enterprises & Service Operators, Nonprofit Institutions, and Individual & Household Consumers. It identifies the ultimate user context; an intermediary that purchases or integrates the offering is not automatically the end user.

Deployment Model covers Customer-Managed Networks, Provider-Managed Networks, and Hybrid Network Management. This lens separates responsibility for managing the network from ownership of the hardware, the communication medium, and the sales route. It directs attention to the responsibilities that must be resolved in a commercial arrangement.

Sales Channel distinguishes Supplier-Direct Sales, Distribution and Retail Sales, and Value-Added Reseller and Integrator Sales. It describes the route by which an offering reaches the buyer. Different organizations appearing along that route do not necessarily represent separate underlying commercial activity.

Operating Envelope includes Visual-Line-of-Sight-Only Deployments and Beyond-Visual-Line-of-Sight Deployments. Both are affirmatively within scope. The distinction establishes the deployment context for qualification and access analysis; it does not itself grant operating permission.

Spectrum Access covers Individually Licensed or Assigned Spectrum, License-Exempt or Generally Authorized Spectrum, Mixed Spectrum Authorization, and Non-Radio Links. This lens distinguishes the stated access context from connectivity technology and operating envelope. Non-Radio Links preserves the included non-radio communication offerings without forcing them into a radio-spectrum classification.

Table 1. Global Drone Data Link System Market Segmentation & Coverage

Segmentation	Coverage

Connectivity Technology	• Noncellular Radio Communications
	  o Digital Radio Links
	  o Combined Analog & Digital Radio Links
	  o Analog Radio Links
	• Satellite RF Communications
	• Hybrid Multibearer Communications
	• Optical Fiber Communications
	• Cellular Communications
	• Wired Electrical Communications
	• Free-Space Optical Communications

Deployment Model	• Customer-Managed Networks • Hybrid Network Management • Provider-Managed Networks

Table 1 - continued

Segmentation	Coverage
End User	• Military & Defense Organizations • Commercial Enterprises & Service Operators • Individual & Household Consumers • Civilian Government & Public Institutions • Nonprofit Institutions
Link Function	• Integrated Flight & Payload Communications • Mission Payload Communications • Flight-Management Communications

Mission Application	• Intelligence, Surveillance & Reconnaissance
	• Combat Operations
	• Recreation & Sport
	• Inspection & Maintenance
	• Media Production & Entertainment
	• Search, Rescue & Emergency Response
	• Agriculture & Forestry
	• Surveying & Mapping
	• Education, Training & Technology Development
	• Transport & Logistics
	  o Cargo Transport & Delivery
	  o Uncrewed Passenger Transport
	• Scientific Research & Environmental Monitoring
	• Communications Relay

Network Topology	• Point-to-Point Networks • Centralized Multipoint Networks • Decentralized Multipoint Networks • Hybrid Network Topologies

Offering	• Data Link Hardware
	  o Complete Data Link Systems
	  o Data Link Terminals & Modules
	  o Link Support Hardware
	• Integration & Lifecycle Services
	• Link Management & Transmission Software
	• Connectivity Services

Operating Envelope	• Beyond-Visual-Line-of-Sight Deployments • Visual-Line-of-Sight-Only Deployments
Sales Channel	• Supplier-Direct Sales • Distribution and Retail Sales • Value-Added Reseller and Integrator Sales
Spectrum Access	• License-Exempt or Generally Authorized Spectrum • Individually Licensed or Assigned Spectrum • Mixed Spectrum Authorization • Non-Radio Links

Sources & Evidence

1. FAA Certificate of Waiver and Authorization 107W-2025-02991 - Pinnacle Drone Light Shows

   · Taxonomy evidence: FAA waiver 107W-2025-xx.xx expressly concerns drone light-show operations and identifies their C2, transmission, and telemetry functions. Its stated effective period begins September xx.xx 2025; it establishes a specific entertainment demand setting, not separately priced link revenue or universal authorization. ([faa.gov](https://www.faa.gov/media/xx.xx))

   · Taxonomy evidence: The waiver identifies aircraft control links and real-time aircraft-status telemetry within the show deployment, independently supporting flight-management communications in an entertainment application. ([faa.gov](https://www.faa.gov/media/xx.xx))

   · Taxonomy evidence: The record identifies drone-show command-and-control software and its version as part of the documented system. This supports communications-software identity, not an independently purchased entitlement or inclusion of all show-planning software. ([faa.gov](https://www.faa.gov/media/xx.xx))

2. ITU-T Recommendation M.3391 (03/2025): Requirements for Smart Maintenance of Telecommunication Infrastructure Based on Unmanned Aerial Vehicles

   · Taxonomy evidence: ITU-T M.xx.xx approved March xx.xx 2025, recognizes UAV-based patrol supporting maintenance of outdoor telecommunications infrastructure. Its smart-maintenance scope supports inspection and condition-assessment demand; it does not independently establish drone-performed physical repair or attributable link sales. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-M.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

   · Taxonomy evidence: The recommendation provides a specialized infrastructure-maintenance demand setting. Treating that objective separately from generic surveying is an analytical primary-purpose rule, not a claim that ITU prescribes this complete market partition. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-M.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. Desider, Issue 199, June 2025 - Next-Generation Armed RPAS Protector Enters Service

   · Taxonomy evidence: The June 2025 government publication reports Protector entering service as an armed remotely piloted aircraft system, corroborating the combat-oriented demand setting without isolating communications expenditure. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))

   · Taxonomy evidence: The publication identifies the Royal Air Force as the operating defense customer for the remotely piloted program. This supports institutional buyer identity, not a supplier-market-share claim. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))

   · Taxonomy evidence: The record describes a multiyear Protector support contract. It establishes a sustainment purchase at aircraft-program level but does not disclose the included drone-link share, so it cannot resolve link-specific service allocation. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))

4. Congressional Record - Senate, February 5, 2024, Pages S356-S357: India MQ-9B Proposed-Sale Notification
   - Taxonomy evidence: The February xx.xx 2024 Congressional Record separately names ground data terminals, satellite earth stations, transceivers, and compact data links in the India MQ-9B proposed-sale notification. This independently identifies communications equipment within a wider aircraft package; it does not establish completed delivery or standalone prices. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
   - Taxonomy evidence: The notification distinguishes named communications equipment from broader software, integration, and support elements, supplying a public procurement basis for distinguishing tangible hardware from service deliverables. It is not an exhaustive offering taxonomy. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
   - Taxonomy evidence: Integration, software support, repair, engineering, and logistics are included in the proposed program. Their communications-only commercial value is not separated. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
   - Taxonomy evidence: The proposed purchaser is the Government of India for a defense aircraft program containing identified communications equipment; proposed procurement is not proof of realized link revenue. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
5. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   - Taxonomy evidence: NIST's current UAS communications portfolio distinguishes licensed cellular communications from unlicensed communications in its public-safety research. This supplies independent drone-specific support for permission-class distinctions, not legal clearance of a particular deployment. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: The portfolio explicitly labels LTE and 5G communications as licensed within its research scope. The market category still requires the actual jurisdiction and underlying network permission for allocation. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: The portfolio independently recognizes unlicensed drone communications alongside licensed alternatives; research recognition does not verify every product's airborne-use compliance. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: NIST identifies transfer of both telemetry and sensor data for public-safety UAS communications. This supports distinct traffic functions but does not establish an indivisible combined-function commercial contract. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: The portfolio's stated demand setting includes disasters, emergencies, fire-related data collection, and wide-area search. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: NIST's UAS communications portfolio distinguishes single-link, point-to-point, multi-UAS, relay, and mesh configurations in its public-safety communications work. These are independent demand-side network distinctions, not supplier-specific product names. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: The portfolio explicitly recognizes point-to-point and single-link drone communications configurations. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: The portfolio explicitly recognizes multi-hop mesh behavior and multi-UAS communications, supporting a decentralized multipoint grouping independently of the underlying radio bearer. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

6. ETSI TS 122 125 V19.2.0 (2026-01): Unmanned Aerial System Support in 3GPP
   - Taxonomy evidence: The January 2026 specification covers UAV communications through 3GPP systems and identifies cellular access nodes carried by UAVs. Cellular bearer identity therefore need not imply a ground-based access node or public-network ownership. This post-base-year standard is category evidence, not 2025 sales evidence. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   - Taxonomy evidence: The standard addresses 3GPP provision of UAV-controller communications and recognizes direct and network-assisted C2 communication. It also identifies cellular access nodes carried onboard UAVs, supporting cellular classification without equating it to terrestrial network ownership. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   - Taxonomy evidence: An onboard radio access node provides connectivity to user equipment, independently supporting an airborne communications-platform use case. The standard does not disclose communications-relay market revenue. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   - Taxonomy evidence: The specification distinguishes C2 communications from payload services. That supports function-based allocation while leaving commercial separability unresolved. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   - Taxonomy evidence: Direct and network-assisted C2 relationships, including redundant links, are recognized separately from the underlying transport. Bearer, endpoint topology, and network responsibility consequently remain distinct analytical questions. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   - Taxonomy evidence: The standard distinguishes the communications transport network from the UAV/controller relationship and allows redundant communications links. This supports keeping bearer and deployed topology as separate classification questions. ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
7. UAS Operator Radio Licence Guidance - Ofcom
   - Taxonomy evidence: Ofcom distinguishes generally exempt drone radio equipment from equipment covered by a UAS operator radio license. The guidance also distinguishes terrestrial mobile-terminal exemption from the authorization required for airborne mobile use. This supports jurisdiction-specific allocation rather than a universal license status inferred from bearer name. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: The guidance distinguishes drone equipment operating under license exemption from equipment requiring a UAS operator radio license. It separately states that radio authorization does not replace aviation requirements.
   - Taxonomy evidence: The UAS operator radio-license framework includes mobile and satellite terminal access under specified permission conditions, supplying a drone-specific individual-license pathway. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: The UAS operator radio license provides a distinct spectrum-permission route for relevant drone equipment.
   - Taxonomy evidence: The guidance expressly separates radio authorization from aviation authorization. Spectrum permission cannot independently verify a VLOS or BVLOS deployment's flight approval. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: A drone using only exempt radio equipment does not require this individual UAS radio license, subject to the exemption's applicable conditions.

8. Quantum Technologies Are Changing the Face of Unmanned Aircraft Communications - NASA

   · Taxonomy evidence: NASA's January xx.xx 2020 account identifies an optical data channel in research intended for unmanned-aircraft applications, with hardware flown on a Twin Otter research aircraft. It supports the named optical technology but is not evidence of merchant availability or a commercial deployment on an unmanned aircraft. ([nasa.gov](https://www.nasa.gov/aeronautics/quantum-technologies-are-changing-the-face-of-unmanned-aircraft-communications/))

   · Taxonomy evidence: NASA identifies an optical data-communications channel in research intended for unmanned-aircraft applications. The account establishes the named technology category while describing research and flight demonstrations, not commercial drone-link availability. ([nasa.gov](https://www.nasa.gov/aeronautics/quantum-technologies-are-changing-the-face-of-unmanned-aircraft-communications/))

9. 先行先试 多地探索全空间无人体系建设 - 中国发展改革报社, May 19, 2025, Published by NDRC

   · Taxonomy evidence: The dated May xx.xx 2025 newspaper report published by NDRC describes a pilotless passenger-sightseeing demonstration and reports operator-certificate issuance on March xx.xx 2025. This corroborates a dated passenger application only; the exact certificate conditions and attributable drone-link purchases are not established by the article. No research-estimate claims on the page are used. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

   · Taxonomy evidence: The May xx.xx 2025 official article reports March xx.xx 2025 operating-certificate issuance for pilotless passenger aircraft and describes a passenger-sightseeing demonstration. It establishes the passenger application, not attributable drone-link sales or unrestricted transport authorization. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

   · Taxonomy evidence: Pilotless passenger carriage is a distinct transport demand setting alongside separately evidenced cargo delivery; the market includes only its identifiable unmanned-aircraft communications portion. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

10. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026, EASA

    · Taxonomy evidence: The June 2026 compilation includes provisions for externally supplied services and allocation of responsibilities between the UAS operator and service providers. These support a responsibility-based deployment axis but are not a universal global contract classification. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

    · Taxonomy evidence: The external-services provisions require allocation of roles and responsibilities between the UAS operator and external providers.

    · Taxonomy evidence: Externally provided services necessary to the intended flight are explicitly recognized. This corroborates external service provision without proving that every provider manages the entire communications network. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

    · Taxonomy evidence: The publication recognizes externally provided services necessary for flight safety and requires their performance to suit the intended operation.

    · Taxonomy evidence: Allocation of operator-provider responsibilities supplies a basis for analyzing shared arrangements; the publication does not establish a named commercial agreement dividing substantive network-management functions. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

    · Taxonomy evidence: The C2 communications provisions separately address applicable radio-equipment and RF-spectrum requirements.

    · Taxonomy evidence: Unlicensed bands are explicitly recognized as a possible C2-link spectrum setting.

11. OneGov IT - GSA IT Vendor Management Office

- Taxonomy evidence: GSA distinguishes OEM prime-contract relationships from reseller participation and separately discusses professional-service contracts. This is an independent cross-market framework for seller-role classification, not proof of drone-specific channel shares. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))
- Taxonomy evidence: An OEM can remain the prime supplier while value-added firms perform supporting functions. Supporting intermediary participation therefore does not by itself reclassify the originating supplier's sale as intermediary resale. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))
- Taxonomy evidence: Integration, engineering, logistics, and compliance are identified value-added roles. Whether a particular drone-link integrator is the intermediary seller, originating supplier, or subcontractor still requires transaction evidence. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))

12. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures

- Taxonomy evidence: ISO distinguishes the C2-link telecommunications service from a tangible product and defines a provider supplying some or all of that service. This supports treating purchased communications provision separately from purchased equipment. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A21384%3A-xx.xx%3Aed-xx.xx%3Av1%3Aen))
- Taxonomy evidence: The standard defines an external C2-link communications service provider and a service-level agreement between that provider and the UAS operator, establishing a recognized communications-service category. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A21384%3A-xx.xx%3Aed-xx.xx%3Av1%3Aen))
- Taxonomy evidence: The public definitions identify a C2 communications provider as an entity supplying some or all of the link service and define an enforceable service agreement covering provider obligations.
- Taxonomy evidence: C2 communications providers are included among external services supporting UAS operations.
- Taxonomy evidence: The provider definition permits partial service provision, furnishing a standards basis for separately allocating responsibility; it does not prescribe this taxonomy's hybrid label.

13. SRWG/4 IP/03 - Annex 10 Updates on RPAS C2 Link

- Taxonomy evidence: The ICAO meeting paper's proposed C2-link provisions distinguish communications equipment from communications-service provision and identify aircraft-side and remote-station communications elements. It is used for category terminology, not as proof of a currently applicable legal requirement. ([icao.int](https://www.icao.int/sites/default/files/APAC/Meetings/2020/2020%20SRWG4/xx.xx-Information%20Papers/IP03_ICAO%20AI.xx.xx%xx.xx-%20Annex%2010%20updates%20on%20RPAS%20C2%20Link.pdf))
- Taxonomy evidence: The proposed provisions identify aircraft and remote-pilot-station transceiver elements within the C2-link system, supporting the endpoint-equipment distinction from the overall communications service. ([icao.int](https://www.icao.int/sites/default/files/APAC/Meetings/2020/2020%20SRWG4/xx.xx-Information%20Papers/IP03_ICAO%20AI.xx.xx%xx.xx-%20Annex%2010%20updates%20on%20RPAS%20C2%20Link.pdf))

14. Congressional Record - Senate, February 5, 2024 - India MQ-9B Proposed-Sale Notification

    · Taxonomy evidence: The Congressional Record's MQ-9B proposed-sale notification separately identifies ground data terminals, satellite earth stations, transceivers, and compact data links within the aircraft procurement package. These are recognized communications deliverables; the notification does not establish standalone prices or completed deliveries. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

    · Taxonomy evidence: The notification describes a compact multiband data link supporting analog waveforms, independently establishing analog signaling within a named UAV communications category. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

    · Taxonomy evidence: The same named compact data link supports digital waveforms and interoperates with digital tactical communications equipment. Capability does not determine the configuration actually deployed. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

    · Taxonomy evidence: The proposed procurement includes integration, software support, repair support, and contractor engineering and logistics services alongside communications equipment. The record does not isolate the drone-link share of those broader services. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

15. SkyLine UAS Command & Control - C2 for BVLOS

    · Taxonomy evidence: The commercial UAS offering distinguishes airborne radios, ground radios, and cloud-based communications software, demonstrating different deliverable forms within one drone-link solution. It does not establish the report's complete offering partition. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

    · Taxonomy evidence: The offering describes paired airborne and ground radios managed as an integrated communications configuration. This supports complete-system identity, while indivisible package pricing remains unestablished. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

    · Taxonomy evidence: The page separately identifies airborne and ground radio products and provides a purchase route for a ground radio, supporting separately supplied communications endpoints. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

    · Taxonomy evidence: SkyLine is described as cloud-based C2 software providing link routing, monitoring, redundancy, and management of airborne and ground radios. Only its communications functions support this category; adjacent fleet-management and airspace-awareness functions remain outside the working boundary. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

    · Taxonomy evidence: The current commercial page describes drone C2 configurations combining ISM and LTE access and configurations incorporating satellite communications. These are observed combined-access offerings, not authorization records.

    · Taxonomy evidence: The supplier expressly markets its communications ecosystem to support BVLOS deployment requirements. The page does not independently establish flight approval or sales for every configuration.

16. UAV Data Link and Unmanned Communications - DTC

    · Taxonomy evidence: DTC's UAV communications offering explicitly includes technical consultation, integration support, deployment support, and long-term lifecycle support. The page establishes offered service functions, not their separately billed revenue. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))

17. Instructions for the Certificate of Waiver or Authorization - FAA
    - Taxonomy evidence: The FAA's operator application guidance lists Wi-Fi, radio, satellite, Bluetooth, and cellular-network links as C2-link types. This provides independent regulatory recognition of bearer distinctions without defining market shares or an exhaustive commercial taxonomy. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
    - Taxonomy evidence: Wi-Fi, radio, and Bluetooth are explicitly recognized C2-link types, supporting the noncellular-radio grouping when cellular and satellite access are excluded. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
    - Taxonomy evidence: Cellular-network connectivity is explicitly identified as a C2-link type. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
    - Taxonomy evidence: Satellite connectivity is explicitly identified as a C2-link type. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
18. Conducting Extended BVLOS Operations in Challenging Terrain - Public uAvionix Project Report
    - Taxonomy evidence: The FAA-hosted public project report documents integration of cellular, noncellular C-band radio, and satellite communications into a unified UAV C2 link. It establishes a multibearer configuration, not commercial sales or universal performance. ([faa.gov](https://www.faa.gov/uas/programs_partnerships/BAA/BAA004-uAvionix%E2%xx.xx%93Conducting-Extended-BVLOS-Operations-in-challenging-terrain.pdf))
    - Taxonomy evidence: The report separately identifies link-management functionality coordinating the integrated communications links, supporting the distinction between bearer hardware and management software. ([faa.gov](https://www.faa.gov/uas/programs_partnerships/BAA/BAA004-uAvionix%E2%xx.xx%93Conducting-Extended-BVLOS-Operations-in-challenging-terrain.pdf))
19. Utilizing Telecommunications/ICTs for Disaster Risk Reduction and Management - ITU-D Question 5/2
    - Taxonomy evidence: The ITU report identifies tethered UAV equipment communicating with ground equipment through the tether's optical-fiber data path. This independently establishes guided optical communication in an aircraft-external link context. ([itu.int](https://www.itu.int/dms_pub/itu-d/opb/stg/D-STG-SG02.xx.xx-2021-PDF-E.pdf))
20. Safe-T 2 - Advanced Tethering System Brochure
    - Taxonomy evidence: The supplier's Safe-T xx.xx brochure identifies broadband-over-power-line communications within the drone tether offering. This supports an electrical data-bearing tether category rather than treating every tether as optical or power-only. Current configuration continuity across revisions is not established. ([elistair.com](https://elistair.com/wp-content/uploads/2021/xx.xx/Safe-T_2_-_Leaflet.pdf))
    - Taxonomy evidence: The same commercial brochure identifies an optional optical-fiber communications configuration, supporting separate guided-optical and electrical communications categories. ([elistair.com](https://elistair.com/wp-content/uploads/2021/xx.xx/Safe-T_2_-_Leaflet.pdf))
21. Tethered Drone Cables for Commercial & Defense - Gore
    - Taxonomy evidence: Gore markets drone-specific tether cable assemblies for communications and power, distinguishing data-carrying cable components from complete communications terminals or systems. Only directly attributable communications value falls within the working boundary. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
    - Taxonomy evidence: The commercial drone-cable page distinguishes an electrical data pair from a power pair and an optical-fiber element, supporting electrical data transport as a recognized component function. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
    - Taxonomy evidence: The page explicitly identifies optical fiber within its drone-tether communications offering. A combined cable does not establish that every available data path is used in a particular purchased configuration. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))

22. HAWK - Optical Communication Terminal for Airborne and Ground Operations

- Taxonomy evidence: Mynaric identifies HAWK as an optical communications terminal with UAS applications, but explicitly describes its status as an early-generation product for demonstrations and use-case verification. The page does not establish unrestricted current drone-market sales. ([mynaric.com](https://mynaric.com/products/hawk))
- Taxonomy evidence: The page distinguishes optical client-data transmission from an additional radio connection required by the described version. Optical classification therefore does not imply the complete absence of ancillary RF connectivity. ([mynaric.com](https://mynaric.com/products/hawk))

23. ETSI TR 102 328 V1.1.1 - Multipoint Equipment and Mesh Topology

- Taxonomy evidence: ETSI identifies a central hub or station in point-to-multipoint networks. This supplies standardized topology terminology; its fixed-radio scope is adapted to UAV networks only alongside UAV-specific evidence. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102300_102399/xx.xx/xx.xx.01_60/tr_102328v010101p.pdf))
- Taxonomy evidence: ETSI distinguishes multipoint-to-multipoint mesh networks by peer terminal relationships and communications between stations, rather than the radial central-station pattern of point-to-multipoint networks. ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102300_102399/xx.xx/xx.xx.01_60/tr_102328v010101p.pdf))

24. Review of Unmanned Aerial Vehicle Swarm Communication Architectures and Routing Protocols

- Taxonomy evidence: The peer-reviewed review distinguishes centralized UAV communications through a common infrastructure node from decentralized UAV ad hoc communications. Its architecture descriptions support topology definitions, not market penetration or sales. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))
- Taxonomy evidence: The review describes multiple UAVs communicating through a central infrastructure node and separately identifies star arrangements, supporting the hub-mediated multipoint category. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))
- Taxonomy evidence: The review identifies ring and mesh intra-UAV communications and peer forwarding, supporting a broader decentralized multipoint category rather than limiting it to one mesh product family. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))
- Taxonomy evidence: The review describes multi-group UAV networks combining centralized inter-group communication with ad hoc intra-group networks. This supports the identified composite-topology category, but does not establish a commercial contract for it. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))

25. UAV/UGV Products - Advanced Microwave Products

- Taxonomy evidence: The supplier's UAV/UGV commercial catalog distinguishes communications transmitters, receivers, and transceivers from RF power amplifiers. Only its UAV-attributable offerings support the captured market boundary. ([advmw.com](https://advmw.com/uav-ugv-products/))
- Taxonomy evidence: The catalog markets RF and microwave amplifiers as supporting products for analog and digital transmission sources, establishing a link-support hardware function distinct from the base communications endpoint. ([advmw.com](https://advmw.com/uav-ugv-products/))
- Taxonomy evidence: The catalog explicitly markets analog FM video transmitters and receivers in its unmanned-platform offering. ([advmw.com](https://advmw.com/uav-ugv-products/))
- Taxonomy evidence: The same catalog identifies digital data transceivers for telemetry and control communications, supporting digital noncellular radio as a distinct signaling family. ([advmw.com](https://advmw.com/uav-ugv-products/))

26. Aquila20 FPV Kit - BETAFPV

- Taxonomy evidence: The analog Aquila20 commercial aircraft kit identifies analog video transmission together with ExpressLRS remote-control connectivity. This supports identification of an embedded mixed-signaling configuration; it does not establish a separately priced communications subsystem or bring the whole aircraft into scope. ([betafpv.com](https://betafpv.com/products/aquila20-fpv-kit))

27. Velaris - Satellite Connectivity for UAVs - Viasat
    - Taxonomy evidence: Viasat markets Velaris as a dedicated satellite communications service for UAVs and advanced-air-mobility aircraft. The UAV-attributable communications service supports this offering category without including unrelated aviation or airspace-management services. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
    - Taxonomy evidence: The offering identifies satellite-network delivery of the UAV data link, corroborating satellite RF access as a commercial connectivity family. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
28. Frequently Used Terms - ICAO
    - Taxonomy evidence: ICAO defines the C2 link by its flight-management purpose, supporting a function-based distinction rather than treating all transmitted data as mission payload. ([icao.int](https://www.icao.int/frequently-used-terms))
    - Taxonomy evidence: The C2 definition connects the remotely piloted aircraft and remote pilot station for managing flight. ([icao.int](https://www.icao.int/frequently-used-terms))
    - Taxonomy evidence: ICAO's operator definition includes persons, organizations, and enterprises engaged in aircraft operations, supporting separation of operating customers from equipment-selling intermediaries. ([icao.int](https://www.icao.int/frequently-used-terms))
    - Taxonomy evidence: The international terminology defines VLOS through direct unaided visual contact rather than a radio-range threshold.
    - Taxonomy evidence: The VLOS definition recognizes visual contact maintained by the remote pilot or an RPA observer, supporting a visual-contact category while leaving local deployment conventions to be established.
29. Summary - ITU-T Recommendation F.749.10 (05/2019), Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Taxonomy evidence: The recommendation distinguishes flight-control communication and flight-data transport from mission-payload communication services. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))
    - Taxonomy evidence: Flight control and flight-data transport are expressly identified communications functions. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))
    - Taxonomy evidence: Mission-payload services include audio, video, imagery, sensor-data transport, and communication-signal relay. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))

30. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

- Taxonomy evidence: Flight and mission-payload services coexist within the recommendation's communications framework; an indivisible combined-function commercial branch is an analytical allocation, not an official product classification. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Appendix I names civilian-UAV communication-service applications across agriculture, inspection, surveillance, disaster monitoring, media, logistics, and research. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Police and traffic-security surveillance are named civilian-UAV communications applications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Natural-disaster monitoring is identified as a civilian-UAV communication-service application. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Power-line and petroleum-pipeline inspection are explicit communications-service use cases; physical maintenance is not established by this record. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Agriculture-related civilian-UAV communication services are explicitly identified. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: The recommendation recognizes scientific-research data transport and meteorological and territorial-resource applications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: Logistics express delivery is a named civilian-UAV communication-service use case. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

31. ITU-T Recommendation Y.4215 (02/2022): Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things

- Taxonomy evidence: ITU-T identifies UAS-aided relaying and offloading as applications in which unmanned aircraft act as communications platforms. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-Y.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
- Taxonomy evidence: The recommendation separately recognizes UAS-aided emergency-response communications, supporting an emergency demand setting without making every emergency relay deployment a distinct topology category. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-Y.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

32. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA

· Taxonomy evidence: EASA identifies drone applications including delivery, photography, disaster management, rescue, mapping, inspection, agriculture, and surveillance. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

· Taxonomy evidence: Rescue and firefighting applications explicitly use real-time information and aerial imagery for response decisions. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

· Taxonomy evidence: Geographic mapping is identified as a drone use case. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

· Taxonomy evidence: Photography and filming are described as commercial drone applications; the record does not isolate communications value for entertainment performances. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

· Taxonomy evidence: Law enforcement and rescue services are identified operating settings, supporting civilian public-service customers. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

· Taxonomy evidence: The regulator describes business use in media, agriculture, industrial monitoring, and security. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

33. Drone Integration: Concept of Operations - FAA, May 2025

· Taxonomy evidence: The May 2025 document identifies infrastructure inspection among demonstrated drone applications. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

· Taxonomy evidence: Aerial surveying is identified as a drone application addressed in the integration framework. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

· Taxonomy evidence: The document recognizes agricultural assessment and aerial agricultural work, with forestry preservation within its agricultural context. Only these high-level application categories are used. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

· Taxonomy evidence: Package delivery is a recognized drone application. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

· Taxonomy evidence: Flight testing and demonstration are identified application settings, not evidence of commercial drone-link revenue. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

34. U.S. Army UAS Interoperability - July 17, 2026

· Taxonomy evidence: The Army's July xx.xx 2026 publication identifies UAS data links, C2 interfaces, and ISR payload-data dissemination as distinct interoperability disciplines. ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))

· Taxonomy evidence: The publication establishes Army demand for unmanned-aircraft communications interfaces and associated ISR information exchange. ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))

· Taxonomy evidence: ISR imagery and associated payload information are separately identified from C2 interfaces, corroborating the payload-communications function. ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))

35. Protector Enters Service with Royal Air Force - June 16, 2025
    - Taxonomy evidence: The June xx.xx 2025 announcement identifies strike operations among Protector's intended remotely piloted roles, establishing a combat demand setting without isolating communications revenue. ([raf.mod.uk](https://www.raf.mod.uk/news/articles/protector-enters-service-with-royal-air-force/))
    - Taxonomy evidence: The Royal Air Force reports delivered ground-control stations and a remotely piloted aircraft program, directly identifying a defense operating customer. ([raf.mod.uk](https://www.raf.mod.uk/news/articles/protector-enters-service-with-royal-air-force/))
36. Educational Users - FAA, Updated March 13, 2026
    - Taxonomy evidence: The FAA's educational-user publication identifies universities, colleges, technical schools, and educational programs using drones for education and research. ([faa.gov](https://www.faa.gov/uas/educational_users))
    - Taxonomy evidence: Educational users can operate through more than one regulatory pathway; educational purpose therefore does not by itself establish a mutually exclusive institutional buyer sector. ([faa.gov](https://www.faa.gov/uas/educational_users))
37. National Uncrewed Systems Office - U.S. Geological Survey
    - Taxonomy evidence: USGS describes UAS data collection for scientific remote sensing, water-quality research, and environmental restoration, establishing a scientific and environmental demand setting. ([usgs.gov](https://www.usgs.gov/programs/national-land-imaging-program/science/national-uncrewed-systems-office))
    - Taxonomy evidence: The office conducts unmanned-aircraft research and data collection for USGS and Department of the Interior scientists, directly identifying civilian government users. ([usgs.gov](https://www.usgs.gov/programs/national-land-imaging-program/science/national-uncrewed-systems-office))
38. IFRC Drones Group
    - Taxonomy evidence: The IFRC Drones Group identifies National Societies, the Federation Secretariat, and ICRC participants using or developing drone applications for humanitarian programs. This supports an organizational user setting, not separately disclosed link purchases. (drones.preparecenter.org)
    - Taxonomy evidence: The group explicitly addresses aerial assessment and information supporting humanitarian disaster response. (drones.preparecenter.org)
39. Recreational Flyers & Community-Based Organizations - FAA
    - Taxonomy evidence: The FAA distinguishes flying solely for recreation from nonrecreational purposes, supporting recreation as a mission-purpose category rather than a synonym for all unpaid activity. ([faa.gov](https://www.faa.gov/uas/recreational_flyers))
    - Taxonomy evidence: The publication expressly recognizes personal recreational drone flyers; household-consumer classification remains separate from organizational regulatory eligibility. ([faa.gov](https://www.faa.gov/uas/recreational_flyers))
40. FAI Drone Racing World Cup - World Air Sports Federation
    - Taxonomy evidence: FAI identifies its Drone Racing World Cup as an international series of competitive drone-piloting events, independently establishing sport as a distinct mission setting. ([fai.org](https://www.fai.org/event/fai-drone-racing-world-cup))

41. Main Concepts and Definitions of Foreign Direct Investment - OECD Benchmark Definition of Foreign Direct Investment, Fifth Edition, 2025

- Taxonomy evidence: The OECD's 2025 benchmark distinguishes households from independently recognized corporations, nonprofit institutions, and government units, supporting institutional rather than mission-based buyer classification. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))
- Taxonomy evidence: Enterprises can be incorporated or unincorporated, and government- or household-owned quasi-corporations can be treated separately from their owners. Business-use classification therefore cannot rely only on public ownership or individual legal identity. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))
- Taxonomy evidence: Households are recognized institutional units distinct from legal and social entities; the taxonomy adapts this distinction to personal, nonbusiness drone-link consumption. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))

42. Glossary - Government at a Glance 2019, OECD

- Taxonomy evidence: The glossary includes government-controlled nonmarket institutions in general government while excluding public corporations and government-owned quasi-corporations. This supports a control-and-economic-role rule for public institutions. ([oecd.org](https://www.oecd.org/en/publications/government-at-a-glance-2019_8ccf5c38-en/full-report/component-xx.xx.html))
- Taxonomy evidence: Public corporations are distinguished from general government, supporting placement of public commercial enterprises with commercial operating customers rather than automatically with civilian agencies. ([oecd.org](https://www.oecd.org/en/publications/government-at-a-glance-2019_8ccf5c38-en/full-report/component-xx.xx.html))

43. Conceptual Framework - OECD Handbook on the Compilation of Household Distributional Results on Income, Consumption and Saving in Line with National Accounts Totals, 2024

- Taxonomy evidence: The conceptual framework distinguishes corporations, general government, households, and nonprofit institutions serving households as institutional sectors; the drone-buyer partition is an explicit adaptation of these distinctions. ([oecd.org](https://www.oecd.org/en/publications/oecd-handbook-on-the-compilation-of-household-distributional-results-on-income-consumption-and-saving-in-line-with-national-accounts-totals_5a3b9119-en/full-report/component-xx.xx.html))
- Taxonomy evidence: Nonprofit institutions serving households are recognized separately from government, corporations, and households, supporting an independent nonmarket nonprofit buyer branch. ([oecd.org](https://www.oecd.org/en/publications/oecd-handbook-on-the-compilation-of-household-distributional-results-on-income-consumption-and-saving-in-line-with-national-accounts-totals_5a3b9119-en/full-report/component-xx.xx.html))

44. Nigeria Civil Aviation Regulations 2023 - Part 21: Remotely Piloted Aircraft System

- Taxonomy evidence: Section xx.xx.xx.xx distinguishes full operator control from provider control over part or all of a C2 link, with responsibilities documented through agreements.
- Taxonomy evidence: Entirely operator-controlled C2 links are expressly recognized.
- Taxonomy evidence: The regulation recognizes provider operational control over the entire C2 link.
- Taxonomy evidence: Provider control over only part of a link is also recognized, supporting the category basis without establishing a named shared-management commercial contract.

45. OneGov IT - IT Vendor Management Office
    - Taxonomy evidence: The procurement FAQs distinguish originating manufacturers' prime-contract role from reseller and integrator participation, supplying a cross-market seller-role classification.
    - Taxonomy evidence: An OEM can remain prime contractor while other firms provide supporting functions; subcontractor participation alone does not establish an intermediary sale.
    - Taxonomy evidence: Value-added resellers and integrators provide engineering, integration, logistics, compliance, and mission support. This establishes the intermediary role, not a drone-specific revenue allocation.
46. Doodle Labs announces launch of Reseller Program
    - Taxonomy evidence: The November xx.xx 2023 channel-program announcement expressly addresses UAV-facing communications and names distributors, value-added resellers, and systems integrators.
    - Taxonomy evidence: Distributors are explicitly identified as eligible partners for the supplier's worldwide communications reseller program.
    - Taxonomy evidence: Value-added resellers and systems integrators are explicitly identified as channel partners for UAV-facing communications products; their individual contractual roles require transaction evidence.
47. VERSITRON Introduces NDAA-Compliant Tethered Drone Fiber Optic Converters for Secure Airborne Communications
    - Taxonomy evidence: The June xx.xx 2026 announcement directs purchasers to contact the manufacturer for pricing and product supply, establishing a direct commercial route.
    - Taxonomy evidence: The announced offering supplies a hardwired optical communications path between airborne and ground equipment rather than an RF link.
    - Taxonomy evidence: The manufacturer announced availability of drone-specific fiber-optic converter equipment carrying video and telemetry. This supports a non-radio commercial format as of the announcement, not 2025 sales or universal regulatory clearance.
48. 2. Development of UAS Regulation - ICAO UAS Toolkit
    - Taxonomy evidence: The UAS regulatory guidance distinguishes VLOS-only operating limitations from operations involving BVLOS; the sample regulatory framework is not presented as a universal national law.
    - Taxonomy evidence: VLOS-only operation is explicitly identified as an operating limitation in the sample categorization.
    - Taxonomy evidence: The guidance notes that BVLOS operations can include VLOS launch and recovery, supporting classification of the complete intended deployment rather than overlapping flight-phase peers.
49. Class licences - Australian Communications and Media Authority
    - Taxonomy evidence: Class authorization is contrasted with individually assigned apparatus permission, demonstrating that the global taxonomy must normalize differing legal terminology rather than equate every license with individual authorization.
    - Taxonomy evidence: The page identifies cellular terminals communicating with licensed base stations and satellite terminals communicating with licensed space stations, supporting distinction between terminal permission and underlying network licensing.
    - Taxonomy evidence: Class licenses authorize common equipment on shared frequencies without an individual application or fee, supporting the generally authorized peer.
50. Five-year spectrum outlook 2023-28 - Australian Communications and Media Authority
    - Taxonomy evidence: The 2023-2028 outlook expressly discusses spectrum and licensing arrangements for commercial and consumer drones, establishing a drone-specific regulatory category basis.
    - Taxonomy evidence: The outlook identifies the low-interference-potential-devices class license as supporting drone use cases. This is dated category evidence, not verification of every current deployment's compliance.
51. Radio Regulations: Organization and Main Concepts - ITU Regional Radiocommunication Seminar
    - Taxonomy evidence: The regulatory presentation distinguishes telecommunications using wire, radio, or optical systems and defines radiocommunication specifically through radio waves.
    - Taxonomy evidence: The distinction supplies a conceptual basis for a non-radio permission peer; it does not establish blanket exemption of optical or wired drone links from national safety requirements.

1.4. Years Considered for the Study

The study spans 2024-2032. The historical year is 2024, the base year is 2025, the estimated year is 2026, and the forecast endpoint is 2032. These roles distinguish historical context, the comparison baseline, estimated-year interpretation, and prospective analysis.

Figure 1. Global Drone Data Link System Market, Years Considered for the Study

1.5. Currency Considered for the Study

Monetary market values are expressed in United States dollars (USD) on an absolute-value basis.

1.6. Language Considered for the Study

The study is published in American English. Organization, product, and category names retain their established identities.

1.7. Key Stakeholders

- Drone manufacturers and platform integrators: Decisions concern embedded versus separately supplied link offerings, supplier qualification, interoperability, integration responsibility, and continuity of lifecycle support.
- Data-link hardware and software suppliers: Decisions concern the supported offering perimeter, buyer qualification requirements, defensible differentiation, and whether broader communications capabilities translate into a specific drone-data-link offering.

- Connectivity and lifecycle service providers: Decisions concern provider-managed and hybrid responsibilities, the relationship between connectivity and integration services, and the contractual scope of ongoing support.
- Distributors, retailers, value-added resellers, and integrators: Decisions concern route-to-buyer access, qualification support, integration accountability, and the distinction between channel participation and ownership of an underlying offering.
- Military & Defense Organizations, Civilian Government & Public Institutions, and Nonprofit Institutions: Decisions concern mission-specific qualification, procurement suitability, authorization applicability, and the allocation of network-management and lifecycle responsibilities.
- Commercial Enterprises & Service Operators: Decisions concern the fit between link function and business application, switching obligations, integration into existing operations, and customer-managed versus provider-managed networks.
- Individual & Household Consumers: Decisions concern compatibility, purchasing route, support responsibility, and the distinction between a included data-link offering and the complete aircraft or recreational activity.
- Aviation and spectrum authorities, standards bodies, and industry associations: Their perspectives are relevant to the boundaries of authorization, qualification, interoperability, and institutional access; product availability and deployment eligibility remain separate questions.
- Investors and corporate strategists: Decisions concern whether a supplier's evidenced capabilities, channel access, and delivery obligations support a proposed commercial position within the accepted market rather than an adjacent business.

2. Research Methodology

2.1. Introduction

The study approaches the Global Drone Data Link System market through its included commercial offerings, buyer requirements, and conditions governing access and adoption. It distinguishes classification from verified commercial activity, and observed conditions from conditional interpretations.

The methodology treats hardware, software, connectivity, and integration or lifecycle services as related but distinct offerings. Analyst-led primary research provides a qualitative challenge layer; numerical conclusions require their own support within the same market boundaries.

2.2. Research Design

The market title and accepted hierarchy establish coverage. Commercial evidence establishes whether a particular offering, supplier role, contractual relationship, or access condition supports a claim within that coverage. This distinction retains all included categories without presuming that every supplier participates in each category or that every application is commercially accessible.

The design separates description of an offering from interpretation of its buyer relevance and from numerical conclusions. Analyst-led primary research challenges market explanations alongside secondary evidence. The expert roster provides professional context rather than a census of suppliers or a substitute for offering-specific support.

Figure 2. Global Drone Data Link System Market, Research Design

2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary evidence anchors publicly verifiable commercial propositions. Where used, supplier materials support the identity and stated status of that supplier's offerings; official records support the scope of an authorization or legal condition; and company filings support disclosed business activity within their stated reporting boundaries. These roles do not make the sources interchangeable.

Evidence must relate directly to the relevant drone-data-link offering, buyer context, or access condition. A parent company's broader operations do not establish participation in every included category. Repetition of an underlying announcement does not create independent corroboration, and a source's claim must not be extended beyond its stated scope.

2.3. Research Framework

The framework connects an included offering to its communication technology, topology, link function, mission application, and end user, then examines who manages the network, how the offering reaches the buyer, and which operating and spectrum contexts apply. This structure links product identity to the commercial responsibilities that a purchasing decision must resolve.

Supplier and buyer roles remain distinct from segmentation membership. Competition is evaluated at a comparable offering and buyer-requirement level rather than inferred from a company's presence in the wider drone or telecommunications value chain. Measurement follows the same boundaries so that a commercial interpretation and its supporting figures address the same activity.

Figure 3. Global Drone Data Link System Market, Research Framework

2.3.1. Qualitative Analysis

Qualitative interpretation examines buyer qualification, integration obligations, interoperability, contractual control, switching requirements, and lifecycle responsibility. These variables connect the accepted technology and offering categories to commercial purchasing decisions without treating technical classification as proof of buyer acceptance.

The analyst-led challenge layer tests explanations of demand and access barriers against the accepted market scope. A proposed mechanism must identify the affected buyer or supplier, the relevant commercial constraint, and the conditions under which an alternative becomes practical. Its role is explanatory and conditional, not independent numerical validation.

2.3.2. Quantitative Analysis

Quantitative interpretation requires a consistent offering perimeter, geographic boundary, period role, and definition of the activity being compared. Monetary market values use USD on an absolute-value basis. Broader aircraft, telecommunications, or mission-related business cannot automatically stand for drone-data-link activity.

The segmentation axes describe different attributes of the same market and are not additive market totals. Offering, supplier, contract, and channel identities must be sufficiently clear to detect overlapping descriptions. Numerical support must establish the relevant activity

independently of interview participation, category membership, or qualitative expectations about adoption.

2.4. Market Size Estimation

Market-size interpretation follows the included data-link offerings rather than total aircraft activity, general telecommunications business, or the economic output of a drone mission. Hardware, software, connectivity, and integration or lifecycle services remain in scope, but their inclusion does not establish that associated amounts can be added without examining overlap.

Any numerical conclusion requires support for the relevant drone-data-link activity within a consistent period and geographic perimeter. Embedded functions, multipurpose offerings, and bundled contracts require defensible attribution. Classification identifies what belongs in the study; it does not independently determine that attribution.

2.4.1. Top-Down Approach

For a top-down interpretation, the controlling question is whether a broader aggregate can be related defensibly to the accepted Drone Data Link System perimeter. Aerospace, defense, telecommunications, or drone-operations activity cannot be carried into this market unchanged; the relevant included offerings must be distinguishable from adjacent business.

The aggregate's geographic and period boundaries must also match the intended comparison. A country-specific record, a particular mission application, or a single connectivity category cannot stand for the Global market merely because it falls within the study.

2.4.2. Bottom-Up Approach

A bottom-up interpretation requires evidence tied to identifiable data-link offerings or attributable commercial activity. Supplier participation, product inclusion, and channel presence are distinct propositions; one cannot be substituted for another.

Hardware, software, connectivity, and lifecycle services can represent different included deliverables, while multiple descriptions of the same commercial activity do not establish additional activity. Clear offering identities and overlap checks are therefore prerequisites for aggregation. A supplier list or an aircraft portfolio alone does not establish the studied market perimeter.

2.5. Data Triangulation

Triangulation addresses whether different evidence paths describe the same commercial proposition. A supplier's offering description, a buyer's procurement scope, and an authorization record may concern different parts of a deployment and cannot automatically corroborate one another.

Differences in definition, period, geography, commercial status, and bundled coverage must be resolved before reconciling claims. Qualitative findings can identify assumptions needing

further examination, but they do not independently validate a numerical estimate or a forecast derived from those assumptions.

Figure 4. Global Drone Data Link System Market, Data Triangulation

2.6. Research Outcomes

The intended decision support is a consistent basis for comparing included offerings, assessing buyer qualification and switching requirements, and distinguishing supplier capability from commercial access. It also supports evaluation of whether sales-channel and deployment-model choices align with buyer responsibilities and the relevant operating context.

Prospective assessments through 2032 should identify the conditions under which a commercial option is feasible, its alternatives and trade-offs, and the evidence needed before commitment. Inclusion in the taxonomy is not itself a recommendation, an authorization, or evidence that procurement will occur.

2.7. Research Assumptions

- Comparisons of embedded or bundled offerings assume that the drone-data-link contribution can be distinguished from unrelated aircraft, network, or mission deliverables. Without defensible attribution, the broader offering cannot be treated entirely as data-link activity.
- The segmentation axes are independent descriptive lenses. An offering may be classified across several axes, but those classifications do not represent separate additive commercial opportunities.

- Commercial interpretation preserves distinctions among marketed, announced, and investigational activity. Category inclusion establishes study coverage, not a supplier's availability, qualification, or deployment authorization.
- Prospective interpretations retain explicit conditions for buyer eligibility, connectivity access, integration, and supplier delivery capability. Evidence concerning an existing offering does not by itself establish future procurement through 2032.

2.8. Research Limitations

- For multipurpose communications products or shared network services, evidence about the wider business may not distinguish drone-data-link activity. Such evidence cannot support a drone-specific comparison without an attributable connection to the included offering.
- Authorization evidence is bounded by its stated jurisdiction, activity, and conditions. A record supporting one operating or spectrum context cannot establish access across the Global market or across every included deployment category.
- Shared technology labels do not establish equivalent qualification, integration, support, or contractual commitments. Supplier substitution decisions require offering-specific evidence rather than category-level similarity.
- Commercial descriptions from manufacturers, integrators, distributors, and service providers can refer to overlapping activity. Conclusions must distinguish separate deliverables from repeated descriptions before comparing or combining them.

3. Executive Summary

3.1. Introduction

The Global Drone Data Link System market is organized around accepted communications responsibilities, not a single interchangeable product class. Embedded and standalone hardware, management software, connectivity, and integration or lifecycle services involve different purchasing counterparties. Included non-radio links also retain mission and aircraft suitability constraints. Remote inspection and public-safety services illustrate why a customer may purchase a connected mission outcome while an operator or aircraft manufacturer purchases the underlying link.

The decisive buyer problem is converting marketed capability into a deployment-ready, supported commitment. Aircraft acceptance, operating permission, communications access and procurement eligibility are separate conditions. The FAA's operation-specific waiver route and the UK's network-consent requirement illustrate why equipment ownership or a managed package cannot settle them all. Supplier comparison should therefore begin with the accepted deliverable and retained duties; portfolio breadth or a familiar connectivity label does not establish a usable alternative.

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland
   · Swisscom's announced inspection and public-safety service combines infrastructure, authorization-application support and data storage, illustrating mission-service purchasing without proving completed nationwide rollout. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
2. Part 107 Waivers
   · The FAA provides operation-specific Part xx.xx waivers, including departures from the visual-line-of-sight requirement; equipment procurement does not grant that permission. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom requires network-operator agreement for covered mobile and satellite use, separately from aviation requirements. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
4. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · DIU distinguishes interoperable components and software from complete aircraft, and verification selections from completed additions. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
5. Datalinks | UAV Navigation
   · UAV Navigation identifies Microhard modems within TELEM07 packages, illustrating distinct originating-component and configured-package roles. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
6. SkyLink - uAvionix
   · SkyLink requires SkyLine network-management integration for full functionality, illustrating linked equipment and management deliverables. ([uavionix.com](https://uavionix.com/product/skylink/))
7. Support - Elistair | Tethered Drone Company
   · Elistair states that tethered data transfer depends on the aircraft and may remain wireless despite tether compatibility. ([elistair.com](https://elistair.com/client-support/))

3.2. CXO Perspective

Aircraft OEMs and component entrants should choose an integration route only when its compatibility-defined package matches the aircraft program and the seller accepts delivery, replacement-support and upstream escalation duties. Direct component supply preserves sourcing control when the OEM can retain those responsibilities. Government-facing commitments additionally require the actual offering's verified status and solicitation fit, not qualification inferred from a partner or another product.

Enterprise CFOs should approve equipment and continuing software, connectivity and support obligations against the same authorized mission. Managed delivery is justified by responsibilities actually transferred, not ownership form alone. Quote exclusions and renewal terms can leave consequential duties with the buyer; internally capable operators may prefer direct relationships despite retaining more coordination work.

Procurement leaders seeking resilience should distinguish seller diversity from originating-source independence. TELEM07, UXV and Triad packages incorporate named originating radios, so another seller quotation may preserve upstream exposure. An accepted alternative source is the relevant diversification trigger. Installed buyers should also confirm continuing entitlements and authorization conformity before crediting equipment retention or replacement flexibility.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The Galaxy xx.xx collaboration describes provisioning, billing, integration and lifecycle coordination; customer-specific duty transfer remains a contractual question. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Nokia's acquisition alternatives and bundled services support comparing ownership and retained responsibilities; promotional returns claims are not treated as realized outcomes. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
3. Part 107 Waivers
   · Operation-specific waivers support evaluating equipment and service commitments against the same authorized mission. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
4. Drones (UAS)
   · EASA requires specific-category aircraft to comply with their operational authorization, constraining assumptions about retained equipment or replacement flexibility. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
5. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · The Framework provides component-level procurement options; the announcement differentiates pending verification and completed additions rather than conferring portfolio-wide status. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
6. Read our Terms & Conditions
   · Elsight's terms specify cloud renewal, purchased-period support, nontransferable embedded-software rights and exclusions for unlisted connections and third-party integration. ([elsight.com](https://www.elsight.com/terms-conditions/))
7. Triad High Power Radio Systems For Unmanned Land Air Sea
   · Triad identifies originating Microhard, Silvus, DTC and Mobilicom radios within configured offerings, supporting seller-versus-source diligence. ([triadrf.com](https://triadrf.com/radio-systems/))

8. Datalinks | UAV Navigation
   · TELEM07 carries a stated UAV Navigation autopilot-compatibility proposition and incorporates Microhard modems, supporting package-boundary and upstream-dependency assessments. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
9. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   · UXV names Persistent Systems, Silvus, Doodle Labs, Microhard and TrellisWare within its SRM integration ecosystem, distinguishing package choice from originating supply. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))

3.3. New Revenue Opportunities

Conditional revenue routes include accepted communications supply to aircraft OEMs, contracted connectivity coordination for authorized operators, and equipment-specific support or migration for installed fleets. Tether-compatible missions provide an additional bounded route for verified data-bearing offerings. Commercial accessibility depends on an accountable qualified buyer, usable access and an accepted delivery scope rather than the application label alone. The Opportunity Mapping section assesses these routes and their capture conditions; none establishes an unconditional Global rollout opportunity.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The announced Velaris coordination layer supports an assessed managed-connectivity route beyond terminal resale, not customer-specific service guarantees. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Drones (UAS)
   · Authorized aircraft requirements remain relevant to equipment-specific continuity and migration opportunities. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · The UK framework retains separate network consent, limiting unconditional managed-connectivity opportunity claims. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
4. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · Component consideration is an identifiable government-facing route, while actual offering status must remain distinct from selection for verification. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
5. StreamCare+ - Silvus Technologies
   · Silvus markets StreamCare+ support with differing coverage options, establishing a lifecycle purchasing route without settling individual equipment coverage. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
6. Datalinks | UAV Navigation
   · The named compatibility-defined TELEM07 offering establishes a component-package purchasing route, not equivalent obligations for a separately purchased modem. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
7. Support - Elistair | Tethered Drone Company
   · Aircraft-dependent tethered data availability and named maintenance arrangements support a bounded, offering-specific continuity and tethered-supply assessment. ([elistair.com](https://elistair.com/client-support/))

3.4. Next-Generation Business Models

Publicly offered models extend beyond one-time hardware ownership. Nokia's North American partner program describes purchase, lease and flight-hire arrangements with bundled services, while the Galaxy xx.xx-Viasat collaboration adds managed distribution to Velaris. These are documented commercial alternatives, not evidence of widespread adoption or superior realized returns.

Ownership, management entitlement and service responsibility remain separate commercial choices even within a bundle. Elsight's cloud-renewal provisions and quote exclusions illustrate continuing obligations; SkyLink's dependence on SkyLine illustrates management access consequential to hardware functionality. Proposals should identify equipment, software rights, connectivity and support separately. Partner-led delivery remains conditional on usable access and explicit operator, data and escalation responsibilities rather than presumed transfer of every obligation.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The March xx.xx 2026 collaboration adds Galaxy xx.xx's managed distribution role to Viasat's Velaris satellite-service proposition. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Nokia's North American partner program describes purchase, lease, sharing and flight-hire alternatives with bundled maintenance, analytics and scheduling. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
3. Drones (UAS)
   · EASA retains operator duties concerning authorization limitations, security, privacy and records, supporting explicit responsibilities in partner-led packages. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · A managed delivery relationship does not independently grant the network or aviation permissions retained by the UK framework. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
5. Read our Terms & Conditions
   · Cloud renewal and quote-defined connection and support entitlements remain distinct from hardware ownership. ([elsight.com](https://www.elsight.com/terms-conditions/))
6. SkyLink - uAvionix
   · The stated SkyLine dependency makes management access commercially consequential to the SkyLink hardware purchase. ([uavionix.com](https://uavionix.com/product/skylink/))

3.5. Industry Roadmap

For 2026-2027, priorities are permission-backed orders and offering-specific eligibility. Canada's qualifying lower-risk BVLOS pathway, effective November xx.xx 2025, provides an existing route; the September xx.xx 2026 TSA notice described the broader U.S. framework as proposed. The FCC component rule is scheduled to take effect October xx.xx 2026, followed by role-specific marketplace FCC-ID display deadlines of March xx.xx and June xx.xx 2027. Its

prospective component prohibition does not revoke previously authorized equipment, supporting targeted diligence rather than blanket replacement.

For 2028-2029, the assessed scenario centers on management renewal, covered support and accepted alternatives to shared originating suppliers. For 2030-2032, recognized aviation-service relationships and destination-specific responsibility schedules could become more consequential to procurement. FAA UTM service evaluation and EASA cross-border requirements provide institutional foundations, not a completed Global permission framework. Renewal rights, accepted independent sources, recognized service relationships and executed local agreements are commercial decision triggers. These horizons are conditional scenarios, not promised adoption milestones.

Sources & Evidence

1. Part 107 Waivers
   · The existing waiver pathway supports permission-backed purchasing separately from commitments dependent on another regulatory framework. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
2. Drones (UAS)
   · Relevant specific-category cross-border operations retain destination confirmation and local conditions; standard-scenario and LUC routes provide defined simplifications. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
3. Unmanned Aircraft System Traffic Management (UTM)
   · FAA UTM work includes service recognition and interoperability; NTAP evaluates services rather than certifying them and requires aligned operator and provider participation. ([faa.gov](https://www.faa.gov/uas/advanced_operations/traffic_management))
4. Notice Soliciting Representatives for Technical Roundtables on Security of Unmanned Aircraft Systems Operating Beyond the Visual Line of Sight
   · The September xx.xx 2026 TSA notice describes the joint BVLOS framework as proposed and regulatory requirements as being finalized. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/notice-soliciting-representatives-for-technical-roundtables-on-security-of-unmanned-aircraft-systems))
5. Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program
   · The FCC final rule is effective October xx.xx 2026. Its specified logic-bearing component prohibition applies prospectively and does not affect previously authorized equipment. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
   · FCC-ID display compliance dates are March xx.xx 2027 for applicable marketplaces with physical access or title, and June xx.xx 2027 for applicable marketplaces relying on third-party seller certifications, subject to defined exceptions. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
6. 2025 Summary of changes to Canada's drone regulations
   · Canada's rules effective November xx.xx 2025 permit qualifying lower-risk BVLOS operations without an SFOC-RPAS, subject to pilot and operator certification and operating conditions. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
7. Triad High Power Radio Systems For Unmanned Land Air Sea
   · Triad's named incorporated radios corroborate shared upstream dependencies relevant to an accepted-alternative sourcing scenario. ([triadrf.com](https://triadrf.com/radio-systems/))

8. StreamCare+ - Silvus Technologies
   · The support program grounds the conditional repeat-procurement focus on covered equipment and continuing support, not assured customer retention. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
9. SkyLink - uAvionix
   · SkyLink's management dependency supports a conditional continuity-and-renewal scenario, not a forecast of customer retention. ([uavionix.com](https://uavionix.com/product/skylink/))
10. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
    · Named incorporated radio suppliers ground the conditional sourcing scenario; another configured seller need not provide independent originating supply. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))

4. Market Overview

4.1. Introduction

The Global Drone Data Link System market combines embedded communications components, separately purchased link equipment, management software and connectivity services. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ These offerings participate at different points in the purchase and support relationship; their presence does not establish interchangeability or market leadership.

▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Elistair's optical-fiber tether option illustrates a separately identifiable non-radio communications role. Wider aircraft, mission-service and telecommunications packages are adjacent commercial systems whose included data-link contributions must remain distinguishable.

Commercial availability and deployment permission are separate conditions. ▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Consequently, marketed equipment is evidence of an offering, not proof that every buyer can deploy it in every included jurisdiction or mission.

Figure 5. Global Drone Data Link System Market Size, 2017-2032

Table 2. Global Drone Data Link System Market Size, 2017-2032 (USD Million)

World	2023	2024	2025	2026	2027	2032	CAGR (%)
Global	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · Doodle Labs published OEM-form Mesh Rider Radio offerings, supporting the distinction between embedded components and services. ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Elsight markets Halo as a multibearer communications offering with management capabilities and an OEM format. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
3. Velaris - BVLOS connectivity for UAVs
   · Viasat markets Velaris as a dedicated satellite communications service for UAVs and Advanced Air Mobility aircraft. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
4. Safe-T Drone Power Station
   · Elistair offers Safe-T xx.xx with an optical-fiber option, supporting an identifiable non-radio communications role. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))
5. Part 107 Waivers
   · The FAA identifies a Part xx.xx waiver route for beyond-visual-line-of-sight operations, separate from equipment availability. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
6. Operational Authorisation
   · EASA's specific-category authorizations define operating conditions, with exceptions for standard scenarios and appropriate LUC privileges. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))
7. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
8. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

9. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
10. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
11. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
12. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
13. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
14. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
15. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
16. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
17. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

18. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
19. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
20. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
21. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
22. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
23. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

4.2. Key Growth Contribution

Remote inspection and public-safety services create a communications purchase trigger when a customer requires remotely delivered mission information rather than only an aircraft. Swisscom's announced service illustrates the combination of infrastructure, application support and storage behind that requirement. Serving it requires an identifiable link contribution, continuing service coordination and clear acceptance responsibilities. Adoption remains bounded by the operator's applicable permission and usable connectivity; the FAA's waiver pathway illustrates why marketed remote-operation capability cannot itself convert every prospective mission into a deployable service.

Figure 6. Global Drone Data Link System Market, Key Growth contribution, 2025-2032

Table 3. Global Drone Data Link System Market, Key Growth Contribution, 2025-2032

Scope	Leading category	Added value (USD Million)	Growth share (%)	CAGR (%)
Global - Connectivity Technology	xx.xx	xx.xx	xx.xx	xx.xx
Global - Country	xx.xx	xx.xx	xx.xx	xx.xx
Global - Deployment Model	xx.xx	xx.xx	xx.xx	xx.xx
Global - End User	xx.xx	xx.xx	xx.xx	xx.xx
Global - Link Function	xx.xx	xx.xx	xx.xx	xx.xx
Global - Mission Application	xx.xx	xx.xx	xx.xx	xx.xx
Global - Network Topology	xx.xx	xx.xx	xx.xx	xx.xx
Global - Offering	xx.xx	xx.xx	xx.xx	xx.xx
Global - Operating Envelope	xx.xx	xx.xx	xx.xx	xx.xx
Global - Region	xx.xx	xx.xx	xx.xx	xx.xx
Global - Sales Channel	xx.xx	xx.xx	xx.xx	xx.xx
Global - Spectrum Access	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland

   · Swisscom's announced inspection and public-safety service combines infrastructure, authorization-application support and data storage; it does not establish completed nationwide deployment. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

2. Part 107 Waivers

   · The FAA identifies applicable departures from Part xx.xx's visual-line-of-sight requirement as requiring a waiver, independently of communications availability. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

17. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
18. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

19. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
20. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
21. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
22. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
23. 2025 Summary of Changes to Canada’s Drone Regulations - Transport Canada
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.

24. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
25. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
26. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
27. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

28. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
29. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
30. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.

31. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
32. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
33. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
34. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.

35. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
36. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
37. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
38. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.

39. DJI O4 Air Unit Series - FAQ

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

40. Read Our Terms & Conditions - Elsight

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.

41. Uncrewed Aircraft Systems - NIST Public Safety Communications Research

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.

42. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
43. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
44. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
45. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.

46. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
47. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
48. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
49. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

50. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
51. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
52. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
53. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

4.3. Industry Ecosystem & Value Chain Analysis

[illegible] Value capture can therefore occur through equipment supply, software access, connectivity and continuing service responsibilities. These deliverables can be bundled, but a package does not make each intermediary's description a separate underlying data-link activity.

Provisioning and service coordination are identifiable commercial control points. [illegible] Its commercial value depends on the responsibilities actually transferred and the customer's remaining approvals, not merely on the existence of a partner relationship.

[redacted] Buyers should distinguish the equipment seller, network counterparty and incident-resolution owner before accepting an end-to-end commitment. A direct purchase provides more control over those relationships, while an integrated service can simplify coordination at the cost of dependence on its delivery contract.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The March xx.xx 2026 announcement describes Galaxy xx.xx's Velaris delivery role in provisioning, billing, compliance oversight and integration.
   ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom's UAS framework requires relevant network-operator agreement for covered mobile and satellite use.
   ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))

4.3.1. Supply-Side Analysis

Suppliers differ in the commercial responsibility they accept. [redacted] An aircraft manufacturer must qualify the applicable offering and supply commitment rather than shortlist on a technology label alone.

Government screening adds another supply-side filter. [redacted] This supports a component-level route to consideration, but suppliers still need to establish the exact procurement's requirements and their ability to fulfill and support an order.

[redacted] Buyers should establish which entity provides warranty, maintenance and contractual support following such transactions. The completed acquisition does not by itself establish completed product integration, superior delivery or market-wide concentration.

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · The published OEM portfolio includes licensed and unlicensed combinations; catalog availability does not establish destination authorization.
   ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Motorola Solutions, Inc. Form 8-K reporting completion of the Silvus acquisition
   · Motorola Solutions' mandatory filing establishes completion of its Silvus acquisition on August xx.xx 2025.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d88358d8k.htm))

3. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   - DIU distinguishes interoperable components and software from complete platforms and distinguishes verification candidates from completed additions. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))

4.3.2. Demand-Side Analysis

Demand originates in the mission, but the link buyer may be an aircraft manufacturer, integrator or service operator rather than the ultimate user. Swisscom's announced inspection, police and site-protection services illustrate customers purchasing a mission service instead of assembling a communications supply chain. [illegible]

[illegible] A buyer therefore cannot assume that access obtained for the flight-management function also covers mission-payload traffic. Procurement should identify the included functions and applicable access conditions before treating an integrated offering as a complete solution.

Ownership preferences change the demand presented to suppliers. [illegible] The choice should follow the approved mission schedule, internal management capability and contract scope, not a presumption that service procurement is always preferable.

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland
   - Swisscom announced a one-stop drone-service infrastructure for inspections, police deployments and site protection, including applications and data storage. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   - Nokia describes purchase, lease, sharing and flight-hire arrangements with bundled maintenance and other services. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
3. Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems
   - The FCC limits non-networked access communications in its dedicated UAS band to control and non-payload communications. ([federalregister.gov](https://www.federalregister.gov/documents/2025/xx.xx/xx.xx/2024-xx.xx/spectrum-rules-and-policies-for-the-operation-of-unmanned-aircraft-systems))

4.3.3. Stakeholder Analysis

[illegible] Ofcom explicitly

separates its UAS radio authorization from aviation requirements. This division means that a buyer needs an approval and responsibility map rather than a single generalized claim that the link is compliant.

Aircraft manufacturers and integrators influence the accepted configuration and supporting documentation, while the operator retains duties associated with the authorized operation. ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ Contracts should consequently identify the contributions of the aircraft supplier, link vendor, connectivity provider and managed-service provider without assuming that outsourcing removes the operator's regulatory responsibilities.

Mission customers and affected communities introduce data-governance exposure distinct from flight permission. ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ Provider-managed delivery can consolidate administration, but the allocation of legal and contractual responsibilities remains consequential.

Sources & Evidence

1. Drones (UAS)
   · EASA identifies operator responsibilities for authorization compliance, security and operational records. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
2. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom separates radio authorization from aviation requirements, supporting the division of stakeholder authority. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
3. Privacy by Design
   · EASA identifies operator data-protection responsibilities and geographic restrictions that may arise for privacy reasons. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/civil-drones/privacy/privacy-by-design))

4.4. Market Dynamics

■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ A favorable development at one gate does not remove the others. Government component vetting can support a shortlist without establishing deployment permission, while a civil operating waiver does not establish eligibility for a restricted procurement.

Regulatory developments can influence procurement timing before they create an enforceable operating entitlement. ■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■ Effective rules, completed qualifications and

executed service agreements are more decisive commercial triggers than policy announcements or portfolio claims.

Sources & Evidence

1. Part 107 Waivers
   · Operating waivers address particular regulatory requirements and do not establish procurement qualification or network access. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
2. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · The verification framework establishes a procurement-related gate distinct from civil operating permission. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
3. Notice Soliciting Representatives for Technical Roundtables on Security of Unmanned Aircraft Systems Operating Beyond the Visual Line of Sight
   · The September xx.xx 2026 TSA notice describes the August 2025 joint BVLOS framework and security provisions as proposed. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/notice-soliciting-representatives-for-technical-roundtables-on-security-of-unmanned-aircraft-systems))

4.4.1. Key Drivers

4.4.1.1. Remote mission delivery creates communications purchase triggers

Remote inspection and public-safety missions create a purchase trigger when customers need communications supporting remotely operated aircraft and timely mission information. Swisscom's announced drone-service infrastructure connects these use cases with communications and managed services. ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland
   · The announced service connects remote industrial and public-safety missions with communications infrastructure; completion of the entire announced rollout is not asserted. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
2. Part 107 Waivers
   · The waiver framework supports treating operating permission as a separate gate to remote-mission deployment. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

4.4.1.2. Continuity requirements support multibearer evaluation

■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ Australia's spectrum policy reinforces that carrier authorization and application coverage must still be established. Additional providers also introduce contractual and support complexity.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Halo's advertised use of cellular, RF and satellite relationships supports conditional multibearer evaluation, not an independent continuity guarantee.
   ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Spectrum policy
   · Australia's drone spectrum policy makes cellular suitability dependent on network-operator authorization and coverage for the application.
   ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))

4.4.1.3. Service packaging broadens procurement alternatives

Nokia's purchase, lease and flight-hire options, together with bundled maintenance and other services, provide different ways for enterprises to obtain connected-drone capabilities. ■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■ ■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■ It supports adoption where the service matches an approved mission, but becomes unsuitable if recurring obligations or provider dependence outweigh the buyer's need for flexibility.

Sources & Evidence

1. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · The commercial options change upfront ownership and retained service responsibilities; buyer suitability remains contractual.
   ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))

4.4.1.4. Documented qualification supports component consideration

The Blue UAS Framework recognizes interoperable components and software as distinct procurement choices, supporting consideration of qualified data-link contributions within aircraft programs. ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ Selection for verification is not the same as completed verification, and listing does not establish an award, delivery capability or applicability to every government procurement.

Sources & Evidence

1. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · The Blue UAS Framework provides component and software choices for government and industry partners; pending verification is not completed qualification.
   ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))

4.4.2. Key Restraints

4.4.2.1. Jurisdiction-specific permissions constrain deployment access

■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ EASA's specific-category authorization framework and CASA's separate BVLOS approval requirements prevent a supplier from treating one deployment record as Global access. Harmonized or broader approval pathways can reduce repetition, but buyers must still establish that their operation falls within the relevant permission before committing to dependent services.

Sources & Evidence

1. Operational Authorisation
   · Authorization is bounded by its stated limitations and duration; simplified routes provide counterforces to repeated application burdens. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))
2. Beyond visual line-of-sight operations
   · CASA separately requires operator certification, pilot qualification and BVLOS flight approval, and identifies a broader-area trial pathway. ([casa.gov.au](https://www.casa.gov.au/drones/flight-authorisations/beyond-visual-line-sight-operations))

4.4.2.2. Spectrum and network permissions limit usable alternatives

Radio availability does not establish spectrum or network access. Ofcom requires network-operator agreement for the mobile and satellite uses covered by its UAS framework, and Australia's policy identifies authorization and coverage as cellular prerequisites. ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■

Sources & Evidence

1. Spectrum policy
   · Authorized network admission and suitable coverage are separate prerequisites from possessing cellular-capable equipment. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
2. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · The framework retains network agreement and aviation requirements alongside radio authorization and existing exemptions. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
3. Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems
   · The function-limited framework does not establish permission for unrelated mission-payload communications. ([federalregister.gov](https://www.federalregister.gov/documents/2025/xx.xx/xx.xx/2024-xx.xx/spectrum-rules-and-policies-for-the-operation-of-unmanned-aircraft-systems))

4.4.2.3. Installed ecosystem commitments constrain substitution

Proprietary compatibility can constrain replacement purchasing. ■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■ This is an offering-specific switching restraint, not proof that all drone links are closed ecosystems or that an entire aircraft must be replaced.

Sources & Evidence

1. DJI O4 Air Unit Series - FAQ
   · DJI's O4 Air Unit FAQ excludes third-party goggles and identifies only partial accessory compatibility with the preceding generation. ([dji.com](https://www.dji.com/o4-air-unit/faq))

4.4.3. Key Opportunities

4.4.3.1. Accountable communications packages for qualified aircraft programs

Aircraft programs can purchase a compatibility-defined communications package rather than coordinate originating components independently. ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Government component consideration adds a separate eligibility gate; a partner relationship or verification selection does not supply portable qualification.

Sources & Evidence

1. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · The Blue UAS Framework distinguishes components and software from complete aircraft and separates verification selections from completed additions. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
2. Datalinks | UAV Navigation
   · UAV Navigation identifies Microhard modems within TELEM07 variants and states compatibility with its autopilots. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))

4.4.3.2. Contracted coordination across connectivity counterparties

Operators administering terminal, software and network relationships can purchase defined coordination duties. Galaxy xx.xx's announced Velaris delivery layer provides a concrete example. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The March xx.xx 2026 Galaxy xx.xx collaboration describes Velaris provisioning, billing, integration and lifecycle coordination, not customer-specific contractual guarantees. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom requires network-operator agreement for covered mobile and satellite use, separately from aviation compliance. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))

4.4.3.3. Supported continuity for installed equipment and entitlements

Installed buyers need continuity of compatible equipment, software rights and support rather than indiscriminate replacement. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Hardware ownership alone does not settle that continuity.

Sources & Evidence

1. Drones (UAS)
   - EASA requires specific-category aircraft to meet the applicable operational authorization's requirements. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
2. Read our Terms & Conditions
   - Elsight's terms separate embedded-software rights, automatic cloud renewal and purchased support coverage. ([elsight.com](https://www.elsight.com/terms-conditions/))
3. DJI O4 Air Unit Series - FAQ - DJI
   - DJI's O4 documentation excludes third-party goggles while separately permitting specified third-party controller relationships. ([dji.com](https://www.dji.com/o4-air-unit/faq))

4.4.3.4. Verified data-bearing offerings for tether-compatible missions

Tether-compatible missions create a bounded purchasing context for electrical and optical-fiber communications. Gore's cable contribution and Elistair's aircraft-dependent data-transfer arrangements occupy different delivery levels. ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■

Sources & Evidence

1. GORE Tethered Drone Cables for Commercial & Defense
   - Gore markets drone-specific tether cables with communications-bearing electrical and optical-fiber contributions, distinct from complete station supply. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
2. Support - Elistair | Tethered Drone Company
   - Elistair states that tethered data transfer depends on the aircraft and can remain wireless despite tether compatibility. ([elistair.com](https://elistair.com/client-support/))

4.4.4. Key Challenges

4.4.4.1. Assigning accountability across communications providers

■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■ Buyers must establish incident ownership, support escalation and service commitments across those boundaries. Public portfolios do not establish whether a particular proposed contract transfers all necessary responsibilities.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   - Elsight describes Allsight management in cloud and on-premises forms, establishing distinct software-management roles. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   - The partnership describes monitoring, cybersecurity and lifecycle-management roles, but does not establish a particular buyer's contractual responsibility transfer. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))

4.4.4.2. Maintaining compliance through supplier and offering changes

EASA requires a drone used in the specific category to meet the requirements of its operational authorization. A replacement link or changed service arrangement therefore needs a compliance assessment before procurement, rather than an assumption that category similarity preserves authorization. ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■

Sources & Evidence

1. Drones (UAS)
   - A drone used in the specific category must meet the requirements defined in its operational authorization. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))

4.4.4.3. Maintaining eligibility as component-based access rules change

■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ Its scope is narrower than a ban on every foreign component and includes protections for previously authorized equipment. Suppliers must establish affected product and component status before making U.S. access or replacement commitments; branding alone does not settle eligibility.

Sources & Evidence

1. Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program
   - The final rule published September xx.xx 2026 is effective October xx.xx 2026 and addresses specified Covered List entities' logic-bearing hardware. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
   - Its scope excludes broader component prohibitions and contains protections for previously authorized equipment and specified pending applications. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))

4.4.4.4. Coordinating link delivery with interoperable aviation services

The FAA describes UTM as automated, API-based coordination and identifies continuing work on service recognition, standards and interoperability. A data link's ability to transport information does not establish acceptance by every traffic-management or mission-service endpoint. ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■

Sources & Evidence

1. Unmanned Aircraft System Traffic Management (UTM)
   - The FAA describes automated API-based UTM coordination, continuing interoperability work and a process for evaluating third-party services. ([faa.gov](https://www.faa.gov/uas/advanced_operations/traffic_management))

4.5. Porter’s Five Forces Analysis

[redacted] A supplier's relevant competitive set is the set of offerings acceptable to the aircraft program, mission and jurisdiction, rather than every product carrying a drone-connectivity label. Entry through a component offering avoids owning the entire communications service, but does not remove customer integration or deployment-compliance requirements.

[redacted] This illustrates how existing receiver and accessory commitments can limit substitution after purchase. Buyers should establish replacement rights and supported compatibility before selection; apparent availability of another transmitter does not demonstrate an economical or authorized migration.

Network providers can retain bargaining leverage even when terminal suppliers advertise carrier flexibility. [redacted] Multibearer purchasing can broaden the available provider set, but it does not eliminate these access gates or establish independent service commitments.

Substitution is bounded by the mission. [redacted] Operators should compare qualified ways of obtaining the required communications outcome, including customer-managed and provider-managed arrangements, rather than treating every included technology as a universal substitute.

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · OEM-form products establish a component-supply role distinct from continuing network-service delivery. ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Halo illustrates a multibearer management architecture distinct from standalone radio components and dedicated satellite services. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
3. Velaris - BVLOS connectivity for UAVs
   · Velaris establishes a satellite-service alternative whose mission suitability is distinct from a tethered communications offering. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
4. Safe-T Drone Power Station
   · The offering is a tethered station; its ground connection makes substitution conditional on the mission's mobility requirements. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))

5. Drones (UAS)
   · Aircraft-level compliance requirements constrain which component alternatives can be accepted; component availability alone does not settle eligibility. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
6. Spectrum policy
   · Network authorization and application coverage support the conclusion that provider flexibility does not eliminate access dependencies. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
7. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Network-operator agreement provides an access gate that terminal-level provider flexibility does not remove. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
8. DJI O4 Air Unit Series - FAQ
   · The documented receiver and accessory restrictions support an offering-specific switching constraint, not a market-wide closed-ecosystem conclusion. ([dji.com](https://www.dji.com/o4-air-unit/faq))

4.6. PESTLE Analysis

[illegible] Importers should establish the applicable product classification, origin and exemption before committing to a delivery obligation; a general-purpose communications label does not settle whether a particular drone-link offering falls within the listed products. These measures create jurisdiction-specific sourcing exposure, not a uniform Global preference for domestic suppliers.

Economic exposure differs between equipment ownership and service procurement. Nokia's purchase, lease and flight-hire alternatives illustrate how buyers can change the timing and responsibility of expenditure. [illegible]

[illegible] Buyers and integrators should distinguish that supplier claim from verified patent scope, territorial protection and contractual software rights. Compatibility, maintenance access and license continuity can influence replacement decisions even where alternative communications products exist.

Privacy and environmental obligations extend the evaluation beyond communications availability. EASA identifies data-protection responsibilities and the possibility of privacy-related geographic restrictions. [illegible]

RESEARCH SAMPLE REPORT

[redacted]

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · Doodle Labs describes its multiband technology as patented; the page does not establish territorial patent scope or market-wide exclusivity.
   ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · The offered ownership alternatives support the conditional expenditure-timing analysis, not an assertion of universal economic advantage.
   ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
3. Adjusting Imports of Unmanned Aircraft Systems and Unmanned Aircraft Systems Components Into the United States
   · The August xx.xx 2026 proclamation establishes tariffs for specified UAS and components with phased dates, exceptions and conditional treatment.
   ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/adjusting-imports-of-unmanned-aircraft-systems-and-unmanned-aircraft-systems-components-into-the))
   · Its defined product scope supports classification-specific diligence rather than assuming that every communications product is covered.
   ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/adjusting-imports-of-unmanned-aircraft-systems-and-unmanned-aircraft-systems-components-into-the))
4. Privacy by Design
   · The guidance supports examining data access, retention and responsibility separately from flight and communications permission.
   ([easa.europa.eu](https://www.easa.europa.eu/en/domains/civil-drones/privacy/privacy-by-design))
5. Waste from Electrical and Electronic Equipment (WEEE)
   · The European Commission describes WEEE requirements for separate collection and treatment, supporting conditional lifecycle-responsibility diligence for covered link equipment.
   ([environment.ec.europa.eu](https://environment.ec.europa.eu/topics/waste-and-recycling/waste-electrical-and-electronic-equipment-weee_en))

4.7. Market Outlook

The commercial outlook through 2032 depends on converting mission demand into authorized, supported purchases rather than on the proliferation of connectivity options alone. [redacted] Effective permissions, completed procurement acceptance and executed delivery commitments are therefore more meaningful turning points than an announced capability or anticipated rule.

Two commercial outcomes remain plausible. More reusable access pathways could broaden the set of purchase-ready propositions, while continuing management dependencies can preserve incumbent relationships after hardware delivery. [redacted]

■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. Part 107 Waivers
   · Part xx.xx waivers establish an operation-specific access pathway rather than an equipment purchasing entitlement. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
2. Notice Soliciting Representatives for Technical Roundtables on Security of Unmanned Aircraft Systems Operating Beyond the Visual Line of Sight
   · The September xx.xx 2026 TSA notice describes the joint BVLOS framework as proposed and its regulatory requirements as being finalized. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/notice-soliciting-representatives-for-technical-roundtables-on-security-of-unmanned-aircraft-systems))
3. 2025 Summary of changes to Canada's drone regulations
   · Canada provides a qualifying lower-risk BVLOS pathway with pilot and operator certification requirements, not unrestricted remote-operation permission. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
4. SkyLink - uAvionix
   · uAvionix states that SkyLink requires SkyLine management integration for full functionality, establishing a continuing management dependency. ([uavionix.com](https://uavionix.com/product/skylink/))

4.7.1. Near-Term Market Outlook (0-2 Years)

For 2026-2027, the actionable outlook centers on access-status resolution. Canada's rules applicable November xx.xx 2025 provide a defined route for qualifying lower-risk BVLOS operations, whereas the September xx.xx 2026 U.S. notice described a proposed framework still being finalized. ■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■ ■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■

U.S. channel diligence also faces defined implementation milestones. ■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■ ■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■ ■■■■ ■■■ ■■■■ ■■ ■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ The new component prohibition preserves previously authorized equipment within its terms, so targeted eligibility checks are more appropriate than indiscriminate installed-system replacement.

Sources & Evidence

1. Part 107 Waivers
   · The published waiver pathway supports separating permission-backed purchasing from commitments dependent on another regulatory framework. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

2. Notice Soliciting Representatives for Technical Roundtables on Security of Unmanned Aircraft Systems Operating Beyond the Visual Line of Sight
   - The notice supports treating a proposed framework separately from existing operating entitlements. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/notice-soliciting-representatives-for-technical-roundtables-on-security-of-unmanned-aircraft-systems))
3. Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program
   - The FCC final rule is effective October xx.xx 2026; marketplace FCC-ID display compliance dates are March xx.xx 2027 and June xx.xx 2027 for the specified marketplace categories. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
   - The new logic-bearing component prohibition applies prospectively and does not revoke previously authorized equipment. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
4. 2025 Summary of changes to Canada's drone regulations
   - Rules applicable November xx.xx 2025 permit qualifying lower-risk BVLOS operations without an SFOC-RPAS, subject to defined credentials and operating conditions. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

4.7.2. Medium-Term Market Outlook (3-5 Years)

[redacted] Incumbents should secure those commitments rather than assume hardware ownership guarantees retention. Buyers should reassess the arrangement when renewal changes control rights or leaves required equipment outside support; a qualified alternative becomes preferable when continuity cannot be maintained.

[redacted] This can require additional qualification work and reduce the convenience of a common package. The observable indicator is an accepted, independently sourced alternative, not the number of intermediary relationships.

Sources & Evidence

1. Triad High Power Radio Systems For Unmanned Land Air Sea
   - Triad identifies originating radios within configured systems, including Silvus products; another package seller need not diversify the originating supply relationship. ([triadrf.com](https://triadrf.com/radio-systems/))
2. StreamCare+ - Silvus Technologies
   - Silvus markets StreamCare+ as a separately purchased support program with differing coverage options. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))

3. SkyLink - uAvionix
   · SkyLink's documented management dependency supports a conditional renewal-and-continuity outlook, not a forecast of customer retention. ([uavionix.com](https://uavionix.com/product/skylink/))
4. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   · UXV's SRM integrations incorporate named originating radio suppliers, supporting a distinction between configured choice and upstream independence. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))

4.7.3. Long-Term Market Outlook (5-10 Years)

For 2030-2032, a more established aviation-service ecosystem could make recognized service relationships and continuing interoperability responsibility increasingly consequential to procurement. [illegible] A common commercial contract should preserve those separate commitments rather than promise transferable Global permission.

[illegible] Historical activity is counterevidence to category inactivity, but satellite-business progress is not proof of airborne purchase readiness. The decisive indicator is an accountable UAV offer, not an extrapolated technology milestone.

Sources & Evidence

1. Drones (UAS)
   · EASA's relevant cross-border pathway retains destination confirmation and local conditions despite reusable home-state authorization. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
2. Unmanned Aircraft System Traffic Management (UTM)
   · The FAA describes ongoing UTM service-recognition and interoperability work; its NTAP pathway requires an aligned service-provider and operator relationship. ([faa.gov](https://www.faa.gov/uas/advanced_operations/traffic_management))
3. Mynaric AG Form 20-F for the Year Ended December 31, 2021
   · Mynaric's 2021 annual filing identifies HAWK airborne terminals and UAV customer targeting; historical activity does not establish a presently supported procurement offer. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d310942d20f.htm))

4. Rocket Lab Completes Mynaric Acquisition, Adding Laser Optical Communications To Growing Space Systems Portfolio
   · Rocket Lab announced Mynaric acquisition completion on April xx.xx 2026, emphasizing satellite and space-system relationships rather than a current HAWK UAV supply commitment. ([rocketlabcorp.com](https://rocketlabcorp.com/updates/rocket-lab-completes-mynaric-acquisition-adding-laser-optical-communications-to-growing-space-systems-portfolio/index.php))

4.8. Go-to-Market Strategy

A component entrant should target the aircraft OEM or systems integrator that controls communications acceptance, with a proposition tied to a named deliverable rather than a general BVLOS claim. ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■ ■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ For screened government procurement, verify the actual offering and solicitation eligibility before promising access.

A managed-connectivity proposition should address an operator's documented coordination burden. Galaxy xx.xx's announced Velaris role identifies provisioning and lifecycle services that a delivery partner can contribute. ■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■

Commercial execution should progress from a confirmed buyer and accepted deliverable to offering-specific eligibility, then to documented entitlements and delivery obligations. Quotes should distinguish equipment, software rights, connectivity and lifecycle support, including exclusions and continuing commitments. ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · Galaxy xx.xx's announced contribution supplies an identifiable managed-delivery role beyond terminal resale. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))

2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America

   · Nokia's North American partner program offers acquisition alternatives and bundled maintenance, analytics and scheduling, with regulator coordination where required. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))

3. Part 107 Waivers

   · Operating permission is distinct from the equipment and service commitments proposed by a communications supplier. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)

   · A managed distribution relationship cannot independently grant the network consent required by the UK framework. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))

5. Blue UAS Refresh List, Framework Platforms and Capabilities Selected

   · The historical framework announcement supports offering-specific procurement checks, not portable qualification across supplier portfolios or solicitations. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))

6. Read our Terms & Conditions

   · The published terms exclude unlisted network connections and third-party software integration, supporting explicit quote boundaries. ([elsight.com](https://www.elsight.com/terms-conditions/))

7. Doodle Labs announces launch of Reseller Program

   · Doodle Labs' reseller program expressly includes value-added resellers, systems integrators and distributors, establishing commercial channel alternatives rather than transferable customer qualification. ([doodlelabs.com](https://doodlelabs.com/blog/announces-launch-of-reseller-program))

8. Datalinks | UAV Navigation

   · TELEM07 establishes a named compatibility-defined package route distinct from purchasing the originating modem alone. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

The purchase trigger is the required communications contribution to a mission, but the economic buyer need not be the ultimate user. ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ Buyers should name the mission-budget owner, aircraft acceptance authority and service-contract owner before defining the procurement; these roles should not be presumed to reside in one organization.

Government qualification is a separate acceptance filter. DIU's Blue UAS Framework distinguishes components and software from complete aircraft and separates candidates undergoing verification from completed additions. ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

Installed compatibility and intellectual-property rights create distinct switching conditions. ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ These are offering-specific constraints; neither a patent claim nor an integrated ecosystem establishes exclusivity across the entire market.

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · Doodle Labs describes its multiband technology as patented; the announcement does not establish territorial patent scope or category-wide exclusivity. ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Swisscom Broadcast and Nokia build joint drone network across Switzerland
   · Swisscom announced inspection and public-safety drone services combining infrastructure, application support and data storage; this documents a mission-service purchasing alternative. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
3. Drones (UAS)
   · EASA requires aircraft used in the specific category to comply with requirements defined in their operational authorization. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
4. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · DIU distinguishes interoperable components and software from complete platforms, and selections awaiting verification from completed additions. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))

5. DJI O4 Air Unit Series - FAQ
   · DJI's O4 Air Unit documentation excludes third-party goggles and identifies partial accessory compatibility with O3. ([dji.com](https://www.dji.com/o4-air-unit/faq))
6. Read our Terms & Conditions
   · Elsight grants a nontransferable license for software embedded in its products. ([elsight.com](https://www.elsight.com/terms-conditions/))

5.2. Consumer Experience Benchmarking

Buyer experience is most defensibly compared through integration burden, supported compatibility, management control and support responsibility. ■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ An aircraft integrator and an individual video-link buyer face different acceptance and replacement decisions.

■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ These offerings can consolidate management relationships, but public continuity claims and service descriptions do not establish equivalent buyer-specific guarantees. Procurement comparisons should identify the remaining network counterparties, incident-resolution owner and contractual exclusions before treating a component proposal and a managed-service proposal as comparable.

Mission constraints also change the relevant comparison. Elistair's Safe-T xx.xx optical-fiber option retains a ground tether and requires aircraft compatibility confirmation; it is not interchangeable with unrestricted mobile deployment. ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■ ■ ■■■■■■■■■■■ ■■■■■ ■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. New Doodle Labs Mesh Rider Radio offerings expand band flexibility and ease of integration
   · Doodle Labs offers OEM-form radios intended as integrated components, establishing a different deliverable from a managed connectivity service. ([doodlelabs.com](https://doodlelabs.com/blog/new-offerings-expand-flexibility-integration))
2. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Elsight markets multibearer connectivity with cloud and on-premises management options; its continuity statements are supplier claims, not buyer-specific contractual guarantees. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
3. Safe-T Drone Power Station
   · Elistair markets Safe-T xx.xx as a tethered station with an optical-fiber option and requests offering-specific aircraft compatibility confirmation. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))
4. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · Viasat's Galaxy xx.xx announcement describes provisioning, monitoring and lifecycle management, supporting comparison of offered service responsibilities rather than equipment alone. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))

5. Spectrum policy
   · Australia's spectrum policy identifies network admission and application coverage as prerequisites for cellular drone connectivity.
   ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
6. DJI O4 Air Unit Series - FAQ
   · The documented supported receiver ecosystem provides an offering-specific compatibility benchmark, not a market-wide performance comparison. ([dji.com](https://www.dji.com/o4-air-unit/faq))

5.3. Opportunity Mapping

Commercial accessibility provides a stronger prioritization basis than an application label. Suppliers should first identify an accountable aircraft or service buyer, an applicable permission pathway and a communications deliverable that the customer can accept. ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ Direct supply is preferable when the OEM can retain those duties and wants the originating relationship. Government opportunities add solicitation-specific eligibility: historical Blue UAS verification selection is not sufficient purchase authorization.

Managed connectivity is a conditional opportunity for operators that otherwise administer fragmented equipment, software and network relationships. ■■■ ■■■■■■ ■ ■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■ ■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■ Public-safety customers require additional caution because NIST identifies emergency environments with degraded infrastructure; a general service offering cannot establish incident-time availability.

Installed-fleet continuity presents a different opportunity from winning a new aircraft program. ■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■

[redacted] Unsupported retention and premature wholesale replacement are both unsuitable alternatives; the commercial opening is an accountable continuity decision, not presumed ecosystem lock-in.

[redacted] This route is appropriate only where the mission accepts the ground connection; mobility-dependent missions favor another qualified offering. Its inclusion in the study does not establish a universal substitute or eliminate aircraft authorization.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The collaboration supports a coordination-based channel proposition; actual transferred duties and service commitments remain agreement-specific. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Drones (UAS)
   · Authorization conformity constrains installed-equipment migration independently of commercial compatibility. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
3. Spectrum policy
   · Australian guidance makes usable cellular connectivity conditional on network admission and application coverage. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · The UK framework retains separate radio, network and aviation access relationships, limiting unconditional managed-service promises. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
5. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · Government component consideration is an identifiable access route, but selection for verification is not an award or universal purchasing eligibility. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
6. GORE Tethered Drone Cables for Commercial & Defense
   · The cable portfolio supports a component-supply opportunity only with separately assigned system delivery responsibility. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
7. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   · NIST identifies first-responder communications needs in environments with degraded or destroyed infrastructure, challenging assumptions of ordinary service availability. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

8. 2025 Summary of changes to Canada’s drone regulations
   · The Canadian pathway identifies a conditional customer qualification context; an individual operator's eligibility still requires confirmation. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
9. StreamCare+ - Silvus Technologies
   · The marketed support program establishes an identifiable lifecycle purchasing alternative without guaranteeing coverage of individual installed equipment. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
10. Datalinks | UAV Navigation
   · The named package relationship supports comparing an integrator deliverable with direct component supply without assuming equivalent obligations. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
11. DJI O4 Air Unit Series - FAQ - DJI
   · The O4 compatibility boundary supports function-specific migration assessment rather than assuming unrestricted replacement. ([dji.com](https://www.dji.com/o4-air-unit/faq))
12. Support - Elistair | Tethered Drone Company
   · Aircraft-dependent data transfer and separately identified maintenance arrangements support configuration-specific purchasing and support checks. ([elistair.com](https://elistair.com/client-support/))
13. ドローン向け上空 LTE SIM なら上空電波パッケージ | DJI 対応 | KDDI スマートドローン
   · KDDI SmartDrone separates aerial LTE admission from management-system eligibility and describes its coverage map as indicative rather than guaranteed. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/communication/4g-lte/))

5.4. Distribution Channel Analysis

Distribution and retail routes can affect support entitlement as well as purchasing convenience. ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ A retail listing does not itself establish a supported replacement or repair relationship.

Value-added distribution contributes a different commercial service. ■■■ ■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ Sales channel and network-management model remain separate choices: an intermediary sale does not necessarily transfer ongoing management.

■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ A service partner can coordinate these relationships but cannot independently grant aviation or network permission. Direct purchasing preserves buyer control where internal integration and supplier management are available; an integrator route is suitable only when its contract addresses the specific coordination burden without obscuring retained operator and supplier responsibilities.

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The March xx.xx 2026 collaboration assigns Galaxy xx.xx a managed distribution role covering provisioning, billing, integration and lifecycle visibility for Velaris. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Nokia's partner program offers bundled maintenance, analytics and scheduling, alongside coordination with relevant regulators. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
3. Spectrum policy
   · Australia assigns equipment-rule compliance responsibilities to suppliers and network admission responsibilities to the relevant network relationship. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom requires relevant network-operator agreement for mobile and satellite use under its UAS framework; an intermediary cannot independently grant that permission. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
5. Where To Buy
   · DJI distinguishes official and authorized sales channels and states that purchases from unauthorized dealers are outside its warranty services. ([dji.com](https://www.dji.com/where-to-buy/online-retails))
6. After-sale Service Policies
   · DJI's after-sales policy covers purchases from DJI and authorized dealers within its stated terms and requires proof of purchase. ([m.dji.com](https://m.dji.com/service_policy))

5.5. Pricing Trend Analysis

Drone-data-link pricing is shaped by the contractual deliverable, not hardware alone. ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■ Nokia's purchase, lease and flight-hire alternatives illustrate expenditure-timing choices, but do not establish that service procurement is universally preferable.

■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ Buyers should negotiate inclusions, renewal and change clauses; distributors making fixed commitments need corresponding supplier obligations. Any negotiated concession should preserve comparable service scope rather than conceal responsibilities returned to the customer.

Trade and currency exposure can change these negotiations independently of product suitability. ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■

[redacted] Contract currency, conversion responsibility and duty allocation should therefore be settled before commitment; pass-through depends on the agreement, not merely the existence of an external cost increase.

Sources & Evidence

1. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Nokia offers purchase, lease and flight-hire alternatives, establishing expenditure-timing choices rather than a universal economic advantage.
   ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
2. Adjusting Imports of Unmanned Aircraft Systems and Unmanned Aircraft Systems Components Into the United States
   · The August xx.xx 2026 U.S. proclamation establishes product-defined UAS tariff treatment with phased dates, origin conditions and exceptions.
   ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/adjusting-imports-of-unmanned-aircraft-systems-and-unmanned-aircraft-systems-components-into-the))
3. Read our Terms & Conditions
   · Elsight's standard terms provide automatic cloud-service renewal, integration and network exclusions, tax and duty exclusions, and conditional quote adjustments.
   ([elsight.com](https://www.elsight.com/terms-conditions/))
4. Elsight Investor Webinar - Q4 2025
   · Elsight describes system sales, mandatory recurring cloud services, optional premium features and usage-based connectivity charges; its risk disclosures identify foreign-exchange exposure.
   ([elsight.com](https://www.elsight.com/wp-content/uploads/2026/xx.xx/ELS-Investor-webinar-Q4-2025.pdf))

5.6. Regulatory Compliance & Standards Framework

[redacted] These routes attach to the applicable operation and conditions; marketed BVLOS capability is not a transferable operating entitlement. Buyers should establish the relevant permission before accepting a deployment-dependent commitment.

[redacted] Integrated flight and payload offerings consequently require confirmation of access for each included function. Non-Radio Links retain their applicable aircraft and product obligations rather than being forced into a radio-spectrum classification.

The FCC final rule published September xx.xx 2026 is scheduled to take effect October xx.xx 2026. It restricts new authorization of specified devices incorporating logic-bearing hardware from relevant Covered List entities. ■■ ■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■ ■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Part 107 Waivers
   · The FAA provides a Part xx.xx waiver route for operations beyond visual line of sight; equipment availability does not itself provide that permission. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
2. Operational Authorisation
   · EASA requires operational authorization for the specific category, except where a standard scenario or appropriate LUC privileges apply. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))
3. Spectrum policy
   · Australia distinguishes class-authorized equipment from individually authorized alternatives and makes cellular suitability dependent on network admission and coverage. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom separates radio authorization from aviation requirements and retains existing radio exemptions alongside its UAS operator licensing framework. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
5. Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems
   · The FCC limits communications under its dedicated non-networked UAS access framework to control and non-payload purposes. ([federalregister.gov](https://www.federalregister.gov/documents/2025/xx.xx/xx.xx/2024-xx.xx/spectrum-rules-and-policies-for-the-operation-of-unmanned-aircraft-systems))
6. Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program
   · The FCC final rule is effective October xx.xx 2026, addresses specified Covered List entities' logic-bearing hardware, and does not revoke previously authorized equipment under this new prohibition. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))

5.7. ESG & Sustainability Analysis

For drone-data-link equipment, a commercially actionable environmental consideration is avoidable replacement rather than an assumed benefit from the drone's mission. Elsight describes software updates that can extend capabilities without replacing hardware, whereas DJI documents only partial accessory compatibility between O4 and O3. ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■

RESEARCH SAMPLE REPORT

[redacted]

End-of-life responsibility is consequential for covered equipment supplied into the EU. The WEEE framework requires separate collection and proper treatment and promotes reuse and resource recovery. [redacted]

The social and governance exposure arises from the information carried by inspection and public-safety links. [redacted] Approval of new data uses or a change in hosting counterparty should trigger a renewed governance review before deployment.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Elsight describes software updates that can extend capabilities without hardware replacement; this is not evidence of a comparative environmental benefit.
   ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Drones (UAS)
   · EASA identifies specific-category operator duties concerning privacy, unauthorized access and maintenance, supporting lifecycle and accountability considerations.
   ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
3. DJI O4 Air Unit Series - FAQ
   · Partial compatibility across O4 and O3 accessories supports conditional consideration of replacement consequences. ([dji.com](https://www.dji.com/o4-air-unit/faq))
4. Waste from Electrical and Electronic Equipment (WEEE)
   · The European Commission identifies separate collection and proper treatment obligations for covered electrical and electronic waste, together with reuse and resource-recovery objectives.
   ([environment.ec.europa.eu](https://environment.ec.europa.eu/topics/waste-and-recycling/waste-electrical-and-electronic-equipment-weee_en))
5. Privacy policy
   · Australia's drone privacy guidance identifies jurisdiction-dependent privacy and surveillance obligations and a route for complaints concerning personal-information misuse.
   ([drones.gov.au](https://www.drones.gov.au/drone-rules/privacy-policy))

5.8. Disruption & Risk Scenarios

An access-policy scenario is triggered when a proposed U.S. offering becomes subject to an authorization restriction or a different applicable import treatment. The FCC's scheduled component rule and the August xx.xx 2026 UAS proclamation govern different commercial questions. [redacted]

An infrastructure-disruption scenario exposes response organizations and service operators relying on continuing external connectivity. NIST documents emergency settings with degraded or destroyed communications, while Australian policy distinguishes available equipment from admitted, adequately covered network service.

An ownership-transition scenario arises when the business responsible for management or maintenance changes counterparties. Immediate switching on accounting classification alone can introduce avoidable migration exposure, while relying on the original brand without contractual continuity leaves responsibility uncertain.

A buyer should obtain necessary permissions and supported continuity before accepting the change, rather than infer portability from a common technology category. Retaining the existing arrangement is appropriate only while its rights and support remain valid; a replacement route requires its own compatible, authorized and contractually supported scope.

Sources & Evidence

1. Drones (UAS)
   - A changed communications arrangement must preserve the requirements of the applicable authorized aircraft configuration. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
2. Spectrum policy
   - Equipment capability does not guarantee carrier admission or incident-area service availability. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))

3. Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program
   · Targeted Covered List component and authorization conditions can affect new purchasing access; protections for previously authorized equipment prevent a blanket replacement conclusion. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/protecting-against-national-security-threats-to-the-communications-supply-chain-through-the))
4. Adjusting Imports of Unmanned Aircraft Systems and Unmanned Aircraft Systems Components Into the United States
   · The August xx.xx 2026 U.S. proclamation defines differentiated UAS and component tariff treatment, phased implementation and exceptions, requiring product-specific treatment assessment. ([federalregister.gov](https://www.federalregister.gov/documents/2026/xx.xx/xx.xx/2026-xx.xx/adjusting-imports-of-unmanned-aircraft-systems-and-unmanned-aircraft-systems-components-into-the))
5. Read our Terms & Conditions
   · Nontransferable embedded-software rights and purchased-period support make reassignment and renewal consequential contractual events. ([elsight.com](https://www.elsight.com/terms-conditions/))
6. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   · The documented emergency setting supports an infrastructure-disruption scenario, not an asserted outage frequency or guaranteed alternative. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
7. Nokia Corporation Report for Q2 and Half Year 2026
   · Nokia's July xx.xx 2026 report classified Enterprise Campus Edge as discontinued operations because reaching a sale agreement was considered highly probable; it did not establish completed transfer or withdrawal. ([nokia.com](https://www.nokia.com/newsroom/nokia-corporation-report-for-q2-and-half-year-2026/))

5.9. Return on Investment & Cost-Benefit Analysis

For an operator's economic buyer, the relevant comparison is the cost and responsibility of delivering the same authorized mission through direct relationships or a managed package. Nokia's acquisition alternatives demonstrate expenditure-timing choices, not universal economic superiority. ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■

■■■ ■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ Direct component purchasing is preferable where the buyer has those capabilities and values supplier control. Neither route should receive credit for undisclosed support transfer or assumed replacement avoidance.

[illegible] This choice does not relax flight-management obligations. Commitment should follow the recipient's information need, included rights and accountable delivery scope, not supplier claims of realized returns.

Sources & Evidence

1. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Purchase, lease, sharing and flight-hire alternatives change expenditure timing and retained duties; the announcement does not prove superior realized returns. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
2. Drones (UAS)
   · Supported replacement flexibility does not independently establish conformity with an existing operational authorization. ([easa.europa.eu](https://www.easa.europa.eu/en/the-agency/faqs/drones-uas))
3. Read our Terms & Conditions
   · Equipment purchasing does not automatically include every connection, integration or continuing support entitlement. ([elsight.com](https://www.elsight.com/terms-conditions/))
4. ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
   · ITU-T F.xx.xx distinguishes stored mission-payload information from real-time delivery and separates payload services from flight-management communications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
5. Gotonomi Completes Successful Flight Trials and Opens Orders
   · Gotonomi's inspection-bundle announcement separately identifies terminal hardware, Videosoft software and its license, and Viasat airtime. ([gotonomi.com](https://gotonomi.com/resources/gotonomi-completes-successful-flight-trials-and-opens-orders/))
6. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   · The swappable-radio ecosystem supports conditional equipment-retention analysis within supported configurations, not universal interchangeability. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))

6. Cumulative Impact of Artificial Intelligence 2026

AI is a documented element of connected-drone supplier strategy, but its presence in a wider mission system should not be confused with a separately established data-link benefit. ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ It supports a commercial use case, not a staffing reduction, reliability guarantee or market-wide adoption conclusion.

Implementation changes the buyer's integration and data-governance requirements. Nokia describes on-premises processing of drone data when its drone offering is combined with campus-network and industrial-edge services. ■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■

Governance and labor conditions remain material to adoption. NIST's voluntary AI risk framework addresses workforce training, human oversight, documented accountability and third-party rights. ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■ ■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■

Sources & Evidence

1. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   · Nokia describes on-premises processing of drone data when its drone offering is combined with its campus-network and industrial-edge offerings. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))
2. Part 107 Waivers
   · The FAA's operating-waiver framework remains a separate access condition from supplier descriptions of AI-assisted connected-drone capabilities. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
3. AI RMF Core
   · NIST's voluntary AI risk framework addresses documented accountability, workforce training, human oversight, third-party rights and lifecycle risk management. ([airc.nist.gov](https://airc.nist.gov/airmf-resources/airmf/xx.xx-sec-core/))

4. Nokia and Motorola Solutions announce drone technology integration for public safety and mission-critical industries

· Nokia and Motorola Solutions announced an AI-assisted connected-drone integration on December xx.xx 2024. The cited Chula Vista CAPE use does not establish deployment of that newly announced combination. ([nokia.com](https://www.nokia.com/newsroom/nokia-and-motorola-solutions-announce-drone-technology-integration-for-public-safety-and-mission-critical-industries/))

7. Drone Data Link System Market, by Offering

[redacted] An aircraft manufacturer purchasing components retains coordination among these contributions. A complete-system buyer should instead require an explicit list of included endpoints, support equipment and acceptance responsibilities, without assuming that the package includes every necessary network service.

Link Management & Transmission Software introduces rights and continuing support obligations that hardware ownership does not resolve. SkyLine illustrates communications management supplied alongside radios. [redacted]

[redacted] Buyers lacking internal supplier-coordination capability can select a supported service package when its agreement names the responsible counterparties and escalation commitments. Buyers with established integration capability may retain more control through separate purchases, accepting the associated coordination burden.

[redacted] Their inclusion does not make a wider aircraft or mission-service contract entirely a data-link purchase. Suppliers and customers should identify the communications deliverables within a bundle before comparing alternatives; unresolved package boundaries can conceal responsibilities rather than demonstrate an additional commercial opportunity.

Figure 7. Global Drone Data Link System Market, by Offering: Market share evolution, 2025-2032

Figure 8. Global Drone Data Link System Market, by Offering: Market size by category, 2025

Figure 9. Global Drone Data Link System Market, by Offering: Market size and growth, 2025-2032

Table 4. Global Drone Data Link System Market, by Offering growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Velaris - BVLOS connectivity for UAVs

   · Viasat markets Velaris as a dedicated satellite communications service for UAVs and advanced-air-mobility aircraft, establishing a communications-provision role. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))

2. Read our Terms & Conditions

   · Elsight's terms establish an embedded-software license, automatic cloud-service renewal, purchased support coverage, and exclusions for third-party integration and unlisted network connections. These support entitlement-specific procurement checks. ([elsight.com](https://www.elsight.com/terms-conditions/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.

3. SkyLine UAS Command & Control - C2 for BVLOS

   · uAvionix identifies paired airborne and ground radios managed through SkyLine, supporting distinct hardware and communications-software deliverables. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

   · Taxonomy evidence: The commercial UAS offering distinguishes airborne radios, ground radios, and cloud-based communications software, demonstrating different deliverable forms within one drone-link solution. It does not establish the report's complete offering partition. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.

4. UAV/UGV Products - Advanced Microwave Products

   · Advanced Microwave Products separately catalogs communications transmitters, receivers and transceivers, and supporting RF or microwave amplifiers. ([advmw.com](https://advmw.com/uav-ugv-products/))

5. GORE Tethered Drone Cables for Commercial & Defense

   · Gore markets drone-specific tether cable products for communications and power, establishing a support-component role distinct from complete link systems. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))

6. UAV Data Link and Unmanned Communications - DTC, a Codan Company

   · DTC publicly offers unmanned communications integration and lifecycle support; the offered role does not establish individual contractual responsibility transfer. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.

7. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures
   · Taxonomy evidence: ISO distinguishes the C2-link telecommunications service from a tangible product and defines a provider supplying some or all of that service. This supports treating purchased communications provision separately from purchased equipment. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A21384%3A-xx.xx%3Aed-xx.xx%3Av1%3Aen))
8. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
9. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
10. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
11. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
12. Telemetry Radios - Holybro Store
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
13. Motorola Solutions - March 2, 2026 Conference Transcript
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
14. Codan FY2025 Results - ASX Announcement, August 21, 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.

15. Codan H1 FY2026 Investor Presentation - February 19, 2026
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
16. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
17. Elsight Limited - Appendix 4E and Annual Report 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
18. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
19. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
20. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

21. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
22. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
23. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
24. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
25. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
26. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.

7.1. Data Link Hardware

Table 6. Global Drone Data Link System Market, by Data Link Hardware growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Congressional Record - Senate, February 5, 2024, Pages S356-S357: India MQ-9B Proposed-Sale Notification
   · Taxonomy evidence: The notification distinguishes named communications equipment from broader software, integration, and support elements, supplying a public procurement basis for distinguishing tangible hardware from service deliverables. It is not an exhaustive offering taxonomy. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
2. SRWG/4 IP/03 - Annex 10 Updates on RPAS C2 Link
   · Taxonomy evidence: The ICAO meeting paper's proposed C2-link provisions distinguish communications equipment from communications-service provision and identify aircraft-side and remote-station communications elements. It is used for category terminology, not as proof of a currently applicable legal requirement. ([icao.int](https://www.icao.int/sites/default/files/APAC/Meetings/2020/2020%20SRWG4/xx.xx-Information%20Papers/IP03_ICAO%20AI.xx.xx%xx.xx-%20Annex%2010%20updates%20on%20RPAS%20C2%20Link.pdf))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.

9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

29. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
30. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
31. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.

7.1.1. Complete Data Link Systems

Table 10. Global Drone Data Link System Market Size, by Complete Data Link Systems, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. SkyLine UAS Command & Control - C2 for BVLOS

   · Taxonomy evidence: The offering describes paired airborne and ground radios managed as an integrated communications configuration. This supports complete-system identity, while indivisible package pricing remains unestablished. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

7.1.2. Data Link Terminals & Modules

Table 13. Global Drone Data Link System Market Size, by Data Link Terminals & Modules, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Congressional Record - Senate, February 5, 2024, Pages S356-S357: India MQ-9B Proposed-Sale Notification

   · Taxonomy evidence: The February xx.xx 2024 Congressional Record separately names ground data terminals, satellite earth stations, transceivers, and compact data links in the India MQ-9B proposed-sale notification. This independently identifies communications equipment within a wider aircraft package; it does not establish completed delivery or standalone prices.
   ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))

2. SRWG/4 IP/03 - Annex 10 Updates on RPAS C2 Link

   · Taxonomy evidence: The proposed provisions identify aircraft and remote-pilot-station transceiver elements within the C2-link system, supporting the endpoint-equipment distinction from the overall communications service.
   ([icao.int](https://www.icao.int/sites/default/files/APAC/Meetings/2020/2020%20SRWG4/xx.xx-Information%20Papers/IP03_ICAO%20AI.xx.xx%xx.xx-%20Annex%2010%20updates%20on%20RPAS%20C2%20Link.pdf))

3. Congressional Record - Senate, February 5, 2024 - India MQ-9B Proposed-Sale Notification

   · Taxonomy evidence: The Congressional Record's MQ-9B proposed-sale notification separately identifies ground data terminals, satellite earth stations, transceivers, and compact data links within the aircraft procurement package. These are recognized communications deliverables; the notification does not establish standalone prices or completed deliveries.
   ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

4. SkyLine UAS Command & Control - C2 for BVLOS
   - Taxonomy evidence: The page separately identifies airborne and ground radio products and provides a purchase route for a ground radio, supporting separately supplied communications endpoints. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
5. UAV/UGV Products - Advanced Microwave Products
   - Taxonomy evidence: The supplier's UAV/UGV commercial catalog distinguishes communications transmitters, receivers, and transceivers from RF power amplifiers. Only its UAV-attributable offerings support the captured market boundary. ([advmw.com](https://advmw.com/uav-ugv-products/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
6. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

7. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

8. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))

9. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.

10. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
11. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
12. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
13. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
14. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
15. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
16. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

17. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

18. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

19. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

20. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

21. Part 107 Waivers - Federal Aviation Administration
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

22. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

23. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

24. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

25. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales.
([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales.
([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

26. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

27. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals.
([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals.
([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

28. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled.
([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled.
([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

29. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
30. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
31. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
32. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.

7.1.3. Link Support Hardware

Table 16. Global Drone Data Link System Market Size, by Link Support Hardware, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Tethered Drone Cables for Commercial & Defense - Gore

   · Taxonomy evidence: Gore markets drone-specific tether cable assemblies for communications and power, distinguishing data-carrying cable components from complete communications terminals or systems. Only directly attributable communications value falls within the working boundary. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))

2. UAV/UGV Products - Advanced Microwave Products
   - Taxonomy evidence: The catalog markets RF and microwave amplifiers as supporting products for analog and digital transmission sources, establishing a link-support hardware function distinct from the base communications endpoint. ([advmw.com](https://advmw.com/uav-ugv-products/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.

7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

24. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))

7.2. Integration & Lifecycle Services

Table 19. Global Drone Data Link System Market Size, by Integration & Lifecycle Services, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 20. Global Drone Data Link System Market Size, by Integration & Lifecycle Services, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 21. Global Drone Data Link System Market Size, by Integration & Lifecycle Services, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Desider, Issue 199, June 2025 - Next-Generation Armed RPAS Protector Enters Service

   · Taxonomy evidence: The record describes a multiyear Protector support contract. It establishes a sustainment purchase at aircraft-program level but does not disclose the included drone-link share, so it cannot resolve link-specific service allocation. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))

2. Congressional Record - Senate, February 5, 2024, Pages S356-S357: India MQ-9B Proposed-Sale Notification
   - Taxonomy evidence: Integration, software support, repair, engineering, and logistics are included in the proposed program. Their communications-only commercial value is not separated. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
3. Congressional Record - Senate, February 5, 2024 - India MQ-9B Proposed-Sale Notification
   - Taxonomy evidence: The proposed procurement includes integration, software support, repair support, and contractor engineering and logistics services alongside communications equipment. The record does not isolate the drone-link share of those broader services. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))
4. UAV Data Link and Unmanned Communications - DTC
   - Taxonomy evidence: DTC's UAV communications offering explicitly includes technical consultation, integration support, deployment support, and long-term lifecycle support. The page establishes offered service functions, not their separately billed revenue. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
5. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

6. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
7. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
8. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
9. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

10. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
11. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
12. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
13. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
14. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
15. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

16. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

17. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

18. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

19. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

20. Part 107 Waivers - Federal Aviation Administration
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

21. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

22. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

23. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

24. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

25. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

26. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

27. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

28. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
29. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
30. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
31. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.

7.3. Link Management & Transmission Software

Table 22. Global Drone Data Link System Market Size, by Link Management & Transmission Software, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 23. Global Drone Data Link System Market Size, by Link Management & Transmission Software, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. FAA Certificate of Waiver and Authorization 107W-2025-02991 - Pinnacle Drone Light Shows
   · Taxonomy evidence: The record identifies drone-show command-and-control software and its version as part of the documented system. This supports communications-software identity, not an independently purchased entitlement or inclusion of all show-planning software. ([faa.gov](https://www.faa.gov/media/xx.xx))

2. SkyLine UAS Command & Control - C2 for BVLOS

   · Taxonomy evidence: SkyLine is described as cloud-based C2 software providing link routing, monitoring, redundancy, and management of airborne and ground radios. Only its communications functions support this category; adjacent fleet-management and airspace-awareness functions remain outside the working boundary. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.

3. Conducting Extended BVLOS Operations in Challenging Terrain - Public uAvionix Project Report

   · Taxonomy evidence: The report separately identifies link-management functionality coordinating the integrated communications links, supporting the distinction between bearer hardware and management software. ([faa.gov](https://www.faa.gov/uas/programs_partnerships/BAA/BAA004-uAvionix%E2%xx.xx%93Conducting-Extended-BVLOS-Operations-in-challenging-terrain.pdf))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

25. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
30. Read Our Terms & Conditions - Elsight
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.

7.4. Connectivity Services

Table 25. Global Drone Data Link System Market Size, by Connectivity Services, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 26. Global Drone Data Link System Market Size, by Connectivity Services, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures

   · Taxonomy evidence: The standard defines an external C2-link communications service provider and a service-level agreement between that provider and the UAS operator, establishing a recognized communications-service category. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A21384%3A-xx.xx%3Aed-xx.xx%3Av1%3Aen))

2. Velaris - Satellite Connectivity for UAVs - Viasat

   · Taxonomy evidence: Viasat markets Velaris as a dedicated satellite communications service for UAVs and advanced-air-mobility aircraft. The UAV-attributable communications service supports this offering category without including unrelated aviation or airspace-management services. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

29. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.

8. Drone Data Link System Market, by Connectivity Technology

Connectivity Technology changes the qualified purchasing alternatives and the counterparties on which deployment depends. Within Noncellular Radio Communications, Analog Radio Links and Digital Radio Links remain distinct commercial offerings: Advanced Microwave Products markets analog video equipment and digital data products. ■■■■■■■■ ■■■■■■■ ■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■

Cellular Communications and Satellite RF Communications add network-service dependencies. Australia's policy makes cellular suitability conditional on network admission and application coverage; Ofcom requires network-operator agreement for mobile and satellite uses under its UAS framework. ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■

Wired Electrical Communications and Optical Fiber Communications change the mobility comparison. ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ Procurement must identify the data-carrying configuration actually supplied; the presence of a power tether or multiple cable elements does not establish which communications path the buyer receives.

■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■ ■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ Before a deployment-dependent commitment, the buyer should obtain the named offering, aircraft acceptance and continuing support terms. Historical program evidence

neither proves unrestricted merchant availability nor establishes an absence of commercial activity elsewhere.

Figure 10. Global Drone Data Link System Market, by Connectivity Technology: Market share evolution, 2025-2032

Figure 11. Global Drone Data Link System Market, by Connectivity Technology: Market size by category, 2025

Figure 12. Global Drone Data Link System Market, by Connectivity Technology: Market size and growth, 2025-2032

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   - Elsight markets Halo as a multibearer offering spanning cellular, satellite and RF relationships; its portfolio is not a buyer-specific continuity agreement. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Velaris - BVLOS connectivity for UAVs
   - Velaris is delivered through Viasat's satellite network, supporting a network-service relationship rather than equipment ownership alone. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
3. Safe-T Drone Power Station
   - Elistair markets Safe-T xx.xx as a tethered station with an optical-fiber option and requests aircraft-specific compatibility confirmation. Tether mobility suitability is an analytical implication of the ground connection. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
4. Spectrum policy
   - Australia's policy makes cellular suitability dependent on network authorization and the necessary coverage for the application. This supports conditional bearer selection, not a Global coverage conclusion. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))

5. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   - Ofcom's UAS operator framework requires specific network-operator agreement for covered mobile and satellite use, separately from aviation requirements. The conclusion is limited to this jurisdictional framework. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
6. UAV/UGV Products - Advanced Microwave Products
   - Its unmanned-platform portfolio includes analog video and digital data products, supporting separate signaling-family purchases without establishing cross-vendor compatibility. ([advmw.com](https://advmw.com/uav-ugv-products/))
7. GORE Tethered Drone Cables for Commercial & Defense
   - The portfolio distinguishes electrical data and optical-fiber elements; a combined cable does not establish the communications path purchased for a particular deployment. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
8. Aquila20 FPV Kit - BETAFPV
   - The Aquila20 kit identifies analog video transmission and ExpressLRS control, supporting function-specific identification within a combined offering. ([betafpv.com](https://betafpv.com/products/aquila20-fpv-kit))
9. Quantum Technologies are Changing the Face of Unmanned Aircraft Communications - NASA
   - NASA's January xx.xx 2020 account describes an optical communications research application intended for unmanned aircraft, using hardware flown on a Twin Otter research aircraft. It does not establish a merchant drone offering. ([nasa.gov](https://www.nasa.gov/aeronautics/quantum-technologies-are-changing-the-face-of-unmanned-aircraft-communications/))
10. Mynaric AG Form 20-F for the Year Ended December 31, 2021
    - Mynaric's 2021 annual filing identifies HAWK as an airborne optical product with UAV use cases and early customer programs. These historical business facts do not establish current buyer-specific commercial availability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d310942d20f.htm))
11. Instructions for the Certificate of Waiver or Authorization - FAA
    - Taxonomy evidence: The FAA's operator application guidance lists Wi-Fi, radio, satellite, Bluetooth, and cellular-network links as C2-link types. This provides independent regulatory recognition of bearer distinctions without defining market shares or an exhaustive commercial taxonomy. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
12. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

13. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
- Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

14. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

15. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.

16. Telemetry Radios - Holybro Store
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

17. Motorola Solutions - March 2, 2026 Conference Transcript
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.

18. Codan FY2025 Results - ASX Announcement, August 21, 2025
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.

19. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
20. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
21. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
22. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
23. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
24. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

25. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
26. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
27. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
28. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
29. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
30. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
31. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.

32. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
33. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
34. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
35. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.

8.1. Noncellular Radio Communications

Table 30. Global Drone Data Link System Market, by Noncellular Radio Communications growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Analog Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Combined Analog & Digital Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Digital Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Instructions for the Certificate of Waiver or Authorization - FAA

   · Taxonomy evidence: Wi-Fi, radio, and Bluetooth are explicitly recognized C2-link types, supporting the noncellular-radio grouping when cellular and satellite access are excluded. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.

8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
29. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
30. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

8.1.1. Digital Radio Links

Table 34. Global Drone Data Link System Market Size, by Digital Radio Links, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Congressional Record - Senate, February 5, 2024 - India MQ-9B Proposed-Sale Notification

   · Taxonomy evidence: The same named compact data link supports digital waveforms and interoperates with digital tactical communications equipment. Capability does not determine the configuration actually deployed. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

2. UAV/UGV Products - Advanced Microwave Products

   · Taxonomy evidence: The same catalog identifies digital data transceivers for telemetry and control communications, supporting digital noncellular radio as a distinct signaling family. ([advmw.com](https://advmw.com/uav-ugv-products/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.

10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

8.1.2. Combined Analog & Digital Radio Links

Table 37. Global Drone Data Link System Market Size, by Combined Analog & Digital Radio Links, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Aquila20 FPV Kit - BETAFPV

   · Taxonomy evidence: The analog Aquila20 commercial aircraft kit identifies analog video transmission together with ExpressLRS remote-control connectivity. This supports identification of an embedded mixed-signaling configuration; it does not establish a separately priced communications subsystem or bring the whole aircraft into scope. ([betafpv.com](https://betafpv.com/products/aquila20-fpv-kit))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

8.1.3. Analog Radio Links

Table 40. Global Drone Data Link System Market Size, by Analog Radio Links, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Congressional Record - Senate, February 5, 2024 - India MQ-9B Proposed-Sale Notification
   · Taxonomy evidence: The notification describes a compact multiband data link supporting analog waveforms, independently establishing analog signaling within a named UAV communications category. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-senate.pdf))

2. UAV/UGV Products - Advanced Microwave Products
   - Taxonomy evidence: The catalog explicitly markets analog FM video transmitters and receivers in its unmanned-platform offering. ([advmw.com](https://advmw.com/uav-ugv-products/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

8.2. Satellite RF Communications

Table 43. Global Drone Data Link System Market Size, by Satellite RF Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Instructions for the Certificate of Waiver or Authorization - FAA
   - Taxonomy evidence: Satellite connectivity is explicitly identified as a C2-link type. ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))
2. Velaris - Satellite Connectivity for UAVs - Viasat
   - Taxonomy evidence: The offering identifies satellite-network delivery of the UAV data link, corroborating satellite RF access as a commercial connectivity family. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.

8.3. Hybrid Multibearer Communications

Table 46. Global Drone Data Link System Market Size, by Hybrid Multibearer Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Conducting Extended BVLOS Operations in Challenging Terrain - Public uAvionix Project Report
   · Taxonomy evidence: The FAA-hosted public project report documents integration of cellular, noncellular C-band radio, and satellite communications into a unified UAV C2 link. It establishes a multibearer configuration, not commercial sales or universal performance. ([faa.gov](https://www.faa.gov/uas/programs_partnerships/BAA/BAA004-uAvionix%E2%xx.xx%93Conducting-Extended-BVLOS-Operations-in-challenging-terrain.pdf))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.

8.4. Optical Fiber Communications

Table 49. Global Drone Data Link System Market Size, by Optical Fiber Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 50. Global Drone Data Link System Market Size, by Optical Fiber Communications, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Utilizing Telecommunications/ICTs for Disaster Risk Reduction and Management - ITU-D Question 5/2

   · Taxonomy evidence: The ITU report identifies tethered UAV equipment communicating with ground equipment through the tether's optical-fiber data path. This independently establishes guided optical communication in an aircraft-external link context. ([itu.int](https://www.itu.int/dms_pub/itu-d/opb/stg/D-STG-SG02.xx.xx-2021-PDF-E.pdf))

2. Safe-T 2 - Advanced Tethering System Brochure

   · Taxonomy evidence: The same commercial brochure identifies an optional optical-fiber communications configuration, supporting separate guided-optical and electrical communications categories. ([elistair.com](https://elistair.com/wp-content/uploads/2021/xx.xx/Safe-T_2_-_Leaflet.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

3. Tethered Drone Cables for Commercial & Defense - Gore

   · Taxonomy evidence: The page explicitly identifies optical fiber within its drone-tether communications offering. A combined cable does not establish that every available data path is used in a particular purchased configuration. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
30. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
31. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
32. Safe-T Drone Power Station - Elistair
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.

8.5. Cellular Communications

Table 52. Global Drone Data Link System Market Size, by Cellular Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 53. Global Drone Data Link System Market Size, by Cellular Communications, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 122 125 V19.2.0 (2026-01): Unmanned Aerial System Support in 3GPP

   · Taxonomy evidence: The January 2026 specification covers UAV communications through 3GPP systems and identifies cellular access nodes carried by UAVs. Cellular bearer identity therefore need not imply a ground-based access node or public-network ownership. This post-base-year standard is category evidence, not 2025 sales evidence.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))

   · Taxonomy evidence: The standard addresses 3GPP provision of UAV-controller communications and recognizes direct and network-assisted C2 communication. It also identifies cellular access nodes carried onboard UAVs, supporting cellular classification without equating it to terrestrial network ownership.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))

2. Instructions for the Certificate of Waiver or Authorization - FAA

   · Taxonomy evidence: Cellular-network connectivity is explicitly identified as a C2-link type.
   ([faa.gov](https://www.faa.gov/uas/advanced_operations/instructions-drone-operators-completing-faa-form-xx.xx-xx.xx))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.

8.6. Wired Electrical Communications

Table 55. Global Drone Data Link System Market Size, by Wired Electrical Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Safe-T 2 - Advanced Tethering System Brochure

   · Taxonomy evidence: The supplier's Safe-T xx.xx brochure identifies broadband-over-power-line communications within the drone tether offering. This supports an electrical data-bearing tether category rather than treating every tether as optical or power-only. Current configuration continuity across revisions is not established. ([elistair.com](https://elistair.com/wp-content/uploads/2021/xx.xx/Safe-T_2_-_Leaflet.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.

2. Tethered Drone Cables for Commercial & Defense - Gore

   · Taxonomy evidence: The commercial drone-cable page distinguishes an electrical data pair from a power pair and an optical-fiber element, supporting electrical data transport as a recognized component function. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

8.7. Free-Space Optical Communications

Table 58. Global Drone Data Link System Market Size, by Free-Space Optical Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 59. Global Drone Data Link System Market Size, by Free-Space Optical Communications, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Quantum Technologies Are Changing the Face of Unmanned Aircraft Communications - NASA

   · Taxonomy evidence: NASA's January xx.xx 2020 account identifies an optical data channel in research intended for unmanned-aircraft applications, with hardware flown on a Twin Otter research aircraft. It supports the named optical technology but is not evidence of merchant availability or a commercial deployment on an unmanned aircraft. ([nasa.gov](https://www.nasa.gov/aeronautics/quantum-technologies-are-changing-the-face-of-unmanned-aircraft-communications/))

   · Taxonomy evidence: NASA identifies an optical data-communications channel in research intended for unmanned-aircraft applications. The account establishes the named technology category while describing research and flight demonstrations, not commercial drone-link availability. ([nasa.gov](https://www.nasa.gov/aeronautics/quantum-technologies-are-changing-the-face-of-unmanned-aircraft-communications/))

2. HAWK - Optical Communication Terminal for Airborne and Ground Operations

   · Taxonomy evidence: Mynaric identifies HAWK as an optical communications terminal with UAS applications, but explicitly describes its status as an early-generation product for demonstrations and use-case verification. The page does not establish unrestricted current drone-market sales. ([mynaric.com](https://mynaric.com/products/hawk))

   · Taxonomy evidence: The page distinguishes optical client-data transmission from an additional radio connection required by the described version. Optical classification therefore does not imply the complete absence of ancillary RF connectivity. ([mynaric.com](https://mynaric.com/products/hawk))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. Mynaric AG - Annual Report 2023
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.

9. Drone Data Link System Market, by Network Topology

[illegible] For the latter, procurement should identify ownership and support of the common infrastructure because several aircraft relationships can depend on it. The commercial advantage of centralized coordination must be weighed against that shared dependency.

Decentralized Multipoint Networks distribute communications relationships among participating nodes, but do not eliminate supplier or management obligations. Commercial mesh capability establishes an available architecture, not automatic compatibility with another vendor's installed network. [illegible]

[illegible] For a composite deployment, the buyer should require one documented commercial scope covering the constituent arrangements and their interfaces. Public architecture descriptions do not establish supplier responsibility for a particular combined deployment; separate purchases preserve choice but can leave interface accountability unresolved.

Figure 13. Global Drone Data Link System Market, by Network Topology: Market share evolution, 2025-2032

Figure 14. Global Drone Data Link System Market, by Network Topology: Market size by category, 2025

Figure 15. Global Drone Data Link System Market, by Network Topology: Market size and growth, 2025-2032

Table 61. Global Drone Data Link System Market, by Network Topology growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Centralized Multipoint Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Decentralized Multipoint Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hybrid Network Topologies	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Point-to-Point Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 62. Global Drone Data Link System Market Size, by Network Topology, 2017-2032 (USD Million)

Network Topology	2023	2024	2025	2026	2027	2032	CAGR (%)
Centralized Multipoint Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Decentralized Multipoint Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. UAV Data Link and Unmanned Communications - DTC, a Codan Company
   - DTC describes its communications family as supporting point-to-point and mesh arrangements. Product capability therefore does not independently identify the arrangement purchased by a customer. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
2. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   - NIST distinguishes point-to-point, single-link, multi-UAS and mesh communications settings in its public-safety portfolio. These are demand-side distinctions, not evidence of purchased deployment prevalence. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Taxonomy evidence: NIST's UAS communications portfolio distinguishes single-link, point-to-point, multi-UAS, relay, and mesh configurations in its public-safety communications work. These are independent demand-side network distinctions, not supplier-specific product names. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
3. Review of Unmanned Aerial Vehicle Swarm Communication Architectures and Routing Protocols
   - The peer-reviewed review distinguishes centralized and decentralized UAV communications and describes combined centralized inter-group and decentralized intra-group arrangements. It supports topology differentiation, not supplier-specific commercial commitments. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))
   - Taxonomy evidence: The peer-reviewed review distinguishes centralized UAV communications through a common infrastructure node from decentralized UAV ad hoc communications. Its architecture descriptions support topology definitions, not market penetration or sales. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))

4. ETSI TS 122 125 V19.2.0 (2026-01): Unmanned Aerial System Support in 3GPP
   · Taxonomy evidence: Direct and network-assisted C2 relationships, including redundant links, are recognized separately from the underlying transport. Bearer, endpoint topology, and network responsibility consequently remain distinct analytical questions.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
   · Taxonomy evidence: The standard distinguishes the communications transport network from the UAV/controller relationship and allows redundant communications links. This supports keeping bearer and deployed topology as separate classification questions.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
5. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
6. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
7. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
8. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
9. Telemetry Radios - Holybro Store
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

10. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
11. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
12. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
13. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

14. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
15. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
16. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
17. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
18. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
19. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
20. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
21. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
22. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

9.1. Point-to-Point Networks

Table 63. Global Drone Data Link System Market Size, by Point-to-Point Networks, by Region, 2017-2032 (USD Million)

Sources & Evidence

1. Uncrewed Aircraft Systems - NIST Public Safety Communications Research

   · Taxonomy evidence: The portfolio explicitly recognizes point-to-point and single-link drone communications configurations. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.

9.2. Centralized Multipoint Networks

Table 66. Global Drone Data Link System Market Size, by Centralized Multipoint Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TR 102 328 V1.1.1 - Multipoint Equipment and Mesh Topology

   · Taxonomy evidence: ETSI identifies a central hub or station in point-to-multipoint networks. This supplies standardized topology terminology; its fixed-radio scope is adapted to UAV networks only alongside UAV-specific evidence.
   ([etsi.org](https://www.etsi.org/deliver/etsi_tr/102300_102399/xx.xx/xx.xx.01_60/tr_102328v010101p.pdf))

2. Review of Unmanned Aerial Vehicle Swarm Communication Architectures and Routing Protocols
   - Taxonomy evidence: The review describes multiple UAVs communicating through a central infrastructure node and separately identifies star arrangements, supporting the hub-mediated multipoint category. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.

9.3. Decentralized Multipoint Networks

Table 69. Global Drone Data Link System Market Size, by Decentralized Multipoint Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Uncrewed Aircraft Systems - NIST Public Safety Communications Research

· Taxonomy evidence: The portfolio explicitly recognizes multi-hop mesh behavior and multi-UAS communications, supporting a decentralized multipoint grouping independently of the underlying radio bearer. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.

2. ETSI TR 102 328 V1.1.1 - Multipoint Equipment and Mesh Topology

· Taxonomy evidence: ETSI distinguishes multipoint-to-multipoint mesh networks by peer terminal relationships and communications between stations, rather than the radial central-station pattern of point-to-multipoint networks.
([etsi.org](https://www.etsi.org/deliver/etsi_tr/102300_102399/xx.xx/xx.xx.01_60/tr_102328v010101p.pdf))

3. Review of Unmanned Aerial Vehicle Swarm Communication Architectures and Routing Protocols

· Taxonomy evidence: The review identifies ring and mesh intra-UAV communications and peer forwarding, supporting a broader decentralized multipoint category rather than limiting it to one mesh product family. ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

25. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
30. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

9.4. Hybrid Network Topologies

Table 72. Global Drone Data Link System Market Size, by Hybrid Network Topologies, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 73. Global Drone Data Link System Market Size, by Hybrid Network Topologies, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Review of Unmanned Aerial Vehicle Swarm Communication Architectures and Routing Protocols

   · Taxonomy evidence: The review describes multi-group UAV networks combining centralized inter-group communication with ad hoc intra-group networks. This supports the identified composite-topology category, but does not establish a commercial contract for it.
   ([mdpi-res.com](https://mdpi-res.com/d_attachment/applsci/applsci-xx.xx-xx.xx/article_deploy/applsci-xx.xx-xx.xx-with-cover.pdf?version=xx.xx))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.

26. Declaração de Conformidade para Uso Próprio - Anatel

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))

27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))

10. Drone Data Link System Market, by Link Function

Link Function separates the communications needed to manage an aircraft from the information purchased for its mission. ITU distinguishes flight-control and flight-data communications from mission-payload services. ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■

■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■ Buyers of Integrated Flight & Payload Communications should verify permission for each included purpose before treating a combined offering as a complete commercial solution. Combining the functions may simplify purchasing, but it does not consolidate every authorization or responsibility.

Payload purchasing also differs according to when the information is needed. ITU recognizes both stored mission data and real-time payload communications, while Elsight markets video, telemetry and sensor-data delivery within one platform. ■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■ ■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations

   · Halo's commercial description includes video, telemetry and sensor feeds within one platform, supporting integrated functional capability without establishing common authorization or acceptance. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))

2. Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems

   · The FCC's dedicated non-networked UAS rules limit communications to control and non-payload purposes. Product capability does not authorize unrelated payload traffic under that framework. ([federalregister.gov](https://www.federalregister.gov/documents/2025/xx.xx/xx.xx/2024-xx.xx/spectrum-rules-and-policies-for-the-operation-of-unmanned-aircraft-systems))

3. SkyLine UAS Command & Control - C2 for BVLOS

   · The marketed SkyLine ecosystem supports command-and-control and payload communications; this is capability evidence, not permission for every traffic purpose. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.

4. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · ITU's summary distinguishes flight-control communication and flight-data transport from mission-payload services, including imagery, sensor data and signal relay. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))

   · Taxonomy evidence: The recommendation distinguishes flight-control communication and flight-data transport from mission-payload communication services. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.

5. ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · ITU-T F.xx.xx recognizes stored mission data and real-time payload delivery, supporting a conditional distinction based on the information recipient's acceptance needs. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

6. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   · Taxonomy evidence: NIST identifies transfer of both telemetry and sensor data for public-safety UAS communications. This supports distinct traffic functions but does not establish an indivisible combined-function commercial contract.
   ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
7. ETSI TS 122 125 V19.2.0 (2026-01): Unmanned Aerial System Support in 3GPP
   · Taxonomy evidence: The specification distinguishes C2 communications from payload services. That supports function-based allocation while leaving commercial separability unresolved.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))
8. Frequently Used Terms - ICAO
   · Taxonomy evidence: ICAO defines the C2 link by its flight-management purpose, supporting a function-based distinction rather than treating all transmitted data as mission payload.
   ([icao.int](https://www.icao.int/frequently-used-terms))
9. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
10. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
11. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
12. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
13. Telemetry Radios - Holybro Store
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

14. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
15. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
16. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
17. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
18. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
19. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
20. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
21. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

22. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
23. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
24. Part 107 Waivers - Federal Aviation Administration
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
25. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
26. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

10.1. Integrated Flight & Payload Communications

Table 77. Global Drone Data Link System Market Size, by Integrated Flight & Payload Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Flight and mission-payload services coexist within the recommendation's communications framework; an indivisible combined-function commercial branch is an analytical allocation, not an official product classification.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.

10.2. Mission Payload Communications

Table 80. Global Drone Data Link System Market Size, by Mission Payload Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Summary - ITU-T Recommendation F.749.10 (05/2019), Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Mission-payload services include audio, video, imagery, sensor-data transport, and communication-signal relay. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.

2. U.S. Army UAS Interoperability - July 17, 2026

   · Taxonomy evidence: ISR imagery and associated payload information are separately identified from C2 interfaces, corroborating the payload-communications function. ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))

10.3. Flight-Management Communications

Table 83. Global Drone Data Link System Market Size, by Flight-Management Communications, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FAA Certificate of Waiver and Authorization 107W-2025-02991 - Pinnacle Drone Light Shows
   · Taxonomy evidence: The waiver identifies aircraft control links and real-time aircraft-status telemetry within the show deployment, independently supporting flight-management communications in an entertainment application. ([faa.gov](https://www.faa.gov/media/xx.xx))

2. Frequently Used Terms - ICAO
   · Taxonomy evidence: The C2 definition connects the remotely piloted aircraft and remote pilot station for managing flight. ([icao.int](https://www.icao.int/frequently-used-terms))
3. Summary - ITU-T Recommendation F.749.10 (05/2019), Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
   · Taxonomy evidence: Flight control and flight-data transport are expressly identified communications functions. ([itu.int](https://www.itu.int/dms_pubrec/itu-t/rec/f/T-REC-F.xx.xx-xx.xx-I%xx.xx%21SUM-HTM-E.htm))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

11. Drone Data Link System Market, by Mission Application

Mission Application changes the purchasing trigger and acceptance context even when communications equipment is shared. ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ Program sustainment can provide continuity while limiting independent substitution; the wider aircraft support agreement does not identify every link-specific obligation.

Search, Rescue & Emergency Response places a different emphasis on service availability at the time of an incident. ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■ A service based on existing infrastructure is less suitable where that infrastructure cannot support the intended response setting.

■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ Buyers should establish whether immediate information delivery or an accepted subsequent record is the purchase trigger. Inspection imagery should not be confused with a separately contracted maintenance activity, and permission for an observation mission does not establish permission for every agricultural or forestry activity.

Transport & Logistics requires a distinction between Cargo Transport & Delivery and Uncrewed Passenger Transport. In the United States, the FAA identifies Part xx.xx certification as the route for small drones carrying another party's property for compensation beyond visual line of sight. ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■

■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■

Media Production & Entertainment contains materially different link purchases. ■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■ ■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ Event buyers should therefore identify whether they are procuring an image feed, a coordinated show or both, and verify the relevant operator's authorization before committing to delivery.

■■■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■ The buyer should identify the service recipients and the party responsible for the communications service, rather than treating the aircraft's flight-control link as the entire deliverable. A relay capability described in a standard establishes a use case, not an executed service commitment or network-access entitlement.

■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■ ■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ Educational purchasers should establish institutional eligibility and the intended activity, while recreational and sporting buyers should confirm applicable operating and event requirements. Existing communications equipment may serve several purposes, but changing its use can change access conditions without changing its technology category.

Figure 19. Global Drone Data Link System Market Size, by Mission Application, 2025 vs 2032 (%)

Figure 20. Global Drone Data Link System Market Size, by Mission Application, 2025 vs 2026 vs 2032

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland

   · Swisscom's August xx.xx 2024 announcement describes first-responder and inspection services. It supports a managed purchasing alternative, not incident-specific availability or completion of the entire announced network.
   ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.

2. Uncrewed Aircraft Systems - NIST Public Safety Communications Research

   · NIST identifies first-responder communications needs in environments with degraded or destroyed infrastructure, supporting incident-area availability as a purchasing condition.
   ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

3. ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
   - The recommendation identifies inspection, surveillance, disaster, agricultural and scientific information settings. It does not establish a universal live-service requirement for those applications. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
   - Taxonomy evidence: Appendix I names civilian-UAV communication-service applications across agriculture, inspection, surveillance, disaster monitoring, media, logistics, and research. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
4. Desider, Issue 199, June 2025 - Protector Enters Service
   - The June 2025 UK government publication reports Protector entering service as an armed remotely piloted program and describes a continuing industry support arrangement. It does not isolate every communications obligation within the wider program. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))
5. Drone Regulatory System - Understanding European Drone Regulations and the Aviation Regulatory System
   - EASA identifies infrastructure inspection, surveying, agricultural monitoring, environmental monitoring, emergency response, filming and educational applications. Their differing information acceptance needs are analytical implications, not a regulator-prescribed market partition. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/Understanding-European-Drone-Regulations-and-the-Aviation-Regulatory-System))
6. Drone Integration: Concept of Operations - May 2025
   - The FAA concept of operations distinguishes agricultural observation from activities subject to agricultural-operator requirements and includes forest preservation within the agricultural context. Only these high-level permission differences are used. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))
7. Matt A Burgess, PhD - U.S. Geological Survey
   - USGS's official profile describes scientific and environmental UAS applications and the National Uncrewed Systems Office's data-collection role for DOI and USGS scientists. No experimental methods or personnel participation claims are used. ([usgs.gov](https://www.usgs.gov/staff-profiles/matt-a-burgess))
8. Package Delivery by Drone (Part 135)
   - The FAA identifies Part xx.xx certification as the route for small drones carrying another party's property for compensation beyond visual line of sight. This supports a cargo-specific access condition, not passenger or Global authorization. ([faa.gov](https://www.faa.gov/uas/advanced_operations/package_delivery_drone))
9. EHang EH216-S Interpretation Series: Air Operator Certificate
   - EHang reported operator certificates issued on March xx.xx 2025 and explained that their initial human-carrying scope involved tourism and flight experiences returning to the departure location. The account does not establish unrestricted point-to-point transport permission. ([ehang.com](https://www.ehang.com/news/xx.xx.html))
10. FAA Certificate of Waiver and Authorization 107W-2025-02991 - Pinnacle Drone Light Shows
    - The FAA issued Pinnacle Drone Light Shows a nontransferable waiver with an effective period beginning September xx.xx 2025 and communications-related conditions. It establishes a specific show setting, not another operator's permission. ([faa.gov](https://www.faa.gov/media/xx.xx))
11. ITU-T Y.4215: Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - ITU-T Y.xx.xx identifies UAS-aided relaying and emergency response as separate communications use cases. This establishes the mission role, not an executed supplier service commitment. ([itu.int](https://www.itu.int/itu-t/recommendations/rec.aspx?lang=en&rec=xx.xx))
12. Educational Users - Federal Aviation Administration
    - FAA educational guidance distinguishes qualifying institutional pathways and Part xx.xx activity. Educational purpose alone does not identify one universal operating entitlement. ([faa.gov](https://www.faa.gov/uas/educational_users))

13. FAI Drone Racing World Cup - World Air Sports Federation
· FAI describes the Drone Racing World Cup as a series of open international competitive drone events, establishing sport as a distinct application setting.
([fai.org](https://www.fai.org/event/fai-drone-racing-world-cup))
14. Recreational Flyers & Community-Based Organizations - Federal Aviation Administration
· The FAA distinguishes recreational purpose from compensation and identifies nonrecreational examples, supporting activity-specific permission checks across recreational and other missions.
([faa.gov](https://www.faa.gov/uas/recreational_flyers))
15. ITU-T Recommendation M.3391 (03/2025): Requirements for Smart Maintenance of Telecommunication Infrastructure Based on Unmanned Aerial Vehicles
· Taxonomy evidence: The recommendation provides a specialized infrastructure-maintenance demand setting. Treating that objective separately from generic surveying is an analytical primary-purpose rule, not a claim that ITU prescribes this complete market partition.
([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-M.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items)
)
16. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA
· Taxonomy evidence: EASA identifies drone applications including delivery, photography, disaster management, rescue, mapping, inspection, agriculture, and surveillance.
([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))
17. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
18. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
19. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

20. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
21. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
22. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
23. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
24. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.

25. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
26. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
27. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
28. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
29. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
30. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
31. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

32. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
33. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
34. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
35. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
36. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
37. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
38. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.

39. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
40. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

11.1. Intelligence, Surveillance & Reconnaissance

Table 88. Global Drone Data Link System Market Size, by Intelligence, Surveillance & Reconnaissance, by Region, 2017-2032 (USD Million)

Sources & Evidence

1. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Police and traffic-security surveillance are named civilian-UAV communications applications.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. U.S. Army UAS Interoperability - July 17, 2026

   · Taxonomy evidence: The Army's July xx.xx 2026 publication identifies UAS data links, C2 interfaces, and ISR payload-data dissemination as distinct interoperability disciplines.
   ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.

11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

11.2. Combat Operations

Table 91. Global Drone Data Link System Market Size, by Combat Operations, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Desider, Issue 199, June 2025 - Next-Generation Armed RPAS Protector Enters Service
   - Taxonomy evidence: The June 2025 government publication reports Protector entering service as an armed remotely piloted aircraft system, corroborating the combat-oriented demand setting without isolating communications expenditure. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))
2. Protector Enters Service with Royal Air Force - June 16, 2025
   - Taxonomy evidence: The June xx.xx 2025 announcement identifies strike operations among Protector's intended remotely piloted roles, establishing a combat demand setting without isolating communications revenue. ([raf.mod.uk](https://www.raf.mod.uk/news/articles/protector-enters-service-with-royal-air-force/))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.

11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

11.3. Recreation & Sport

Table 94. Global Drone Data Link System Market Size, by Recreation & Sport, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recreational Flyers & Community-Based Organizations - FAA
   · Taxonomy evidence: The FAA distinguishes flying solely for recreation from nonrecreational purposes, supporting recreation as a mission-purpose category rather than a synonym for all unpaid activity. ([faa.gov](https://www.faa.gov/uas/recreational_flyers))
2. FAI Drone Racing World Cup - World Air Sports Federation
   · Taxonomy evidence: FAI identifies its Drone Racing World Cup as an international series of competitive drone-piloting events, independently establishing sport as a distinct mission setting. ([fai.org](https://www.fai.org/event/fai-drone-racing-world-cup))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.

11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

11.4. Inspection & Maintenance

Table 97. Global Drone Data Link System Market Size, by Inspection & Maintenance, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T Recommendation M.3391 (03/2025): Requirements for Smart Maintenance of Telecommunication Infrastructure Based on Unmanned Aerial Vehicles

   · Taxonomy evidence: ITU-T M.xx.xx approved March xx.xx 2025, recognizes UAV-based patrol supporting maintenance of outdoor telecommunications infrastructure. Its smart-maintenance scope supports inspection and condition-assessment demand; it does not independently establish drone-performed physical repair or attributable link sales.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-M.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items)
)

2. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Power-line and petroleum-pipeline inspection are explicit communications-service use cases; physical maintenance is not established by this record.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

3. Drone Integration: Concept of Operations - FAA, May 2025

   · Taxonomy evidence: The May 2025 document identifies infrastructure inspection among demonstrated drone applications.
   ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
30. CY 2024 Small Unmanned Aircraft Systems Survey Report
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
31. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.

11.5. Media Production & Entertainment

Table 100. Global Drone Data Link System Market Size, by Media Production & Entertainment, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FAA Certificate of Waiver and Authorization 107W-2025-02991 - Pinnacle Drone Light Shows

   · Taxonomy evidence: FAA waiver 107W-2025-xx.xx expressly concerns drone light-show operations and identifies their C2, transmission, and telemetry functions. Its stated effective period begins September xx.xx 2025; it establishes a specific entertainment demand setting, not separately priced link revenue or universal authorization. ([faa.gov](https://www.faa.gov/media/xx.xx))

2. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA

   · Taxonomy evidence: Photography and filming are described as commercial drone applications; the record does not isolate communications value for entertainment performances. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.

11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

11.6. Search, Rescue & Emergency Response

Table 103. Global Drone Data Link System Market Size, by Search, Rescue & Emergency Response, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 104. Global Drone Data Link System Market Size, by Search, Rescue & Emergency Response, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   · Taxonomy evidence: The portfolio's stated demand setting includes disasters, emergencies, fire-related data collection, and wide-area search.
   ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
2. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
   · Taxonomy evidence: Natural-disaster monitoring is identified as a civilian-UAV communication-service application.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
3. ITU-T Recommendation Y.4215 (02/2022): Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
   · Taxonomy evidence: The recommendation separately recognizes UAS-aided emergency-response communications, supporting an emergency demand setting without making every emergency relay deployment a distinct topology category.
   ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-Y.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))
4. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA
   · Taxonomy evidence: Rescue and firefighting applications explicitly use real-time information and aerial imagery for response decisions.
   ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

5. IFRC Drones Group

   · Taxonomy evidence: The group explicitly addresses aerial assessment and information supporting humanitarian disaster response. (drones.preparecenter.org)

6. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

7. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

8. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
9. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
10. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
11. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
12. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
13. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
14. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

15. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
16. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
17. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
18. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
19. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
20. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
21. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

22. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

23. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

24. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

25. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
26. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
27. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
28. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

29. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
30. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
31. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
32. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.

11.7. Agriculture & Forestry

Table 106. Global Drone Data Link System Market Size, by Agriculture & Forestry, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Agriculture-related civilian-UAV communication services are explicitly identified. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. Drone Integration: Concept of Operations - FAA, May 2025
   - Taxonomy evidence: The document recognizes agricultural assessment and aerial agricultural work, with forestry preservation within its agricultural context. Only these high-level application categories are used. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
30. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.

11.8. Surveying & Mapping

Table 109. Global Drone Data Link System Market Size, by Surveying & Mapping, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 111. Global Drone Data Link System Market Size, by Surveying & Mapping, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA
   - Taxonomy evidence: Geographic mapping is identified as a drone use case. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))
2. Drone Integration: Concept of Operations - FAA, May 2025
   - Taxonomy evidence: Aerial surveying is identified as a drone application addressed in the integration framework. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. CY 2024 Small Unmanned Aircraft Systems Survey Report
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.

11.9. Education, Training & Technology Development

Table 112. Global Drone Data Link System Market Size, by Education, Training & Technology Development, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Drone Integration: Concept of Operations - FAA, May 2025

   · Taxonomy evidence: Flight testing and demonstration are identified application settings, not evidence of commercial drone-link revenue.
   ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

2. Educational Users - FAA, Updated March 13, 2026
   - Taxonomy evidence: The FAA's educational-user publication identifies universities, colleges, technical schools, and educational programs using drones for education and research. ([faa.gov](https://www.faa.gov/uas/educational_users))
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
29. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

11.10. Transport & Logistics

Table 115. Global Drone Data Link System Market, by Transport & Logistics growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Cargo Transport & Delivery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Uncrewed Passenger Transport	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 先行先试 多地探索全空间无人体系建设 - 中国发展改革报社, May 19, 2025, Published by NDRC

   · Taxonomy evidence: Pilotless passenger carriage is a distinct transport demand setting alongside separately evidenced cargo delivery; the market includes only its identifiable unmanned-aircraft communications portion. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
29. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.

11.10.1. Cargo Transport & Delivery

Table 119. Global Drone Data Link System Market Size, by Cargo Transport & Delivery, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 120. Global Drone Data Link System Market Size, by Cargo Transport & Delivery, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

   · Taxonomy evidence: Logistics express delivery is a named civilian-UAV communication-service use case. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. Drone Integration: Concept of Operations - FAA, May 2025

   · Taxonomy evidence: Package delivery is a recognized drone application. ([faa.gov](https://www.faa.gov/uas/resources/policy_library/Drone-Integration-Concept-of-Operations-May-2025.pdf))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
29. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.

11.10.2. Uncrewed Passenger Transport

Table 122. Global Drone Data Link System Market Size, by Uncrewed Passenger Transport, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 先行先试 多地探索全空间无人体系建设 - 中国发展改革报社, May 19, 2025, Published by NDRC

   · Taxonomy evidence: The dated May xx.xx 2025 newspaper report published by NDRC describes a pilotless passenger-sightseeing demonstration and reports operator-certificate issuance on March xx.xx 2025. This corroborates a dated passenger application only; the exact certificate conditions and attributable drone-link purchases are not established by the article. No research-estimate claims on the page are used. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

   · Taxonomy evidence: The May xx.xx 2025 official article reports March xx.xx 2025 operating-certificate issuance for pilotless passenger aircraft and describes a passenger-sightseeing demonstration. It establishes the passenger application, not attributable drone-link sales or unrestricted transport authorization. ([ndrc.gov.cn](https://www.ndrc.gov.cn/wsdwhfz/xx.xx/t20250519_1397787_ext.html))

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

28. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.

11.11. Scientific Research & Environmental Monitoring

Table 125. Global Drone Data Link System Market Size, by Scientific Research & Environmental Monitoring, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ITU-T Recommendation F.749.10 (05/2019): Requirements for Communication Services of Civilian Unmanned Aerial Vehicles

· Taxonomy evidence: The recommendation recognizes scientific-research data transport and meteorological and territorial-resource applications.
([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-F.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

2. National Uncrewed Systems Office - U.S. Geological Survey

· Taxonomy evidence: USGS describes UAS data collection for scientific remote sensing, water-quality research, and environmental restoration, establishing a scientific and environmental demand setting.
([usgs.gov](https://www.usgs.gov/programs/national-land-imaging-program/science/national-uncrewed-systems-office))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))

11.12. Communications Relay

Table 128. Global Drone Data Link System Market Size, by Communications Relay, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ETSI TS 122 125 V19.2.0 (2026-01): Unmanned Aerial System Support in 3GPP
   · Taxonomy evidence: An onboard radio access node provides connectivity to user equipment, independently supporting an airborne communications-platform use case. The standard does not disclose communications-relay market revenue.
   ([etsi.org](https://www.etsi.org/deliver/etsi_ts/122100_122199/xx.xx/xx.xx.00_60/ts_122125v190200p.pdf))

2. ITU-T Recommendation Y.4215 (02/2022): Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things

   · Taxonomy evidence: ITU-T identifies UAS-aided relaying and offloading as applications in which unmanned aircraft act as communications platforms. ([itu.int](https://www.itu.int/rec/dologin_pub.asp?id=T-REC-Y.xx.xx-xx.xx-I%xx.xx%21PDF-E&lang=e&type=items))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

12. Drone Data Link System Market, by End User

[illegible] Suppliers should establish the commissioning unit, applicable procurement eligibility and acceptance authority rather than apply a defense purchasing condition to every public institution. Component screening can support consideration, but the relevant procurement and offering status still require confirmation.

[illegible] A link supplier addressing the service operator must resolve continuing support and connectivity relationships; a supplier addressing the mission customer must make the included communications contribution and retained duties visible. Managed delivery is suitable when those responsibilities match the customer's needs, while direct equipment purchasing better preserves control for customers able to manage the relationships themselves.

Nonprofit Institutions have a documented demand setting independent of both government and household consumption. [illegible] Consequently, a donated or unpaid deployment still requires activity-specific permission and accountable support.

Individual & Household Consumers can purchase an integrated retail ecosystem rather than a separately negotiated communications service. [illegible] Personal ownership does not make every subsequent activity recreational: the FAA's purpose-based distinction means that a change to organizational or service use can require a different permission assessment even when the equipment is unchanged.

Figure 21. Global Drone Data Link System Market, by End User: Market share evolution, 2025-2032

Figure 22. Global Drone Data Link System Market, by End User: Market size by category, 2025

Figure 23. Global Drone Data Link System Market, by End User: Market size and growth, 2025-2032

Table 131. Global Drone Data Link System Market, by End User growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Civilian Government & Public Institutions	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Military & Defense Organizations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonprofit Institutions	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland
   - Swisscom describes customers purchasing drone services combining infrastructure, applications and data storage, illustrating the distinction between a mission customer and the operator coordinating communications. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
2. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   - DIU distinguishes its complete-aircraft list from its framework of interoperable components and software and differentiates verification candidates from completed additions. Procurement applicability remains offering-specific. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
3. Aquila20 FPV Kit - BETAFPV
   - BETAFPV's retail kit includes the aircraft, goggles and controller. It illustrates an integrated consumer purchase, not a standalone-link entitlement or universal replacement compatibility. ([betafpv.com](https://betafpv.com/products/aquila20-fpv-kit))
4. Matt A Burgess, PhD - U.S. Geological Survey
   - The official material identifies USGS and DOI scientists as institutional users of unmanned-aircraft data collection, establishing a civilian government setting distinct from defense procurement. ([usgs.gov](https://www.usgs.gov/staff-profiles/matt-a-burgess))
5. Recreational Flyers & Community-Based Organizations - Federal Aviation Administration
   - FAA guidance explicitly identifies volunteer drone activity for a nonprofit as potentially nonrecreational. Nonprofit status and personal ownership do not independently determine permission. ([faa.gov](https://www.faa.gov/uas/recreational_flyers))

6. IFRC Drones Group

· The IFRC Drones Group identifies National Societies, the Federation Secretariat and ICRC participants and connects drone capabilities with humanitarian mandates and legal and ethical frameworks. It establishes an institutional demand setting, not individual purchasing capability or exemption. (drones.preparecenter.org)

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.

7. Frequently Used Terms - ICAO

· Taxonomy evidence: ICAO's operator definition includes persons, organizations, and enterprises engaged in aircraft operations, supporting separation of operating customers from equipment-selling intermediaries. ([icao.int](https://www.icao.int/frequently-used-terms))

8. Educational Users - FAA, Updated March 13, 2026

· Taxonomy evidence: Educational users can operate through more than one regulatory pathway; educational purpose therefore does not by itself establish a mutually exclusive institutional buyer sector. ([faa.gov](https://www.faa.gov/uas/educational_users))

9. Main Concepts and Definitions of Foreign Direct Investment - OECD Benchmark Definition of Foreign Direct Investment, Fifth Edition, 2025

· Taxonomy evidence: The OECD's 2025 benchmark distinguishes households from independently recognized corporations, nonprofit institutions, and government units, supporting institutional rather than mission-based buyer classification. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))

10. Conceptual Framework - OECD Handbook on the Compilation of Household Distributional Results on Income, Consumption and Saving in Line with National Accounts Totals, 2024

· Taxonomy evidence: The conceptual framework distinguishes corporations, general government, households, and nonprofit institutions serving households as institutional sectors; the drone-buyer partition is an explicit adaptation of these distinctions. ([oecd.org](https://www.oecd.org/en/publications/oecd-handbook-on-the-compilation-of-household-distributional-results-on-income-consumption-and-saving-in-line-with-national-accounts-totals_5a3b9119-en/full-report/component-xx.xx.html))

11. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

12. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

· Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

13. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
14. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
15. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
16. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
17. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
18. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
19. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
20. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.

21. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
22. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
23. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
24. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
25. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
26. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
27. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
28. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

29. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
30. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.

Sources & Evidence

1. Desider, Issue 199, June 2025 - Next-Generation Armed RPAS Protector Enters Service
   · Taxonomy evidence: The publication identifies the Royal Air Force as the operating defense customer for the remotely piloted program. This supports institutional buyer identity, not a supplier-market-share claim. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/685bf0de0433072fce0e1001/desider_-_issue_199__June_2025.pdf))
2. Congressional Record - Senate, February 5, 2024, Pages S356-S357: India MQ-9B Proposed-Sale Notification
   · Taxonomy evidence: The proposed purchaser is the Government of India for a defense aircraft program containing identified communications equipment; proposed procurement is not proof of realized link revenue. ([congress.gov](https://www.congress.gov/xx.xx/crec/2024/xx.xx/xx.xx/xx.xx/xx.xx/CREC-2024-xx.xx-xx.xx-pt1-PgS356-xx.xx.pdf))
3. U.S. Army UAS Interoperability - July 17, 2026
   · Taxonomy evidence: The publication establishes Army demand for unmanned-aircraft communications interfaces and associated ISR information exchange. ([army.mil](https://www.army.mil/article-amp/xx.xx/u_s_army_uas_interoperability))
4. Protector Enters Service with Royal Air Force - June 16, 2025
   · Taxonomy evidence: The Royal Air Force reports delivered ground-control stations and a remotely piloted aircraft program, directly identifying a defense operating customer. ([raf.mod.uk](https://www.raf.mod.uk/news/articles/protector-enters-service-with-royal-air-force/))

5. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
6. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

7. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
8. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
9. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
10. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
11. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
12. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.

13. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
14. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
15. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
16. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
17. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
18. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

19. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

20. Part 107 Waivers - Federal Aviation Administration

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

21. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

22. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

23. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
24. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

25. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
26. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
27. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
28. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
29. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
30. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

31. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.

12.2. Commercial Enterprises & Service Operators

Table 136. Global Drone Data Link System Market Size, by Commercial Enterprises & Service Operators, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA

   · Taxonomy evidence: The regulator describes business use in media, agriculture, industrial monitoring, and security. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

2. Main Concepts and Definitions of Foreign Direct Investment - OECD Benchmark Definition of Foreign Direct Investment, Fifth Edition, 2025

   · Taxonomy evidence: Enterprises can be incorporated or unincorporated, and government- or household-owned quasi-corporations can be treated separately from their owners. Business-use classification therefore cannot rely only on public ownership or individual legal identity. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))

3. Glossary - Government at a Glance 2019, OECD

   · Taxonomy evidence: Public corporations are distinguished from general government, supporting placement of public commercial enterprises with commercial operating customers rather than automatically with civilian agencies. ([oecd.org](https://www.oecd.org/en/publications/government-at-a-glance-2019_8ccf5c38-en/full-report/component-xx.xx.html))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
30. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

12.3. Individual & Household Consumers

Table 139. Global Drone Data Link System Market Size, by Individual & Household Consumers, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 140. Global Drone Data Link System Market Size, by Individual & Household Consumers, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Recreational Flyers & Community-Based Organizations - FAA

   · Taxonomy evidence: The publication expressly recognizes personal recreational drone flyers; household-consumer classification remains separate from organizational regulatory eligibility. ([faa.gov](https://www.faa.gov/uas/recreational_flyers))

2. Main Concepts and Definitions of Foreign Direct Investment - OECD Benchmark Definition of Foreign Direct Investment, Fifth Edition, 2025

   · Taxonomy evidence: Households are recognized institutional units distinct from legal and social entities; the taxonomy adapts this distinction to personal, nonbusiness drone-link consumption. ([oecd.org](https://www.oecd.org/en/publications/2025/xx.xx/oecd-benchmark-definition-of-foreign-direct-investment-fifth-edition_38a25baf/full-report/main-concepts-and-definitions-of-foreign-direct-investment_c3240e7d.html))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

29. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
30. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.

12.4. Civilian Government & Public Institutions

Table 142. Global Drone Data Link System Market Size, by Civilian Government & Public Institutions, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Drones & Air Mobility Benefits for European Citizens and Air Transport - EASA

   · Taxonomy evidence: Law enforcement and rescue services are identified operating settings, supporting civilian public-service customers. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/drones-air-mobility-landscape/benefits))

2. National Uncrewed Systems Office - U.S. Geological Survey

   · Taxonomy evidence: The office conducts unmanned-aircraft research and data collection for USGS and Department of the Interior scientists, directly identifying civilian government users. ([usgs.gov](https://www.usgs.gov/programs/national-land-imaging-program/science/national-uncrewed-systems-office))

3. Glossary - Government at a Glance 2019, OECD

   · Taxonomy evidence: The glossary includes government-controlled nonmarket institutions in general government while excluding public corporations and government-owned quasi-corporations. This supports a control-and-economic-role rule for public institutions. ([oecd.org](https://www.oecd.org/en/publications/government-at-a-glance-2019_8ccf5c38-en/full-report/component-xx.xx.html))

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

12.5. Nonprofit Institutions

Table 145. Global Drone Data Link System Market Size, by Nonprofit Institutions, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IFRC Drones Group

· Taxonomy evidence: The IFRC Drones Group identifies National Societies, the Federation Secretariat, and ICRC participants using or developing drone applications for humanitarian programs. This supports an organizational user setting, not separately disclosed link purchases. (drones.preparecenter.org)

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.

2. Conceptual Framework - OECD Handbook on the Compilation of Household Distributional Results on Income, Consumption and Saving in Line with National Accounts Totals, 2024

· Taxonomy evidence: Nonprofit institutions serving households are recognized separately from government, corporations, and households, supporting an independent nonmarket nonprofit buyer branch. ([oecd.org](https://www.oecd.org/en/publications/oecd-handbook-on-the-compilation-of-household-distributional-results-on-income-consumption-and-saving-in-line-with-national-accounts-totals_5a3b9119-en/full-report/component-xx.xx.html))

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

13. Drone Data Link System Market, by Deployment Model

[illegible] A buyer seeking customer-managed control should verify administrative rights, authority over network relationships and retained support duties. This preserves direct control only when the customer has the contractual rights and organizational capability to exercise it; an installed terminal or local console is not sufficient evidence.

Provider-Managed Networks can consolidate specific continuing duties. The Galaxy xx.xx and Viasat collaboration announced March xx.xx 2026 describes provisioning, billing, monitoring and lifecycle coordination for Velaris delivery. [illegible]

Hybrid Network Management remains a distinct included arrangement in which substantive management responsibilities are divided. [illegible] A proposed hybrid arrangement therefore needs a documented responsibility and change-control allocation before it can be treated as an executable commercial alternative.

Figure 24. Global Drone Data Link System Market, by Deployment Model: Market share evolution, 2025-2032

Figure 25. Global Drone Data Link System Market, by Deployment Model: Market size by category, 2025

Figure 26. Global Drone Data Link System Market, by Deployment Model: Market size and growth, 2025-2032

Table 148. Global Drone Data Link System Market, by Deployment Model growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Customer-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hybrid Network Management	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Provider-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 149. Global Drone Data Link System Market Size, by Deployment Model, 2017-2032 (USD Million)

Deployment Model	2023	2024	2025	2026	2027	2032	CAGR (%)
Customer-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hybrid Network Management	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Provider-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations

   · Elsight offers cloud-based and on-premises management options; hosting location alone does not establish contractual network control. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.

2. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft

   · The March xx.xx 2026 Galaxy xx.xx and Viasat announcement describes provisioning, billing, monitoring and lifecycle coordination for Velaris delivery. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.

3. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026

   · The published external-service provisions call for allocation of operator-provider roles and responsibilities; they do not establish a named hybrid-management contract. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

   · Taxonomy evidence: The June 2026 compilation includes provisions for externally supplied services and allocation of responsibilities between the UAS operator and service providers. These support a responsibility-based deployment axis but are not a universal global contract classification. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

   · Taxonomy evidence: The external-services provisions require allocation of roles and responsibilities between the UAS operator and external providers.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.

4. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures

   · Taxonomy evidence: The public definitions identify a C2 communications provider as an entity supplying some or all of the link service and define an enforceable service agreement covering provider obligations.

5. Nigeria Civil Aviation Regulations 2023 - Part 21: Remotely Piloted Aircraft System

   · Taxonomy evidence: Section xx.xx.xx.xx distinguishes full operator control from provider control over part or all of a C2 link, with responsibilities documented through agreements.

6. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

7. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
8. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
9. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
10. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
11. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
12. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
13. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
14. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

15. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
16. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
17. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
18. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
19. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
20. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

21. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
22. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
23. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

13.1. Customer-Managed Networks

Table 150. Global Drone Data Link System Market Size, by Customer-Managed Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)

Sources & Evidence

1. Nigeria Civil Aviation Regulations 2023 - Part 21: Remotely Piloted Aircraft System
   - Taxonomy evidence: Entirely operator-controlled C2 links are expressly recognized.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

28. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.

13.2. Hybrid Network Management

Table 153. Global Drone Data Link System Market Size, by Hybrid Network Management, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 154. Global Drone Data Link System Market Size, by Hybrid Network Management, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026, EASA

   · Taxonomy evidence: Allocation of operator-provider responsibilities supplies a basis for analyzing shared arrangements; the publication does not establish a named commercial agreement dividing substantive network-management functions. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.

2. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures

   · Taxonomy evidence: The provider definition permits partial service provision, furnishing a standards basis for separately allocating responsibility; it does not prescribe this taxonomy's hybrid label.

3. Nigeria Civil Aviation Regulations 2023 - Part 21: Remotely Piloted Aircraft System

   · Taxonomy evidence: Provider control over only part of a link is also recognized, supporting the category basis without establishing a named shared-management commercial contract.

4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
30. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.

13.3. Provider-Managed Networks

Table 156. Global Drone Data Link System Market Size, by Provider-Managed Networks, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026, EASA
   - Taxonomy evidence: Externally provided services necessary to the intended flight are explicitly recognized. This corroborates external service provision without proving that every provider manages the entire communications network. ([easa.europa.eu](https://www.easa.europa.eu/en/document-library/easy-access-rules/online-publications/easy-access-rules-unmanned-aircraft-systems?erules-id=ERULES-xx.xx-xx.xx))
   - Taxonomy evidence: The publication recognizes externally provided services necessary for flight safety and requires their performance to suit the intended operation.
2. ISO 21384-3:2026 - Uncrewed aircraft systems - Part 3: Operational procedures
   - Taxonomy evidence: C2 communications providers are included among external services supporting UAS operations.
3. Nigeria Civil Aviation Regulations 2023 - Part 21: Remotely Piloted Aircraft System
   - Taxonomy evidence: The regulation recognizes provider operational control over the entire C2 link.
4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
30. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.

14. Drone Data Link System Market, by Sales Channel

[illegible] The same originating supplier can therefore reach a buyer through different commercial relationships. Under Supplier-Direct Sales, the buyer should establish the manufacturer's own delivery and support commitments; intermediary participation does not by itself identify the seller of record or prove that an originating supplier's sale has become a separate resale.

[illegible] Authorized retail can provide an acceptable supported route; supplier-direct purchasing is an alternative when the buyer needs a direct commercial relationship. Neither route independently establishes aircraft acceptance or operating permission.

Value-Added Reseller and Integrator Sales are defensible where the intermediary contributes duties the buyer would otherwise coordinate. Galaxy xx.xx's announced Velaris role includes provisioning, billing and lifecycle coordination rather than traditional distribution alone. [illegible]

Figure 27. Global Drone Data Link System Market, by Sales Channel: Market share evolution, 2025-2032

Figure 28. Global Drone Data Link System Market, by Sales Channel: Market size by category, 2025

Figure 29. Global Drone Data Link System Market, by Sales Channel: Market size and growth, 2025-2032

Table 159. Global Drone Data Link System Market, by Sales Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Distribution and Retail Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Supplier-Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Value-Added Reseller and Integrator Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 160. Global Drone Data Link System Market Size, by Sales Channel, 2017-2032 (USD Million)

Sales Channel	2023	2024	2025	2026	2027	2032	CAGR (%)
Distribution and Retail Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Supplier-Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Value-Added Reseller and Integrator Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   - Galaxy xx.xx's announced role goes beyond traditional distribution through continuing provisioning and service coordination. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
2. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   - Ofcom requires relevant network-operator agreement for covered mobile and satellite use, supporting the distinction between intermediary coordination and network permission. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
3. Where To Buy
   - DJI distinguishes official and authorized channels and excludes unauthorized-dealer purchases from its warranty services. ([dji.com](https://www.dji.com/where-to-buy/online-retails))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
4. Doodle Labs announces launch of Reseller Program
   - Doodle Labs' UAV-facing reseller program includes distributors, value-added resellers and systems integrators. ([doodlelabs.com](https://doodlelabs.com/blog/announces-launch-of-reseller-program))
   - Taxonomy evidence: The November xx.xx 2023 channel-program announcement expressly addresses UAV-facing communications and names distributors, value-added resellers, and systems integrators.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
5. OneGov IT - GSA IT Vendor Management Office
   - Taxonomy evidence: GSA distinguishes OEM prime-contract relationships from reseller participation and separately discusses professional-service contracts. This is an independent cross-market framework for seller-role classification, not proof of drone-specific channel shares. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))

6. OneGov IT - IT Vendor Management Office
   - Taxonomy evidence: The procurement FAQs distinguish originating manufacturers' prime-contract role from reseller and integrator participation, supplying a cross-market seller-role classification.
7. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
8. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
9. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
10. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
11. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
12. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.

13. Codan FY2025 Results - ASX Announcement, August 21, 2025
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
14. Codan H1 FY2026 Investor Presentation - February 19, 2026
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
15. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
16. Elsight Limited - Appendix 4E and Annual Report 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
17. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
18. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
19. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
20. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

21. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
22. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
23. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
24. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
25. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

14.1. Supplier-Direct Sales

Table 161. Global Drone Data Link System Market Size, by Supplier-Direct Sales, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 162. Global Drone Data Link System Market Size, by Supplier-Direct Sales, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 163. Global Drone Data Link System Market Size, by Supplier-Direct Sales, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. OneGov IT - GSA IT Vendor Management Office
   - Taxonomy evidence: An OEM can remain the prime supplier while value-added firms perform supporting functions. Supporting intermediary participation therefore does not by itself reclassify the originating supplier's sale as intermediary resale. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))
2. OneGov IT - IT Vendor Management Office
   - Taxonomy evidence: An OEM can remain prime contractor while other firms provide supporting functions; subcontractor participation alone does not establish an intermediary sale.

3. VERSITRON Introduces NDAA-Compliant Tethered Drone Fiber Optic Converters for Secure Airborne Communications
   - Taxonomy evidence: The June xx.xx 2026 announcement directs purchasers to contact the manufacturer for pricing and product supply, establishing a direct commercial route.
4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
   ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.

12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results

    · Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

19. Part 107 Waivers - Federal Aviation Administration

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

    · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary

    · Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

30. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.

14.2. Distribution and Retail Sales

Table 164. Global Drone Data Link System Market Size, by Distribution and Retail Sales, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Doodle Labs announces launch of Reseller Program
   - Taxonomy evidence: Distributors are explicitly identified as eligible partners for the supplier's worldwide communications reseller program.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.

14.3. Value-Added Reseller and Integrator Sales

Table 167. Global Drone Data Link System Market Size, by Value-Added Reseller and Integrator Sales, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 168. Global Drone Data Link System Market Size, by Value-Added Reseller and Integrator Sales, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. OneGov IT - GSA IT Vendor Management Office

   · Taxonomy evidence: Integration, engineering, logistics, and compliance are identified value-added roles. Whether a particular drone-link integrator is the intermediary seller, originating supplier, or subcontractor still requires transaction evidence. ([itvmo.gsa.gov](https://itvmo.gsa.gov/onegov/))

2. OneGov IT - IT Vendor Management Office
   - Taxonomy evidence: Value-added resellers and integrators provide engineering, integration, logistics, compliance, and mission support. This establishes the intermediary role, not a drone-specific revenue allocation.
3. Doodle Labs announces launch of Reseller Program
   - Taxonomy evidence: Value-added resellers and systems integrators are explicitly identified as channel partners for UAV-facing communications products; their individual contractual roles require transaction evidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

30. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
31. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.

15. Drone Data Link System Market, by Operating Envelope

[redacted] The FAA states that a waiver is unnecessary when all applicable Part xx.xx rules are met, while identifying visual-line-of-sight departures among operations requiring a waiver. A long-range radio claim therefore does not establish a BVLOS procurement requirement, and a visual-line-of-sight deployment should not automatically be treated as approval-free.

Beyond-Visual-Line-of-Sight Deployments introduce a separate authorization-dependent commitment. For applicable U.S. small-UAS operations, the FAA provides a Part xx.xx waiver route. [redacted]

Buyers should commit to deployment-dependent communications services only after identifying the actual operating permission and its conditions. [redacted] That separation may delay a broader rollout, but avoids treating an application pathway or a supplier capability claim as an approved mission schedule.

Figure 30. Global Drone Data Link System Market, by Operating Envelope: Market share evolution, 2025-2032

Figure 31. Global Drone Data Link System Market, by Operating Envelope: Market size by category, 2025

Table 170. Global Drone Data Link System Market, by Operating Envelope growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Beyond-Visual-Line-of-Sight Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Visual-Line-of-Sight-Only Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 171. Global Drone Data Link System Market Size, by Operating Envelope, 2017-2032 (USD Million)

Operating Envelope	2023	2024	2025	2026	2027	2032	CAGR (%)
Beyond-Visual-Line-of-Sight Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Visual-Line-of-Sight-Only Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Part 107 Waivers

   · The FAA identifies visual-line-of-sight departures among waivable Part xx.xx operations and states that compliant operations do not need a waiver. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.

2. 2025 Summary of changes to Canada's drone regulations

   · Canada's lower-risk BVLOS rules became applicable November xx.xx 2025; relevant pilot credentials and an RPAS Operator Certificate are required. The framework separately identifies extended visual-line-of-sight operations. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.

3. UAS Operator Radio Licence Guidance
   - Ofcom's guidance separates radio permission from aviation authorization. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: The guidance expressly separates radio authorization from aviation authorization. Spectrum permission cannot independently verify a VLOS or BVLOS deployment's flight approval. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
4. Frequently Used Terms - ICAO
   - Taxonomy evidence: The international terminology defines VLOS through direct unaided visual contact rather than a radio-range threshold.
5. 2. Development of UAS Regulation - ICAO UAS Toolkit
   - Taxonomy evidence: The UAS regulatory guidance distinguishes VLOS-only operating limitations from operations involving BVLOS; the sample regulatory framework is not presented as a universal national law.
6. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
7. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
8. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
9. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.

10. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
11. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
12. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
13. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
14. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
15. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
16. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
17. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
18. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

19. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

20. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

22. CY 2024 Small Unmanned Aircraft Systems Survey Report
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

15.1. Beyond-Visual-Line-of-Sight Deployments

Table 172. Global Drone Data Link System Market Size, by Beyond-Visual-Line-of-Sight Deployments, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. SkyLine UAS Command & Control - C2 for BVLOS
   - Taxonomy evidence: The supplier expressly markets its communications ecosystem to support BVLOS deployment requirements. The page does not independently establish flight approval or sales for every configuration.

2. 2. Development of UAS Regulation - ICAO UAS Toolkit
   - Taxonomy evidence: The guidance notes that BVLOS operations can include VLOS launch and recovery, supporting classification of the complete intended deployment rather than overlapping flight-phase peers.
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
     ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
     ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

29. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
30. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.

15.2. Visual-Line-of-Sight-Only Deployments

Table 175. Global Drone Data Link System Market Size, by Visual-Line-of-Sight-Only Deployments, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 176. Global Drone Data Link System Market Size, by Visual-Line-of-Sight-Only Deployments, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 177. Global Drone Data Link System Market Size, by Visual-Line-of-Sight-Only Deployments, by Country, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Frequently Used Terms - ICAO
   - Taxonomy evidence: The VLOS definition recognizes visual contact maintained by the remote pilot or an RPA observer, supporting a visual-contact category while leaving local deployment conventions to be established.
2. 2. Development of UAS Regulation - ICAO UAS Toolkit
   - Taxonomy evidence: VLOS-only operation is explicitly identified as an operating limitation in the sample categorization.

3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.

13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results

· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

16. Drone Data Link System Market, by Spectrum Access

Spectrum Access changes the counterparty and permission evidence required before a radio offering is usable. Ofcom distinguishes generally exempt drone equipment from equipment covered by its UAS operator radio license and retains network-consent conditions for covered mobile and satellite use. ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■■

Mixed Spectrum Authorization must be distinguished from the mere presence of several communications technologies. ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ Adding bearers broadens the permission relationships that must be resolved; it does not itself establish destination access.

■■■■■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ A non-radio communications contribution avoids treating that medium as an RF access requirement, but does not remove aircraft or mission authorization, or permissions for any accompanying radio functions. Buyers should evaluate a tethered alternative only where the mission permits the ground connection and aircraft compatibility is confirmed; mobility-dependent missions favor a different qualified offering.

Figure 32. Global Drone Data Link System Market, by Spectrum Access: Market share evolution, 2025-2032

Figure 33. Global Drone Data Link System Market, by Spectrum Access: Market size by category, 2025

Table 179. Global Drone Data Link System Market Size, by Spectrum Access, 2017-2032 (USD Million)

Spectrum Access	2023	2024	2025	2026	2027	2032	CAGR (%)
Individually Licensed or Assigned Spectrum	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
License-Exempt or Generally Authorized Spectrum	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mixed Spectrum Authorization	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   - Halo is marketed with cellular, radio and satellite connectivity; the portfolio does not establish destination-specific spectrum permission. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
2. Safe-T Drone Power Station
   - Elistair markets Safe-T as a tethered offering with an optical-fiber option and offering-specific aircraft compatibility considerations; mission suitability remains conditional on the ground connection. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
3. Operational Authorisation
   - Specific-category aircraft operations remain subject to applicable authorization, independently of the included communications medium. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))

4. UAS Operator Radio Licence Guidance
   - The guidance distinguishes exempt equipment from UAS operator-license equipment and retains relevant network-consent requirements. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: Ofcom distinguishes generally exempt drone radio equipment from equipment covered by a UAS operator radio license. The guidance also distinguishes terrestrial mobile-terminal exemption from the authorization required for airborne mobile use. This supports jurisdiction-specific allocation rather than a universal license status inferred from bearer name. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))
   - Taxonomy evidence: The guidance distinguishes drone equipment operating under license exemption from equipment requiring a UAS operator radio license. It separately states that radio authorization does not replace aviation requirements.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
5. Class licences
   - ACMA class licenses authorize specified common equipment without an individual application and require compliance with their conditions. The page distinguishes terminals from licensed base and space stations. ([acma.gov.au](https://www.acma.gov.au/class-licences))
   - Taxonomy evidence: Class authorization is contrasted with individually assigned apparatus permission, demonstrating that the global taxonomy must normalize differing legal terminology rather than equate every license with individual authorization.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
6. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   - Taxonomy evidence: NIST's current UAS communications portfolio distinguishes licensed cellular communications from unlicensed communications in its public-safety research. This supplies independent drone-specific support for permission-class distinctions, not legal clearance of a particular deployment. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))
7. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026, EASA
   - Taxonomy evidence: The C2 communications provisions separately address applicable radio-equipment and RF-spectrum requirements.

8. VERSITRON Introduces NDAA-Compliant Tethered Drone Fiber Optic Converters for Secure Airborne Communications
   - Taxonomy evidence: The announced offering supplies a hardwired optical communications path between airborne and ground equipment rather than an RF link.
9. Five-year spectrum outlook 2023-28 - Australian Communications and Media Authority
   - Taxonomy evidence: The 2023-2028 outlook expressly discusses spectrum and licensing arrangements for commercial and consumer drones, establishing a drone-specific regulatory category basis.
10. Radio Regulations: Organization and Main Concepts - ITU Regional Radiocommunication Seminar
    - Taxonomy evidence: The regulatory presentation distinguishes telecommunications using wire, radio, or optical systems and defines radiocommunication specifically through radio waves.
11. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
12. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
13. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
14. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
15. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
16. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.

17. Codan FY2025 Results - ASX Announcement, August 21, 2025
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.

18. Codan H1 FY2026 Investor Presentation - February 19, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.

19. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

20. Elsight Limited - Appendix 4E and Annual Report 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.

21. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

22. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.

23. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

24. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

25. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
26. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
27. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
28. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
29. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.

16.1. License-Exempt or Generally Authorized Spectrum

Table 180. Global Drone Data Link System Market Size, by License-Exempt or Generally Authorized Spectrum, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
   · Taxonomy evidence: The portfolio independently recognizes unlicensed drone communications alongside licensed alternatives; research recognition does not verify every product's airborne-use compliance. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

2. UAS Operator Radio Licence Guidance - Ofcom
   - Taxonomy evidence: A drone using only exempt radio equipment does not require this individual UAS radio license, subject to the exemption's applicable conditions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
3. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026, EASA
   - Taxonomy evidence: Unlicensed bands are explicitly recognized as a possible C2-link spectrum setting.
4. Class licences - Australian Communications and Media Authority
   - Taxonomy evidence: Class licenses authorize common equipment on shared frequencies without an individual application or fee, supporting the generally authorized peer.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
5. Five-year spectrum outlook 2023-28 - Australian Communications and Media Authority
   - Taxonomy evidence: The outlook identifies the low-interference-potential-devices class license as supporting drone use cases. This is dated category evidence, not verification of every current deployment's compliance.
6. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

7. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
8. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
9. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
10. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

11. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
12. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
13. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
14. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
15. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
16. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
17. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

18. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
19. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
20. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
21. Part 107 Waivers - Federal Aviation Administration
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
· Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
22. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
23. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

24. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
25. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

26. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
27. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
28. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
29. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
30. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
31. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

16.2. Individually Licensed or Assigned Spectrum

Table 183. Global Drone Data Link System Market Size, by Individually Licensed or Assigned Spectrum, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 184. Global Drone Data Link System Market Size, by Individually Licensed or Assigned Spectrum, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Uncrewed Aircraft Systems - NIST Public Safety Communications Research

   · Taxonomy evidence: The portfolio explicitly labels LTE and 5G communications as licensed within its research scope. The market category still requires the actual jurisdiction and underlying network permission for allocation. ([nist.gov](https://www.nist.gov/ctl/pscr/research-portfolios/uncrewed-aircraft-systems))

2. UAS Operator Radio Licence Guidance - Ofcom

   · Taxonomy evidence: The UAS operator radio-license framework includes mobile and satellite terminal access under specified permission conditions, supplying a drone-specific individual-license pathway. ([ofcom.org.uk](https://www.ofcom.org.uk/siteassets/resources/documents/manage-your-licence/aeronautical/guidance/uas-operator-radio-licence-guidance.pdf?v=xx.xx))

   · Taxonomy evidence: The UAS operator radio license provides a distinct spectrum-permission route for relevant drone equipment.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.

3. Class licences - Australian Communications and Media Authority
   - Taxonomy evidence: The page identifies cellular terminals communicating with licensed base stations and satellite terminals communicating with licensed space stations, supporting distinction between terminal permission and underlying network licensing.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
4. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.

5. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
6. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
7. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
8. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.

9. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
10. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
11. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
12. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
13. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
14. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
15. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))

16. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
17. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
18. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
19. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
20. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
21. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

22. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
23. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

24. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
25. Civil Aviation Safety Authority Annual Report 2024-25
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
26. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
27. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
28. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
29. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

16.3. Mixed Spectrum Authorization

Table 186. Global Drone Data Link System Market Size, by Mixed Spectrum Authorization, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 187. Global Drone Data Link System Market Size, by Mixed Spectrum Authorization, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. SkyLine UAS Command & Control - C2 for BVLOS

   · Taxonomy evidence: The current commercial page describes drone C2 configurations combining ISM and LTE access and configurations incorporating satellite communications. These are observed combined-access offerings, not authorization records.

2. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
3. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

4. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
5. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
6. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
7. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
8. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
9. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
10. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

11. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
12. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
13. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
14. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
15. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
16. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
17. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

18. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
19. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
20. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

21. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
22. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
23. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
24. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

25. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
26. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
27. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
28. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

16.4. Non-Radio Links

Table 189. Global Drone Data Link System Market Size, by Non-Radio Links, by Region, 2017-2032 (USD Million)

Region	2023	2024	2025	2026	2027	2032	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. VERSITRON Introduces NDAA-Compliant Tethered Drone Fiber Optic Converters for Secure Airborne Communications

   · Taxonomy evidence: The manufacturer announced availability of drone-specific fiber-optic converter equipment carrying video and telemetry. This supports a non-radio commercial format as of the announcement, not 2025 sales or universal regulatory clearance.

2. Radio Regulations: Organization and Main Concepts - ITU Regional Radiocommunication Seminar
   - Taxonomy evidence: The distinction supplies a conceptual basis for a non-radio permission peer; it does not establish blanket exemption of optical or wired drone links from national safety requirements.
3. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
     ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
4. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
     ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares.
     ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

5. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
6. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
7. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
8. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
9. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
10. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
11. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.

12. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
13. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
14. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
15. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
16. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
17. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
18. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

19. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
20. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
21. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))

22. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
23. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
24. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
25. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
