    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

26. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
27. Declaração de Conformidade para Uso Próprio - Anatel
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes.
([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
28. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator.
([faa.gov](https://www.faa.gov/media/xx.xx))
29. Safe-T Drone Power Station - Elistair
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
30. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.

17. Drone Data Link System Market, by Region

[illegible] A communications supplier should therefore identify the customer's applicable aircraft program and approval owner before promising deployment. These examples concern defined civil pathways, not every operation across Asia-Pacific.

North America presents different commitment triggers within neighboring jurisdictions. [illegible] A cross-border service proposal needs separate acceptance conditions; Canadian eligibility cannot substantiate a U.S. deployment commitment.

Latin American entry can depend on the import and commercial-use relationship as well as aircraft permission. Brazil's Anatel conformity-declaration route for own-use imports excludes commercialization and telecommunications-service provision, while ANAC identifies separate telecommunications and airspace obligations. [illegible] Suppliers can organize reusable qualification documentation for applicable EASA programs while maintaining separate UK radio and network commitments. The alternative of a single undifferentiated European service promise is unsuitable when it obscures the authority or network counterparty controlling access.

[illegible]

[illegible] Procurement should verify the operator's relevant permission before accepting a connected-service commitment. The UAE pathway does not establish access elsewhere in the Middle East.

Africa should not be approached on the assumption that public-interest or nonprofit use removes operator qualification. [illegible] South African requirements are a destination example, not a continent-wide authorization standard.

Figure 35. Global Drone Data Link System Market, by Region: Market share evolution, 2025-2032

Sources & Evidence

1. Part 107 Waivers

   · The Part xx.xx waiver route provides a U.S.-specific purchasing gate for applicable BVLOS deployments. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

2. Operational Authorisation

   · EASA harmonizes the relevant civil framework within its Member States, supporting bounded qualification reuse rather than a Europe-wide radio entitlement. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))

3. Beyond visual line-of-sight operations

   · Australia's BVLOS pathway separately requires operator certification, pilot qualification and flight approval. ([casa.gov.au](https://www.casa.gov.au/drones/flight-authorisations/beyond-visual-line-sight-operations))

4. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · The UK UAS radio framework remains separate from aviation requirements and includes network-consent conditions.
   ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
5. 2025 Summary of changes to Canada’s drone regulations
   · Canada's defined lower-risk pathway has its own pilot and operator prerequisites, supporting separate North American commitment conditions. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
6. Unmanned Aircraft "LEVEL 4" Flight Web Portal
   · Japan's Level xx.xx pathway requires Class xx.xx aircraft certification, Class xx.xx pilot certification and flight permission or approval. ([mlit.go.jp](https://www.mlit.go.jp/koku/level4/en/))
7. Operator and activity permits
   · Singapore distinguishes operator and activity permits and requires operator-permit holders to subscribe to its Centralised Flight Management System.
   ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))
8. Declaração de Conformidade para uso próprio
   · Anatel's own-use import conformity route excludes commercialization and use in telecommunications-service provision, supporting separate diligence for resale.
   ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
9. Operations - ANAC National Civil Aviation Agency - Brazil
   · ANAC identifies separate compliance with DECEA and Anatel requirements for Brazilian drone operations.
   ([anac.gov.br](https://www.anac.gov.br/en/faq/drones/operations/))
10. Workshop on Drone UAS/RPAS Operations, Challenges and Opportunities for the NAM/CAR/SAM Regions - Summary of Discussions
    · The June 2025 workshop documents Colombia's RAC xx.xx framework and digital oversight tools as a constituent example.
    ([icao.int](https://www.icao.int/sites/default/files/NACC/MeetingDocs/2025/DroneUASRPAS/English/xx.xx-Report/DroneUASRPASWorkshop2025-SoD-EN.pdf))
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
11. UAS Registration
    · GCAA states that institutional operator authorization does not itself authorize flight and identifies further operational and capturing-device security requirements.
    ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))
12. Unmanned Aircraft Systems
    · South Africa's approval matrix requires a UAS Operating Certificate for commercial, corporate and nonprofit operations and distinguishes private use. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))

13. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
14. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
15. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
16. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.

17. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
18. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
19. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
20. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
21. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
22. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
23. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

24. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
25. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
26. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
27. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
28. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

29. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
30. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales. ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

17.1. Europe

Table 194. Europe Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Mixed Spectrum Authorization	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EASA reported more than two million European registered operators in May 2025, constraining the civilian purchasing pool and the forecast baseline rather than measuring equipment shipments. ([easa.europa.eu](https://www.easa.europa.eu/en/newsroom-and-events/press-releases/easa-launches-drone-economy-dashboard-fourth-release-innovative))

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three million 2025 FPV receipts provide a recipient-country anchor for Europe's attritable communications allocation; the model applies only communications-equivalent value, not complete aircraft value. ([mod.gov.ua](https://mod.gov.ua/en/news/xx.xx-billion-from-partners-over-xx.xx-million-strike-drones-more-ukrainian-weapons-key-ministry-of-defence-highlights))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European spending and national differences constrain qualified-equipment allocation assumptions.
20. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

21. Drones as a Service for the Whole of Switzerland - Swisscom, August 8, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure and service relationship supports a Swiss paid-service purchasing premise, but does not establish completed nationwide deployment or realized revenue. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure and service relationship supports a Swiss paid-service purchasing premise, but does not establish completed nationwide deployment or realized revenue. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
22. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
23. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

24. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
25. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
26. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
27. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

30. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
31. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
32. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
33. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

34. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
35. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
36. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
37. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

38. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
39. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
40. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

41. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
42. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
43. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
44. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
45. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.

46. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
47. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
48. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
49. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.

50. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
51. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
52. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

17.2. North America

Table 209. North America Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The U.S. fleet supplies the principal civilian anchor within North America; Canadian and Mexican activity and institutional equipment are separately modeled.

3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.

5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.

7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National defense spending cross-checks institutional equipment scale, not market shares.

20. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
21. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
22. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
23. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

24. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
25. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
26. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

27. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
28. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

29. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
30. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
31. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
32. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

33. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
34. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
35. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
36. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

37. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
38. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
39. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

40. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
41. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
42. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
43. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
44. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

45. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
46. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
47. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
48. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

49. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
50. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
51. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
52. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

17.3. Asia-Pacific

Table 224. Asia-Pacific Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Indonesia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Malaysia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Philippines	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Singapore	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Taiwan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Thailand	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese domestic fleet growth anchors the regional civilian component, with explicit replacement, price and non-Chinese adjustments; it does not establish the final regional percentage.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian national spending constrains institutional equipment assumptions; published spending is not copied as drone-link shares. ([sipri.org](https://www.sipri.org/sites/default/files/2026-xx.xx/2604_milex_2025.pdf))
20. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asian recipient differences support country-specific institutional adjustments and caution against using manufacturing or exports as demand.

21. Civil Aviation Safety Authority Annual Report 2024-25
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

22. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

23. Operator and Activity Permits - Civil Aviation Authority of Singapore
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator/activity permits and the required flight-management-service relationship constrain Singapore's addressable paid-service premise; no ASEAN-wide entitlement or revenue observation is inferred. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator/activity permits and the required flight-management-service relationship constrain Singapore's addressable paid-service premise; no ASEAN-wide entitlement or revenue observation is inferred. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))

24. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

25. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
26. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
27. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

28. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
29. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

30. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
31. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

32. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
33. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
34. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
35. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

36. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
37. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
38. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
39. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

40. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
41. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
42. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

43. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
44. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
45. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
46. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
47. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

48. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
49. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
50. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
51. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

52. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
53. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
54. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
55. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

17.4. Middle East

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National Middle Eastern spending constrains modeled communications-content intensities.
20. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Different Gulf recipient profiles constrain qualified-equipment assumptions without treating broad arms imports as drone-link purchases.

21. UAS Registration - General Civil Aviation Authority of UAE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator authorization is distinct from mission permission, qualifying the modeled UAE enterprise-service adoption premise rather than establishing paid deployment. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator authorization is distinct from mission permission, qualifying the modeled UAE enterprise-service adoption premise rather than establishing paid deployment. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))
22. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
23. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
24. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

25. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
26. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
27. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

30. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
31. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
32. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
33. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

34. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
35. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
36. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
37. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

38. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
39. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
40. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

41. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
42. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
43. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
44. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
45. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

46. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
47. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
48. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
49. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

50. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
51. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
52. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
53. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

17.5. Latin America

Table 254. Latin America Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: South American spending constrains institutional purchasing assumptions, not direct link demand.

20. ICAO NAM/CAR/SAM Drone UAS/RPAS Workshop - Summary of Discussions, June 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx Colombian UAS and xx.xx registered pilots provide a June 2025 purchasing-pool constraint, with explicit stock-to-flow and communications-value assumptions. ([icao.int](https://www.icao.int/sites/default/files/NACC/MeetingDocs/2025/DroneUASRPAS/English/xx.xx-Report/DroneUASRPASWorkshop2025-SoD-EN.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx Colombian UAS and xx.xx registered pilots provide a June 2025 purchasing-pool constraint, with explicit stock-to-flow and communications-value assumptions. ([icao.int](https://www.icao.int/sites/default/files/NACC/MeetingDocs/2025/DroneUASRPAS/English/xx.xx-Report/DroneUASRPASWorkshop2025-SoD-EN.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National administrative differences qualify a common regional adoption or permission assumption; the source does not publish the regional market allocation.
21. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
22. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
23. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

24. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
25. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
26. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
27. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

30. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
31. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
32. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
33. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

34. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
35. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
36. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
37. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

38. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
39. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
40. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

41. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
42. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
43. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
44. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
45. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

46. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
47. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
48. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
49. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

50. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
51. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
52. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
53. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

17.6. Africa

Table 269. Africa Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Egypt	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Trends in World Military Expenditure, 2025 - SIPRI Fact Sheet, April 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: African institutional scale remains distinct from the limited country inventory.
20. Trends in International Arms Transfers, 2025 - SIPRI, March 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales.
      ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recipient patterns support retaining major African demand outside the four assigned countries; transfer indicators are not dollar sales.
      ([sipri.org](https://www.sipri.org/publications/2026/sipri-fact-sheets/trends-international-arms-transfers-2025))

21. Unmanned Aircraft Systems - South African Civil Aviation Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial, corporate and nonprofit operator-approval distinctions constrain addressable professional demand; nonprofit mission interest is not counted as automatically deployable purchasing. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial, corporate and nonprofit operator-approval distinctions constrain addressable professional demand; nonprofit mission interest is not counted as automatically deployable purchasing. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))
22. UAS Manual of Implementing Standards - Kenya Civil Aviation Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Component import permits and eligible ownership categories constrain the Kenyan purchasing route, not the size of realized demand. ([kcaa.or.ke](https://www.kcaa.or.ke/sites/default/files/docs/uas/Manual%20of%20Implementing%20Standards%xx.xx%28MIS%xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Component import permits and eligible ownership categories constrain the Kenyan purchasing route, not the size of realized demand. ([kcaa.or.ke](https://www.kcaa.or.ke/sites/default/files/docs/uas/Manual%20of%20Implementing%20Standards%xx.xx%28MIS%xx.xx.pdf))
23. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
24. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

25. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
26. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
27. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
28. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

29. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
30. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

31. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
32. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
33. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
34. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

35. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
36. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
37. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
38. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

39. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
40. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
41. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

42. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
43. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
44. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
45. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
46. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

47. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
48. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
49. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
50. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

51. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
52. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
53. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
54. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

18. Drone Data Link System Market, by Group

The geographic groups are overlapping commercial lenses, not additive markets or interchangeable permission areas. Their usefulness depends on the particular shared institution, procurement route or coordination mechanism. ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■

Americas: ICAO's June 2025 NAM/CAR/SAM workshop documented regulatory-harmonization and traffic-management infrastructure challenges and described its model regulations as nonbinding. ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■ ■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ Buyers considering a common delivery partner should require destination-specific approval ownership and support commitments; coordination reduces administrative fragmentation only where those duties are actually contracted.

Europe, Middle East & Africa: the practical grouping is a portfolio of distinct approval relationships. EASA's shared civil framework, the UK's separate radio framework, UAE professional-operation approvals and South Africa's operator-certification requirements govern different constituencies. ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■

■■■■■■ ■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Cross-member recognition of permissions and common treatment of service-data arrangements remain unestablished. Suppliers should retain a destination-by-destination commitment gate rather than promise group-wide deployment on the strength of one constituent's approval.

GCC: the customs-union framework provides a shared goods-movement mechanism, including a single entry-point concept, while preserving treatment of prohibited and restricted goods. This can support evaluation of a regional distribution hub for eligible link equipment, but not automatic destination approval. ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■

RESEARCH SAMPLE REPORT

[illegible]

Australasia: Australia and New Zealand both provide operator-approval routes for operations outside their ordinary permitted conditions, but through different national systems. [illegible] Neither aircraft procurement nor a training qualification substitutes for the required operator permission.

Nordic: the Nordic Drone Initiative provides an institutional cooperation context for drone transport, ecosystem development and proposed regulatory changes, not evidence of a common purchasing award. [illegible] A transport ecosystem may help identify prospective counterparties, but investment should wait for a defined customer, offering and permission rather than rely on the initiative's objectives alone.

[illegible] Standard scenarios and appropriate LUC privileges can simplify particular cases, but do not justify ignoring local conditions. Equipment conformity and service-contract coverage remain separate purchasing questions.

BRICS: the 2025 Data Economy Governance Understanding establishes a cooperation agenda while expressly retaining national legal frameworks, data sovereignty and legitimate localization objectives. [illegible] Implemented national measures, rather than the cooperation document alone, should trigger changes in commitments.

G7: the 2025 Industry, Digital and Technology Ministerial Declaration connects supply-chain transparency, semiconductor resilience and security of internet-connected products. This provides a policy rationale for offering-specific provenance and continuing-support diligence,

not a G7 equipment-approval passport. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Component suppliers should establish the aircraft manufacturer's acceptance and the specific procurement's requirements before relying on that route. Direct component procurement remains an alternative, but requires its own offering-level acceptance and support relationship.

Figure 38. Global Drone Data Link System Market Size, by Group, 2025 vs 2026 vs 2032

Table 284. Global Drone Data Link System Market Size, by Group, 2017-2032 (USD Million)

Group	2023	2024	2025	2026	2027	2032	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Operational Authorisation

   · EASA's framework includes Norway and Iceland; authorizations retain stated limitations and cross-border conditions, with specific exceptions for standard scenarios and appropriate LUC privileges. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operational-authorisation))

2. Beyond visual line-of-sight operations

   · The Australian requirements provide a national approval schedule distinct from New Zealand's Part xx.xx route. ([casa.gov.au](https://www.casa.gov.au/drones/flight-authorisations/beyond-visual-line-sight-operations))

3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)

   · The UK framework establishes a constituent-specific communications relationship rather than a common EMEA permission. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))

4. 2025 Summary of changes to Canada’s drone regulations

   · The Canadian pathway is a national constituent example within Americas and G7, not a group-wide authorization. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.

5. Unmanned Aircraft "LEVEL 4" Flight Web Portal

   · Japan supplies a distinct national aircraft-and-pilot qualification example within G7. ([mlit.go.jp](https://www.mlit.go.jp/koku/level4/en/))

6. Operator and activity permits

   · The Singapore requirements establish local purchasing dependencies, not cross-member ASEAN recognition. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))

7. Workshop on Drone UAS/RPAS Operations, Challenges and Opportunities for the NAM/CAR/SAM Regions - Summary of Discussions

   · The workshop identifies regulatory-harmonization and traffic-management infrastructure challenges and states that ICAO model regulations are nonbinding. ([icao.int](https://www.icao.int/sites/default/files/NACC/MeetingDocs/2025/DroneUASRPAS/English/xx.xx-Report/DroneUASRPASWorkshop2025-SoD-EN.pdf))

8. UAS Registration

   · UAE professional-operation requirements establish mission-access conditions separate from GCC goods movement or EMEA commercial administration. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))

9. Unmanned Aircraft Systems

   · The South African operator-certification requirement supplies an African constituent boundary within EMEA contracting analysis. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))

10. □□□□□□□ □□□□ □□□□ □□□□□□□ □□□□□□ □□□□□ □□□□□□ □□□□□□□

    · The GCC customs-union framework describes a single entry-point mechanism and preserves prohibited- and restricted-goods treatment, supporting conditional hub evaluation. ([gcc-sg.org](https://www.gcc-sg.org/ar/JointGulf/Cooperation/GCCCustomsUnion/Pages/default.aspx))

11. Intro to Part 102 certification for unmanned aircraft

    · New Zealand requires a Part xx.xx operator certificate for operations outside Part xx.xx; a training qualification is not itself that certificate. ([aviation.govt.nz](https://www.aviation.govt.nz/drones/regulations/part-xx.xx-certification-for-drones/))

12. Nordic Drone Initiative

    · The Nordic Drone Initiative identifies transport, ecosystem cooperation and proposed regulatory-development objectives, not a common purchasing award. ([norden.org](https://www.norden.org/en/publication/nordic-drone-initiative))

13. Operations in the specific category in a state different from the one of registration

    · The relevant specific-category cross-border route retains destination-authority confirmation and local conditions after home-state authorization. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/civil-drones-rpas/specific-category-civil-drones/operations-specific-category-state-different-one-registration))

14. BRICS Brasil 2025 - BRICS Data Economy Governance Understanding

    · The BRICS Data Economy Governance Understanding retains national frameworks, data sovereignty and legitimate localization objectives while pursuing trusted transfers and cooperation. ([gov.br](https://www.gov.br/mdic/pt-br/centrais-de-conteudo/publicacoes/brics/comercio/ingles/brics_tmm_package_of_outcomes_v21-xx.xx-25_final-version.pdf))

15. G7 2025 Industry, Digital and Technology Ministerial Declaration

    · The G7 declaration addresses supply-chain transparency, semiconductor resilience and security of internet-connected products; these are policy commitments rather than equipment authorization. ([ised-isde.canada.ca](https://ised-isde.canada.ca/site/ised/en/g7-2025-industry-digital-and-technology-ministerial-declaration))

16. Red Cat's Teal Drones Black Widow System Approved for NATO NSPA Catalogue

    · Red Cat reported Black Widow's NSPA catalogue addition on September xx.xx 2025 and identified an integrated Doodle Labs radio; end-user procurement determines configurations and delivery conditions. ([ir.redcatholdings.com](https://ir.redcatholdings.com/news-events/press-releases/detail/xx.xx/red-cats-teal-drones-black-widow-system-approved-for-nato-nspa-catalogue))

17. Regional Coordination

    · ICAO describes regional initiatives toward harmonized approvals, including Asia-Pacific coordination; the publication does not establish an ASEAN operating entitlement. ([icao.int](https://www.icao.int/UA/Regional-Coordination))

18. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

19. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

20. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub

    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

21. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
22. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
23. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
24. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
25. Codan H1 FY2026 Investor Presentation - February 19, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
26. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
27. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
28. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
29. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.

30. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
31. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
32. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
33. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
34. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

18.1. NATO

Table 285. NATO Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

20. Latvian Civil Aviation Agency - Growth in Drone Users and Administrative Offences, April 27, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx year-end 2025 operator observation calibrates modeled annual installations and led to a higher working civilian numerator; forecast turnover and services remain assumptions. ([caa.gov.lv](https://www.caa.gov.lv/en/article/rapid-growth-number-uav-or-drone-users-number-administrative-offences-committed-also-increased-significantly-last-year))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx year-end 2025 operator observation calibrates modeled annual installations and led to a higher working civilian numerator; forecast turnover and services remain assumptions. ([caa.gov.lv](https://www.caa.gov.lv/en/article/rapid-growth-number-uav-or-drone-users-number-administrative-offences-committed-also-increased-significantly-last-year))
21. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
22. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
23. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

24. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
25. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
26. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
27. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

30. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
31. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
32. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
33. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

34. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
35. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
36. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
37. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

38. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
39. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
40. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

41. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
42. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
43. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
44. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
45. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

46. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
47. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
48. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
49. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

50. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
51. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
52. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
53. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

20. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
21. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
22. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
23. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

24. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
25. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
26. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

27. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
28. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

29. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
30. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
31. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
32. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

33. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
34. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
35. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
36. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

37. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
38. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
39. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

40. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
41. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
42. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
43. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
44. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

45. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
46. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
47. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
48. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

49. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
50. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
51. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
52. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

18.3. BRICS

Table 315. BRICS Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Mixed Spectrum Authorization	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales. ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

20. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
21. Unmanned Aircraft Systems - South African Civil Aviation Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial, corporate and nonprofit operator-approval distinctions constrain addressable professional demand; nonprofit mission interest is not counted as automatically deployable purchasing. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial, corporate and nonprofit operator-approval distinctions constrain addressable professional demand; nonprofit mission interest is not counted as automatically deployable purchasing. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))
22. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
23. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

24. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
25. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
26. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
27. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

28. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
29. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

30. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
31. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
32. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
33. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

34. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
35. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
36. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
37. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

38. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
39. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
40. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

41. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
42. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
43. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
44. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
45. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

46. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
47. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
48. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
49. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

50. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
51. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
52. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
53. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

18.4. European Union

Table 330. European Union Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Austria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Latvian Civil Aviation Agency - Growth in Drone Users and Administrative Offences, April 27, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx year-end 2025 operator observation calibrates modeled annual installations and led to a higher working civilian numerator; forecast turnover and services remain assumptions. ([caa.gov.lv](https://www.caa.gov.lv/en/article/rapid-growth-number-uav-or-drone-users-number-administrative-offences-committed-also-increased-significantly-last-year))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx year-end 2025 operator observation calibrates modeled annual installations and led to a higher working civilian numerator; forecast turnover and services remain assumptions. ([caa.gov.lv](https://www.caa.gov.lv/en/article/rapid-growth-number-uav-or-drone-users-number-administrative-offences-committed-also-increased-significantly-last-year))

20. Irish Aviation Authority - Response to Dáil Question 371, January 21, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The authority reports xx.xx registrations during 2025 and lacks a company/individual breakdown; the model does not reinterpret annual registrations as an active aircraft census. ([iaa.ie](https://www.iaa.ie/docs/default-source/publications/corporate-publications/parliamentary-questions/2026-pqs/parliamentary-question-iaa-letter-question-xx.xx.pdf?sfvrsn=96a8cef0_1))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The authority reports xx.xx registrations during 2025 and lacks a company/individual breakdown; the model does not reinterpret annual registrations as an active aircraft census. ([iaa.ie](https://www.iaa.ie/docs/default-source/publications/corporate-publications/parliamentary-questions/2026-pqs/parliamentary-question-iaa-letter-question-xx.xx.pdf?sfvrsn=96a8cef0_1))
21. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
22. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
23. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

24. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
25. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
26. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

27. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
28. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

29. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
30. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
31. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
32. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

33. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
34. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
35. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
36. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

37. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
38. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
39. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

40. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
41. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
42. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
43. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
44. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

45. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
46. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
47. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
48. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

49. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
50. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
51. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
52. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

18.5. GCC

Table 345. GCC Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bahrain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kuwait	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. UAS Registration - General Civil Aviation Authority of UAE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator authorization is distinct from mission permission, qualifying the modeled UAE enterprise-service adoption premise rather than establishing paid deployment. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator authorization is distinct from mission permission, qualifying the modeled UAE enterprise-service adoption premise rather than establishing paid deployment. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

18.6. ASEAN

Table 360. ASEAN Drone Data Link System Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brunei	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cambodia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Operator and Activity Permits - Civil Aviation Authority of Singapore
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator/activity permits and the required flight-management-service relationship constrain Singapore's addressable paid-service premise; no ASEAN-wide entitlement or revenue observation is inferred. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator/activity permits and the required flight-management-service relationship constrain Singapore's addressable paid-service premise; no ASEAN-wide entitlement or revenue observation is inferred. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

22. Safe-T Drone Power Station - Elistair
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

23. Safe-T 2 - Advanced Tethering System Brochure
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19. Drone Data Link System Market, by Country

United States entry requires separating product eligibility, government purchasing and civil flight permission. ■■■ ■■■■■ ■■■■■ ■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■■■■ ■ ■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ Domestic sourcing or a screening announcement cannot alone settle every requirement; existing authorization and applicable exemptions can favor retention rather than blanket replacement.

Canada provides a defined lower-risk BVLOS pathway rather than unrestricted remote-operation permission. ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ A customer's proposed locations and certificate coverage should determine whether to proceed under this pathway or assess a different authorization route.

■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ An integrator can coordinate the submissions, but cannot replace the authorities' decisions; direct component purchasing retains that coordination with the buyer. Confined-area operations remove the DECEA airspace-authorization requirement, not the ANAC and ANATEL responsibilities.

For a German operator serving a French customer, EASA's specific-category framework preserves home-state approval while retaining destination conditions. Operations outside standard scenarios require French confirmation of the cross-border application; standard-scenario and qualifying LUC routes have simpler documentary requirements. ■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■

■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■

[illegible] A managed-connectivity contract should allocate carrier-consent and authorization-renewal duties separately. Existing radio exemptions remain alternatives where applicable, while a UK licence cannot establish access in another country.

[illegible] The announcement distinguishes existing customized services from prospective network deployment; it does not establish completed nationwide availability. Bundling exchanges purchasing simplicity for provider dependence.

China's communications-access rules distinguish product approval from service eligibility. MIIT requires type approval for covered UAS radio transmitters supplied for domestic sale or use, subject to stated exemptions, and requires cellular and satellite services lawfully available in China. [illegible]

India treats separately supplied components differently from complete or knocked-down drones. The February xx.xx 2022 import notification prohibits the latter subject to specified exceptions while classifying drone-component imports as Free. [illegible]

[illegible] A link supplier should establish the intended aircraft program's category before offering a deployment-dependent commitment. Participation in a qualifying program can simplify access, but category similarity does not confer another program's permission.

Australia requires flight approval and cellular acceptance to be established independently. ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪

Sources & Evidence

1. Swisscom Broadcast and Nokia build joint drone network across Switzerland

   · Swisscom's August xx.xx 2024 announcement combines infrastructure, authorization-application support and storage, distinguishing existing customized services from prospective network deployment. ([swisscom.ch](https://www.swisscom.ch/en/about/news/2024/xx.xx/xx.xx-drohnennetzwerk-schweiz.html))

2. Part 107 Waivers

   · FAA operational waivers permit specified deviations from Part xx.xx including its visual-line-of-sight requirement; equipment availability does not provide that permission. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.

   · Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.

3. Beyond visual line-of-sight operations

   · CASA identifies operator certification, pilot qualification and BVLOS flight approval as separate requirements and describes an eligible broader-area approval pathway. ([casa.gov.au](https://www.casa.gov.au/drones/flight-authorisations/beyond-visual-line-sight-operations))

4. Spectrum policy
   - Australian guidance describes class-authorized equipment and makes cellular suitability dependent on network-operator admission and coverage for the application. ([drones.gov.au](https://www.drones.gov.au/policies-and-programs/policies/spectrum-policy))
5. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   - Ofcom's UAS radio licence covers UK operations and territorial waters, excludes international flights, requires covered network-operator agreement and preserves existing radio exemptions. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
6. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   - DIU distinguishes the Blue UAS Framework's components and software from complete aircraft and separates verification candidates from completed additions. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
7. 2025 Summary of changes to Canada’s drone regulations
   - Canadian rules effective November xx.xx 2025 permit qualifying lower-risk BVLOS operations without an SFOC, subject to Level xx.xx Complex certification, an RPOC and operating-environment restrictions. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
8. Operator and activity permits
   - CAAS links Class xx.xx Activity Permits to Operator Permits, requires Operator Permit holders to subscribe to CFMS, and allows permits covering repeated activities. ([caas.gov.sg](https://www.caas.gov.sg/unmanned-aircraft/operator-and-activity-permits/))
9. UAS Registration
   - GCAA states that operator authorization does not authorize flight and requires security approval for capturing-device activities regardless of red or green zone status. ([gcaa.ae](https://gcaa.ae/en/pages/UASRegistration.aspx))
10. Unmanned Aircraft Systems
    - SACAA's approval table requires UASOC and aircraft-related approvals for commercial, corporate and nonprofit operations, but identifies an Air Service Licence specifically for commercial operations. ([caa.co.za](https://www.caa.co.za/industry-information/uas/))
11. Operations in the specific category in a state different from the one of registration
    - EASA distinguishes destination confirmation for non-standard-scenario cross-border operations from simpler standard-scenario and qualifying LUC documentation, while retaining local conditions and geographic zones. ([easa.europa.eu](https://www.easa.europa.eu/en/domains/drones-air-mobility/operating-drone/specific-category-civil-drones/operations-specific-category-state-different-one-registration))
12. Unleashing American Drone Dominance - FCC Notice and Request for Comments
    - The FCC notice released April xx.xx 2026 records foreign-produced UAS and critical-component authorization restrictions, exemptions and continued use of already-authorized devices; communications systems are included. ([public-inspection.federalregister.gov](https://public-inspection.federalregister.gov/2026-xx.xx.pdf))

13. Quais autorizações são necessárias antes de solicitar um voo de drone ao DECEA?

· DECEA identifies ANATEL and ANAC approvals before open-air RPAS airspace requests; confined-area operations do not require DECEA airspace authorization.
([ajuda.decea.mil.br](https://ajuda.decea.mil.br/base-de-conhecimento/quais-autorizacoes-sao-necessarias-antes-de-solicitar-um-voo-de-drone-ao-decea/))

14. UK SORA-based Operational Authorisations

· UK SORA replaced the OSC application method on April xx.xx 2025; operational authorizations issued through the stated route last twelve months.
([caa.co.uk](https://www.caa.co.uk/drones/specific-category/uk-sora-based-operational-authorisations/uk-sora-based-operational-authorisations/))

15. 工业和信息化部关于印发《民用无人驾驶航空器无线电管理暂行办法》的通知

· MIIT requires approval for covered UAS radio transmitters, subject to exemptions, lawfully available Chinese cellular or satellite services, and UAS-specific SIMs for cellular access.
([miit.gov.cn](https://www.miit.gov.cn/jgsj/wgj/wjfb/art/2024/art_1c3a092d3bcd4d41abe69c369ba7bab6.html))

16. Annexures to DGFT Notification No. 54/2015-20 dated February 9, 2022

· DGFT Notification No. xx.xx/2015-xx.xx dated February xx.xx 2022 prohibits complete and knocked-down drone imports subject to specified exceptions and classifies component imports as Free.
([apeda.gov.in](https://apeda.gov.in/sites/default/files/dgft_notifications/Eng_Notification54_dated_9Feb2022_ITC_HS_with_Annexures.pdf))

17. Equipment Type Approval (ETA)

· WPC's equipment-approval service expressly excludes drones and satellite equipment from its ordinary ETA self-declaration route, supporting separate offering-classification diligence.
([eservices.dot.gov.in](https://eservices.dot.gov.in/equipment-type-approval-eta))

18. Unmanned Aircraft Flight Permission/Approval Application Web portal

· MLIT distinguishes conditional Category II permission relief from Category III requirements for Class I pilot certification, Class xx.xx aircraft certification and ministerial approval.
([mlit.go.jp](https://www.mlit.go.jp/koku/permitapproval/en/index.html))

19. Kenya Civil Aviation Authority - UAS Manual of Implementing Standards

· KCAA requires permits for UAS or component imports and identifies eligible aircraft owners, including Kenyan citizens or residents, Kenya-registered companies and government bodies.
([kcaa.or.ke](https://www.kcaa.or.ke/sites/default/files/docs/uas/Manual%20of%20Implementing%20Standards%xx.xx%28MIS%xx.xx.pdf))

20. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

21. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
22. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.
23. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
24. Telemetry Radios - Holybro Store
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
25. Motorola Solutions - March 2, 2026 Conference Transcript
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
26. Codan FY2025 Results - ASX Announcement, August 21, 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.

27. Codan H1 FY2026 Investor Presentation - February 19, 2026
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
28. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
29. Elsight Limited - Appendix 4E and Annual Report 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
30. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.
31. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
32. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
33. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
34. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
· Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.
35. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
· Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

36. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

37. Civil Aviation Safety Authority Annual Report 2024-25

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

38. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

39. Declaração de Conformidade para Uso Próprio - Anatel

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))

40. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Effective versus cumulative commercial fleet counts and projected maturation constrain U.S. installations and the forecast's civilian hardware contribution; they are not direct market shares. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-uas-and-aam-full-document.pdf))
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Small Unmanned Aircraft Systems Survey Report 2023 - Federal Aviation Administration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Registry sampling excludes some populations, including DoD operators, and cross-state activity is common; civilian flight-location data cannot alone allocate the full U.S. equipment/services numerator. ([faa.gov](https://www.faa.gov/media/xx.xx))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 registered fleet of xx.xx, up xx.xx%, constrains the Chinese domestic installation pool and the starting pool for the forecast; registrations are not sales.
   ([caac.gov.cn](https://www.caac.gov.cn/XXGK/XXGK/TJSJ/xx.xx/P020260417665629030648.pdf))

2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.

3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. United Kingdom Main National Aviation Safety Plan 2026-2029 - CAP3237
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2025 baseline of xx.xx active operator IDs constrains the UK civilian pool; flyer IDs are not added as additional aircraft purchasers. ([caa.co.uk](https://www.caa.co.uk/publication/download/xx.xx))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19.6. France

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.

21. Safe-T Drone Power Station - Elistair
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.

22. Safe-T 2 - Advanced Tethering System Brochure
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19.7. India

Table 461. India Drone Data Link System Market Size, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
India	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. India’s Drone Ecosystem: From Policy to Public Service Transformation - Press Information Bureau, February 17, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The February xx.xx 2026 figure of xx.xx registered drones and documented public purchasing channels constrain the bridged 2025 pool; future equipment and service adoption are modeled. ([pib.gov.in](https://www.pib.gov.in/PressReleasePage.aspx?PRID=xx.xx&lang=xx.xx®=xx.xx&trk=article-ssr-frontend-pulse_little-text-block))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19.9. Australia

Table 489. Australia Drone Data Link System Market Size, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Australia	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 499. Australia Drone Data Link System Market Size, by Deployment Model, 2017-2032 (USD Million)

Deployment Model	2023	2024	2025	2026	2027	2032	CAGR (%)
Customer-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hybrid Network Management	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Provider-Managed Networks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 500. Australia Drone Data Link System Market Size, by Sales Channel, 2017-2032 (USD Million)

Sales Channel	2023	2024	2025	2026	2027	2032	CAGR (%)
Distribution and Retail Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Supplier-Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Value-Added Reseller and Integrator Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 501. Australia Drone Data Link System Market Size, by Operating Envelope, 2017-2032 (USD Million)

Operating Envelope	2023	2024	2025	2026	2027	2032	CAGR (%)
Beyond-Visual-Line-of-Sight Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Visual-Line-of-Sight-Only Deployments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 502. Australia Drone Data Link System Market Size, by Spectrum Access, 2017-2032 (USD Million)

Spectrum Access	2023	2024	2025	2026	2027	2032	CAGR (%)
Individually Licensed or Assigned Spectrum	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
License-Exempt or Generally Authorized Spectrum	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mixed Spectrum Authorization	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Radio Links	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.
14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.
15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Civil Aviation Safety Authority Annual Report 2024-25
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: June 2025 active-drone, operator-certificate and remote-pilot observations calibrate Australia's professional equipment/service mix, not annual shipment totals. ([casa.gov.au](https://www.casa.gov.au/sites/default/files/2025-xx.xx/casa-annual-report-2024-2025.pdf))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19.10. Brazil

Table 503. Brazil Drone Data Link System Market Size, 2017-2032 (USD Million)

Country	2023	2024	2025	2026	2027	2032	CAGR (%)
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Declaração de Conformidade para Uso Próprio - Anatel
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-use conformity excludes commercialization, qualifying resale and integration-channel assumptions without establishing sales volumes. ([gov.br](https://www.gov.br/anatel/pt-br/regulado/certificacao-de-produtos/declaracao-de-conformidade))

20. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
21. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
22. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
23. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

24. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
25. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

26. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
27. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

28. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
29. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
30. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
31. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

32. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
33. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
34. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
35. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

36. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
37. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
38. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

39. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
40. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
41. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
42. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
43. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

44. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
45. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
46. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
47. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

48. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
49. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
50. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
51. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional framework effective November xx.xx 2025 constrains the addressable operator/service pool; it does not directly quantify incremental revenue or unrestricted BVLOS adoption. ([tc.canada.ca](https://tc.canada.ca/en/aviation/drone-safety/2025-summary-changes-canada-drone-regulations))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.

19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

19.15. Mexico

Table 573. Mexico Drone Data Link System Market Size, 2017-2032 (USD Million)

Sources & Evidence

1. 2025 Civil Aviation Industry Development Statistical Bulletin - Civil Aviation Administration of China
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: China reported xx.xx registered drones at year-end 2025, up xx.xx%, including xx.xx medium and large drones. These observations constrain civilian installation and premium-equipment assumptions; registrations are not sales.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The reported expansion of China's registered fleet and operating organizations supports continued civilian demand in the 2026 nowcast, without extending the 2025 growth rate globally.
2. Compendium to FAA Aerospace Forecast FY 2025-2045: Unmanned Aircraft Systems and Advanced Air Mobility
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The FAA distinguishes approximately xx.xx effective or active commercial drones from approximately xx.xx cumulative commercial registrations in 2024. This prevents treating all registrations as operating installations.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The FAA's recreational and commercial fleet estimates provide independent civilian demand constraints, with materially different active and cumulative populations.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: The FAA's projected slowing of fleet expansion through 2029 constrains the model's mature civilian hardware trajectory. It does not establish the returned 2032 market value.
3. EASA Launches Drone Economy Dashboard in Fourth Release of Innovative Air Mobility Hub
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: EASA reported more than two million registered European drone operators in May 2025. Operator counts constrain the European purchasing pool but require explicit aircraft-per-operator, activity and replacement assumptions.

4. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DJI's January xx.xx 2025 launch announcement states retail prices of USD xx.xx and USD xx.xx for the O4 Air Unit offerings. These are price comparables, not shipment observations; camera value and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2025 launch states USD xx.xx and USD xx.xx retail prices; communications attribution and supplier-equivalent discounts are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated digital-video products provide consumer digital-link price comparables, not shipment or signaling-share observations.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2025 USD xx.xx and USD xx.xx retail packages constrain civilian unit values; cameras and channel margins require deductions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Content-creation positioning supports a media demand setting, not a shipment or entertainment share.
5. Telemetry Radios - Holybro Store
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The retrieved manufacturer catalog lists entry telemetry products from USD xx.xx and Microhard-branded packages from USD xx.xx. Current listed prices provide a reasonableness check for modeled equipment values, not observed 2025 realized prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current manufacturer listings include telemetry products from USD xx.xx and Microhard products from USD xx.xx constraining endpoint price relationships.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately priced converters and antenna-extension cables support lower-valued link-support components; adjacent remote-identification products are excluded.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier store provides a direct purchase route and dealer/OEM links, supporting distinct channel alternatives without measured sales weights.

6. Motorola Solutions - March 2, 2026 Conference Transcript
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Motorola Solutions' CFO reported Silvus calendar-2025 revenue of USD xx.xx. Only the modeled airborne-link and equipment portions enter the supplier cross-check; total MANET revenue is not treated as drone-link revenue.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The company speaker stated a 2026 Silvus revenue expectation of USD xx.xx, providing a dated supplier-level growth calibration rather than a global forecast.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A company speaker reported Silvus calendar-2025 revenue of USD xx.xx and a USD xx.xx 2026 expectation; drone and equipment attribution is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silvus business scale supplies a quantitative mesh-capable equipment check, not an observed decentralized deployment share.
7. Codan FY2025 Results - ASX Announcement, August 21, 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Codan reported that FY2025 unmanned-systems revenue of approximately AUD xx.xx more than doubled the previous year's result. This constrains the historical premium-link expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue provides a financial anchor, subject to calendar-period, airborne-attribution and equipment-versus-service adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately AUD xx.xx FY2025 unmanned-systems revenue supplies the first financial input for DTC's calendar and airborne-equipment bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported mesh-radio business activity constrains qualified digital supply, after airborne and equipment attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unmanned mesh-capable supplier revenue supports available multipoint equipment but does not establish its actual deployment topology.

8. Codan H1 FY2026 Investor Presentation - February 19, 2026
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: DTC's July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input for the calendar-2025 revenue bridge.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The disclosed growth and approximately balanced conflict/non-conflict application mix support premium demand while qualifying dependence on wartime procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: July-December 2025 unmanned-systems revenue of approximately AUD xx.xx, up xx.xx%, supplies the second calendar-bridge input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately balanced conflict/non-conflict applications qualify an exclusively wartime adoption thesis; disclosed revenue does not measure peer-network incidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DTC's AUD xx.xx unmanned-systems revenue and approximately half conflict-related mix constrain premium purchasing; conflict revenue is not synonymous with combat missions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Non-conflict unmanned revenue supplies a countercheck against assigning all premium defense activity to current combat.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense and unmanned revenue constrain the military purchasing assumption; non-conflict geography does not establish a civilian customer.
9. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The official 2025 annual exchange rate of USD xx.xx per Australian dollar converts the calendar-bridged DTC revenue into the common USD valuation basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2025 annual USD xx.xx per AUD observation converts the DTC proxy to the inherited USD basis.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The exchange-rate input supports the USD-denominated mesh-capable supplier cross-check, not topology penetration.

10. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Elsight disclosed 2025 revenue of USD xx.xx comprising physical goods of USD xx.xx data usage of USD xx.xx and service-level agreements and other services of USD xx.xx. The separate streams constrain hardware attribution and recurring-service assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Audited 2025 physical-goods revenue of USD xx.xx supports the equipment/service bridge, not a global hardware percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and software income is included within USD xx.xx of service-level agreements and other services; software attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 data-usage revenue of USD xx.xx provides an observed separately billed connectivity input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported service streams support paid continuing obligations but do not isolate global integration/lifecycle revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Halo-centred business activity constrains premium multibearer scale; adjacent non-UAV activity requires exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: One European UAV-sector customer contributed xx.xx% of 2025 revenue; concentration does not identify its sales channel.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately disclosed goods, data-usage and service revenues provide a quantitative service-mix check; recurring revenue does not establish transferred management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The service/goods distinction prevents automatically classifying customer-administered paid software as externally managed networks.
11. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Mobilicom reported approximately USD xx.xx of 2025 revenue. This provides a small-supplier scale check and cautions against extrapolating exceptional growth at another supplier across the market.

12. Ukraine Ministry of Defence - Key 2025 Highlights, December 27, 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Ukraine's Ministry of Defence reported three million FPV drones received during 2025. The model values only attributable communications equipment, not complete drones, weapons or mission output.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The realized 2025 delivery observation constrains the 2026 attritable-link demand baseline; it is not a 2026 delivery observation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ministry's three million 2025 FPV receipts constrain the procurement-driven attritable communications baseline; only attributable link value is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official defense receipts establish military commissioning rather than assigning procurement to commercial aircraft suppliers.

13. Armed Forces to Receive Three Million FPV Drones by Year-End - Cabinet of Ministers of Ukraine
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The December xx.xx 2025 government statement described three million FPV deliveries as almost xx.xx times the previous year's level, implying approximately xx.xx comparable 2024 deliveries. This is a derived historical input, not an exact published count.

14. The Drone Databook - Center for the Study of the Drone at Bard College, 2019
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The academic inventory study identified xx.xx confirmed military drones in service in 2019, with the actual population likely exceeding xx.xx. Its all-class inventory constrains, but does not directly measure, the higher-value installed cohort.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The documented international installed base provides a historical constraint for the modeled 2025 medium/large-aircraft replacement and sustainment pool. The 2025 stock remains an estimate.

15. L3Harris Reports Fourth-Quarter and Second-Half 2019 Results
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: L3Harris reported an MQ-xx.xx airborne-datalink production order that brought the awarded IDIQ value to USD xx.xx. This establishes a historical equipment-program scale, not annual recognized revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The identified airborne-link procurement provides a commercial scale check for the traditional high-value communications cohort; no contract ceiling is added directly to 2025 sales.

16. Part 107 Waivers - Federal Aviation Administration
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The FAA's operation-specific waiver pathway supports retaining an authorization constraint on remote-service adoption rather than equating marketed BVLOS capability with deployable demand.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Operation-specific permission remains a forecast adoption premise; this source does not establish the modeled 2027 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operation-specific waivers constrain BVLOS purchasing adoption; product capability is not a completed authorization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Compliant VLOS operations and departures requiring waivers are distinct; long-range hardware does not determine the allocation.
17. 2025 Summary of Changes to Canada's Drone Regulations - Transport Canada
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Canada's lower-risk BVLOS pathway became applicable November xx.xx 2025 under defined conditions. This supports incremental addressable demand, not unrestricted global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional lower-risk BVLOS framework effective November xx.xx 2025 supports incremental accessible demand, not unrestricted Global access.
18. FAA Aerospace Forecast Fiscal Years 2019-2039 - Historical Fleet Summary
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The FAA's historical publication identifies a 2018 recreational fleet of approximately xx.xx and commercial fleet of xx.xx. These constrain the pre-2020 civilian backcast; subsequent forecast figures are not treated as realized observations.
19. Transformation of the Defence Forces: How Ukraine Changed Its System - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official account reports xx.xx fiber-controlled drone deliveries during 2025; only attributable communications value enters the model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed guided-fiber procurement constrains substitution within the attritable cohort and prevents allocating its entire value to radio.

20. Military Receives First 100,000 FPV Drones through DOT-Chain Defence - Ministry of Defence of Ukraine
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 record reports over xx.xx channel deliveries, nearly one-third fiber; this selected late-year sample is not extrapolated globally.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The platform links manufacturers, customers and the procurement agency; payment coordination alone does not establish intermediary resale.
21. Safe-T Drone Power Station - Elistair
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current offering includes an optical-fiber option and reports more than 2,000 systems in use; installed stock is a scale check, not 2025 sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Safe-T offers an optical-fiber option and reports over xx.xx cumulative deployed units; optical-option incidence and annual communications revenue are not disclosed.
22. Safe-T 2 - Advanced Tethering System Brochure
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier brochure separately identifies electrical data-bearing tether communications; this is historical category evidence, not current revenue disclosure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An optional optical-fiber communications configuration supports separation of guided optical and electrical data paths.

23. UAV/UGV Products - Advanced Microwave Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier distinguishes communications endpoints from supporting amplifiers; UAV attribution and value weights remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supporting amplifiers establish a commercial role distinct from complete systems and endpoints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Analog video products support the analog commercial category without establishing its transaction prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digital data products support the separate digital category; catalog counts are not used as market weights.
24. Aquila20 FPV Kit - BETAFPV
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed kit combines analog video and digital remote-control connectivity; whole-aircraft value is excluded and mixed-signaling prevalence remains assumed.

25. SkyLine UAS Command & Control - C2 for BVLOS
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Paired airborne and ground radios establish a complete communications-package option; indivisible package pricing is not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identified airborne and ground products support endpoint purchasing alongside complete packages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud link routing, monitoring and management support a separable communications-software role; unrelated fleet and awareness functions are excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The marketed ecosystem combines cellular, noncellular and satellite relationships; available capability does not establish paid activation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined control and payload capability supports the integrated-function boundary but not its commercial indivisibility or market share.
26. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier offers pre-integration and continuing support, establishing an integration/lifecycle business role without a separately billed global value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same radio family supports two-endpoint relationships; mesh-capable radio revenue is not automatically mesh-deployment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial mesh support establishes available decentralized arrangements, not purchased deployment prevalence.

27. Summary - ITU-T F.749.10: Requirements for Communication Services of Civilian Unmanned Aerial Vehicles
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The standards summary distinguishes flight-control and flight-data transport, supporting the flight-management attribution boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mission-payload services include imagery, sensor-data transport and signal relay, supporting a separately attributable payload category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Coexisting communications purposes support the combined-function analytical boundary but do not establish an indivisible purchase.
28. Mynaric AG - Annual Report 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: AIR revenue was EUR xx.xx in 2022 and zero in 2023, with the existing HAWK production basis discontinued; this materially limits commercialization assumptions.
29. General Atomics and Kepler Communications Successfully Demonstrate Air-to-Space Optical Communications Capability
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2025 airborne optical demonstration is not an identified commercial unmanned-aircraft delivery and therefore does not establish the modeled numerator.
30. Doodle Labs Announces Launch of Reseller Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The UAV-facing reseller program explicitly includes distributors; program availability is not a revenue-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Value-added resellers and systems integrators are included, supporting distinct channel roles rather than supplier-brand classification.

31. Where To Buy - DJI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official online stores establish a supplier-direct route distinct from authorized intermediaries.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized retail and dealer routes are separately recognized, with warranty consequences for unauthorized purchases; no channel sales split is disclosed.
32. Galaxy 1 Partners with Viasat to Deliver Rapid, Scalable and Secure Communications for Uncrewed Aircraft
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2026 announcement assigns provisioning, billing and integration responsibilities, supporting a managed value-added channel mechanism without measured penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced delivery relationship concerns a dedicated satellite communications service; it supports a forecast premise, not realized 2032 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The March 2026 collaboration names provisioning, billing, monitoring and lifecycle duties, supporting a provider-management commercial premise without disclosing penetration.
33. Statement: Spectrum for Unmanned Aircraft Systems - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered mobile-network use requires operator agreement; this constrains forecast cellular adoption rather than proving global access.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Satellite use requires the relevant network relationship and separate aviation compliance, qualifying unrestricted service-penetration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: An intermediary cannot independently grant network permission, limiting the forecast transfer of customer obligations.
34. DJI O4 Air Unit Series - FAQ
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party goggles are unsupported and O3 accessory compatibility is partial, supporting offering-specific switching constraints rather than universal replacement interoperability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Offering-specific goggles compatibility and partial accessory compatibility qualify replacement assumptions; they do not quantify household sales or universal switching costs.

35. Read Our Terms & Conditions - Elsight
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Embedded software rights and automatically renewing cloud services support entitlement-specific allocation; license existence alone does not establish separately attributable revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Unlisted network connections and third-party integration are excluded from standard scope, supporting separation of connectivity from integration deliverables.
36. Uncrewed Aircraft Systems - NIST Public Safety Communications Research
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public-safety portfolio distinguishes single-link, multi-UAS and mesh settings; these are independent participant distinctions, not purchased prevalence observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Multi-UAS communications provide a demand-side basis for multipoint classification without identifying the share using a central coordinating node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mesh and multi-hop settings support decentralized participant relationships independently of bearer technology.
37. CY 2024 Small Unmanned Aircraft Systems Survey Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 survey's overlapping activity responses constrain civilian purchasing assumptions, not market shares; real estate and construction are prominent.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activity responses provide a civilian construction/real-estate demand check for the modeled surveying allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recreational-only activity among Part xx.xx respondents demonstrates that registration type is not an institutional purchasing sector.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Emergency-organization waiver intentions constrain, but do not verify, future authorized BVLOS uptake.

38. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI reports over xx.xx of its agricultural drones in use at end-2025; stock constrains installation and replacement assumptions but is not annual sales.
39. DJI Agriculture's Annual Report Reveals Drone-Powered Farming Revolution at Brazil's Agrishow 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: DJI's approximately xx.xx agricultural drones in use at end-2024 provide the preceding stock comparison for the 2025 purchasing-flow calibration.
40. EHang Reports Fourth Quarter and Fiscal Year 2025 Unaudited Financial Results - SEC Exhibit 99.1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx eVTOL deliveries in 2025 constrain passenger-program installation scale; variants and communications-only values remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aircraft delivery observations constrain the passenger component of the parent transport budget, not complete-aircraft inclusion.
41. Zipline to Triple U.S. Manufacturing Facility, Creating More Jobs in AI and Robotics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Over xx.xx cumulative deliveries and planned capacity up to xx.xx aircraft annually constrain cargo adoption; neither is recognized communications revenue or realized annual production.
42. Swisscom Broadcast and Nokia Build Joint Drone Network Across Switzerland
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced infrastructure-inspection service supports operator-mediated purchasing and the conditional inspection uptake premise, not completed nationwide deployment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-responder services establish an emergency purchasing alternative without verifying incident-specific availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A commercial service operator coordinates underlying infrastructure and data storage, supporting separation from the commissioning mission customer.

43. Easy Access Rules for Unmanned Aircraft Systems - Revision from June 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: External-service provisions require allocation of operator/provider responsibilities; they support responsibility-based classification, not a measured hybrid contract share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operator-retained responsibilities prevent equating an external service with complete provider management.
44. UAS Operator Radio Licence Guidance - Ofcom
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The guidance distinguishes exempt drone equipment from operator-license equipment and requires relevant network agreement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Generally exempt equipment is a distinct conditional permission route, not an absence of applicable rules.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Radio authorization expressly does not confer aviation authorization, qualifying deployment-dependent uptake assumptions.
45. Class Licences - Australian Communications and Media Authority
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Class-authorized terminals can communicate with licensed base or space stations; terminal and underlying network permission must be distinguished.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Assigned apparatus permission and underlying network licensing constrain, but do not directly measure, the assigned-spectrum allocation.
46. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cloud and on-premises options do not independently establish retained or transferred network-management rights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cellular, radio and satellite combinations establish an available multibearer offering, not jurisdiction-specific mixed authorization or its sales share.

47. Defence Procurement Agency DOT - Official Post on Fiber-Optic Drone Procurement and 2025 Deliveries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official procurement agency reports xx.xx fiber-optic drone deliveries under its contracts in 2025, constraining commercial non-radio equivalents; only attributable communications value is included.
48. ITU-T Y.4215 - Use Cases, Requirements and Capabilities of Unmanned Aircraft Systems for the Internet of Things
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recommendation independently identifies UAS-aided relaying as a mission output; standards recognition does not disclose commercial purchasing incidence.
49. IFRC Drones Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The humanitarian institutional demand setting supports a separate nonprofit purchasing branch, not a measured procurement share.
50. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate complete-platform and component/software frameworks support qualification-sensitive defense purchasing; selections and additions are not revenue weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Program verification and capability-development purchasing establish a development context without quantifying worldwide link purchases.

20. Competitive Landscape

20.1. Market Share Analysis, 2025

Supported competitive positioning follows the buyer's acceptance boundary rather than corporate scale. A merchant radio supplier competes for an aircraft manufacturer's component selection; a configured-system supplier competes for package accountability; a network provider competes for continuing communications access. ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪

Named incorporation relationships provide useful access evidence without establishing portable qualification. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ An integrator route is useful when the buyer needs that defined deliverable; direct component purchasing preserves sourcing control while retaining coordination duties.

Defense-program and government-screening evidence answer different access questions. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Procurement approvers should confirm the exact offering and current access status rather than transfer qualification from another program, a supplier name or a portfolio description.

Installed commitments can change the practical competitive set. DJI's O4 documentation limits goggle compatibility and accessory reuse, while permitting third-party controller relationships under its stated conditions. ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪

Regional connectivity propositions compete on service scope as well as equipment. ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Buyers should

compare the territory, aircraft eligibility, included software and escalation owner actually offered, without assuming that a regional relationship establishes Global fulfillment.

[redacted] It does not independently overcome aircraft acceptance, procurement eligibility or network permission. Direct entry is more suitable when the entrant can obtain those commitments itself and the customer values direct supplier control; otherwise, a clearly bounded integration relationship can reduce coordination burden at the cost of control over the packaged deliverable.

Sources & Evidence

1. Velaris - BVLOS connectivity for UAVs
   - The service proposition establishes a purchasing relationship distinct from merchant component supply. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
2. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   - DIU's February xx.xx 2025 announcement distinguishes verification selections from additions and includes Mobilicom component activity. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
3. Software-Defined Radios | Cubic
   - The published component and integrated-package alternatives support defining the purchasing boundary before supplier comparison. ([cubic.com](https://www.cubic.com/defense/secure-communications/software-defined-radios))
4. Triad High Power Radio Systems For Unmanned Land Air Sea
   - The packages establish an integration purchasing route above originating radio supply. ([triadrf.com](https://triadrf.com/radio-systems/))
5. Mesh Rider Radios - Doodle Labs
   - The identifiable radio offering supports comparison of component purchasing with an aircraft-level package incorporating that supplier. ([doodlelabs.com](https://doodlelabs.com/products/radios))
6. Astro - US Made Commercial Drone
   - Astro's named Doodle Labs relationship supports an account-access example, not interchangeability with a separately purchased radio. ([freeflysystems.com](https://freeflysystems.com/astro))
   - Evidence informing base-year company-share estimates: The current business page reports thousands of units in the field and identifies Doodle Labs, LTE and AuterionOS within Astro. It constrains installed scale and upstream deductions, not the assumed 2025 stock, turnover or incremental realization. ([freeflysystems.com](https://freeflysystems.com/astro))
7. Microhard - Products
   - The originating catalog provides a component purchasing boundary distinct from downstream branded packages. ([microhardcorp.com](https://www.microhardcorp.com/products.php))
8. Datalinks | UAV Navigation
   - The named TELEM07 package supports a compatibility-defined integration route distinct from direct modem procurement. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
9. SkyLink - uAvionix
   - The identifiable equipment-and-management relationship supports defining the procurement deliverable before supplier comparison. ([uavionix.com](https://uavionix.com/product/skylink/))
10. DJI O4 Air Unit Series - FAQ - DJI
    - DJI excludes third-party O4 flight goggles, permits third-party controller relationships under stated conditions and identifies limits on accessory compatibility. ([dji.com](https://www.dji.com/o4-air-unit/faq))
11. Arycom announcement of Velaris UAV connectivity with Viasat and Gotonomi
    - The named partner relationship supports a channel proposition distinct from originating network ownership. ([linkedin.com](https://www.linkedin.com/posts/arycom_velaris-arycom-viasat-activity-xx.xx-Nvhd))

12. Patria has signed an agreement with Airbus Defence and Space for SIRTAP datalink solution
    - Patria's company-issued February xx.xx 2025 announcement identifies a CANDL-based SIRTAP agreement with Airbus Defence and Space covering airborne and ground systems. ([news.cision.com](https://news.cision.com/patria-group/r/patria-has-signed-an-agreement-with-airbus-defence-and-space-for-sirtap-datalink-solution%2Cc4105786))
13. ドローン向け上空 LTE SIM なら上空電波パッケージ | DJI 対応 | KDDI スマートドローン
    - KDDI SmartDrone separates aerial connectivity from management-system eligibility, including an ANAFI Ai restriction, and qualifies its area information. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/communication/4g-lte/))
    - Evidence informing base-year company-share estimates: The current aerial package lists JPY xx.xx annually excluding tax and separates connectivity, management and adjacent package obligations. The tariff is a current comparable; historical realization, attachment and deductions remain modeled.
14. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
    - The configured controller and radio relationship supports an integration-based account route with configuration-specific conditions. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))
15. Telemetry Radios - Holybro
    - The catalog provides another named purchasing route involving Microhard products. ([holybro.com](https://holybro.com/collections/telemetry-radios))
16. UAS Radios: Wi-Fi, Microhard, Doodle Labs, LTE | ModalAI
    - The listed Microhard products establish a platform-related purchasing route, not portfolio-wide compatibility or independent originating radio technology. ([modalai.com](https://www.modalai.com/pages/radios))
17. LTE Aerial Use Plan | NTT DOCOMO
    - NTT DOCOMO presents a dedicated aerial LTE plan with compatible-equipment conditions and domestic-use scope. No tariff values are used. ([docomo.ne.jp](https://www.docomo.ne.jp/charge/lte-joukuriyou-plan/))
18. Vodafone Germany Launches Platform for Commercial Drones
    - The German carrier-platform relationship establishes a regional account proposition, not Global service fulfillment. ([vodafone.com](https://www.vodafone.com/news/newsroom/technology/vodafone-germany-launches-platform-for-commercial-drones))
19. CNPC-1000 UAS Command and Control Data Link | Collins Aerospace
    - Collins Aerospace's CNPC-xx.xx page publishes a notice prohibiting sale or lease until FCC authorization is obtained. The page alone does not independently settle subsequent authorization status. ([rtx.com](https://www.rtx.com/collinsaerospace/what-we-do/industries/military-and-defense/communications/tactical-data-links/cnpc-xx.xx-uas-command-and-control-data-link))
20. Elsight Limited - Appendix 4E and Annual Report 2025
    - Evidence informing base-year company-share estimates: Audited 2025 revenue separates USD xx.xx goods, USD xx.xx data usage and USD xx.xx other services. Comparative amounts support the recurring-dollar and revenue-mix test; Aura disclosures require scope qualification. Capture factors remain modeled.
21. Xmobots Aeroespacial e Defesa Ltda. - Demonstrações financeiras em 31 de dezembro de 2025
    - Evidence informing base-year company-share estimates: Note xx.xx separates BRL xx.xx product sales, BRL xx.xx merchandise resale and BRL xx.xx services, with returns and sales-tax deductions. These anchor the manufacturing-only attribution model, not a disclosed communications subtotal.
22. Brazilian Reals to U.S. Dollar Spot Exchange Rate (AEXBZUS)
    - Evidence informing base-year company-share estimates: The official 2025 annual average is BRL xx.xx per USD. It replaces the draft's assumed USD xx.xx per BRL without changing the local-currency activity and content assumptions.

23. NAURU 500C ISR - Xmobots

- Evidence informing base-year company-share estimates: The Nauru commercial portfolio identifies associated ground data terminals, supporting separation of included communications from the wider aircraft and control-station offering. It does not establish annual units, realized link prices or the modeled own-content fraction.

24. Batcomms OÜ - 2025 Annual Report

- Evidence informing base-year company-share estimates: The statutory report records EUR xx.xx customer sales and separate EUR xx.xx other operating income for March xx.xx-December xx.xx 2025. Sales are classified as R&D, requiring an explicit delivered-commercial-communications assumption rather than automatic eligibility.

25. BC-COMMS - BATCOMMS

- Evidence informing base-year company-share estimates: The BC-COMMS commercial offering addresses UAV, UGV and sensor-network applications, supporting a scope deduction within the narrow customer-development receipt model. It does not observe the assumed xx.xx% aircraft attribution.

26. U.S. Dollars to Euro Spot Exchange Rate (AEXUSEU)

- Evidence informing base-year company-share estimates: The official 2025 annual average is USD xx.xx per EUR, converting modeled eligible receipts of EUR xx.xx to USD xx.xx. It replaces the draft's rounded conversion parameter.

- Evidence informing base-year company-share estimates: The official 2025 annual average of USD xx.xx per EUR converts the modeled EUR xx.xx communications numerator to USD xx.xx. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXUSEU))

- Evidence informing base-year company-share estimates: The 2025 annual rate is USD xx.xx per EUR, used to convert the modeled EUR xx.xx numerator.

- Evidence informing base-year company-share estimates: The 2025 annual rate is USD xx.xx per EUR, used for the revenue-calibrated communications numerator.

27. ドローン購入・機体選定サポート - KDDI スマートドローン株式会社

- Evidence informing base-year company-share estimates: The current aircraft-purchasing page reports experience with more than xx.xx customer companies. This constrains a modeled customer reference pool, not historical aerial-connectivity subscriptions or annual billing equivalents.

28. LTE 上空利用プランのご案内 - NTT DOCOMO

- Evidence informing base-year company-share estimates: The aerial-use tariff publishes a JPY xx.xx tax-exclusive monthly base charge. Twelve months supply the JPY xx.xx peer-calibrated network-input deduction; this is not an observation of KDDI's wholesale cost.

29. Japanese Yen to U.S. Dollar Spot Exchange Rate (AEXJPUS)

- Evidence informing base-year company-share estimates: The official 2025 annual average is JPY xx.xx per USD. It converts the modeled JPY xx.xx incremental-package numerator, replacing the draft's assumed JPY xx.xx per USD.

30. Motorola Solutions - Morgan Stanley Technology, Media & Telecom Conference Transcript, March 2, 2026

- Evidence informing base-year company-share estimates: The company CFO reported Silvus calendar-2025 revenue of USD xx.xx and identified drone applications. This anchors total-business revenue, not the modeled xx.xx% airborne attribution or equipment/service split. ([motorolasolutions.com](https://www.motorolasolutions.com/content/dam/msi/investors/doc_events/2026/final_transcript_msi_at_morgan_stanley_tmt_conference_03-xx.xx-xx.xx.pdf))

31. Motorola Solutions, Inc. Form 8-K - Silvus Acquisition Completion

- Evidence informing base-year company-share estimates: The mandatory filing records completion of the Silvus acquisition on August xx.xx 2025. It supports ownership and entity continuity, not a new revenue numerator or transferred product-specific warranties. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d88358d8k.htm))

32. Mobilicom Reports 2025 Year-End Financial Results - SEC Exhibit 99.1
· Evidence informing base-year company-share estimates: The filed financial table reports USD xx.xx of 2025 revenue; operating disclosures identify continuing SkyHopper drone-production orders. These anchor the modeled numerator before the assumed xx.xx% scope deduction. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ea028293501ex99-xx.xx.htm))
33. ASSURE A83 - 2025 Annual Report
· Evidence informing base-year company-share estimates: The January-November 2025 academic detection dataset identifies manufacturer information for xx.xx platforms, including xx.xx DJI platforms. These counts calibrate a restricted installed/activity proxy; they are not global shipments or an observed revenue share.
34. DJI Launches O4 Air Unit Series to Deliver Unmatched First-Person View Flight Experience
· Evidence informing base-year company-share estimates: DJI's January xx.xx 2025 announcement lists O4 Air Unit prices of USD xx.xx and USD xx.xx. These constrain endpoint valuation comparables, subject to camera, controller-function and channel deductions; they do not establish annual units or realized OEM receipts.
35. DJI Demonstrates Drone Technology's Potential To Unlock U.S. Job Growth Across Agriculture Industry
· Evidence informing base-year company-share estimates: DJI's April 2025 company article states that cumulative agricultural-drone sales exceeded xx.xx units by October 2024. This constrains the modeled opening pool but is not an exact January 2025 active-fleet observation.
36. DJI Agriculture Reveals Global Adoption of Agricultural Drones Cuts 51Mt in Carbon Emissions and Saves 410Mts of Water for Farmers Globally
· Evidence informing base-year company-share estimates: DJI's April xx.xx 2026 announcement reports more than xx.xx DJI agricultural drones in use globally at end-2025. The observation constrains deployment scale; annual purchases require an explicitly modeled opening pool and retirements.
37. DJI O4 Air Unit Series - FAQ
· Evidence informing base-year company-share estimates: The official O4 FAQ distinguishes supported goggles, limited accessory reuse and conditional third-party controller compatibility. These support endpoint and replacement-boundary adjustments, not a numerical switching premium or global shipment weight.
38. Sky-Drones company post - Over 5000 Worldwide Users Trust Sky-Drones
· Evidence informing base-year company-share estimates: Company-issued disclosure of more than xx.xx worldwide users supplies the rounded reference pool for the assumption-led customer-activity model; it does not establish paying hardware accounts or annual shipments. ([linkedin.com](https://www.linkedin.com/posts/sky-drones_defense-security-inspections-activity-xx.xx-EU1j))
39. AIRLink - Sky-Drones Technologies Ltd
· Evidence informing base-year company-share estimates: AIRLink combines communications with autopilot and mission-computing functions, supporting communications-only attribution. Its stated monthly commercial supply capability is a feasibility ceiling, not observed calendar-2025 shipments. ([sky-drones.com](https://sky-drones.com/airlink))
40. SmartLink Ground Module - Sky-Drones Technologies Ltd
· Evidence informing base-year company-share estimates: The retrieved SmartLink Ground Module listing provides a current USD xx.xx endpoint price anchor. The xx.xx% net realization adjustment and historical price bridge are modeled, not disclosed. ([sky-drones.com](https://sky-drones.com/telemetry/smartlink-ground-module.html))
41. AIRLink Enterprise Set - Sky-Drones Technologies Ltd
· Evidence informing base-year company-share estimates: The current USD xx.xx AIRLink Enterprise Set price is a broader-package comparable. It supports excluding unrelated avionics and camera value rather than treating the complete set price as communications revenue. ([sky-drones.com](https://sky-drones.com/sets/airlink-enterprise-set.html))
42. Codan FY2025 Results - ASX Announcement, August 21, 2025
· Evidence informing base-year company-share estimates: Approximately AUD xx.xx of FY2025 DTC unmanned-systems revenue supplies the fiscal-year anchor for the calendar-2025 bridge; it is not wholly drone-attributable revenue. ([codan.com.au](https://codan.com.au/wp-content/uploads/2025/xx.xx/ASX-FY25-announcement_Aug-Board_FINAL-xx.xx.xx.xx.pdf))

43. Codan H1 FY2026 Investor Presentation
    · Evidence informing base-year company-share estimates: DTC's July-December 2025 unmanned revenue of approximately AUD xx.xx, up xx.xx%, supplies the second-half input and permits inference of the comparable 2024 half-year. The approximately balanced conflict/non-conflict mix does not disclose airborne attribution. ([codan.com.au](https://codan.com.au/cda-h1-fy26-investor-presentation/))
44. U.S. Dollars to Australian Dollar Spot Exchange Rate - Annual Series AEXUSAL
    · Evidence informing base-year company-share estimates: The official 2025 annual exchange rate of USD xx.xx per AUD converts DTC's calendar-bridged revenue to the frozen USD measurement basis. ([fred.stlouisfed.org](https://fred.stlouisfed.org/series/AEXUSAL))
45. UAV Data Link and Unmanned Communications - DTC, a Codan Company
    · Evidence informing base-year company-share estimates: The official unmanned communications offering supports the relevant business boundary; it does not quantify the assumed xx.xx% airborne share of disclosed unmanned revenue. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))
46. Embention reports record results in 2025 with €13.4 million in revenue and €6.6 million in EBITDA
    · Evidence informing base-year company-share estimates: Reported EUR xx.xx of 2025 company revenue provides a ceiling check for the communications-only customer-cohort estimate, not an automatic market-share numerator. ([embention.com](https://www.embention.com/news/embention-reports-record-results-in-2025-with-e13-xx.xx-million-in-revenue-and-e6-xx.xx-million-in-ebitda/))
47. Investor Relations - Embention
    · Evidence informing base-year company-share estimates: The investor page's 2025 metrics identify more than xx.xx worldwide clients, providing the rounded customer-pool input. Annual radio-buying incidence and quantities remain assumptions. ([embention.com](https://www.embention.com/investors/))
48. Datalink SDL for Wireless Communications - Embention
    · Evidence informing base-year company-share estimates: The SDL portfolio identifies SDL09 as a rugged P900 product, supporting attribution to Embention's incremental package contribution rather than gross originating-modem turnover. No sales quantities or net incremental prices are disclosed. ([embention.com](https://www.embention.com/veronte-ecosystem/avionics/sdl-los-datalink/))
49. P900 OEM Wireless Modem - Microhard
    · Evidence informing base-year company-share estimates: Microhard's originating P900 catalog corroborates the radio-origin boundary used to exclude incorporated modem value from Embention's modeled contribution; it does not establish wholesale transfer prices. ([microhardcorp.com](https://www.microhardcorp.com/P900.php))
50. The Importance of a Robust Data Link in UAV Operations - Embention
    · Evidence informing base-year company-share estimates: Embention's dated disclosure of its DTC collaboration supports retaining originating DTC radio value at DTC rather than counting the same underlying radio again in downstream integration. ([embention.com](https://www.embention.com/news/the-importance-of-a-robust-data-link-in-uav-operations/))
    · Evidence informing base-year company-share estimates: The disclosed DTC collaboration establishes an incorporated-radio and integration role. It supports the net-value boundary, not the assumed customer activity or incremental service fee. ([embention.com](https://www.embention.com/news/the-importance-of-a-robust-data-link-in-uav-operations/))
51. Radionor Communications AS Reports Record Earnings in 2025 Financial Result
    · Evidence informing base-year company-share estimates: Radionor reports rounded 2025 revenue of USD xx.xx and prior-year revenue of USD xx.xx. These anchor the aggregate-revenue and incremental-revenue model, not an observed UAV-only numerator or market share.
52. Radionor Communications opens branch in Ukraine - Ministry of Defence of Ukraine
    · Evidence informing base-year company-share estimates: The July xx.xx 2025 government account identifies UAV communications as a particular focus of Radionor's Ukrainian cooperation. This supports the direction of differentiated incremental UAV attribution, but does not quantify the assumed allocation.

53. Unmanned - Radionor Communications
    - Evidence informing base-year company-share estimates: The unmanned portfolio identifies UAV-facing radios and associated endpoint offerings, supporting the commercial-category bridge and separation from non-UAV applications. It does not establish sales volumes.
54. About CADDX
    - Evidence informing base-year company-share estimates: The current official page reports more than xx.xx distributor partners and identifies proprietary FPV transmission products and an official-store route. The model uses xx.xx as a footprint anchor with explicit historical, activity and channel-tier adjustments; it does not use the broader user count as annual shipments.
55. Walksnail Avatar HD VTX V2 Module - CADDXFPV
    - Evidence informing base-year company-share estimates: The camera-free Walksnail Avatar HD VTX V2 Module is listed at USD xx.xx. This current retail comparable anchors modeled transmitter realization after a stated indirect-channel adjustment; it is not an observed 2025 realized selling price.
56. Walksnail Avatar FPV VRX - CADDXFPV
    - Evidence informing base-year company-share estimates: The receiver listing establishes a separable ground communications endpoint and offers standalone and bundled purchasing choices. Its displayed USD xx.xx bundle price is not treated as the standalone receiver ASP; the model's USD xx.xx net receiver contribution remains an explicit assumption.
57. Viasat Annual Report 2026
    - Evidence informing base-year company-share estimates: The audited comparative segment table reports FY2025 tactical-networking product revenue of USD xx.xx. The report identifies TrellisWare as a majority-owned consolidated subsidiary and includes its activity within tactical networking; the line is a proxy, not TrellisWare-only or UAV-only revenue.
58. Viasat, Inc. Form 10-Q - Quarter Ended December 31, 2025
    - Evidence informing base-year company-share estimates: The tactical-networking product table reports April-December revenue of USD xx.xx in 2025 and USD xx.xx in 2024. Combined with FY2025 revenue, these inputs produce the USD xx.xx calendar-2025 business-line proxy.
59. TrellisWare Releases Latest Software with Support for Multiple Waveforms
    - Evidence informing base-year company-share estimates: The April xx.xx 2024 announcement identifies TW-xx.xx and TW-xx.xx embedded modules with small-UAS integration applicability and separately licensed software capability. This establishes a pre-2025 eligible portfolio and supports rejecting a pre-entry-zero inference.
60. TrellisWare Launches TW-310 Embedded Datalink Module For UAS Market
    - Evidence informing base-year company-share estimates: The TW-xx.xx launch is dated May xx.xx 2026. Its chronology prevents attributing that new offering's launch-driven sales to 2025 while leaving earlier eligible module activity in the modeled numerator.
61. MicroPilot - Professional UAV Autopilots and Client Base
    - Evidence informing base-year company-share estimates: The retrieved company page reports over 2,000 clients. This current cumulative business-scale observation constrains, but does not directly establish, the modeled xx.xx-customer-equivalent 2025 pool or annual ordering incidence.
62. MP2128LRC2 - MicroPilot Integrated UAV Autopilots
    - Evidence informing base-year company-share estimates: The MP2128LRC2 offering identifies integrated airborne/ground communications and off-the-shelf radio modems. This supports estimating only proprietary interface and incremental integration value rather than counting incorporated modem revenue again.
63. Potential of Unmanned Aerial Vehicles in the Grains Industry - Ben Boughton, Nuffield Australia, 2014
    - Evidence informing base-year company-share estimates: The 2014 noncommercial report identifies a USD xx.xx MicroPilot ground-control software price and distinguishes software from the radio connection. It is a historical comparable, not an observed 2025 realized price or communications-only allocation.
64. AeroVironment, Inc. Form 10-K - Fiscal Year Ended April 30, 2026
    - Evidence informing base-year company-share estimates: The annual-filing revenue table reports fiscal-2025 Uncrewed Aircraft Systems revenue of USD xx.xx and Precision Strike and Defense Systems revenue of USD xx.xx. These are fiscal-period bridge inputs, not drone-data-link revenue.

65. AeroVironment, Inc. Form 10-Q/A - Quarter Ended January 31, 2026, Filed June 22, 2026
· Evidence informing base-year company-share estimates: The amended quarterly filing supplies UAS and Precision Strike revenue for the nine-month and quarterly periods ending January 2026 and January 2025. Those inputs support the calendar-period bridge and expose the acquired-business scope adjustment; revenue was unaffected by the restatement.
66. AeroVironment DDL Digital Data Link - 2015 Product Datasheet
· Evidence informing base-year company-share estimates: The historical 2015 DDL datasheet identifies separately supplied AeroVironment communications modules and transceivers. It supports a communications-only originating-product boundary, not 2025 shipments or current merchant availability.
67. GA-ASI Selected To Support U.S. Navy CCA Design Effort - October 17, 2025
· Evidence informing base-year company-share estimates: The October xx.xx 2025 company announcement reports more than xx.xx aircraft built annually and more than xx.xx cumulative deliveries. These constrain the annual installation and retained-support-pool model; neither is a directly observed 2025 communications numerator.
68. GA-ASI Demonstrates Predator-System Interoperability With NATO ISR Enterprise at Unified Vision 2014
· Evidence informing base-year company-share estimates: The historical interoperability announcement identifies L-xx.xx communications equipment separately from GA-ASI networking, ground-station and integration contributions. It supports deducting third-party radio value and unrelated sensor-processing functions.
69. GA-ASI, Lockheed Martin and L3Harris Collaborate on Crewed-Uncrewed Teaming Flight Test - November 17, 2025
· Evidence informing base-year company-share estimates: The November xx.xx 2025 announcement identifies L3Harris radios in the October demonstration and states that the demonstration series used internal R&D funding. This supports excluding outside radio value and not treating the demonstration as a paid commercial delivery.
70. Hoverfly Spectre Officially Added to DIU Blue List, Cementing NDAA Compliance
· Evidence informing base-year company-share estimates: The company-issued February xx.xx 2025 release reports hundreds of systems delivered to defense customers. This anchors cumulative commercial activity, not observed annual shipments or the returned share.
71. Spectre - Hoverfly Technologies
· Evidence informing base-year company-share estimates: Spectre documentation identifies tether-carried command/control and separately named radio payloads. It supports communications-only attribution and exclusion of lifted merchant radios, not the assumed realized value.
72. Leonardo DRS, Inc. - 2025 Form 10-K
· Evidence informing base-year company-share estimates: The 2025 filing establishes an approximately xx.xx% minority interest in Hoverfly. It supports ownership-boundary treatment; investment value is not used as operating revenue and the working share receives no minority-ownership haircut.
73. Ondas Inc. - Form 10-K for the Year Ended December 31, 2025
· Evidence informing base-year company-share estimates: The filing reports USD xx.xx OAS revenue and rounded acquired-business contributions used to derive an approximately USD xx.xx core aerial-platform proxy. It also reports USD xx.xx Networks revenue and distinguishes aerial, ground-robotics, sensing and counter-UAS businesses. Communications content and package-equivalent prices remain modeled.
74. US tech helps Australian drone capabilities hit new high - Austrade
· Evidence informing base-year company-share estimates: The June xx.xx 2025 government-hosted company interview reports production exceeding xx.xx drones monthly. It anchors the modeled annual throughput; full-year deliveries and communications realization remain assumed. ([international.austrade.gov.au](https://international.austrade.gov.au/en/news-and-analysis/success-stories/us-tech-helps-australian-drone-capabilities-hit-new-high))

75. Skydio Extends its Modular, Open Platform to Support Custom Attachments for X10D
    · Evidence informing base-year company-share estimates: The March xx.xx 2025 release reports over xx.xx commercial/public organizations and prior full-rate X10D deliveries. The organization count constrains the modeled service pool but does not measure paid communications subscriptions. ([skydio.com](https://www.skydio.com/blog/skydio-extends-its-modular-open-platform-to-support-custom-attachments-for-x10d))
76. Skydio Delivers the First Systems for Tranche 2 of the U.S. Army's Short Range Reconnaissance Program
    · Evidence informing base-year company-share estimates: The May xx.xx 2025 release reports a fulfilled Army order and shipment of the xx.xx,000th drone. Cumulative milestones are corroborating scale observations, not an exact annual shipment difference. ([skydio.com](https://www.skydio.com/blog/skydio-delivers-first-systems-for-army-srr-t2))
77. Skydio Announces Upgraded Suite of Wireless and Connectivity Capabilities
    · Evidence informing base-year company-share estimates: The release distinguishes aircraft-related radio, cellular and fused connectivity offerings. It supports isolating communications from complete aircraft value, without establishing modeled prices or paid attachment rates. ([skydio.com](https://www.skydio.com/blog/skydio-announces-upgraded-suite-of-wireless-and-connectivity-capabilities))
78. U.S. Dollars to U.K. Pound Sterling Spot Exchange Rate (AEXUSUK)
    · Evidence informing base-year company-share estimates: The 2025 annual rate is USD xx.xx per GBP, used to convert the modeled GBP xx.xx incremental-value numerator.
79. eXtended Long Range System - Professional Long Range Radio Control Systems
    · Evidence informing base-year company-share estimates: The inspected manufacturer business presentation advertises xx.xx-plus units annually. This is an undated aggregate commercial-activity indicator, not observed 2025 shipments; period, UAV and endpoint adjustments are modeled.
80. Digital Micro Devices - Price List XLRS Systems, 20 January 2021
    · Evidence informing base-year company-share estimates: The January xx.xx 2021 manufacturer list gives communications-package ranges of EUR xx.xx-xx.xx and EUR xx.xx-xx.xx. These constrain the assumed EUR xx.xx historical reference; they do not establish 2025 realized prices.
81. DMD presentation
    · Evidence informing base-year company-share estimates: The dated January xx.xx 2024 CEO presentation identifies UAV, ground, surface, robotics and industrial applications, requiring a modeled UAV deduction rather than treating all activity as drone communications.
82. Goran S. - Orqa 2025 revenue disclosure
    · Evidence informing base-year company-share estimates: The company's CFO reports rounded 2025 revenue of EUR xx.xx and distinguishes it from an anticipated higher consolidated figure. This supplies the basket-calibration ceiling, not a directly observed communications numerator.
83. rapidFIRE 5.8Ghz Video Receiver
    · Evidence informing base-year company-share estimates: The inspected official shop lists the rapidFIRE video receiver at EUR xx.xx. Its separable communications function and current price constrain the modeled net module realization, without proving annual unit volume.
84. FPV Controller - Best Remote Drone Radio Transmitter - Orqa
    · Evidence informing base-year company-share estimates: The official FPV.Ctrl offering establishes a separately marketed control-link endpoint, supporting separation of originating communications from complete aircraft, headset displays and unrelated electronics.
85. Elistair | About us
    · Evidence informing base-year company-share estimates: The company timeline records crossing xx.xx products sold in 2022. This historical installed-pool scale anchors the modeled legacy purchasing and support components, not an observed 2025 flow.
86. Elistair Awarded €3 Million Contract for Small Tethered UAS by Allied Military Force
    · Evidence informing base-year company-share estimates: The February 2025 announcement states a EUR xx.xx small tethered-UAS contract including spares, training and support, with deliveries scheduled from Q2 2025. Recognition and communications-only content remain assumptions.

87. Elistair Equips Greece with 13 Tethered Drones to Fight Wildfires
- Evidence informing base-year company-share estimates: The May xx.xx 2025 announcement identifies an award for xx.xx tethered surveillance drones for Greek fire-service mobile operations centers. It provides a unit anchor, not confirmed 2025 recognized revenue.

88. Support - Elistair | Tethered Drone Company
- Evidence informing base-year company-share estimates: Elistair explains that wired-data capability depends on the aircraft and that some manufacturers retain wireless data. This supports a deduction for power-only tether purchases; it does not observe the modeled xx.xx% eligibility.

89. Solid State Annual Report 2025
- Evidence informing base-year company-share estimates: FY2025 Systems revenue is GBP xx.xx, with noncommunications activity reported at xx.xx%. Their complement supplies a derived GBP xx.xx communications input, subject to calendar and UAV adjustments.

90. Solid State plc - Final Results for the 12 months ended 31 March 2026
- Evidence informing base-year company-share estimates: FY2026 Systems revenue is GBP xx.xx, including GBP xx.xx communications-program revenue recognized in its first half, which falls within calendar 2025.
- Evidence informing base-year company-share estimates: The report identifies the Persistent Systems ecosystem and separately places the initial Project CAIN delivery after the captured base year, supporting exclusion of duplicated originating radios and later deliveries.

91. Unmanned Systems & Remotely-Operated Vehicles - Steatite Communications
- Evidence informing base-year company-share estimates: Steatite's official unmanned offering separates Wave Relay links from antennas, tracking and ground-system contributions. This supports an incremental-value model rather than attribution of all incorporated radio turnover.

92. DFS-Konzern Geschäftsbericht 2025
- Evidence informing base-year company-share estimates: The 2025 consolidated filing reports Droniq full-entity revenue of EUR xx.xx separately from ownership-attributed columns, supplying the correct company revenue anchor.
- Evidence informing base-year company-share estimates: The management report describes below-plan procurement and project delays, qualifying an automatic conversion of offering availability into paid activation.

93. HOD4stream Product Flyer
- Evidence informing base-year company-share estimates: The official HOD4stream brochure establishes a remote-control/video communications package with cellular access. It supports the dedicated-offering boundary, not annual sales or the assumed revenue mix.

94. Drohnen in Industrie - Sichtbar & automatisiert im Luftraum fliegen.
- Evidence informing base-year company-share estimates: The inspected official industrial-offerings page lists HOD4track from EUR xx.xx excluding VAT alongside whole aircraft, training and other services. The price is a current module-equivalent check, not observed 2025 realization or volume.

95. Press release: Frankfurt Fire Department relies on Droniq
- Evidence informing base-year company-share estimates: The November xx.xx 2025 customer announcement describes Droniq's aircraft sales, training, authorization support, mission services and UTM offering. These require exclusions rather than treating total revenue as data-link revenue.

96. The future of UAV connectivity: Gotonomi’s critical comms for autonomous UAV operations
- Evidence informing base-year company-share estimates: The original January xx.xx 2025 interview with Gotonomi's general manager reports more than xx.xx pre-production units delivered to the market and describes production deliveries beginning in February 2025. The model uses this company-operating statement as an engagement-scale anchor, not as audited paid shipments or 2025 revenue.

97. Gotonomi Completes Successful Flight Trials and Opens Orders
- Evidence informing base-year company-share estimates: The August xx.xx 2024 supplier announcement establishes production-order availability and separately identifies Gotonomi hardware, Videosoft licensing and Viasat airtime. It supports the model's exclusion of third-party software, connectivity and pure resale value, not its assumed 2025 unit flow or price.

98. Coalas Tech - Системи радіозв'язку для НРК
    - Evidence informing base-year company-share estimates: The company presentation states that more than xx.xx drones have been equipped and that activity began in 2024, supplying a cumulative commercial-activity reference rather than an annual sales count.
    - Evidence informing base-year company-share estimates: The presentation gives an entry paired-link price from USD xx.xx. The model separates aircraft receivers from reused ground equipment and applies explicit annualization, UAV-scope and net-realization assumptions.
99. Home - Coalas Tech: product listings and company activity
    - Evidence informing base-year company-share estimates: The retrieved manufacturer product listing gives UAH xx.xx for the basic coalas::45RX receiver. This is a current endpoint-price comparable, not an observed 2025 realized price; the model explicitly assumes the currency bridge and unchanged nominal historical comparable.
100. For investors and partners - UVS Dynamics
    - Evidence informing base-year company-share estimates: The company states that radio revenue begins with its first small series, whose date remained unpublished; disclosed grant and founders' financing are not market sales.
101. About - UVS Dynamics
    - Evidence informing base-year company-share estimates: The radio programme began in November 2025; the September 2026 status distinguishes current company development from earlier products worked on by team members, addressing predecessor attribution.
102. LAT Defence - European fibre-optic UAV components & manufacturing
    - Evidence informing base-year company-share estimates: The company's dated 2026 presentation identifies its new entity, 2026 product supply and a line still being commissioned; partner competencies are distinguished from this company's operating receipts.
103. Jauns aizsardzības uzņēmums «LAT Defence» ražos dronu tehnoloģijas un apmācīs to pilotus - LSM
    - Evidence informing base-year company-share estimates: July xx.xx 2026 reporting corroborates the new venture and its initial product-development and supply agreement, supporting the operating-entry date rather than a founding-date-only zero.
104. Lietuviški husarai danguje: šalyje įsisuka dronų pramonė - LRT
    - Evidence informing base-year company-share estimates: The February xx.xx 2025 commercial interview reports more than xx.xx aircraft dispatched and approximately xx.xx aircraft per month of capacity; these constrain the modeled flow but do not establish annual sales or link revenue.
105. Advanced UAV Defence Solutions - Baltic Viper
    - Evidence informing base-year company-share estimates: The official commercial portfolio identifies communications-bearing aircraft and relay offerings, supporting the activity boundary but not shipment counts or promotional performance claims.
106. WB Electronics S.A. - 2025 Management Report, including sustainability reporting
    - Evidence informing base-year company-share estimates: The 2025 report supplies the PLN xx.xx net-revenue table and xx.xx% aerospace taxonomy-turnover classification used as an explicitly qualified business-scope proxy, not direct drone-link sales.
107. Setki WARMATE dla Wojska Polskiego - GRUPA WB
    - Evidence informing base-year company-share estimates: The December xx.xx 2025 announcement identifies xx.xx WARMATE sets containing xx.xx aircraft scheduled for delivery by year-end; scheduled deliveries are not assumed to be recognized revenue.
108. Kolejne Warmate dla Wojska Polskiego - Defence24
    - Evidence informing base-year company-share estimates: Dated reporting corroborates the approximately PLN xx.xx gross, xx.xx-aircraft contract event; it calibrates package-price scale rather than directly observing communications revenue.
109. Thousandth FlyEye produced - WB GROUP
    - Evidence informing base-year company-share estimates: The March xx.xx 2024 announcement identifies the thousandth FlyEye produced. This cumulative milestone constrains the modeled installed support pool; it is not a 2025 shipment count.

110. Portuguesa Beyond Vision conquista contrato de drones nos EUA - Portugal Global
    - Evidence informing base-year company-share estimates: The commercial announcement reports EUR xx.xx of 2024 turnover and a EUR xx.xx, xx.xx-package order, with deliveries beginning in 2026. It supports the economic-package price proxy and excludes this order from assumed 2025 delivery revenue.
111. Citymesh first responder drone activated at DronePort, the first DiaB installed on an active airport
    - Evidence informing base-year company-share estimates: The April xx.xx 2025 customer disclosure identifies approximately xx.xx installed drone-in-a-box units and further deployments underway, constraining installed stock rather than supplier annual receipts.
112. Minister Francken visits the new Citymesh Remote Operations Center at DronePort Sint-Truiden
    - Evidence informing base-year company-share estimates: The September 2025 customer disclosure identifies a network of xx.xx drone-in-a-box units, independently constraining the modeled Belgian deployment progression.
113. Citymesh demonstrates Safety Drones from the new R.O.C. in DronePort Sint-Truiden
    - Evidence informing base-year company-share estimates: The October xx.xx 2025 customer statement distinguishes more than xx.xx installed units from a xx.xx-unit year-end target; the model does not treat the target as completed sales.
114. Taking industries further with the enhanced Nokia Drone Networks platform
    - Evidence informing base-year company-share estimates: Nokia's November xx.xx 2025 update identifies Belgian, Spanish and U.S. commercial activity while describing Switzerland as planning deployment. It supports geographical participation and offering-generation separation, not the assumed international unit counts.
115. Nokia and Swisscom Broadcast to deploy largest Drones-as-a-Service network
    - Evidence informing base-year company-share estimates: The August xx.xx 2024 announcement identifies a planned xx.xx-unit Swiss network. This is a programme-scale constraint, not an observation of xx.xx units delivered or recognized in 2025.
116. The DOT-Chain Defence drone catalog: UAVs from 20 manufacturers are now available to the military
    - Evidence informing base-year company-share estimates: The August xx.xx 2025 government announcement identifies Reactive Drones among newly contracted DOT-Chain Defence manufacturers. It supports base-year commercial access, not company-specific shipment value; marketplace totals are not allocated to the company.
117. Ударний БПЛА Кажан | ТОВ Реактивні Дрони
    - Evidence informing base-year company-share estimates: The current manufacturer page states up to xx.xx UAVs monthly and xx.xx annually. The model uses the lower monthly-annualized xx.xx commercial capacity reference, with separate assumed 2025 capacity and utilization bridges; these are not observed 2025 deliveries.
118. Reactive Drone Ukraine | Manufacturer of unmanned aerial systems
    - Evidence informing base-year company-share estimates: Reactive Drone describes its aircraft manufacturing and proprietary communications activity. This supports evaluating attributable captive communications, but does not verify the modeled USD xx.xx own-origin value per delivery or purchased-component deduction.
119. RedFish LongTerm Capital - Relazione Finanziaria al 31 Dicembre 2025
    - Evidence informing base-year company-share estimates: The Alpi Aviation operating review reports approximately EUR xx.xx of 2025 revenue and delivery of the first three systems under the DAA contract. Three deliveries anchor the incremental communications-fee model; whole-aircraft revenue is not the numerator.
    - Evidence informing base-year company-share estimates: The review identifies VTOL retrofit and certification activity, supporting exclusion of those adjacent functions unless separately attributable to communications.
120. Milestones - CTech
    - Evidence informing base-year company-share estimates: CTech's chronology identifies SkyARX's ANKA integration in 2019 and xx.xx cumulative flight hours on ANKA and AKSUNGUR in its 2024 milestone sequence. This reported aggregate activity anchors an assumption-led equipped-aircraft-equivalent proxy, not an observed installed-unit count.

121. MSI, May 2025 - Interview with CTech General Manager Dr. Cüneyd Fırat
· Evidence informing base-year company-share estimates: The company-hosted May 2025 management interview describes SkyARX use on ANKA and AKSUNGUR and an expected annual business scale of USD xx.xx-xx.xx. The latter is a prospective scale check, not realized 2025 revenue or a UAV revenue split.
122. SkyARX - CTech
· Evidence informing base-year company-share estimates: The official SkyARX page establishes a terminal-side unmanned-aircraft communications offering. It supports excluding originating network airtime and complete-aircraft value; it does not publish the modeled supplier-equivalent price.
123. Baykar Remains Global UCAV Export Leader in 2025
· Evidence informing base-year company-share estimates: Baykar's January xx.xx 2026 announcement reports USD xx.xx of total revenue and USD xx.xx of exports for calendar 2025. Total revenue anchors the package-equivalent model; no company promotional leadership claim is used as market-share evidence.
124. Baykar Technology - Avionics/Subsystems
· Evidence informing base-year company-share estimates: Baykar's official avionics catalog identifies digital communications and video-link subsystems, supporting a captive originating communications model. It does not establish the assumed USD xx.xx communications content or its own-versus-purchased split.
125. Creomagic to Provide Thousands of Datalink Systems to an International UAS Manufacturer
· Evidence informing base-year company-share estimates: The company announcement reproduced in specialist press describes an airborne-unit and ground-station order exceeding USD xx.xx. It supports the reference lot value used in the model, not observed 2025 annual revenue or its assumed delivery cadence.
126. Products - Creomagic
· Evidence informing base-year company-share estimates: The originating manufacturer's catalog distinguishes UAV-facing airborne radios from land, maritime and personal products. This supports the modeled numerator's product boundary, but does not provide sales quantities.
127. Rafael Places US$5.5 Million Order for Orbit's Airborne Satcom and Ground Pedestal Solutions for Heron TP UAV
· Evidence informing base-year company-share estimates: Orbit's company-issued announcement schedules a USD xx.xx UAV communications order across 2019 and 2020. It supplies a two-calendar-year procurement comparable for Creomagic's assumed annualization, not evidence of Creomagic's actual schedule.
128. Gilat Satellite Networks Ltd. - Form 6-K, April 9, 2025
· Evidence informing base-year company-share estimates: The April xx.xx 2025 Form xx.xx-K contains the announcement of a contract exceeding USD xx.xx from a UAV company for DKET terminals, with deliveries scheduled later in 2025. The model uses the disclosed threshold and assumed recognition and dedicated-drone attribution; neither annual recognition nor the final share is directly observed.
129. Gilat Reports Fourth Quarter and Full Year 2025 Results
· Evidence informing base-year company-share estimates: Gilat reports USD xx.xx of total 2025 revenue across broader businesses. This is a reporting-boundary and scale check, expressly not the drone numerator or an automatic market-share weight.
130. Connectivity for BLoS Missions - Defense Aviation - Gilat
· Evidence informing base-year company-share estimates: The official defense aviation portfolio identifies unmanned-aircraft SATCOM terminals. It supports eligible terminal-side commercial participation, while providing no additional attributable 2025 shipment or revenue quantity.
131. Milkor busy with Milkor 380 production and deliveries as UAV project enters a new phase - Milkor Company Zone, April 3, 2025
· Evidence informing base-year company-share estimates: Milkor's dated company-issued material reports annual UAV production of eight and six aircraft under construction in the preceding year. These constrain the modeled activity scale but do not establish accepted deliveries or recognized revenue. ([defenceweb.co.za](https://defenceweb.co.za/company-zones/milkor/PressRelease.php?StoryID=xx.xx))

132. Milkor Integrated Systems - MIS Digital Catalogue 2022

· Evidence informing base-year company-share estimates: The official catalog identifies communications equipment and communications-system services separately within Milkor's wider portfolio. It supports the own-value boundary, not the assumed unit values or 2025 sales. ([milkor.com](https://milkor.com/wp-content/uploads/2022/xx.xx/MIS-Digital-Catalogue-2022_compressed.pdf))

133. Armscor Annual Report 2024-2025 - procurement contract KT471248

· Evidence informing base-year company-share estimates: Armscor records Denel Dynamics' ZAR xx.xx Seeker xx.xx steady-state support contract, starting June xx.xx 2024 and expiring June xx.xx 2027. This is the procurement anchor for assumed annualized communications support; the full contract is not counted as drone-link revenue. ([armscor.co.za](https://www.armscor.co.za/wp-content/uploads/2025/xx.xx/2024-xx.xx-Armscor-Annual-Report_compressed.pdf))

134. Denel Group Annual Report 2024/2025

· Evidence informing base-year company-share estimates: Denel reports resumed fourth-RPV project execution and Seeker xx.xx maintenance-spares activity for a Middle Eastern customer. These identify additional eligible activity routes, but do not disclose calendar-2025 communications revenue, completion percentages or the modeled export amount. ([nationalgovernment.co.za](https://nationalgovernment.co.za/entity_annual/xx.xx/2025-denel-soc-ltd-annual-report.pdf))

135. Production & Quality Control | Shenzhen Yangda Technology Co., Ltd.

· Evidence informing base-year company-share estimates: The company states commercial capacity of xx.xx complete UAV-system integrations per month and separately xx.xx airframes per month. The model uses only the former as its integration-capacity anchor, with explicit 2025 carry-back and utilization assumptions; neither quantity is treated as observed 2025 shipments.

136. Leading Industrial UAV Manufacturer About Us | YANGDA

· Evidence informing base-year company-share estimates: The company states deployment across more than xx.xx projects and identifies UAV systems, video/data links and lifecycle services. The cumulative project statement constrains the modeled replacement pool but does not establish annual purchases or communications-only revenue.

137. YANGDA Technical Support Team Successfully Conducts 5-Day Training on Sky Whale VTOL Drone System in Kenya

· Evidence informing base-year company-share estimates: The February xx.xx 2025 announcement identifies a Sky Whale customer-support package incorporating Videopass-N60 and a ground-control station. This supports base-year commercial participation and the named package boundary, not the modeled annual quantity or sourcing percentage.

138. China Shenzhen Suntor Technology Co., Ltd. Company Profile

· Evidence informing base-year company-share estimates: The company profile states products, solutions and ODM services supplied to more than xx.xx customers. This is the cumulative commercial-scale input for the assumption-led purchasing model, not a dated active-customer or shipment observation.

· Evidence informing base-year company-share estimates: The profile identifies multiple non-UAV communications businesses, requiring an explicit airborne-scope adjustment. Its annual-sales field lacks the period and currency needed for a directly observed 2025 USD numerator and is excluded from calculation.

139. About Shenzhen Suntor Technology Company Introduction

· Evidence informing base-year company-share estimates: The official company introduction distinguishes airborne radios from handheld, shipboard, vehicle-mounted, base-station and dispatch offerings. It supports excluding non-drone applications rather than using total communications-business scale as automatic drone-link revenue.

140. WHO WE ARE - FrSky - Lets you set the limits

· Evidence informing base-year company-share estimates: FrSky's own profile reports RMB xx.xx annual sales in 2018. This is the historical company-specific scale anchor for an assumption-led 2025 bridge, not observed 2025 revenue.

· Evidence informing base-year company-share estimates: The identified transmitter, receiver, module, controller and sensor portfolio supports separating communications value from broader corporate receipts.

141. Best selling products - RadioMaster RC
- Evidence informing base-year company-share estimates: Manufacturer catalog comparables of USD xx.xx for TX16S Mark II, USD xx.xx for RP3 V2 and USD xx.xx for Nomad constrain the modeled handset, receiver and external-module basket.
- Evidence informing base-year company-share estimates: These are peer retail-price inputs only; FrSky's product mix, wholesale realization and handset communications allocation remain modeled assumptions.

142. Chinese Yuan Renminbi to U.S. Dollar Spot Exchange Rate (AEXCHUS) | FRED | St. Louis Fed
- Evidence informing base-year company-share estimates: The official annual exchange-rate series reports RMB xx.xx per USD for 2025, converting the assumed RMB business baseline into the frozen denominator's USD basis.
- Evidence informing base-year company-share estimates: The exchange rate does not validate the assumed 2025 business receipts or communications attribution.

143. Iridium Communications Inc. 2025 Annual Report
- Evidence informing base-year company-share estimates: The 2025 annual report provides broadband revenue of USD xx.xx and monthly ARPU of USD xx.xx and IoT revenue of USD xx.xx and monthly ARPU of USD xx.xx. These support subscriber-to-service-value calculations, not the assumed UAV subscriber counts.
- Evidence informing base-year company-share estimates: The disclosed government airtime contract is fixed-price and not subscriber- or usage-priced; its UAV allocation is therefore modeled rather than directly observed.
- Evidence informing base-year company-share estimates: Broadband revenue declined from USD xx.xx in 2024, qualifying an inference of universally rapid service adoption.

144. Autonomous Systems | Iridium
- Evidence informing base-year company-share estimates: Iridium's autonomous-systems page identifies aircraft connectivity and partner terminal routes, including ATMOSPHERE, Ground Control, NAL Technologies and SKYTRAC.
- Evidence informing base-year company-share estimates: Supports the network-service versus terminal-supplier boundary and deduplication premise. The current page does not independently establish 2025 UAV subscription quantities.
- Evidence informing base-year company-share estimates: The named PLANET xx.xx UAV-L partner product corroborates ATMOSPHERE's terminal-side role within the Iridium network relationship, without establishing annual shipments.

145. ATMOSPHERE
- Evidence informing base-year company-share estimates: ATMOSPHERE states that PLANET serves hundreds of users across aircraft, rotorcraft, UAV/USV and balloon applications and describes a team of more than ten engineers.
- Evidence informing base-year company-share estimates: This mixed installed-user scale anchors a specialist-business model. The 2025 population, UAV fraction, purchase incidence and realized values are assumptions, not disclosed observations.
- Evidence informing base-year company-share estimates: The page distinguishes terminal manufacturing, custom development, aviation, UAV and IoT activities, requiring an explicit UAV-only attribution.

146. ATMOSPHERE | Connect by CNES
- Evidence informing base-year company-share estimates: The CNES business profile identifies ATMOSPHERE's satellite/5G equipment, Iridium partnership, drone connectivity, software and cloud-service offerings.
- Evidence informing base-year company-share estimates: Corroborates the separable hardware, software and connectivity roles used in the numerator boundary, not their annual revenue amounts.

147. Terms and Conditions
- Evidence informing base-year company-share estimates: ATMOSPHERE's terms distinguish product purchase prices from monthly access, call and data charges.
- Evidence informing base-year company-share estimates: Supports separating equipment and continuing service obligations, and excluding originating-network pass-through from ATMOSPHERE's incremental service value. It does not establish the modeled fee amounts.

20.2. Market Concentration Analysis, 2025

[illegible] Multiple seller quotations consequently need not represent independent communications sources. Buyers seeking supply diversification should identify the originating radio, embedded management dependency and support owner, not merely compare the names on quotations.

[illegible] These relationships matter when evaluating group exposure, but do not make every group offering commercially identical. TrellisWare radio procurement and Viasat's Velaris service remain different deliverables and can involve different contractual counterparties.

[illegible] Buyers should specify renewal, reassignment, data access and support rights in the applicable agreement. Retaining direct management relationships can preserve control, whereas coordinated delivery reduces the number of relationships the buyer administers.

[illegible] This is a counterexample to treating all drone communications as a single closed category, not proof of unrestricted substitution. A buyer can retain meaningful choice in one communications function while remaining dependent on another supplier for video or management.

Network permission remains an upstream bargaining point even where terminal choice is broad. [illegible] Contracting flexibility is therefore greatest when the buyer has both qualified equipment alternatives and a usable network relationship; terminal diversity alone does not establish that combination.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · The combined connectivity-and-management offering supports treating management access as a separate continuing commercial relationship.
   ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))

2. Motorola Solutions, Inc. Form 8-K reporting completion of the Silvus acquisition
   · Motorola Solutions' mandatory filing records completion of the Silvus acquisition on August xx.xx 2025, establishing common group ownership rather than product equivalence. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d88358d8k.htm))
3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · Ofcom requires network-operator agreement for mobile and satellite technologies covered by its UAS framework, establishing a permission boundary distinct from terminal choice. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
4. UAV Data Link and Unmanned Communications - DTC, a Codan Company
   · DTC identifies itself as a Codan business and markets unmanned-system communications, establishing an ownership context without product-equivalence claims. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))
5. Triad High Power Radio Systems For Unmanned Land Air Sea
   · Named incorporated radios demonstrate shared upstream dependencies across differently branded offers. ([triadrf.com](https://triadrf.com/radio-systems/))
6. Datalinks | UAV Navigation
   · A branded package incorporating Microhard supports the distinction between seller diversity and originating-component independence. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
7. SkyLink - uAvionix
   · The stated functionality dependency establishes a management control point distinct from purchasing radio hardware. ([uavionix.com](https://uavionix.com/product/skylink/))
8. Viasat, Inc. Form 10-Q - Quarter Ended June 30, 2026
   · Viasat's Form xx.xx-Q for the quarter ended June xx.xx 2026 includes majority-owned TrellisWare in consolidated reporting, establishing the ownership relationship without combining operating contracts. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/vsat-xx.xx.htm))
9. DJI O4 Air Unit Series - FAQ - DJI
   · The goggle restriction establishes a video-specific installed dependency rather than a uniform constraint across every communications function. ([dji.com](https://www.dji.com/o4-air-unit/faq))
10. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
    · Incorporation of named originating suppliers supports distinguishing module choice from independent upstream supply. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))
11. Telemetry Radios - Holybro
    · Microhard-branded products in another seller's catalog illustrate why seller choice need not establish an independent originating source. ([holybro.com](https://holybro.com/collections/telemetry-radios))
12. UAS Radios: Wi-Fi, Microhard, Doodle Labs, LTE | ModalAI
    · ModalAI's catalog supports separating platform packaging from the incorporated modem supplier. ([modalai.com](https://www.modalai.com/pages/radios))
13. Autonomous Systems | Iridium
    · Partner-terminal alternatives support equipment choice within an originating network relationship, not independence from network service. ([iridium.com](https://www.iridium.com/markets/aviation/autonomous-systems))
14. Receivers - RadioMaster RC
    · The catalog provides a separately marketed control-link choice, not evidence of cross-brand video compatibility. ([radiomasterrc.com](https://www.radiomasterrc.com/collections/receivers))
15. Receivers - BETAFPV
    · The marketed control-link choice provides a counterexample to treating every included communications function as one supplier's closed ecosystem. ([betafpv.com](https://betafpv.com/collections/receivers))

16. Product Finder | ExpressLRS
    · Project-specific hardware support establishes documented control-link alternatives, not unrestricted substitution across products or communications functions.
    ([expresslrs.org](https://www.expresslrs.org/product-finder/))

20.3. Recent Developments & Impact Analysis, 2025

Ownership changes alter supplier diligence before they establish product integration. ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■ ■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ Acquisition completion does not establish transferred warranties, an integrated product roadmap or current HAWK merchant availability.

Nokia's July xx.xx 2026 financial report classified Enterprise Campus Edge as discontinued operations because reaching a sale agreement was considered highly probable. This describes an anticipated transaction, not a completed ownership transfer or product withdrawal. ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■ ■■■■■■■■■■

Patria's February xx.xx 2025 SIRTAP agreement establishes aircraft-prime access for a CANDL-based airborne-and-ground datalink. ■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■ ■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ Prime contractors should align the quoted generation and supplier milestones with their own commitments, with confirmation of delivery and acceptance acting as the trigger for dependent procurement decisions.

■■■ ■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■ ■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ The managed route is preferable only when its contract accepts the buyer's required coordination and escalation duties. Ofcom's separate network-agreement requirement illustrates why the new delivery layer cannot be treated as independent permission to operate or access a network.

VERSITRON Inc.'s June xx.xx 2026 announcement introduces a marketed tethered-drone conversion platform, adding an active-component comparison alongside cable and tether-station offerings. ■■■■ ■■■■ ■■■ ■■■■ ■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ OEMs should compare the proposed converter's delivery and support

boundary with separately sourced media and system responsibility, rather than infer package completeness from a product launch.

Legacy-brand continuity can also change the account-access question. Vislink's 2024 annual filing describes discontinuing Poway operations and transitioning remaining activities after the earlier BMS asset acquisition; its BMS continuity page provides a support route. ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■

Sources & Evidence

1. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   · The March xx.xx 2026 Galaxy xx.xx collaboration announcement describes Velaris provisioning, billing, integration and lifecycle coordination. It does not establish individual customer duties or access permissions. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
2. Motorola Solutions, Inc. Form 8-K reporting completion of the Silvus acquisition
   · The filing definitively establishes the completed transaction date, not transferred offering-specific warranties or finished product integration. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d88358d8k.htm))
3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   · The separate network-agreement requirement limits what the announced managed Velaris delivery layer can independently grant. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
4. StreamCare+ - Silvus Technologies
   · The separately marketed support program supports distinguishing support entitlement from ownership change. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
5. Patria has signed an agreement with Airbus Defence and Space for SIRTAP datalink solution
   · The signed agreement establishes program access, not completed generation-specific delivery or customer acceptance. ([news.cision.com](https://news.cision.com/patria-group/r/patria-has-signed-an-agreement-with-airbus-defence-and-space-for-sirtap-datalink-solution%2Cc4105786))
6. Patria CANDL securing UAV networks in contested environments
   · Patria's 2026 article schedules CANDL xx.xx series production for autumn 2026 and deliveries for late 2026. These are announced milestones, not evidence of completed acceptance. ([patriagroup.com](https://www.patriagroup.com/newsroom/patria-magazine/tech/patria-candl-securing-uav-networks-in-contested-environments))
7. Rocket Lab Completes Mynaric Acquisition, Adding Laser Optical Communications To Growing Space Systems Portfolio
   · The completed acquisition establishes an ownership event, distinct from product-specific support or commercial availability commitments. ([rocketlabcorp.com](https://rocketlabcorp.com/updates/rocket-lab-completes-mynaric-acquisition-adding-laser-optical-communications-to-growing-space-systems-portfolio/index.php))
8. Nokia Corporation Report for Q2 and Half Year 2026
   · Nokia's July xx.xx 2026 report classifies ECE as discontinued operations because reaching a sale agreement was considered highly probable. It does not report a completed ECE transfer. ([nokia.com](https://www.nokia.com/newsroom/nokia-corporation-report-for-q2-and-half-year-2026/))

9. VERSITRON Introduces Tethered Drone Fiber Optic Converters
   · The June xx.xx 2026 announcement establishes marketed platform availability; its compliance wording remains a company claim rather than independent qualification evidence. ([versitron.com](https://www.versitron.com/pages/versitron-introduces-ndaa-compliant-tethered-drone-fiber-optic-converters-for-secure-airborne-communications))
10. Vislink Technologies Form 10-K - Year Ended December 31, 2024
    · The filing describes discontinuing Poway operations and transitioning remaining activity following the restructuring initiative, rather than establishing unchanged independent BMS operations. ([vislink.com](https://www.vislink.com/wp-content/uploads/2025/xx.xx/Vislink-Technologies-Inc-xx.xx-xx.xx-2025-Form-xx.xx-K-December-xx.xx-2024-Filed-Version.pdf))
11. BMS Support and Product Continuity | BMS Is Now Part of Vislink
    · The published support route is counterevidence to inferring complete product discontinuation solely from an operational transition. ([vislink.com](https://www.vislink.com/product/bms-broadcast-microwave-services/))

20.4. Product Portfolio Analysis, 2025

Drone data-link portfolios differ most consequentially in the responsibility being sold. ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ These are relevant subsystem alternatives, but their published portfolios do not establish interchangeable aircraft acceptance, destination eligibility or support obligations.

Specialist portfolios provide additional alternatives without reproducing the same purchasing boundary. Commtact distinguishes aircraft-side and base-station products and identifies satellite offerings as planned rather than already interchangeable with its marketed line-of-sight products. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

[illegible] Their commercial contribution is the configured deliverable and associated accountability. An OEM choosing this route should obtain package-level acceptance and support commitments rather than transfer an originating supplier's claims to the integrator's entire offering.

[illegible] Nokia combines communications with drones, docking and edge-processing equipment. These offerings can suit aircraft or mission-package purchasers, but a complete platform is not equivalent to a separately supplied data-link subsystem.

Elsight and uAvionix extend the purchase into communications management. Halo combines bearer options with management arrangements; SkyLink's full functionality depends on SkyLine management. [illegible]

Satellite portfolios separate network provision from terminal supply. [illegible] Terminal alternatives should be compared within the applicable network relationship; buying equipment does not independently secure connectivity or operating permission.

Software and channels add complementary, not equivalent, portfolio coverage. [illegible] Buyers should separate the transmission contribution from broader mission applications and identify which counterparty owns each continuing obligation.

Consumer and FPV portfolios also separate video from control. ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Divimath's declared HDZero technology ownership is additionally distinct from an executed third-party licensing agreement.

▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ Cable, converter, communications package and tether-station procurement should therefore remain separate comparisons. Mynaric AG's historical HAWK airborne optical offering belongs to the free-space-optical category, not the physical-fiber peer group; its present procurement status requires separate confirmation.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   - Elsight markets Halo as a connectivity platform with management arrangements and OEM purchasing relevance. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Velaris - BVLOS connectivity for UAVs
   - Viasat presents Velaris as its satellite communications service for UAV and advanced-air-mobility applications. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
3. UAV/UGV Products - Advanced Microwave Products
   - AMP's unmanned-platform catalog separates analog video, data products and supporting amplifiers, supporting function- and endpoint-specific peer groups. ([advmw.com](https://advmw.com/uav-ugv-products/))
4. GORE Tethered Drone Cables for Commercial & Defense
   - Gore's drone-cable portfolio distinguishes electrical data and optical-fiber contributions from the complete terminal or station deliverable. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
5. Mynaric AG Form 20-F for the Year Ended December 31, 2021
   - Mynaric's historical annual filing identifies HAWK airborne terminals and UAV applications, supporting its distinct free-space-optical category. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d310942d20f.htm))
6. Secure Wideband Data Links | Cubic
   - Cubic presents airborne, surface and relay terminals with UAV applications and reports CDL waveform verification by JITC. This supports a standards-oriented portfolio comparison, not aircraft-wide procurement acceptance. ([cubic.com](https://www.cubic.com/solutions/c5isr/assured-data-link-solutions/secure-wideband-data-links))
7. Software-Defined Radios | Cubic
   - Cubic distinguishes software-defined radios from integrated communications packages extending from modem to antenna. ([cubic.com](https://www.cubic.com/defense/secure-communications/software-defined-radios))

8. Unmanned Systems Datalinks
   · Silvus' unmanned-systems brochure identifies StreamCaster radios for command, telemetry and video communications; it is family-level historical portfolio evidence. ([silvustechnologies.com](https://silvustechnologies.com/wp-content/uploads/2018/xx.xx/StreamCaster-Unmanned-Systems-Datalinks.pdf))
9. Triad High Power Radio Systems For Unmanned Land Air Sea
   · Triad identifies originating radios within its unmanned-system packages, including Silvus, DTC and Mobilicom relationships. ([triadrf.com](https://triadrf.com/radio-systems/))
10. Mesh Rider Radios - Doodle Labs
    · Doodle Labs presents Mesh Rider radios for OEM and unmanned-platform purchasing, supporting its merchant-radio role. ([doodlelabs.com](https://doodlelabs.com/products/radios))
11. Astro - US Made Commercial Drone
    · Freefly identifies a Doodle Labs radio, LTE connectivity and AuterionOS within Astro, establishing an aircraft-side incorporation relationship. ([freeflysystems.com](https://freeflysystems.com/astro))
12. Microhard - Products
    · Microhard's catalog identifies digital data-link and Pico families, supporting an originating component-supplier role. ([microhardcorp.com](https://www.microhardcorp.com/products.php))
13. Datalinks | UAV Navigation
    · UAV Navigation identifies Microhard modems within TELEM07 variants and states compatibility with its autopilots. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
14. SkyHopper Pro - Mobilicom
    · Mobilicom markets SkyHopper PRO with its named ICE cybersecurity proposition. This supports combined commercial scope, not independently demonstrated superiority. ([mobilicom.com](https://mobilicom.com/products/skyhopperpro/))
15. SkyLink - uAvionix
    · uAvionix states that SkyLink requires SkyLine management integration for full functionality. ([uavionix.com](https://uavionix.com/product/skylink/))
16. DJI O4 Air Unit Series - FAQ - DJI
    · O4's documented receiver relationship supports a digital-video portfolio distinction, not cross-brand compatibility. ([dji.com](https://www.dji.com/o4-air-unit/faq))
17. Arycom announcement of Velaris UAV connectivity with Viasat and Gotonomi
    · Arycom's own public announcement identifies a Velaris proposition involving Viasat and Gotonomi; it does not establish an executed customer contract. ([linkedin.com](https://www.linkedin.com/posts/arycom_velaris-arycom-viasat-activity-xx.xx-Nvhd))
18. Gotonomi Completes Successful Flight Trials and Opens Orders
    · Gotonomi's bundle announcement separately identifies terminal hardware, Videosoft software and licensing, and Viasat airtime. ([gotonomi.com](https://gotonomi.com/resources/gotonomi-completes-successful-flight-trials-and-opens-orders/))
19. Support - Elistair | Tethered Drone Company
    · Elistair explains that tethered data transfer depends on the aircraft and can differ from tether-power compatibility. ([elistair.com](https://elistair.com/client-support/))
20. Surveillance Drone UAV Video Solutions | Videosoft Global
    · Videosoft markets drone-facing video transmission software and associated network-facing solutions. Externally attributed market estimates and promotional outcome claims are excluded. ([videosoftglobal.com](https://www.videosoftglobal.com/industries/drones/))

21. Nokia unveils first CE-certified 5G automated drone-in-a-box solution for secure, reliable public sector and industrial operations
    - Nokia describes Drone Networks as a cellular-connected package containing aircraft, docking and edge processing, supporting separation of its communications contribution from the wider platform. ([nokia.com](https://www.nokia.com/newsroom/nokia-unveils-first-ce-certified-5g-automated-drone-in-a-box-solution-for-secure-reliable-public-sector-and-industrial-operations/))
22. COMMUNICATION SOLUTIONS - S-PLANE Automation
    - S-PLANE combines its communications equipment with third-party links and offers integration support, establishing an integration role distinct from every incorporated supplier. ([s-plane.com](https://s-plane.com/solutions/communication-solutions/))
23. Technology | HDZERO
    - HDZero identifies Divimath as developer and owner of its technology; that statement does not establish negotiated third-party licensing rights. ([hd-zero.com](https://www.hd-zero.com/technology))
24. Divimath HDMI VTX - Digital 5.8 GHz HDMI Wireless Link for FPV and Embedded Systems
    - Divimath markets HDMI VTX for FPV and embedded applications and identifies supported digital receivers, establishing a video-link product boundary. ([divimath.com](https://www.divimath.com/products/divimath-hdmi-vtx))
25. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
    - UXV describes swappable-radio integrations involving Persistent Systems, Silvus, Doodle Labs, Microhard and TrellisWare. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))
26. HiveLink High-Assurance Data Link Radio | L3Harris
    - L3Harris markets HiveLink for UAV and other airborne platforms and identifies supported standardized waveforms. Its own offering description does not establish buyer-specific acceptance. ([l3harris.com](https://www.l3harris.com/all-capabilities/hivelink-high-assurance-data-link-radio))
27. Telemetry Radios - Holybro
    - Holybro's telemetry catalog lists SiK and Microhard-branded telemetry products, establishing differentiated package choices without asserting fulfillment. ([holybro.com](https://holybro.com/collections/telemetry-radios))
28. UAS Radios: Wi-Fi, Microhard, Doodle Labs, LTE | ModalAI
    - ModalAI lists Microhard communications products and modem add-ons alongside cellular communications products for its platform. ([modalai.com](https://www.modalai.com/pages/radios))
29. Autonomous Systems | Iridium
    - Iridium presents autonomous-aircraft connectivity and identifies partner products from NAL Technologies, Ground Control, ATMOSPHERE and SKYTRAC. ([iridium.com](https://www.iridium.com/markets/aviation/autonomous-systems))
30. RockREMOTE UAV | Ground Control
    - Ground Control markets RockREMOTE UAV using Iridium service and distinguishes enclosed and OEM product forms. ([groundcontrol.com](https://www.groundcontrol.com/product/rockremote-uav/))
31. Droniq Traffic-Management Software and Communications Hardware
    - Droniq combines communications hardware with online traffic-management access and describes LTE transfer of position and optional payload information. ([droniq.de](https://droniq.de/produkte/verkehrsmanagement/utm/))
32. Vodafone Germany Launches Platform for Commercial Drones
    - Vodafone identifies FlyNex as its DroNet Hub partner and describes a dedicated live-data connectivity service in Germany. ([vodafone.com](https://www.vodafone.com/news/newsroom/technology/vodafone-germany-launches-platform-for-commercial-drones))

33. AURA Network Systems - Solutions
    · AURA presents aviation-focused communications and states that its data technologies and services are being developed. This supports a commercial-status distinction, not deployed-service equivalence. ([auranetworksystems.com](https://auranetworksystems.com/solutions))
34. Custom Optical Fiber Solutions for Aerospace, Military and Defense | M2 Optics
    · M2 Optics identifies custom optical-fiber solutions with drone and UAV applications, supporting a specialized physical-link contribution rather than complete terminal supply. ([m2optics.com](https://www.m2optics.com/company/industries/custom-optical-fiber-solutions-for-aerospace-military-and-defense-communications-labs-and-networks))
35. Linden Photonics Enhances Drone Capabilities with Advanced Tether Cables
    · Linden Photonics' April xx.xx 2025 company article identifies drone tether cables and distinguishes its cable activity from planned tether-management expansion. Only commercial offering identity is used. ([lindenphotonics.com](https://www.lindenphotonics.com/linden-photonics-enhances-drone-capabilities-with-advanced-tether-cables))
36. VERSITRON Introduces Tethered Drone Fiber Optic Converters
    · VERSITRON announced a tethered-drone fiber-optic conversion platform on June xx.xx 2026, establishing an active-component offering distinct from cable-only procurement. ([versitron.com](https://www.versitron.com/pages/versitron-introduces-ndaa-compliant-tethered-drone-fiber-optic-converters-for-secure-airborne-communications))
37. Fiber Optic Communications System | Kinetic Industries
    · Kinetic Industries markets a fiber-optic communications package for unmanned platforms, supporting a package-level comparison distinct from cable or converter supply. No operating guidance or performance claims are used. ([kineticindustries.us](https://www.kineticindustries.us/fiber-optic-spool-system))
38. Walksnail Avatar HD VTX V2 Module | CADDXFPV
    · CADDXFPV's official listing presents a Walksnail Avatar video-transmission module, supporting a distinct digital-video offering rather than asserted cross-brand receiver interchangeability. ([caddxfpv.com](https://www.caddxfpv.com/products/walksnail-avatar-hd-vtx-v2-only))
39. Receivers - RadioMaster RC
    · RadioMaster's official catalog includes ExpressLRS receivers, supporting its control-link equipment role. ([radiomasterrc.com](https://www.radiomasterrc.com/collections/receivers))
40. Receivers - BETAFPV
    · BETAFPV's official catalog lists ExpressLRS receivers, supporting a control-link equipment proposition. ([betafpv.com](https://betafpv.com/collections/receivers))
41. Product Finder | ExpressLRS
    · The ExpressLRS project publishes hardware-specific support references involving RadioMaster, BETAFPV, FrSky and SIYI, and identifies listed devices as project-supported. ([expresslrs.org](https://www.expresslrs.org/product-finder/))
42. CRSF Shot and Open TX | Team BlackSheep Support
    · Team BlackSheep's own support page documents its Crossfire ecosystem, supporting a named control-link portfolio relationship without asserting universal compatibility. ([team-blacksheep.com](https://www.team-blacksheep.com/new-support/kb/xx.xx/))
43. Tactical Communication Products | Commtact
    · Commtact identifies platform and base-station link products and describes satellite solutions as planned. ([commtact-systems.com](https://commtact-systems.com/products/))
44. ASELSAN 2023 Annual Report
    · ASELSAN's 2023 annual report identifies TRustLink with UAV applicability. This is historical offering evidence, not confirmation of current generation availability. ([wwwcdn.aselsan.com](https://wwwcdn.aselsan.com/api/file/2023_aselsan_annual_report_082024.pdf))

45. ELTA Communication Suite for UAVs | Israel Aerospace Industries
· IAI's ELTA UAV communications suite combines line-of-sight and satellite communications in a modular commercial offering. Only category and offering scope are used. ([iai.co.il](https://www.iai.co.il/wp-content/uploads/2025/xx.xx/ELTA-ELK-1882T-Communication-Suite-For-UAVs.pdf))
46. The StarLite Data-Link Series | Elbit Systems
· Elbit's StarLite brochure identifies a line-of-sight communications family for manned and unmanned platforms, supporting a subsystem portfolio role. ([elbitsystems.com](https://elbitsystems.com/media/Starlite_family-xx.xx.pdf))
47. Avionics | Leonardo Electronics
· Leonardo identifies DLMS as a data-link management contribution for manned and unmanned aerial platforms, supporting separation from a complete originating radio link. ([leonardo.us](https://www.leonardo.us/avionics))
48. Data Link | TUALCOM
· TUALCOM presents component data links and turnkey solutions including ground-station arrangements, supporting different package boundaries. ([tualcom.com](https://www.tualcom.com/data-link/))
49. UAV Radio Data Links | Transbit
· Transbit identifies aircraft and ground radio modules for tactical UAV links and a distinct PAXLINK-M micro-drone offering. ([transbit.com.pl](https://www.transbit.com.pl/uav-radio-data-links))
50. Unmanned | Radionor Communications
· Radionor identifies communications products for unmanned aircraft, including dedicated UAV and small-unmanned-system offerings. Promotional superiority claims are not used. ([radionor.no](https://radionor.no/domain/unmanned/))
51. Airborne Communications | Rohde & Schwarz
· Rohde & Schwarz identifies UAV applicability within its multipurpose M3AR airborne-radio family. ([rohde-schwarz.com](https://www.rohde-schwarz.com/us/solutions/aerospace-and-defense/air/airborne-communications/airborne-communications_250736.html))
52. MANET/FANET Solutions | Huneed Technologies
· Huneed identifies FANET modules with UAV applications, supporting a specialist-module role without procurement-qualification claims. ([huneed.com](https://www.huneed.com/manetfanetsolutions?lang=en))
53. SkyARX | CTech
· CTech markets SkyARX satellite communications for manned and unmanned aerial platforms, including UAV control and data applications. ([ctech.com.tr](https://ctech.com.tr/en/product/skyarx/))
54. Small Satcom | Honeywell Aerospace
· Honeywell's Small Satcom portfolio lists VersaWave with a small-unmanned-aircraft application, supporting a terminal-side comparison rather than originating-network attribution. ([honeywellaerospace.com](https://www.honeywellaerospace.com/us/en/products-and-services/products/cabin-and-cockpit/satellite-communications/small-satcom))
55. Communications | RFDesign
· RFDesign describes TXMOD and supported modem relationships within its communications portfolio, supporting an integrated telemetry-and-control purchasing boundary. ([rfdesign.com.au](https://rfdesign.com.au/communications/))
56. Skynode X: The New Evolution of Auterion's Autopilot
· Auterion's Skynode X announcement identifies a connected avionics proposition and its hardware/software ecosystem, supporting separation of embedded communications from merchant radios. ([auterion.com](https://auterion.com/introducing-skynode-x-the-next-evolution-of-auterion-skynode/))
57. Skydio Announces Upgraded Wireless and Connectivity Capabilities
· Skydio describes connectivity options associated with its X10 aircraft, supporting an aircraft-specific portfolio boundary. Announced availability is not converted into universal current fulfillment. ([skydio.com](https://www.skydio.com/blog/skydio-announces-upgraded-suite-of-wireless-and-connectivity-capabilities))

58. UAV Systems | WB GROUP
    · WB GROUP's UAV portfolio includes a flight-control and data-transmission contribution. This does not establish separate merchant availability of every subsystem.
    ([wbgroup.pl](https://www.wbgroup.pl/en/obszar-dzialalnosci/uav-systems/))

20.5. Benchmarking Analysis, 2025

A defensible benchmark starts with the offered deliverable and its commitment status, then evaluates aircraft acceptance, jurisdictional access, management entitlement and support accountability. Supplier portfolios are evidence of proposed commercial coverage, not a league table of equivalent capabilities. ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■

■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■

■■■■■■■ ■■■ ■■■■■■■ Such documentation supports a configuration-specific acceptance check; it does not establish independent comparative performance or universal interchangeability.

Mynaric AG requires a status benchmark rather than a capability score. ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ Historical airborne engagement also prevents treating the unresolved status as evidence of no relevant activity.

BMS, Vislink of Poway LLC requires brand-versus-counterparty reconciliation. Vislink's annual filing identifies Vislink Poway, LLC as the entity that acquired BMS assets and describes a subsequent operational transition. ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■■

■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■ ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ An installed buyer needs a supported maintenance commitment; a new aircraft program needs an identifiable offered generation and delivery commitment. Historical participation alone cannot settle either decision.

For potential proposals from Autel Robotics, General Atomics Aeronautical Systems, Inc., Hydra Technologies, Hoverfly Technologies, Inc., Baykar, Xmobots, Corporación de la Industria Aeronáutica Colombiana, Albatross Indústria Aeronáutica Ltda., IDETEC UAV Chile, Stella Tecnologia, Spirit Aircraft, INVAP and Fábrica Argentina de Aviones Brig. ■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■ ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ Until that boundary is established, an aircraft-level proposal should not be substituted for a merchant-link quotation.

The same attribution requirement affects Milkor (Pty) Ltd., Denel Dynamics, Paramount Advanced Technologies, YANGDA, TELNET Holding, Terra Industries, Briech UAS, Integrated Dynamics, SATUMA (Private) Limited, PT Len Industri, Reactive Drone, Alpi Aviation, Italdron and Unmanned Industries. Their comparable data-link deliverable and retained aircraft-program responsibilities need offering-specific confirmation. ■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■

For RAFAEL Advanced Defense Systems Ltd., Bharat Electronics Limited, Data Patterns (India) Limited, Indra, ST Engineering, Viettel High Tech, EDGE Group, Calidus, Astra Microwave Products Limited and Benua Defence Sdn. ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Buyers should identify the proposed operating seller, program applicability and permitted delivery destination before comparing institutional supplier names.

▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ Multipurpose satellite activity cannot establish a drone-specific purchasing alternative. The practical benchmark is the contracted communications outcome and its access conditions, not the breadth of the parent telecommunications portfolio.

For CubePilot, MicroPilot, Kutta Technologies, LLC, Embention, Airelectronics, Sky-Drones Technologies Ltd, Unusual Machines, Inc., Orqa d.o.o., Beyond Vision, KSI Data Sciences, Inc., Somewear Labs and Omnitron, the unresolved boundary is a directly comparable transmission or link-management deliverable versus an adjacent controller, interface, compute, display or mission-application contribution. Buyers should identify the included communications function and which supplier supplies the actual aircraft-to-endpoint connection. ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

Originating-product attribution and package accountability remain material for ZARR, WaveStorm Technologies, Digital Micro Devices, Flying Objects Technologies, LinkAV, ViewproUAV, AVIX, Moneypro Group, SoarApex, Nextech, Aerora Technology and Rebhu Computing Private Limited. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ A documented reseller route can still be useful, but it should be compared with another channel route rather than credited as independent upstream supply.

▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ These unresolved distinctions prevent a defensible substitution conclusion, not a finding of low competitive importance. The decision trigger is an accountable offering-specific proposal rather than a broad communications or unmanned-systems label.

SDT Uzay & Savunma Teknolojileri, TURLink, Meteksan Defence, Savronik, Creomagic Ltd., Sinan Advanced Industries, Nardan Motor and RAAD Dynamics likewise require confirmation of marketed or licensed status and the entity accepting delivery obligations. ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪

■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ A buyer should not make a schedule-dependent commitment until the proposed offer and its contractual milestones are established.

For Shenzhen Suntor Technology Co., Ltd., IWAVE Communications Co., Ltd., CUAV, WPC Systems Ltd., HiDes, Inc., Japan Radio Co., Ltd., 두타기술 and Macgio LLP, exact product and supplier attribution remains necessary before comparing current drone-link availability. Model history or broader radio activity does not settle the supplied endpoints, legal seller or lifecycle support. ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■

Sources & Evidence

1. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   · The Framework distinguishes components from complete aircraft and pending verification from completed additions, supporting status-specific benchmarking. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
2. UAV Data Link and Unmanned Communications - DTC, a Codan Company
   · DTC explicitly offers integration and continuing lifecycle support, supporting a contract-scope benchmark rather than assumed portfolio-wide service entitlement. ([dtccodan.com](https://www.dtccodan.com/solutions/unmanned/))
3. Mynaric AG Form 20-F for the Year Ended December 31, 2021
   · The filing establishes historical airborne commercial engagement but cannot establish present HAWK orderability or continuing UAV-specific support. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d310942d20f.htm))
4. Secure Wideband Data Links | Cubic
   · Cubic's reported CDL verification establishes a documented interoperability proposition, distinct from acceptance on a buyer's particular aircraft. ([cubic.com](https://www.cubic.com/solutions/c5isr/assured-data-link-solutions/secure-wideband-data-links))
5. Triad High Power Radio Systems For Unmanned Land Air Sea
   · The originating-radio versus package distinction supports requiring an explicit upstream support allocation. ([triadrf.com](https://triadrf.com/radio-systems/))
6. StreamCare+ - Silvus Technologies
   · Silvus markets StreamCare+ support options including priority assistance, shipping and return handling; individual coverage still requires confirmation. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
7. DJI O4 Air Unit Series - FAQ - DJI
   · The separate goggle and controller conditions support configuration-specific benchmarking. ([dji.com](https://www.dji.com/o4-air-unit/faq))
8. Support - Elistair | Tethered Drone Company
   · Aircraft-dependent data transfer supports configuration-specific benchmarking rather than assuming a universal wired substitute. ([elistair.com](https://elistair.com/client-support/))
9. Rocket Lab Completes Mynaric Acquisition, Adding Laser Optical Communications To Growing Space Systems Portfolio
   · Rocket Lab announced acquisition completion on April xx.xx 2026 and emphasized satellite and space-program relationships. The announcement does not establish a current HAWK UAV offer. ([rocketlabcorp.com](https://rocketlabcorp.com/updates/rocket-lab-completes-mynaric-acquisition-adding-laser-optical-communications-to-growing-space-systems-portfolio/index.php))
10. COMMUNICATION SOLUTIONS - S-PLANE Automation
    · The incorporated-supplier relationship supports requiring explicit package and upstream support accountability. ([s-plane.com](https://s-plane.com/solutions/communication-solutions/))

11. ドローン向け上空 LTE SIM なら上空電波パッケージ | DJI 対応 | KDDI スマートドローン

    · The distinct connectivity and management conditions support aircraft- and service-specific regional benchmarking. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/communication/4g-lte/))

12. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.

    · The marketed integration layer supports comparison of configured purchasing and separately retained supplier coordination.
    ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))

13. HiveLink High-Assurance Data Link Radio | L3Harris

    · HiveLink's standards-oriented product description supports an interoperability-proposition benchmark, not an independent comparative performance score.
    ([l3harris.com](https://www.l3harris.com/all-capabilities/hivelink-high-assurance-data-link-radio))

14. LTE Aerial Use Plan | NTT DOCOMO

    · The aerial plan's equipment and territorial conditions support a regional service benchmark rather than a generic cellular-capability comparison.
    ([docomo.ne.jp](https://www.docomo.ne.jp/charge/lte-joukuriyou-plan/))

15. Droniq Traffic-Management Software and Communications Hardware

    · The equipment-and-management package supports requiring explicit included functions and responsibilities in a regional-service comparison.
    ([droniq.de](https://droniq.de/produkte/verkehrsmanagement/utm/))

16. Vodafone Germany Launches Platform for Commercial Drones

    · The carrier and platform contributions support comparing service scope and counterparties separately.
    ([vodafone.com](https://www.vodafone.com/news/newsroom/technology/vodafone-germany-launches-platform-for-commercial-drones))

17. Vislink Technologies Form 10-K - Year Ended December 31, 2024

    · Vislink's annual filing identifies Vislink Poway, LLC in the September xx.xx 2023 BMS asset acquisition and describes the subsequent Poway operational transition.
    ([vislink.com](https://www.vislink.com/wp-content/uploads/2025/xx.xx/Vislink-Technologies-Inc-xx.xx-xx.xx-2025-Form-xx.xx-K-December-xx.xx-2024-Filed-Version.pdf))

18. BMS Support and Product Continuity | BMS Is Now Part of Vislink

    · Vislink's BMS continuity page provides an identifiable support and product-continuity route under Vislink, without allocating an individual drone-link contract.
    ([vislink.com](https://www.vislink.com/product/bms-broadcast-microwave-services/))

19. Skydroid Support

    · Skydroid's own support material distinguishes its supported controller relationships from SIYI equipment, supporting a product-specific compatibility check.
    ([skydroidglobal.com](https://skydroidglobal.com/pages/skydroid-support))

20. Tactical Communication Products | Commtact

    · The explicit planned satellite status supports separating future portfolio intentions from marketed purchasing alternatives. ([commtact-systems.com](https://commtact-systems.com/products/))

21. CNPC-1000 UAS Command and Control Data Link | Collins Aerospace

    · The explicit notice supports distinguishing marketed capability from verified purchase-ready access.
    ([rtx.com](https://www.rtx.com/collinsaerospace/what-we-do/industries/military-and-defense/communications/tactical-data-links/cnpc-xx.xx-uas-command-and-control-data-link))

22. DUAV | Hanwha Systems

    · Hanwha Systems describes a datalink associated with a brigade-level UAV and its aircraft-ground information exchange. This establishes a program-related offering description, not unrelated merchant availability.
    ([hanwhasystems.com](https://www.hanwhasystems.com/en/business/defense/space/avonics06.do))

21. Company Profiles

21.1. Cubic

Cubic provides a standards-oriented defense communications portfolio spanning airborne, surface and relay terminals. ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ These capabilities make Cubic relevant to buyers whose aircraft programs require a defined CDL communications subsystem rather than a generic radio category.

The commercial choice is between purchasing an identifiable modem or transceiver and contracting for a broader integrated link. Defense procurement teams should establish the applicable model, program acceptance, destination eligibility and continuing support commitment before treating the portfolio's stated interoperability as procurement approval. ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Secure Wideband Data Links | Cubic
   - Cubic markets airborne, surface and relay terminals for UAV applications, identifies a Dual Channel Modem developed for MQ-8C Fire Scout, and reports JITC verification of its CDL products. ([cubic.com](https://www.cubic.com/solutions/c5isr/assured-data-link-solutions/secure-wideband-data-links))
   - Company verification: Cubic markets Common Data Link products and airborne, surface and relay terminals explicitly including UAV applications.
   - Company verification: The catalog identifies a dual-channel modem associated with the MQ-8C UAV program.
2. Software-Defined Radios | Cubic
   - Cubic presents EX-xx.xx and Multiband Miniature Transceiver offerings and distinguishes radios from integrated modem-to-antenna solutions, supporting the component-versus-package purchasing distinction. ([cubic.com](https://www.cubic.com/defense/secure-communications/software-defined-radios))
3. Cubic Corporation Modern Slavery Statement - March 21, 2025
   - Company verification: The March xx.xx 2025 statement identifies Cubic Corporation and its operating-company group.
   - Company verification: It identifies Cubic as a privately owned Veritas Capital company and describes continuing defense operations.

21.2. Silvus Technologies

▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

[redacted] Buyers therefore encounter both originating radio offerings and another supplier's integrated package. Incorporation establishes a supplier relationship, but does not make the package's compatibility, warranty or delivery commitments identical to those of the underlying radio.

Motorola Solutions completed its acquisition of Silvus Technologies Holdings Inc. on August xx.xx 2025. Separately, Silvus markets StreamCare+ plans with priority support, two-way shipping and accelerated return handling. [redacted]

Sources & Evidence

1. Motorola Solutions, Inc. Form 8-K reporting completion of the Silvus acquisition
   - Motorola Solutions' mandatory filing records completion of its acquisition of Silvus Technologies Holdings Inc. on August xx.xx 2025. It establishes ownership change, not reassignment of offering-specific support contracts. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d88358d8k.htm))
   - Company verification: Motorola Solutions' SEC filing records completion of its acquisition of Silvus Technologies Holdings Inc. on August xx.xx 2025.
2. Unmanned Systems Datalinks
   - Silvus' unmanned-systems brochure identifies StreamCaster radios for video, command-and-control, telemetry and IP-data communications; family-level material does not establish every legacy model's continuing availability. ([silvustechnologies.com](https://silvustechnologies.com/wp-content/uploads/2018/xx.xx/StreamCaster-Unmanned-Systems-Datalinks.pdf))
   - Company verification: Silvus' official StreamCaster brochure presents unmanned-system data-link offerings.
   - Company verification: The document identifies Silvus as the supplier of the StreamCaster product family.
3. Triad High Power Radio Systems For Unmanned Land Air Sea
   - Triad's marketed unmanned radio-system catalog identifies named Silvus radios incorporated into Triad packages, supporting the distinction between originating radio supply and integrated-system supply. ([triadrf.com](https://triadrf.com/radio-systems/))
   - Company verification: Triad's current system catalog identifies Silvus radios within marketed unmanned communication packages, corroborating downstream use.
4. StreamCare+ - Silvus Technologies
   - Silvus markets StreamCare+ for StreamCaster radios with tiered coverage, priority support, two-way shipping and accelerated return handling; individual equipment eligibility requires confirmation. ([silvustechnologies.com](https://silvustechnologies.com/resources/streamcare-plus/))
5. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   - Company verification: Named as an upstream radio supplier incorporated into UXV's commercial SRM ecosystem.

21.3. Doodle Labs

Doodle Labs offers Mesh Rider radios in OEM and other commercial formats for aircraft and unmanned-platform integration. Its portfolio describes carriage of video, telemetry and control

traffic. ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■ ■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■■■■■■

An aircraft manufacturer seeking component-level control can evaluate the applicable Mesh Rider offering, but must retain responsibility for obtaining aircraft acceptance and defining supplier support. ■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■ Buyers should specify the contracting entity, exact offering and support owner before committing, particularly when procurement spans those locations.

Sources & Evidence

1. Mesh Rider Radios - Doodle Labs
   - Doodle Labs offers Mesh Rider radios in OEM and other formats for larger vehicles and aircraft and describes carriage of video, telemetry and control traffic. ([doodlelabs.com](https://doodlelabs.com/products/radios))
   - Company verification: Doodle Labs markets Mesh Rider radios in multiple commercial form factors, including aircraft/OEM applications.
   - Company verification: The catalog describes carriage of video, telemetry and control traffic.
2. Astro - US Made Commercial Drone
   - Freefly identifies a Doodle Labs radio in its Astro commercial aircraft offering, providing aircraft-supplier evidence of incorporation and a distinct aircraft-level purchasing context. ([freeflysystems.com](https://freeflysystems.com/astro))
   - Company verification: Freefly's current Astro commercial offering identifies Doodle Labs as its radio supplier.
3. About Us - Doodle Labs
   - Doodle Labs lists offices in the United States and Singapore. Office presence identifies commercial contact locations but does not establish destination-wide delivery entitlement. ([doodlelabs.com](https://doodlelabs.com/about))
   - Company verification: Doodle Labs' corporate page presents one operating business with United States and Singapore offices.
   - Company verification: Its legal footer identifies Doodle Labs LLC, and its corporate history attributes Mesh Rider radios to that business.
4. Case Studies - Doodle Labs
   - Company verification: Doodle Labs' commercial case-study collection identifies its radio integrations with Freefly Astro, Teledyne FLIR SkyRanger R70, and other named unmanned-aircraft platforms.
   - Company verification: These named integrations support its market-specific supplier role without establishing comparable shipments or market share.
5. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   - Company verification: Named as an upstream radio supplier incorporated into UXV's commercial SRM ecosystem.

21.4. Microhard Systems Inc.

■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ Its role

includes originating modem supply rather than only finished, aircraft-branded communications packages. UAV Navigation explicitly identifies Microhard modems inside TELEM07-MH400 and TELEM07-MH900 and describes TELEM07 compatibility with its own autopilots.

That distinction matters to buyers using UAV Navigation equipment: the packaged TELEM07 offering carries a stated autopilot-compatibility proposition that cannot automatically be transferred to a bare Microhard modem. A packaged purchase is relevant when that defined compatibility boundary matches the aircraft program; direct component purchasing preserves supplier-selection control but requires a separately agreed acceptance and support scope. ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■

Sources & Evidence

1. Microhard - Products
   - Microhard's catalog identifies Digital Data Links and Pico product families and states that sales and support are undertaken from its Calgary, Alberta headquarters. ([microhardcorp.com](https://www.microhardcorp.com/products.php))
   - Company verification: Microhard's official catalog identifies Microhard Systems Inc. and digital data-link and Pico product categories.
   - Company verification: The catalog identifies company headquarters in Calgary, Alberta, Canada.
2. Datalinks | UAV Navigation
   - UAV Navigation identifies Microhard modems inside TELEM07-MH400 and TELEM07-MH900 and states TELEM07 compatibility with its autopilots, establishing a package-specific commercial compatibility proposition. ([uavnavigation.com](https://uavnavigation.com/products/peripherals/datalinks))
   - Company verification: UAV Navigation's branded TELEM07 product listing independently corroborates Microhard's upstream modem participation in UAV communication packages.
3. Microhard Telemetry Radio - Holybro Store
   - Company verification: Holybro's telemetry-radio listing states that its branded product integrates Microhard Pico Series radio modules, corroborating Microhard's upstream participation.
4. Triad High Power Radio Systems For Unmanned Land Air Sea
   - Company verification: Triad's current system catalog identifies Microhard radios within marketed unmanned communication packages, corroborating downstream use.
5. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   - Company verification: Named as an upstream radio supplier incorporated into UXV's commercial SRM ecosystem.
6. All Drone Components and Autonomy Computers | ModalAI, Inc.
   - Company verification: ModalAI's commercial catalog names Microhard digital data-link equipment and related branded integration products.
7. VOXL & VOXL 2 Microhard Modem Add-on with USB Hub | ModalAI, Inc.
   - Company verification: Identified as the radio technology incorporated into ModalAI's VOXL modem package.

21.5. Mobilicom

Mobilicom markets SkyHopper PRO as a bidirectional software-defined-radio data link with ICE cybersecurity protection. ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ Procurement teams should distinguish the

availability of those offerings from independently established security outcomes and require the applicable contractual protection and support scope rather than accepting promotional performance language as an assurance.

Mobilicom's SEC-filed operating release reports that a U.S. drone manufacturer continued placing production orders for SkyHopper PRO during 2025. This supports an OEM supply relationship beyond a demonstration or initial selection. ■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■

■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■ ■■■■ ■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ A procurement approver should confirm the exact offering's applicable framework status and solicitation requirements; component consideration is neither an individual award nor product-specific spectrum authorization. Mobilicom is therefore a defensible specialist candidate for further procurement assessment, not a universally qualified substitute.

Sources & Evidence

1. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
   - DIU names Mobilicom SkyHopper PRO and Pro Lite among selected components and separately reports additions of Mobilicom components to the Framework. The announcement distinguishes selection from completed verification. ([diu.mil](https://www.diu.mil/latest/blue-uas-refresh-list-and-framework-platforms-and-capabilities-selected))
   - Company verification: Government material identifies Skyhopper PRO and Pro Lite in the framework selection process and reports addition of Mobilicom components to the framework.
   - Company verification: The record is not product-specific spectrum authorization.
2. SkyHopper Pro - Mobilicom
   - Mobilicom markets SkyHopper PRO as a bidirectional software-defined-radio data link with ICE cybersecurity protection. The page establishes the offered security proposition, not independent comparative effectiveness. ([mobilicom.com](https://mobilicom.com/products/skyhopperpro/))
   - Company verification: Mobilicom publicly offers the SkyHopper PRO bidirectional software-defined-radio data link.
3. Mobilicom Reports 2025 Year-End Financial Results
   - Mobilicom's SEC-filed release reports continuing 2025 production orders from an unnamed U.S. drone manufacturer for SkyHopper PRO, supporting a company-reported OEM supply relationship rather than a projected award. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ea028293501ex99-xx.xx.htm))
   - Company verification: Mobilicom's SEC-filed 2025 financial and operating release identifies Mobilicom Limited.
   - Company verification: It reports continuing production orders from a United States drone manufacturer for SkyHopper PRO datalinks.
   - Company verification: The disclosed production-order relationship establishes commercial participation beyond framework selection or demonstrations.

21.6. Elsight

Elsight markets Halo as a multibearer connectivity platform combining cellular, satellite and radio links, with Allsight management available through cloud-based and on-premises deployment options. ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■ Buyers should evaluate the management deliverable alongside the hardware instead of assuming hardware ownership includes every service entitlement.

■■■■■■■■■ ■■■■■ ■■■■■■■ ■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ Cloud delivery creates a continuing service commitment; the offered on-premises alternative does not automatically change embedded-software rights. This makes contractual continuity consequential when equipment is reassigned or the management arrangement changes.

Sources & Evidence

1. Halo: Commercial Drone Connectivity Platform for BVLOS Operations
   · Elsight presents Halo with cellular, radio and satellite connectivity and identifies cloud-based and on-premises Allsight management options, supporting a combined connectivity-and-management purchasing proposition. ([elsight.com](https://www.elsight.com/products/halo-for-commercial-use/))
2. Read our Terms & Conditions
   · Elsight's terms specify a nontransferable embedded-software license, automatic cloud-service renewal, purchased-period support, and exclusions for third-party software integration and connections absent from the quote. ([elsight.com](https://www.elsight.com/terms-conditions/))
3. Elsight Limited - Appendix 4E and Annual Report 2025
   · Company verification: Elsight's 2025 annual report identifies Elsight Limited as the Australian ultimate legal parent, with wholly owned Israeli and United States subsidiaries.
   · Company verification: The report describes executed Halo-related defense contracts and continuing equipment, software, and connectivity activity.
   · Company verification: Its disclosure distinguishes the adjacent Aura portfolio from the Halo unmanned-platform business.
4. Halo for HLS/Public Safety
   · Company verification: Elsight markets Halo for UAV/UGV command/control connectivity.
   · Company verification: The public offering combines cellular, satellite and radio connectivity and provides an OEM product format.

21.7. uAvionix

■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ The company identifies SkyLine and SkyLink activity at the FAA-designated Choctaw Nation test site, providing a named North American application reference. Although the broader ecosystem also supports payload communications, its distinctive purchasing proposition is aircraft-control connectivity with continuing link management, not simply a payload-video transmitter.

[redacted] For U.S. operations relying on Part xx.xx the FAA's BVLOS waiver pathway remains separate from equipment procurement. Test-site activity does not establish permission for the buyer's proposed operation or destination-specific service coverage.

Sources & Evidence

1. Part 107 Waivers
   - The FAA identifies a Part xx.xx waiver pathway for operations beyond the visual-line-of-sight requirement, establishing that the applicable operating permission is separate from communications-equipment procurement. ([faa.gov](https://www.faa.gov/uas/commercial_operators/part_107_waivers))
2. SkyLine UAS Command & Control - C2 for BVLOS
   - uAvionix presents SkyLine management with muLTElink, SkyLink and SkyStation products, supports payload communications within the broader ecosystem, and identifies SkyLine and SkyLink activity at the Choctaw Nation test site. ([uavionix.com](https://uavionix.com/uncrewed-aircraft-systems/uas-command/))
   - Company verification: uAvionix's current commercial page presents SkyLine, muLTElink, and SkyLink within its UAS command-and-control offering.
   - Company verification: The page identifies SkyLine and SkyLink activity at the FAA-designated Choctaw Nation test site.
   - Company verification: This establishes a dedicated aircraft-link and link-management role, not merely general aviation electronics capability.
3. SkyLink - uAvionix
   - uAvionix's SkyLink product documentation states that full functionality requires SkyLine network-management integration, supporting evaluation of equipment and management as a combined purchasing scope. ([uavionix.com](https://uavionix.com/product/skylink/))
   - Company verification: uAvionix publicly offers SkyLink airborne and ground command/control radio products.
   - Company verification: The product page includes a commercial request-for-quote channel.

21.8. Viasat

[redacted] Its distinctive contribution is continuing communications access rather than only merchant equipment supply. Operators should consequently evaluate the service relationship, included terminal and support obligations together; owning a compatible terminal is not equivalent to securing the required network service.

The Galaxy xx.xx collaboration announced March xx.xx 2026 adds a delivery role covering provisioning, billing, integration, monitoring and lifecycle visibility. [redacted]

■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ The collaboration does not independently grant those permissions.

Viasat's filing for the quarter ended June xx.xx 2026 identifies TrellisWare Technologies as a majority-owned subsidiary included in consolidated reporting and attributes tactical-networking offerings to that company. Group ownership therefore does not establish a single operating supplier or support counterparty. ■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Velaris - BVLOS connectivity for UAVs
   - Viasat markets Velaris as a dedicated UAV and advanced-air-mobility satellite communications service using its L-band network, with terminal offerings and a partner ecosystem. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
   - Company verification: Viasat markets Velaris as a dedicated satellite communications service for UAVs and advanced air mobility.
   - Company verification: The offering includes UAV-oriented terminals and command/control connectivity services.
2. Galaxy 1 partners with Viasat to deliver rapid, scalable and secure communications for uncrewed aircraft
   - The March xx.xx 2026 Galaxy xx.xx collaboration announcement describes Velaris delivery responsibilities covering provisioning, billing, integration, terminal monitoring and lifecycle visibility; individual customer contract duties are not established. ([viasat.com](https://www.viasat.com/news/latest-news/aviation/2026/galaxy-xx.xx-partners-with-viasat/))
3. Statement: Spectrum for Unmanned Aircraft Systems (UAS)
   - Ofcom's UK UAS framework requires network-operator agreement for covered satellite and mobile use and separately retains aviation requirements, limiting what a distribution partner can independently grant. ([ofcom.org.uk](https://www.ofcom.org.uk/spectrum/radio-equipment/spectrum-for-unmanned-aircraft-systems))
4. Viasat, Inc. Form 10-Q - Quarter Ended June 30, 2026
   - Viasat's Form xx.xx-Q for the quarter ended June xx.xx 2026 includes majority-owned TrellisWare in consolidated reporting and identifies TrellisWare as an operating supplier within tactical networking. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/vsat-xx.xx.htm))
5. EnerLinks | Viasat
   - Company verification: Viasat markets EnerLinks video/ISR data links.
   - Company verification: The portfolio expressly addresses UAV data-link applications and includes airborne and ground-side products.
6. ARYCOM - Soluções de Conectividade para Drones e eVTOLs
   - Company verification: Arycom's Brazilian drone-connectivity offering identifies Viasat as its satellite-network partner.

21.9. DJI

DJI supplies the O4 Air Unit and O4 Air Unit Pro as separately purchased digital video-transmission products for FPV drones. Its commercial distinction is the supported receiver ecosystem: DJI identifies compatible goggles, excludes third-party flight goggles and limits reuse of O3 accessories. ■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■

RESEARCH SAMPLE REPORT

[redacted]

DJI offers a direct store route and identifies authorized sellers. Its channel policy places unauthorized-dealer purchases outside manufacturer warranty service. [redacted]

Sources & Evidence

1. Where To Buy
   - DJI identifies official and authorized sales channels and states that products purchased from unauthorized dealers are outside its warranty services. ([dji.com](https://www.dji.com/where-to-buy/online-retails))
2. DJI O4 Air Unit Series - DJI United States
   - DJI markets the O4 Air Unit and O4 Air Unit Pro as digital video-transmission products and provides a direct DJI Store purchasing route. ([dji.com](https://www.dji.com/o4-air-unit))
   - Company verification: DJI markets the O4 Air Unit and O4 Air Unit Pro as drone-oriented digital video-transmission products.
   - Company verification: The official United States product page provides a purchase route and identifies compatible DJI controllers and goggles.
3. DJI O4 Air Unit Series - FAQ - DJI
   - DJI names compatible goggles and controllers, excludes third-party flight goggles, permits third-party remote controllers subject to its stated compatibility conditions, and identifies only partial O3 accessory compatibility. ([dji.com](https://www.dji.com/o4-air-unit/faq))

21.10. Gore

Gore participates through communications-support components rather than the complete aircraft-to-ground link evidenced by a terminal supplier. Its tethered-drone cable portfolio identifies power, electrical-data and optical-fiber elements for commercial and defense applications. [redacted]

[redacted] Component purchasing preserves supplier-selection flexibility but leaves the OEM with more coordination responsibility than a bundled system purchase. Before awarding supply, buyers should confirm the exact cable offering, regional fulfillment, relevant qualification documentation and responsibility for replacement support; general cable-channel authorization does not settle those offering-specific commitments.

Sources & Evidence

1. GORE Tethered Drone Cables for Commercial & Defense
   · Gore markets tethered-drone cables for commercial and defense applications, identifies power, electrical-data and optical-fiber elements, and links purchasers to a distributor route. The evidenced deliverable is cable hardware rather than a complete terminal system. ([gore.com](https://www.gore.com/products/tethered-drone-cables-commercial-defense))
   · Company verification: Gore markets GORE Tethered Drone Cables combining power and fiber-optic data paths.
   · Company verification: The page establishes a drone-specific physical-tether offering, not complete data-link terminal supply.
2. How to Buy: GORE Bulk Wire & Cables - Authorized Distributors & Agents
   · Gore's bulk-wire-and-cable directory identifies authorized distributors serving North America and Europe and offers contact with Gore representatives. It does not establish local stock of a particular tethered-drone cable. ([gore.com](https://www.gore.com/resources/bulk-wire-and-cables-authorized-distributors-agents))

21.11. Arycom

[redacted] The complementary roles remain important: Viasat provides the underlying Velaris satellite service, while Gotonomi supplies UAV terminal offerings. Arycom's regional presence therefore offers a local commercial contact without establishing ownership of those upstream capabilities.

[redacted] Named partnerships do not establish exclusive distribution rights, an executed customer-service agreement or approval for the buyer's operation. The route is less suitable when the buyer requires direct control of upstream contracts or cannot obtain a clear division of support obligations.

Sources & Evidence

1. Velaris - BVLOS connectivity for UAVs
   · Viasat identifies Velaris as its satellite communications service for UAVs and Advanced Air Mobility, delivered through its L-band satellite network. This supports the distinction between Arycom's regional route and the originating network service. ([viasat.com](https://www.viasat.com/aviation/advanced-air-mobility/velaris/))
2. Arycom announcement of Velaris UAV connectivity with Viasat and Gotonomi
   · Arycom's own announcement identifies its hybrid LTE/satellite UAV Velaris offering and names Viasat and Gotonomi as partners. It establishes a commercial proposition, not an executed customer contract. ([linkedin.com](https://www.linkedin.com/posts/arycom_velaris-arycom-viasat-activity-xx.xx-Nvhd))
3. Arycom | LinkedIn
   · Arycom's public corporate materials identify São Paulo headquarters and a Rio de Janeiro office, and include continuing descriptions of Velaris delivery with Viasat and Gotonomi. These are company-reported presence and offering facts, not verified service-level commitments. ([linkedin.com](https://www.linkedin.com/company/arycom))

4. Gotonomi Completes Successful Flight Trials and Opens Orders
   - Gotonomi identifies its UAV terminal range as connecting through Viasat's Velaris network, establishing the separate terminal and network roles underlying the regional-channel analysis. ([gotonomi.com](https://gotonomi.com/resources/gotonomi-completes-successful-flight-trials-and-opens-orders/))
5. ARYCOM - Soluções de Conectividade para Drones e eVTOLs
   - Company verification: Arycom publicly offers a drone-specific Velaris connectivity solution and identifies Brazilian business addresses.
   - Company verification: The offering identifies Viasat and Gotonomi as partners and names Arycom Capacidade Satelital Ltda in the footer.

21.12. Patria

[redacted] The announced solution is based on CANDL products. This establishes named program participation rather than merely a catalog claim, but the agreement announcement does not establish completed delivery or customer acceptance.

Patria markets CANDL for UAS command-and-control and payload-data communications, giving aircraft-program buyers a combined-function terminal proposition. [redacted] Those dates describe an announced commercialization schedule, not evidence that the new generation has fulfilled a particular order.

[redacted] Program-based procurement can align airborne and ground deliverables, but it also makes supplier access dependent on the prime's requirements and timetable. The SIRTAP agreement should not be treated as transferable qualification for another aircraft program or as proof of availability for an unrelated customer.

Sources & Evidence

1. Connectivity | Patria
   - Patria markets CANDL as an airborne networking datalink for UAS command-and-control and payload-data applications. This establishes the published combined-function offering, not qualification for every aircraft program. ([patriagroup.com](https://www.patriagroup.com/products-and-services/defence-and-weapon-systems/intelligence-and-surveillance/connectivity))
   - Company verification: Patria offers CANDL as an airborne networking data link.
   - Company verification: The company explicitly identifies UAS command/control and payload-data applications.
2. Patria has signed an agreement with Airbus Defence and Space for SIRTAP datalink solution
   - Patria's February xx.xx 2025 company-issued announcement identifies an agreement with Airbus Defence and Space in Spain for a CANDL-based SIRTAP datalink covering airborne vehicles and ground systems. It does not establish completed customer acceptance. ([news.cision.com](https://news.cision.com/patria-group/r/patria-has-signed-an-agreement-with-airbus-defence-and-space-for-sirtap-datalink-solution%2Cc4105786))

3. Patria CANDL securing UAV networks in contested environments
   - Patria's May xx.xx 2026 article scheduled CANDL xx.xx series production for autumn 2026 and deliveries for late 2026. These are announced milestones, not confirmation of completed delivery against a customer order. ([patriagroup.com](https://www.patriagroup.com/newsroom/patria-magazine/tech/patria-candl-securing-uav-networks-in-contested-environments))
   - Company verification: Patria's May xx.xx 2026 business article establishes continuing CANDL portfolio activity.
   - Company verification: It separately states that CANDL xx.xx series production is scheduled for autumn 2026 and deliveries for late 2026; completed deliveries are not established.
4. Patria on allekirjoittanut sopimuksen Airbus Defence and Spacen kanssa SIRTAP-järjestelmän datalink-ratkaisusta
   - Company verification: Patria's February xx.xx 2025 announcement identifies an Airbus Defence and Space agreement to supply airborne and ground datalink solutions for SIRTAP.
   - Company verification: The contracted solution is explicitly based on Patria CANDL products.

21.13. Elistair

[redacted] Its aircraft-specific Air Modules and compatibility inquiry provide a system purchasing route distinct from buying a cable alone. This proposition is relevant to operators considering communications within a tether-compatible mission, but power compatibility and wired-data compatibility must be evaluated separately.

Elistair's support guidance states that data may pass through the tether or through wireless applications depending on the aircraft, and cautions that some manufacturers, including DJI, retain their own wireless data applications. A purchaser seeking a Non-Radio Link should obtain confirmation that the specified aircraft and selected offering support tethered data, rather than infer this from power-tether compatibility. [redacted]

[redacted] The station route can consolidate tether hardware purchasing, but it does not remove aircraft-specific dependencies or establish a local repair commitment in every destination. Missions requiring movement beyond the tethered operating area need a separately suitable communications alternative.

Sources & Evidence

1. Safe-T Drone Power Station
   - Elistair markets Safe-T xx.xx with data-transfer capability, an optical-fiber option and aircraft-specific Air Modules, and asks purchasers to confirm drone compatibility. ([elistair.com](https://elistair.com/solutions/tethering-station-safe-t/))
   - Company verification: Elistair markets the Safe-T xx.xx drone tether station with data-transfer capability and an optical-fiber option.
   - Company verification: The product page identifies Elistair's European business address in Dardilly, France.
2. Support - Elistair | Tethered Drone Company
   - Elistair states that tethered or wireless data transfer depends on the aircraft and notes manufacturer-specific wireless restrictions, including DJI. It identifies maintenance centers in France and the United States and authorized partners providing initial maintenance. ([elistair.com](https://elistair.com/client-support/))

3. Elistair - Station d’alimentation Safe - T 2.2 - Medina Street Group
   - Company verification: Medina Street Group's Moroccan catalog lists Elistair Safe-T xx.xx and advertises tethered data-link options.
   - Company verification: The listing establishes advertised regional channel availability, not completed sales or local production.

21.14. Videosoft Global Ltd

Videosoft Global Ltd contributes drone-facing live-video transmission software and associated solutions rather than an independently established originating network role. ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ This provides a software-layer option for UAV manufacturers and mission-data buyers, but the company's performance language should not be treated as independently demonstrated outcomes for a buyer's aircraft and network.

The commercial separation is visible in Gotonomi's August xx.xx 2024 inspection-and-surveillance bundle announcement, which identifies Videosoft software and its license alongside Gotonomi terminal hardware and Viasat airtime. A bundled purchase consequently combines distinct equipment, software and connectivity commitments. ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■

Sources & Evidence

1. Gotonomi Completes Successful Flight Trials and Opens Orders
   - Gotonomi's August xx.xx 2024 announcement separately identifies terminal hardware, Videosoft video-streaming software and its license, and Viasat airtime within an inspection-and-surveillance bundle. The announcement does not establish customer-specific license or support terms. ([gotonomi.com](https://gotonomi.com/resources/gotonomi-completes-successful-flight-trials-and-opens-orders/))
   - Company verification: Videosoft's video-streaming software is identified within the announced Gotonomi UAV inspection bundle.
2. Surveillance Drone UAV Video Solutions | Videosoft Global
   - Videosoft markets drone-to-ground video delivery and video-transmission software for satellite, mesh and cellular connections. Only its own offering descriptions support the profile; third-party market estimates and promotional outcome claims are not used. ([videosoftglobal.com](https://www.videosoftglobal.com/industries/drones/))
   - Company verification: Videosoft Global offers drone-facing video-transmission solutions connecting UAVs and ground-control systems.
   - Company verification: Its participation is principally video-delivery software and associated solutions rather than an independently established RF-radio manufacturing role.

3. VIDEOSOFT GLOBAL LTD overview - Companies House
   - Company verification: Companies House records Videosoft Global Ltd as active under company number xx.xx.
   - Company verification: The inspected record shows a confirmation statement dated August xx.xx 2026 and accounts made up to December xx.xx 2025.
   - Company verification: Companies House records VIDEOSOFT GLOBAL LTD under company number xx.xx.
4. Live Gotonomi Demo at Xponential Europe 2026 with AIR6 SYSTEMS & Videosoft
   - Company verification: Videosoft Global is identified as a participating commercial partner in the March 2026 UAV connectivity demonstration.
   - Company verification: The event supplements its previously captured production-terminal bundle relationship without establishing sales volume.

21.15. Mynaric AG

[redacted] Its annual filing for 2021 identifies HAWK terminals for aircraft and UAV communications, customer engagement through aerospace primes and demonstration-oriented commercial activity. That record supports an identifiable airborne product and business role, but it does not establish a presently orderable drone configuration.

[redacted] Waiting for that confirmation may delay supplier selection, but relying on a space-focused ownership announcement would leave the airborne commitment unresolved. Historical HAWK customer relationships prevent the opposite inference that commercialization uncertainty means no relevant activity.

Sources & Evidence

1. Mynaric AG Form 20-F for the Year Ended December 31, 2021
   - Mynaric's annual filing for the year ended December xx.xx 2021 identifies HAWK airborne optical terminals, UAV customer targeting, aerospace-prime relationships and demonstration-oriented commercial engagement. It does not establish present HAWK orderability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/d310942d20f.htm))
2. Rocket Lab Completes Mynaric Acquisition, Adding Laser Optical Communications To Growing Space Systems Portfolio
   - Rocket Lab announced completion of its acquisition of Mynaric AG on April xx.xx 2026. The announcement emphasizes satellite optical communications and space-program relationships and does not establish a current UAV-specific HAWK supply or maintenance commitment. ([rocketlabcorp.com](https://rocketlabcorp.com/updates/rocket-lab-completes-mynaric-acquisition-adding-laser-optical-communications-to-growing-space-systems-portfolio/index.php))
   - Company verification: Rocket Lab announced completion of its acquisition of Mynaric AG on April xx.xx 2026.

3. HAWK - Optical Communication Terminal for Airborne and Ground Operations - Mynaric
   - Company verification: Mynaric's HAWK optical-communications product page explicitly includes UAS connectivity.
   - Company verification: The stated product status is an early-generation product for demonstrations and use-case validation, not evidence of unrestricted current drone-market sales.

21.16. Nokia

[illegible] The identifiable communications contribution remains distinct from the entire aircraft, docking and mission package. A quotation should also name the supported release: Nokia's November xx.xx 2025 update introduced Drone Networks xx.xx XLR rather than establishing interchangeability among every version.

The managed route is suitable only when the contract resolves network access, service delivery, data responsibilities and escalation. [illegible] Partner-led delivery may consolidate administration; the published service proposition does not establish that all operator obligations transfer or that its acquisition alternatives are offered on identical terms in every destination.

Ownership and support continuity require separate diligence. [illegible] Before a multiyear commitment, buyers should identify the contracting and maintenance counterparties and establish how software support and service obligations would continue through any ownership change.

Sources & Evidence

1. Nokia extends partner program to accelerate Drones-as-a-Service business in North America
   - Nokia's December xx.xx 2023 North American partner-program announcement describes purchase, lease, sharing and flight-hire alternatives, with bundled maintenance, analytics and scheduling. The announcement does not establish individual contract responsibilities or universal destination availability. ([nokia.com](https://www.nokia.com/newsroom/nokia-extends-partner-program-to-accelerate-drones-as-a-service-business-in-north-america/))

2. Nokia unveils first CE-certified 5G automated drone-in-a-box solution for secure, reliable public sector and industrial operations
   · Nokia describes Drone Networks as an integrated drone, docking and edge-processing offering using public and private cellular connectivity. The wider system contains distinguishable communications and noncommunications deliverables. ([nokia.com](https://www.nokia.com/newsroom/nokia-unveils-first-ce-certified-5g-automated-drone-in-a-box-solution-for-secure-reliable-public-sector-and-industrial-operations/))
   · Company verification: Nokia's May xx.xx 2023 release identifies Nokia Drone Networks as a dedicated integrated drone solution using cellular connectivity.
   · Company verification: The release identifies Espoo, Finland and states that the solution is manufactured in Europe.
3. Taking industries further with the enhanced Nokia Drone Networks platform
   · Nokia's November xx.xx 2025 update introduces Drone Networks xx.xx XLR. It supports offering-generation diligence without establishing availability or acceptance of every release for every customer. ([nokia.com](https://www.nokia.com/blog/taking-industries-further-with-the-enhanced-nokia-drone-networks-platform/))
4. Nokia Corporation Report for Q2 and Half Year 2026
   · Nokia's July xx.xx 2026 financial report states that Enterprise Campus Edge was classified as discontinued operations in Q2 2026 because an agreement to sell the business was considered highly probable. This is not confirmation of a completed ECE ownership transfer. ([nokia.com](https://www.nokia.com/newsroom/nokia-corporation-report-for-q2-and-half-year-2026/))
5. 自動飛行・遠隔運用に強みを持つ Nokia ECE 製ドローンの国内初の販売権を取得：日立
   · Hitachi's announcement identifies Japanese domestic sales rights for Nokia ECE drones. This supports a channel relationship, not a customer-specific fulfillment or continuing-support guarantee. ([hitachi.com](https://www.hitachi.com/ja-jp/press/articles/2026/xx.xx/xx.xx/))

21.17. S-PLANE Automation

S-PLANE Automation provides an aircraft-and-ground communications integration route from Somerset West, South Africa. Its offering combines TRACKER+, X-ADT and GDT terminals with third-party line-of-sight and satellite links. ■■■■■■■■ ■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■

Aircraft manufacturers seeking coordinated delivery can evaluate its system-integration and certification-support services alongside the equipment. The potential coordination benefit depends on the agreement naming incorporated suppliers, network counterparties, acceptance deliverables and continuing support responsibilities. ■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■■■■

Sources & Evidence

1. COMMUNICATION SOLUTIONS - S-PLANE Automation
   - S-PLANE markets communications solutions combining TRACKER+, X-ADT and GDT equipment with third-party line-of-sight and satellite links, and offers integration and certification support. Its stated location is Somerset West, South Africa. These support assessing integration responsibility separately from incorporated suppliers. ([s-plane.com](https://s-plane.com/solutions/communication-solutions/))
   - Company verification: S-PLANE markets communication solutions for unmanned aircraft, combining TRACKER+, airborne/ground data terminals and third-party line-of-sight or satellite links.
   - Company verification: The offering page provides a Somerset West, South Africa business address.
2. TRACKER+ - S-PLANE Automation
   - TRACKER+ is marketed as a standalone antenna tracker and radio enclosure. Customers may select their own incorporated radio links or standard alternatives, supporting a commercial choice between coordinated integration and retained radio-supplier control. ([s-plane.com](https://s-plane.com/products/tracker/))

21.18. KDDI SmartDrone Inc.

KDDI SmartDrone Inc. offers Japanese drone operators a dedicated aerial LTE package, including drone-facing and transmitter-facing SIM connectivity. Its Tokyo-based corporate presentation identifies KDDI Corporation and Japan Airlines as shareholders. ■■■ ■■■■■■■ ■■■■ ■■■■■■ ■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■

■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ Compatible aircraft and communications modules are required, and the aerial-area map is indicative rather than a connectivity guarantee. These conditions make the package more specific than a generic cellular-capable terminal.

■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ Procurement should confirm included functions, escalation commitments and cloud-data responsibilities. Changes to the supported aircraft or intended service area should reopen the assessment rather than relying on compatibility established for another deployment.

Sources & Evidence

1. ドローン向け上空 LTE SIM なら上空電波パッケージ | DJI 対応 | KDDI スマートドローン
   - The aerial LTE package offers drone and transmitter SIM connectivity, requires compatible equipment, permits connectivity without the management system, excludes ANAFI Ai from that system, and describes its coverage map as indicative rather than guaranteed. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/communication/4g-lte/))
   - Company verification: Markets KDDI SmartDrone's dedicated aerial LTE communications package, including drone-facing SIM connectivity.

2. 企業情報 | KDDI スマートドローン株式会社
   - The corporate page identifies a Tokyo location and lists KDDI Corporation and Japan Airlines as shareholders. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/company/))
   - Company verification: KDDI SmartDrone's current corporate page identifies KDDI Corporation and Japan Airlines as shareholders, superseding reliance on its wholly owned status at formation.
   - Company verification: The page contains an April xx.xx 2026 operating-company reference and continues to present dedicated drone communications services.
   - Company verification: It identifies the Japanese legal company and the English presentation KDDI SmartDrone Inc.
3. スマートドローン運航管理システム・クラウド | テクノロジー | KDDI スマートドローン株式会社
   - KDDI SmartDrone markets its Flight Operation System and cloud functions for remote supervision and video sharing over the au mobile network in Japan. These functions support comparing retained aircraft-management tools with additional provider software and cloud responsibilities. ([kddi.smartdrone.co.jp](https://kddi.smartdrone.co.jp/technology/control/))
4. Establishment of KDDI SmartDrone Inc. | 2022 | KDDI Corporation
   - Company verification: Establishes KDDI SmartDrone Inc.'s formation on January xx.xx 2022 and KDDI's xx.xx% ownership at formation.
   - Company verification: Describes the transfer of KDDI's drone business and its cellular-enabled remote-flight service role.

21.19. Divimath, Inc.

Divimath, Inc. combines a declared technology-ownership position with identifiable video-transmission products. HDZero identifies Divimath as the developer and owner of its digital wireless video-transceiver technology. ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■ ■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■

The HDMI VTX should be assessed as a video-link offering rather than presumed to include a complete flight-management communications service. ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ Equipment buyers should confirm the supported source and receiver relationship; OEMs discussing technology rights should separately establish the proposed license and commercialization permissions.

■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ Buyers requiring continuing commercial maintenance should establish applicable seller coverage and service commitments separately. Dealer presence does not establish delivery of every model, and technology ownership does not itself provide broader maintenance entitlement.

Sources & Evidence

1. Technology | HDZERO
   - HDZero identifies Divimath Inc. as the developer and owner of its digital wireless video-transceiver technology. This is the company's technology-ownership statement, not evidence of a negotiated third-party license. ([hd-zero.com](https://www.hd-zero.com/technology))
   - Company verification: Identifies Divimath Inc. as the developer and owner of HDZero digital wireless video-transceiver technology for FPV applications.
2. Divimath HDMI VTX - Digital 5.8 GHz HDMI Wireless Link for FPV and Embedded Systems
   - Divimath markets the HDMI VTX for FPV and embedded applications, specifies HDZero/Divimath digital-receiver compatibility, and excludes MIPI cameras such as its HD90. The listing supports video-link classification and product-specific compatibility checks. ([divimath.com](https://www.divimath.com/products/divimath-hdmi-vtx))
   - Company verification: Markets a Divimath-branded HDMI digital video transmitter for FPV and embedded-system applications.
   - Company verification: The commercial listing identifies compatibility with HDZero and Divimath digital receivers.
3. Authorized Dealers | HDZERO
   - HDZero's authorized-dealer page lists channels in the United States, United Kingdom and Japan. It establishes published dealer relationships, not fulfillment of every Divimath model in those destinations. ([hd-zero.com](https://www.hd-zero.com/dealers))
4. Warranty | HDZERO
   - HDZero's published hobby-product warranty accepts dead-on-arrival claims and excludes crash damage. This supports verifying seller coverage and separately negotiated commercial maintenance rather than inferring continuing service from technology ownership. ([hd-zero.com](https://www.hd-zero.com/warranty))

21.20. UXV Technologies

[redacted] SRoC controllers and SRM accessories provide the commercial integration layer, while SRM Airside USB extends that ecosystem to drone and vehicle applications. This distinguishes UXV's controller and module-integration role from the originating capabilities of the incorporated radio suppliers.

DIU documented SRoC controller use with AgEagle and Skydio aircraft in a June 2024 integration example. [redacted] A new buyer should compare a configured UXV package with direct radio purchasing that retains its own ground-control integration responsibilities.

UXV presents headquarters in Denmark and the United States and lists UXV Technologies ApS and UXV Technologies, Inc. Buyers should identify which entity contracts for the controller and incorporated module, and who handles warranty, repairs and upstream escalation. [redacted]

Sources & Evidence

1. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
   · UXV describes SRM integrations incorporating Persistent Systems, Silvus Technologies, Doodle Labs, Microhard and TrellisWare radios, together with SRoC controllers and SRM accessories. This supports its configured-controller and integration role rather than attribution of every incorporated radio technology to UXV. ([uxvtechnologies.com](https://www.uxvtechnologies.com/news/unleashing-the-power-of-swappable-radio-modules-srm-the-future-of-connectivity-is-here))
   · Company verification: Markets branded SRM radio integrations for unmanned-system ground-control equipment.
   · Company verification: Names Persistent Systems, Silvus Technologies, Doodle Labs, Microhard and TrellisWare among integrated radio suppliers.
2. UXV Technologies Communications - SRM Airside USB
   · SRM Airside USB is marketed for the UXV swappable-radio ecosystem and drone or vehicle applications. Its advertised compatibility concerns supported module options, supporting configuration-specific rather than universal substitution conclusions. ([uxvtechnologies.com](https://www.uxvtechnologies.com/communication/srm-airside-usb))
   · Company verification: Offers SRM Airside USB for drone and vehicle compatibility with its swappable-radio ecosystem.
   · Company verification: Official materials present UXV Technologies ApS and UXV Technologies, Inc. within the same commercial presentation.
3. Successful Flight Operations Conducted Between Uncrewed Traffic Management System and Blue UAS Platforms at FAA Test Site
   · DIU reports that UXV Soldier Robotic Controller ground stations controlled AgEagle and Skydio aircraft in a June 2024 integration event. This corroborates use in that configuration; it does not establish portfolio-wide procurement qualification. ([diu.mil](https://www.diu.mil/latest/successful-flight-operations-conducted-between-uncrewed-traffic-management))
   · Company verification: A government account identifies UXV Soldier Robotic Controllers as the ground-control equipment used for the participating aircraft.
4. Contact Us
   · UXV's contact page presents headquarters in Denmark and the United States and lists UXV Technologies ApS and UXV Technologies, Inc. Those presentations do not allocate individual contracts, warranties or upstream repair responsibilities. ([uxvtechnologies.com](https://www.uxvtechnologies.com/contact))

21.21. Advanced Microwave Products

Advanced Microwave Products presents itself as a privately owned Reno, Nevada supplier serving commercial, government, military and unmanned-platform applications. ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ This gives buyers distinct component-sourcing choices rather than a single undifferentiated digital-link proposition.

Purchasing comparisons should identify the required video or data function, the matched transmitter and receiver, and any separately supplied support hardware. ■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■■■ Buyers should obtain offering-specific confirmation before treating a proposed component set as a substitute for an installed link.

AMP invites custom product requests and provides direct sales and engineering contacts. It also identifies Toronto-based Dyplex Communications as an international distributor. ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. UAV/UGV Products - Advanced Microwave Products
   - AMP's UAV/UGV catalog separates analog video transmitters and receivers, FSK data products, encrypted video products and RF amplifiers. These distinct families support function-specific endpoint comparisons and separation of complete links from supporting hardware. ([advmw.com](https://advmw.com/uav-ugv-products/))
   - Company verification: Provides a dedicated UAV/UGV commercial catalog of data, analog and encrypted transmitters, receivers and transceivers.
2. About AMP | Advanced Microwave Products | Reno, NV
   - AMP describes itself as privately owned and located in Reno, Nevada, serving commercial, government, military, UAV and UGV applications. It invites custom product requirements alongside its standard video and data product lines. ([advmw.com](https://advmw.com/about-amp/))
   - Company verification: Identifies Advanced Microwave Products as a privately owned Reno, Nevada business.
   - Company verification: Describes its UAV-facing video and data transmitter/receiver product lines.
3. Contact Us | Advanced Microwave Products | Reno, NV
   - AMP publishes direct sales and engineering contacts and identifies Toronto-based Dyplex Communications as an international distributor. This supports separate manufacturer-direct and distributor routes without establishing identical destination coverage or service obligations. ([advmw.com](https://advmw.com/contact-us/))

Sources & Evidence

1. L3Harris Technologies, Inc. 2025 Annual Report
   - Company verification: The 2025 annual report identifies L3Harris Technologies, Inc. and establishes continuing consolidated operations, including its communications business.
   - Company verification: The report supports consolidated-company reporting rather than adding separate representations of its communications operating units.
2. Cubic Corporation Modern Slavery Statement - March 21, 2025
   - Company verification: The March xx.xx 2025 statement identifies Cubic Corporation and its operating-company group.
   - Company verification: It identifies Cubic as a privately owned Veritas Capital company and describes continuing defense operations.
3. AEVEX joins Persistent Systems' Wave Relay Ecosystem
   - Company verification: Persistent Systems, LLC announced an AEVEX Wave Relay ecosystem agreement on May xx.xx 2026.
   - Company verification: The announcement identifies Wave Relay integration into AEVEX's Atlas UAS, establishing a current named aircraft-manufacturer relationship and continuing supplier activity.

4. About Us - Doodle Labs
   - Company verification: Doodle Labs' corporate page presents one operating business with United States and Singapore offices.
   - Company verification: Its legal footer identifies Doodle Labs LLC, and its corporate history attributes Mesh Rider radios to that business.
5. Case Studies - Doodle Labs
   - Company verification: Doodle Labs' commercial case-study collection identifies its radio integrations with Freefly Astro, Teledyne FLIR SkyRanger R70, and other named unmanned-aircraft platforms.
   - Company verification: These named integrations support its market-specific supplier role without establishing comparable shipments or market share.
6. Mobilicom Limited - 2025 Financial Results and Operating Highlights
   - Company verification: Mobilicom's SEC-filed 2025 financial and operating release identifies Mobilicom Limited.
   - Company verification: It reports continuing production orders from a United States drone manufacturer for SkyHopper PRO datalinks.
   - Company verification: The disclosed production-order relationship establishes commercial participation beyond framework selection or demonstrations.
7. Elsight Limited - Appendix 4E and Annual Report 2025
   - Company verification: Elsight's 2025 annual report identifies Elsight Limited as the Australian ultimate legal parent, with wholly owned Israeli and United States subsidiaries.
   - Company verification: The report describes executed Halo-related defense contracts and continuing equipment, software, and connectivity activity.
   - Company verification: Its disclosure distinguishes the adjacent Aura portfolio from the Halo unmanned-platform business.
8. SkyLine UAS Command & Control - C2 for BVLOS
   - Company verification: uAvionix's current commercial page presents SkyLine, muLTElink, and SkyLink within its UAS command-and-control offering.
   - Company verification: The page identifies SkyLine and SkyLink activity at the FAA-designated Choctaw Nation test site.
   - Company verification: This establishes a dedicated aircraft-link and link-management role, not merely general aviation electronics capability.
9. Comrod acquires Triad RF Systems
   - Company verification: Comrod's April xx.xx 2024 announcement records acquisition of a majority share of Triad RF Systems Inc.
   - Company verification: It explicitly states that Triad retains its branding and serves the market as a Comrod company.
10. Triad RF - A Comrod Company
    - Company verification: Comrod's current Triad business page continues to present Triad-branded integrated radio systems and turnkey data-link offerings.
    - Company verification: It expressly identifies unmanned-aircraft systems among the business's commercial application areas.
11. Sobre nosotros - UAV Navigation-Grupo Oesía
    - Company verification: UAV Navigation's corporate page explicitly identifies the operating business as part of Grupo Oesía.
    - Company verification: It describes continuing supply of flight-control solutions to aircraft manufacturers, resolving the previously unassessed immediate group relationship.
12. Virksomhetsopplysninger - RADIONOR COMMUNICATIONS AS
    - Company verification: Norway's official business register identifies RADIONOR COMMUNICATIONS AS under organization number xx.xx.
    - Company verification: The record establishes its Trondheim business address and communications-equipment manufacturing classification.

13. Radionor opens new and advanced manufacturing facility in Selbu
    - Company verification: Radionor's June xx.xx 2026 announcement reports opening a manufacturing facility in Selbu.
    - Company verification: The dated event establishes continuing commercial operations and expansion of radio-product delivery capability; it does not establish drone-specific production volume.
14. Patria on allekirjoittanut sopimuksen Airbus Defence and Spacen kanssa SIRTAP-järjestelmän datalink-ratkaisusta
    - Company verification: Patria's February xx.xx 2025 announcement identifies an Airbus Defence and Space agreement to supply airborne and ground datalink solutions for SIRTAP.
    - Company verification: The contracted solution is explicitly based on Patria CANDL products.
15. Patria CANDL securing UAV networks in contested environments
    - Company verification: Patria's May xx.xx 2026 business article establishes continuing CANDL portfolio activity.
    - Company verification: It separately states that CANDL xx.xx series production is scheduled for autumn 2026 and deliveries for late 2026; completed deliveries are not established.
16. World Defense Show 2026 - HENSOLDT
    - Company verification: HENSOLDT's February xx.xx-xx.xx 2026 World Defense Show portfolio expressly includes the DL-xx.xx video and data terminal.
    - Company verification: This refreshes evidence of continuing portfolio activity beyond the undated product record.
17. RACOM Newsletter 02/2026
    - Company verification: RACOM's February 2026 newsletter announces the WaSP embedded-radio product line and continuing defense-sector commercial activity.
    - Company verification: It identifies in-house development and manufacturing in Czechia and provides a quotation/contact route.
18. Solid State Group - Group Capabilities Brochure
    - Company verification: Solid State Group's capabilities brochure identifies Steatite Ltd as its systems operating division.
    - Company verification: It presents Steatite's communications portfolio, including Wave Relay products and configured systems, supporting operating-company reporting under Solid State.
19. VIDEOSOFT GLOBAL LTD overview - Companies House
    - Company verification: Companies House records Videosoft Global Ltd as active under company number xx.xx.
    - Company verification: The inspected record shows a confirmation statement dated August xx.xx 2026 and accounts made up to December xx.xx 2025.
    - Company verification: Companies House records VIDEOSOFT GLOBAL LTD under company number xx.xx.
20. Xer Technologies Extends X8 BVLOS Capability with Gotonomi Satellite Integration
    - Company verification: An April xx.xx 2026 announcement identifies integration of Gotonomi's Velaris Multi-Link satellite module into Xer Technologies' X8 UAV.
    - Company verification: The announcement establishes a current named integration relationship, not a disclosed delivery volume or procurement award.
21. Live Gotonomi Demo at Xponential Europe 2026 with AIR6 SYSTEMS & Videosoft
    - Company verification: Gotonomi announced a March 2026 commercial demonstration with AIR6 SYSTEMS and Videosoft Global involving remotely piloted UAV connectivity.
    - Company verification: Videosoft Global is identified as a participating commercial partner in the March 2026 UAV connectivity demonstration.
    - Company verification: The event supplements its previously captured production-terminal bundle relationship without establishing sales volume.

22. Current details for ABN 46 133 371 758 - RFDesign Pty Ltd
    - Company verification: Australia's ABN register identifies RFDesign Pty Ltd, an Australian private company, with active ABN xx.xx.
    - Company verification: The record associates the RFDesign trading name with that entity and identifies Queensland as its main business location.
23. 企業情報 - KDDI スマートドローン株式会社
    - Company verification: KDDI SmartDrone's current corporate page identifies KDDI Corporation and Japan Airlines as shareholders, superseding reliance on its wholly owned status at formation.
    - Company verification: The page contains an April xx.xx 2026 operating-company reference and continues to present dedicated drone communications services.
    - Company verification: It identifies the Japanese legal company and the English presentation KDDI SmartDrone Inc.
24. Vislink Technologies, Inc. - Form 10-K for the Year Ended December 31, 2024
    - Company verification: Vislink's 2024 Form xx.xx-K records acquisition of assets from Broadcast Microwave Services, LLC on September xx.xx 2023.
    - Company verification: The filing identifies Vislink Poway, LLC as the associated subsidiary, exposing a naming difference from the staged BMS display title.
25. Kratos Defense & Security Solutions, Inc. - Form 10-Q for the Quarter Ended June 28, 2026
    - Company verification: Kratos' June xx.xx 2026 quarterly filing records completion of its acquisition of Orbit Technologies Ltd on March xx.xx 2026.
    - Company verification: The filing establishes the acquired group's Kratos ownership; the exact relationship to the staged Orbit Communication Systems Ltd. operating identity still requires reconciliation.
26. About US - Skydroid
    - Company verification: Skydroid's business page identifies the Skydroid Technology company presentation and describes its unmanned-system communications portfolio.
    - Company verification: Its corporate history identifies the H16 image-transmission product launch and subsequent link-portfolio activity.
    - Company verification: The history does not establish current availability of every H16 variant or an independently corroborated registered legal name.
27. About Commtact - Tactical Communication Experts
    - Company verification: Commtact's current company page includes management appointments in 2025 and a Yavne business address, supporting continuing operations.
    - Company verification: It continues to link Phoenix and MDLS product families; it does not establish current ultimate ownership.
28. Manned-Unmanned Teaming
    - Company verification: L3Harris publicly promotes miniature transceivers and surface data-link systems for UAV and manned-unmanned communications.
    - Company verification: Its offering material identifies the Bandit radio within its UAV-facing portfolio.
29. Secure Wideband Data Links | Cubic
    - Company verification: Cubic markets Common Data Link products and airborne, surface and relay terminals explicitly including UAV applications.
    - Company verification: The catalog identifies a dual-channel modem associated with the MQ-8C UAV program.
30. Motorola Solutions, Inc. Form 8-K - Silvus acquisition completion
    - Company verification: Motorola Solutions' SEC filing records completion of its acquisition of Silvus Technologies Holdings Inc. on August xx.xx 2025.
31. StreamCaster Unmanned Systems Datalinks
    - Company verification: Silvus' official StreamCaster brochure presents unmanned-system data-link offerings.
    - Company verification: The document identifies Silvus as the supplier of the StreamCaster product family.

32. Persistent Systems, LLC | Unmanned Aerial Systems (UAS) Solutions Overview
    - Company verification: Persistent Systems offers UAS connectivity solutions involving embedded radio modules, ground communication equipment and MPU5-based controller/video-terminal products.
    - Company verification: The offering page explicitly addresses bidirectional UAS connectivity and video transmission.
33. Mesh Rider Radios - Doodle Labs
    - Company verification: Doodle Labs markets Mesh Rider radios in multiple commercial form factors, including aircraft/OEM applications.
    - Company verification: The catalog describes carriage of video, telemetry and control traffic.
34. Microhard - Products
    - Company verification: Microhard's official catalog identifies Microhard Systems Inc. and digital data-link and Pico product categories.
    - Company verification: The catalog identifies company headquarters in Calgary, Alberta, Canada.
35. Microhard Telemetry Radio - Holybro Store
    - Company verification: Holybro's telemetry-radio listing states that its branded product integrates Microhard Pico Series radio modules, corroborating Microhard's upstream participation.
    - Company verification: Holybro markets a branded Microhard Telemetry Radio package.
    - Company verification: The retrieved selected product listing is marked sold out, so immediate availability is not established.
36. SkyHopper Pro - Mobilicom
    - Company verification: Mobilicom publicly offers the SkyHopper PRO bidirectional software-defined-radio data link.
37. Halo for HLS/Public Safety
    - Company verification: Elsight markets Halo for UAV/UGV command/control connectivity.
    - Company verification: The public offering combines cellular, satellite and radio connectivity and provides an OEM product format.
38. SkyLink - uAvionix
    - Company verification: uAvionix publicly offers SkyLink airborne and ground command/control radio products.
    - Company verification: The product page includes a commercial request-for-quote channel.
39. CNPC-1000 UAS Command and Control Data Link | Collins Aerospace
    - Company verification: Collins Aerospace describes CNPC-xx.xx as a UAS command/control data link supporting control, telemetry and downlink services.
    - Company verification: The same page states that required FCC authorization has not been obtained and that the device may not be sold or leased until authorized.
40. EnerLinks | Viasat
    - Company verification: Viasat markets EnerLinks video/ISR data links.
    - Company verification: The portfolio expressly addresses UAV data-link applications and includes airborne and ground-side products.
41. Velaris | Satellite connectivity for UAVs | Viasat
    - Company verification: Viasat markets Velaris as a dedicated satellite communications service for UAVs and advanced air mobility.
    - Company verification: The offering includes UAV-oriented terminals and command/control connectivity services.
42. Small Satcom | Honeywell Aerospace
    - Company verification: Honeywell Aerospace's satellite-communications catalog lists VersaWave 5G as a high-speed global satellite communications system for small UAVs.

43. Honeywell Aerospace Small UAV SATCOM sees beyond visual line of sight
    - Company verification: Honeywell Aerospace's Small UAV SATCOM brochure describes an offering for UAV command/control, live video and collected-data communications.
    - Company verification: The brochure identifies inspection, public safety and other operator applications at the commercial-category level.
44. Honeywell Aerospace reports second quarter results; updates 2026 outlook
    - Company verification: Honeywell Aerospace's August xx.xx 2026 corporate disclosure reports completion of its spin-off on June xx.xx 2026.
    - Company verification: The disclosure identifies Honeywell Aerospace as a standalone publicly traded company.
45. E-LynX UxS - Unified connectivity for manned-unmanned teaming
    - Company verification: Elbit Systems' E-LynX UxS brochure presents a connectivity product category expressly connecting UAS and other unmanned platforms.
46. Communications Archives - IAI
    - Company verification: IAI's communications catalog lists Castellite for UAVs and LOS wideband data-link systems.
    - Company verification: The UAV offering is described as a communications suite for UAV operators and connected control centers.
47. BNET Family - Air, Land & Sea
    - Company verification: RAFAEL's official BNET family brochure includes a NANO BNET variant explicitly designated for UAVs.
    - Company verification: The brochure identifies RAFAEL Advanced Defense Systems as the product-family supplier; current availability is not established by this record.
48. Tactical Communication Products | Commtact
    - Company verification: Commtact markets LOS data-link products for UAV video and mission-data communications.
    - Company verification: The catalog names Phoenix and MDLS product families.
    - Company verification: The page distinguishes current LOS offerings from satellite solutions described as planned.
49. ARTLINK MESH 1000 - ISR Data Link System
    - Company verification: ASELSAN's April 2026 ARTLINK MESH xx.xx brochure presents an ISR data-link system for unmanned aerial, ground and surface platforms.
    - Company verification: The brochure explicitly includes payload-information transmission to ground operators.
50. Leonardo capabilities in UAV platforms, systems and certification
    - Company verification: Leonardo's 2025 corporate presentation lists WBDL, a wideband data link, and DLMS, a data-link management system, among its UAV capabilities.
    - Company verification: The presentation establishes a named UAV-related portfolio capability but not standalone merchant availability.
51. Radar, IFF and datalink | HENSOLDT
    - Company verification: HENSOLDT's South Africa country hub lists the DL-xx.xx video/data terminal within its data-link portfolio.
    - Company verification: The page establishes a South African portfolio presence but does not explicitly resolve the terminal's UAV-specific commercial role.
    - Company verification: HENSOLDT's South Africa country hub includes its data-link portfolio and links the DL-xx.xx product.
52. DJI O4 Air Unit Series - DJI United States
    - Company verification: DJI markets the O4 Air Unit and O4 Air Unit Pro as drone-oriented digital video-transmission products.
    - Company verification: The official United States product page provides a purchase route and identifies compatible DJI controllers and goggles.

53. EVO Lite Series Specifications - Remote control & image transmission
    - Company verification: Autel Robotics' official EVO Lite portfolio record identifies Autel SkyLink as its remote-control/image-transmission system.
    - Company verification: This record supports embedded OEM connectivity rather than independently sold merchant-link equipment.
54. Communications - RFDesign
    - Company verification: RFDesign markets TXMOD as an integrated telemetry and remote-control communication system.
    - Company verification: The product page expressly describes communication between an aircraft and its ground-side controller.
55. RFD900 VideoLink Modem - RFDesign
    - Company verification: RFDesign markets the RFD900 VideoLink module for UAV and other remote-platform applications.
    - Company verification: The official store listing describes combined telemetry and video connectivity.
56. AIRLink - Sky-Drones Technologies Ltd
    - Company verification: Sky-Drones Technologies markets AIRLink as an integrated drone avionics product combining SmartAP and SmartLink.
    - Company verification: The offering includes cellular/internet connectivity and remote-control services.
57. UAV Data Link and Unmanned Communications | DTC, a Codan Company
    - Company verification: DTC markets BluSDR and MeshUltra UAV data-link and unmanned communication offerings.
    - Company verification: The official page identifies DTC as a Codan company.
58. Data Link - TUALCOM
    - Company verification: TUALCOM's official catalog offers data-link products and turnkey systems including ground stations.
    - Company verification: The catalog links its ground-terminal offering to airborne platforms and UAVs.
59. C Band UAV Data Link
    - Company verification: TUALCOM's official C Band UAV Data Link brochure presents a drone-specific video and telemetry communication product category.
60. Datalinks | UAV Navigation
    - Company verification: UAV Navigation markets TELEM07 radio data links compatible with its autopilot portfolio.
    - Company verification: The listed TELEM07 variants incorporate Microhard modems.
    - Company verification: UAV Navigation's branded TELEM07 product listing independently corroborates Microhard's upstream modem participation in UAV communication packages.
61. Triad High Power Radio Systems For Unmanned Land Air Sea
    - Company verification: Triad RF Systems markets THPR radio systems for unmanned command/control and data links.
    - Company verification: Its catalog identifies integrated systems incorporating Microhard and Silvus radios.
    - Company verification: Triad's current system catalog identifies Silvus radios within marketed unmanned communication packages, corroborating downstream use.
    - Company verification: Triad's current system catalog identifies Microhard radios within marketed unmanned communication packages, corroborating downstream use.
62. Embention Manuals | Veronte Avionics SDL | Datalink Manual
    - Company verification: Embention's official SDL documentation identifies SDL as a LOS datalink for UAV communications.
    - Company verification: The overview is dated December xx.xx 2025; it does not by itself establish current commercial availability.

63. Investor Relations | Embention
    - Company verification: Embention's investor page identifies the company and its UAV/avionics business.
    - Company verification: The page identifies Embention Sistemas Inteligentes, S.A. as the corporate legal entity.
64. SOVERON AR Software Defined Airborne Radio | Rohde & Schwarz
    - Company verification: Rohde & Schwarz maintains an official product page for the SOVERON AR software-defined airborne radio.
65. SOVERON AR Airborne Radio
    - Company verification: Rohde & Schwarz's April 2023 SOVERON AR brochure explicitly includes UAV applications and tactical-data/data-link communications.
    - Company verification: The brochure identifies Rohde & Schwarz GmbH & Co. KG in Munich, Germany.
66. Walksnail Avatar HD VTX V2 模块 - CADDX FPV
    - Company verification: CADDXFPV markets the Walksnail Avatar HD VTX V2 video-transmission module for FPV drones.
    - Company verification: The official product page provides a purchase route and identifies Shenzhen fulfillment and international shipping destinations.
67. TrellisWare Launches TW-310 Embedded Datalink Module For UAS Market
    - Company verification: TrellisWare Technologies, Inc. announced the TW-xx.xx embedded UAS datalink module on May xx.xx 2026.
    - Company verification: The announcement identifies San Diego headquarters and positions TW-xx.xx for UAS command/control, ISR data and relay communications.
68. Viasat, Inc. Form 10-Q - Quarter Ended June 30, 2026
    - Company verification: Viasat's Form xx.xx-Q for the quarter ended June xx.xx 2026 identifies TrellisWare Technologies, Inc. as its majority-owned subsidiary.
69. FreeWave Government and Defense Applications - Use Cases at a Glance
    - Company verification: FreeWave's government and defense catalog connects named GXM, MM2 and ZumLink products to UAV command/control and ISR applications.
70. Rugged Wireless Radios for International OEM Applications
    - Company verification: FreeWave's legacy commercial announcement describes general availability of the MM2-13X5W radio for UAS and OEM applications.
    - Company verification: The announcement expressly discusses delivery of UAV communication data in the United States and abroad.
71. Videos - Rajant Wireless Solutions in Action
    - Company verification: Rajant's official business resources describe BreadCrumb DX2 networking for drones and drone swarms.
    - Company verification: The page identifies Rajant's headquarters in Malvern, Pennsylvania.
72. XRD2 - Connected Drones Over Cellular
    - Company verification: Botlink markets XRD2 hardware and software for cellular UAS command/control, telemetry and video.
    - Company verification: The product page states that XRD2 is on the shelf and identifies a Fargo, North Dakota support team and business address.
73. Company - SKYTRAC Systems Ltd.
    - Company verification: SKYTRAC's company page identifies SKYTRAC Systems Ltd. and business locations in Kelowna and Ottawa, Canada.
    - Company verification: Its corporate history identifies DLS-xx.xx within its unmanned-aviation portfolio.
74. SKYTRAC Case Study - Platform Aerospace
    - Company verification: SKYTRAC's case study describes DLS-xx.xx as a satellite transceiver supporting unmanned-aircraft command/control and telemetry.
    - Company verification: The document identifies SKYTRAC as a member of the ACR Group of Companies.

75. About - NAL Technologies
    - Company verification: NAL Technologies' corporate history records the merger of NAL Research and Blue Sky Network in 2024.
    - Company verification: The history records ACR Group's acquisition of NAL Research in 2016.
76. SkyLink 7100
    - Company verification: NAL Technologies markets SkyLink xx.xx satellite/LTE communications for aviation and UAV operations, including command/control and onboard data.
    - Company verification: The product page identifies headquarters in Manassas, Virginia.
77. VERSITRON Introduces NDAA-Compliant Tethered Drone Fiber Optic Converters for Secure Airborne Communications
    - Company verification: VERSITRON announced availability of a tethered-drone fiber-optic converter platform for video and telemetry communications on June xx.xx 2026.
    - Company verification: The announcement identifies VERSITRON Inc. in Newark, Delaware.
78. Kinetic Industries - Fiber Optic Spool System
    - Company verification: Kinetic Industries offers a complete drone fiber-optic communication system, including airborne and ground modules, or individual components.
    - Company verification: The supplier describes the system as American-owned and made in the United States; these are company-stated origin claims.
79. MP2128LRC2 - MicroPilot Integrated UAV Autopilots
    - Company verification: MicroPilot markets MP2128LRC2 integrated airborne/ground UAV packages with redundant data communication links.
    - Company verification: The supplier states that its ground unit uses off-the-shelf radio modems, establishing a packaged-system rather than exclusively upstream-radio role.
80. Contact - MicroPilot
    - Company verification: MicroPilot's official contact page identifies its business address in Stony Mountain, Manitoba, Canada.
81. Unified Video Terminal - Kutta Technologies
    - Company verification: Kutta markets a Unified Video Terminal and describes UAV payload-data receipt and payload/vehicle control functions.
    - Company verification: The page identifies Kutta Technologies, LLC in Phoenix, Arizona as an SNC subsidiary.
82. AeroVironment DDL Digital Data Link - 2015 Product Datasheet
    - Company verification: AeroVironment's 2015 DDL catalog offers UAV communication modules, standalone video transceivers and associated commercial packages.
    - Company verification: The historical document identifies AeroVironment's corporate headquarters in Monrovia, California; it does not establish the present headquarters or current availability.
83. GA-ASI Launches Team SkyGuardian Canada
    - Company verification: GA-ASI's May xx.xx 2018 announcement identifies General Atomics Aeronautical Systems, Inc. and Canadian teaming partners for MQ-9B SkyGuardian.
    - Company verification: The announcement describes satellite data-link connectivity within the aircraft offering; teaming is not represented as a completed Canadian sale.
84. Spectre - Hoverfly Technologies
    - Company verification: Hoverfly markets Spectre tethered UAS and states that its command/control data travels over the tether.
    - Company verification: The supplier describes its drones as designed, built and supported in the United States.
    - Company verification: Hoverfly lists TrellisWare among the radio suppliers associated with its Spectre platform, providing separate downstream offering corroboration.

85. Products - Unusual Machines
    - Company verification: Unusual Machines' current product catalog markets the Fat Shark HDO+ headset with a quotation route.
    - Company verification: The catalog describes HDO+ as built in the United States; this does not establish independent receiver-module or complete-link manufacture.
86. Unusual Machines Completes Acquisitions of Fat Shark and Rotor Riot
    - Company verification: Unusual Machines, Inc. announced completion of its Fat Shark Holdings, Ltd. and Rotor Riot LLC acquisitions on February xx.xx 2024.
    - Company verification: The company identifies Fat Shark's business as FPV goggles and Rotor Riot's role as an e-commerce marketplace.
87. AURA Network Systems - Solutions
    - Company verification: AURA Network Systems, Inc. describes a C2 Link System and aviation radio services for command/control of uncrewed aircraft.
    - Company verification: The solutions page also identifies data technologies and services as developing, qualifying commercial readiness.
88. AURA Network Systems - Infrastructure
    - Company verification: AURA states that airborne radios are available for aircraft integration and ground systems can support customer test flights.
    - Company verification: The company describes United States spectrum rights and network infrastructure; deployed nationwide commercial coverage was not independently established.
89. Company Overview - Ondas Inc.
    - Company verification: Ondas Inc.'s current corporate overview identifies Ondas Networks as its FullMAX wireless business.
    - Company verification: The overview also identifies tethered-UAV offerings with proprietary communications within the group's autonomous-systems portfolio.
90. Ondas Holdings - 2021 Investor Presentation Filed as Exhibit 99.1
    - Company verification: An Ondas 2021 filing presentation explicitly positions FullMAX as a drone-application network supporting command/control and data delivery.
    - Company verification: This historical positioning does not establish current drone-specific shipments or availability.
91. Sobre Nosotros - Hydra Technologies
    - Company verification: Hydra Technologies' Spanish-language company page identifies a Mexico-origin tactical UAS business.
    - Company verification: The company describes integrated offerings spanning avionics and communications; it does not identify a distinct merchant data-link product on this page.
92. GCS - Hydra Technologies
    - Company verification: Hydra markets a branded ground-control-station portfolio that includes communications equipment.
    - Company verification: The inspected page establishes an integrated control-system role, not an independently marketed drone data-link product.
93. Enlace de datos 30km - ZARR
    - Company verification: ZARR's official storefront lists Enlace de datos 30km as a drone data/control-link offering.
    - Company verification: The selected listing is marked sold out; the upstream manufacturer and independent branded-system role are not identified.
94. Customized Canisters with Optical Fiber Cables for Drones and UAVs - M2 Optics
    - Company verification: M2 Optics markets OptiTether drone-specific optical-fiber tether canisters for physical drone communications.
    - Company verification: The page identifies production and headquarters in Raleigh, North Carolina; it does not establish a complete airborne/ground terminal offering.

95. Tethered Drone Cables for Commercial and Defense - Gore
    - Company verification: Gore markets GORE Tethered Drone Cables combining power and fiber-optic data paths.
    - Company verification: The page establishes a drone-specific physical-tether offering, not complete data-link terminal supply.
96. Defense - Linden Photonics Inc
    - Company verification: Linden Photonics' defense page describes optical-fiber communication packs and lists drone tethers among its cable categories.
    - Company verification: The inspected business material does not establish a complete aerial data-link system or current drone-specific sales.
97. ARYCOM - Soluções de Conectividade para Drones e eVTOLs
    - Company verification: Arycom publicly offers a drone-specific Velaris connectivity solution and identifies Brazilian business addresses.
    - Company verification: The offering identifies Viasat and Gotonomi as partners and names Arycom Capacidade Satelital Ltda in the footer.
    - Company verification: Arycom's Brazilian drone-connectivity offering identifies Viasat as its satellite-network partner.
98. NAURU 500C ISR - Xmobots
    - Company verification: Xmobots markets Nauru 500C ISR and identifies the GDT-60A5000 ground data terminal within its integrated communications offering.
    - Company verification: The product page provides a commercial contact route and identifies the aircraft as manufactured in Brazil.
99. Empresas Relacionadas e Excluídas do CESAER
    - Company verification: The Brazilian aerospace registry identifies Albatross Indústria Aeronáutica Ltda and lists a mesh data-link radio among its aerospace/defense offerings.
    - Company verification: The inspected registry is updated October xx.xx 2022; it does not expressly establish UAV applicability.
100. Publicación de Corporación de la Industria Aeronáutica Colombiana
    - Company verification: CIAC's own public statement identifies a primary data link and aircraft/ground-station communications within ART Quimbaya.
    - Company verification: The statement establishes embedded communication activity, not standalone-link commercialization.
101. Informacion del Proveedor
    - Company verification: Chile's Mercado Público provider record identifies Ingeniería y Desarrollo Tecnológico Limitada with the branch name IDETEC UAV CHILE.
102. Meteorología cuenta con nueva herramienta para la adquisición de datos
    - Company verification: A Universidad de Chile account dated March xx.xx 2009 identifies IDETEC UAV Chile as the developer of SIROL xx.xx and describes its university collaboration.
103. LA INDUSTRIA DE LOS DRONES EN ARGENTINA: OPORTUNIDADES PARA SU DESARROLLO
    - Company verification: The government industry paper identifies INVAP's historical SARA involvement; it reports suspension in 2016 and reactivation interest in 2020.
    - Company verification: The government industry paper identifies FAdeA alongside INVAP in SARA and identifies its corporate name.
104. UAV Radio Data Links
    - Company verification: Transbit Sp. z o.o. lists a Warsaw address and UAV air/ground radio-link offerings.
    - Company verification: The catalog identifies PAXLINK-M for smaller drones and describes telemetry, control and video-data roles.

105. Connectivity | Patria
   - Company verification: Patria offers CANDL as an airborne networking data link.
   - Company verification: The company explicitly identifies UAS command/control and payload-data applications.
106. Defence Industry | RACOM
   - Company verification: RACOM connects its WaSP embedded data-radio offering to UAV and UGV networking.
   - Company verification: The page describes a 2025 embedded-radio portfolio expansion and participation in the Czech defense ecosystem.
107. WMX481V3 - eXtended Long Range System
   - Company verification: The XLRS WMX481V3 offering is presented as a command/control and data-link product for unmanned platforms.
   - Company verification: The product page identifies UAV applications and manufacturer-handled customization in Spain.
108. Products - Flying Objects Technologies
   - Company verification: Flying Objects Technologies' catalog lists the FOT-Mini and FOT100 data-link products.
   - Company verification: The FOT-Mini listing identifies video, telemetry and remote-control traffic.
109. About - Best FPV Shop in the World of Flight - Orqa
   - Company verification: Orqa's official company history identifies Orqa d.o.o., founded in 2018.
   - Company verification: The company describes its business as developing products for the FPV-drone industry.
110. FPV Controller - Best Remote Drone Radio Transmitter - Orqa
   - Company verification: Orqa markets FPV.Ctrl as a drone radio-controller product.
   - Company verification: The product page provides a direct purchase route.
111. rapidFIRE - 5.8GHz Receiver Module for FPV Goggles - Orqa
   - Company verification: Orqa's product portfolio includes the rapidFIRE receiver module for FPV goggles.
112. Safe-T Drone Power Station - Elistair | Tethered Drone Company
   - Company verification: Elistair markets the Safe-T xx.xx drone tether station with data-transfer capability and an optical-fiber option.
   - Company verification: The product page identifies Elistair's European business address in Dardilly, France.
113. Unmanned Systems & Remotely-Operated Vehicles - Steatite Communications
   - Company verification: Steatite Ltd identifies a Redditch, United Kingdom business address.
   - Company verification: It offers configured unmanned communications solutions including data links, ground stations and tracking systems based on Wave Relay technology.
114. CASE STUDY: Taking fixed wing UAVs to new heights | Steatite
   - Company verification: Steatite describes communications-system work for UAVE's Prion Mk3 UAV in an official customer case study.
115. Surveillance Drone UAV Video Solutions | Videosoft Global
   - Company verification: Videosoft Global offers drone-facing video-transmission solutions connecting UAVs and ground-control systems.
   - Company verification: Its participation is principally video-delivery software and associated solutions rather than an independently established RF-radio manufacturing role.
116. Gotonomi Completes Successful Flight Trials and Opens Orders
   - Company verification: Gotonomi announced the opening of production-terminal orders on August xx.xx 2024.
   - Company verification: The announcement identifies satellite and hybrid satellite/cellular UAV terminals and an inspection bundle incorporating Videosoft software.
   - Company verification: Videosoft's video-streaming software is identified within the announced Gotonomi UAV inspection bundle.

117. Introducing Gotonomi™ | Gotonomi
    - Company verification: TTP announced the launch of Gotonomi in Cambridge, United Kingdom on August xx.xx 2023.
    - Company verification: The business was introduced with UAV satellite and hybrid-connectivity terminal offerings.
118. HAWK - Optical Communication Terminal for Airborne and Ground Operations - Mynaric
    - Company verification: Mynaric's HAWK optical-communications product page explicitly includes UAS connectivity.
    - Company verification: The stated product status is an early-generation product for demonstrations and use-case validation, not evidence of unrestricted current drone-market sales.
119. Rocket Lab Completes Mynaric Acquisition, Adding Laser Optical Communications To Growing Space Systems Portfolio
    - Company verification: Rocket Lab announced completion of its acquisition of Mynaric AG on April xx.xx 2026.
120. Digital Data Link - Granta Autonomy
    - Company verification: Granta Autonomy markets Hornet DDL as a digital data-link offering.
    - Company verification: The page connects the offering to Hornet XR and integration with unmanned systems and ground-control stations.
121. BC-COMMS - BATCOMMS
    - Company verification: BATCOMMS presents BC-COMMS as a complete communication kit comprising transmitter, receiver and repeater.
    - Company verification: The kit is expressly offered for UAV control and sensor-data applications.
122. Contact - BATCOMMS
    - Company verification: BATCOMMS provides an Estonian business contact for UAV/UGV communication solutions and pricing inquiries.
    - Company verification: The company identifies membership in the Estonian Defence and Aerospace Industry Association.
123. Самоорганизующаяся сеть связи для БПЛА - ДИНАРУС
    - Company verification: The DINARUS UAV business page offers radio modules, software and devices for control, telemetry and image/video traffic.
    - Company verification: The page states that these offerings are developed and produced in Russia; it does not establish the responsible legal entity.
124. Про компанію MIWARS | Український виробник систем РЕБ та VTX
    - Company verification: MIWARS identifies itself as a Ukrainian manufacturer of UAV video-transmission and ELRS control-link products.
    - Company verification: Its company history distinguishes these communication products from its adjacent electronic-warfare offerings.
125. UAV systems - WB GROUP
    - Company verification: WB GROUP's official UAV catalog includes a flight-control and data-transmission offering category.
126. Nokia unveils first CE-certified 5G automated drone-in-a-box solution for secure, reliable public sector and industrial operations
    - Company verification: Nokia's May xx.xx 2023 release identifies Nokia Drone Networks as a dedicated integrated drone solution using cellular connectivity.
    - Company verification: The release identifies Espoo, Finland and states that the solution is manufactured in Europe.
127. Unmanned - Radionor Communications
    - Company verification: Radionor's unmanned-system page explicitly markets radios for UAS connectivity.
    - Company verification: Named offerings include I-BEAM xx.xx UAV, I-BEAM LW and MICRO.

128. About us - Radionor Communications
- Company verification: Radionor Communications identifies itself as a Norwegian company supplying tactical broadband radio systems.

129. IAI and Thales Integrate a New Datalink Capability on Heron
- Company verification: IAI's July xx.xx 2015 announcement identifies Thales as the supplier of the TMA xx.xx terminal integrated on Heron.
- Company verification: This establishes a historical UAV data-link role, not current product availability.

130. X-band radio for UAVs - UVS Dynamics
- Company verification: UVS Dynamics publicly describes UAV radio-link activity.
- Company verification: The inspected business record does not establish delivered commercial products.

131. SkyARX - CTech
- Company verification: CTech's official SkyARX catalog expressly positions the SATCOM terminal for unmanned aerial platforms and UAV command, control and data communications.

132. About Us - CTech
- Company verification: CTech identifies itself as a Turkish Aerospace subsidiary, with headquarters in Istanbul and an Ankara office.
- Company verification: The corporate overview reports use of CTech communications products on ANKA and AKSUNGUR UAVs.
- Company verification: Its operating-country list includes Turkey, the United Arab Emirates, Iraq, Qatar, Saudi Arabia and Jordan; the list is not product-specific sales evidence.

133. SDT Uzay & Savunma Teknolojileri - Drone Data Link Sistemleri
- Company verification: SDT's official Turkish solutions page lists Drone Data Link Systems for UAV control, coordination, payload information and telemetry.
- Company verification: The page describes development and customer customization; it does not establish current delivered-product availability.

134. About Us | TURLink
- Company verification: TURLink describes its business as developing data-link systems for unmanned aerial, ground and maritime vehicles.
- Company verification: Its corporate page places its operations in the Ankara Aerospace Organized Industrial Zone.

135. Products | TURLink
- Company verification: TURLink's official catalog lists branded SAV-family data-link modems, including SAV D0214 and SAV ADV, alongside ground controllers and tracking systems.

136. BAYKAR Technology | Avionics/Subsystems
- Company verification: Baykar's official avionics catalog lists Bayraktar Digital Communication Link, Mini UAV Video Link and Digital Video Link.
- Company verification: The catalog presents named communication and video-link subsystems, supporting participation beyond a generic aircraft-manufacturer description.

137. Products - Creomagic
- Company verification: Creomagic's official airborne catalog offers CreoAir Light for small UAVs and multirotor platforms.
- Company verification: The same catalog positions CreoAir HP for UAS and CreoAir HP MIL for larger airborne platforms, including ISR drones.

138. ISRAEL at IDEX 2025
- Company verification: The Israeli Ministry of Defense's IDEX 2025 directory identifies Creomagic Ltd. and describes its airborne MANET communications business.
- Company verification: The directory identifies Orbit Communication Systems Ltd. within the Israeli supplier delegation and describes airborne communications for unmanned platforms.

139. Airborne Satcom | Orbit Communication Systems
    - Company verification: Orbit's official airborne SATCOM catalog expressly includes UAS applications for its MPT terminal family, including MPT xx.xx Ku and MPT xx.xx.
140. Connectivity for BLoS Missions | Defense Aviation | Gilat
    - Company verification: Gilat's official Air portfolio markets airborne SATCOM connectivity for unmanned vehicles.
    - Company verification: Its unmanned-terminal portfolio names Viper Ka, BlackRay Airborne and MLT xx.xx.
141. Gilat Receives over $11 Million Defense Contract from a Leading UAV Company - Gilat
    - Company verification: Gilat's company announcement reports a defense contract from an unnamed UAV company, providing a customer-side business connection without establishing market share.
142. Products List - Thuraya Mobile Satellite Communications Company
    - Company verification: Thuraya's official catalog lists T220 System For UAV as a dedicated satellite terminal for UAV communications, telemetry and beyond-line-of-sight connectivity.
143. About Us - Thuraya Mobile Satellite Communications Company
    - Company verification: Thuraya maintains an official corporate overview identifying its mobile satellite communications operating business.
144. The Smartellite™ Terminal Product | hiSky
    - Company verification: hiSky's official product page lists the Smartellite satellite-terminal family, a hub and network management system.
    - Company verification: This inspected record supports satellite-product identity, but does not establish a specific current UAV offering.
145. EDGE to Supply Intelligence Capabilities to the UAE Armed Forces in AED 4 Billion Deal
    - Company verification: EDGE's February xx.xx 2023 announcement reports a UAE Armed Forces contract for tactical communications and data-link solutions across air, maritime and land applications.
    - Company verification: The page identifies EDGE Group PJSC's Abu Dhabi head office; it does not identify a drone-specific offering or UAV contract allocation.
146. We Signed a Memorandum of Understanding (MoU) with Sinan Advanced Industries! - CTech
    - Company verification: CTech announced a communications-related memorandum of understanding with Sinan Advanced Industries on October xx.xx 2025.
    - Company verification: The announcement identifies Sinan Advanced Industries as an Oman-based defense and aerospace business and a communications-cooperation counterparty.
    - Company verification: The record establishes announced cooperation, not a marketed or delivered UAV-link product.
147. CTech, Hamad Bin Khalifa University, and Nardan Motor Join Forces in Qatar for Next-Generation Satellite Communication Technologies - CTech
    - Company verification: CTech's January xx.xx 2026 announcement names cooperation with Hamad Bin Khalifa University and Nardan Motor in Qatar for next-generation satellite communications.
    - Company verification: The dated announcement names Nardan Motor as a counterparty in a Qatar satellite-communications initiative.
    - Company verification: The announcement does not establish Nardan Motor's independent drone-link supply, authorization or current sales.
148. COMMUNICATION SOLUTIONS - S-PLANE Automation
    - Company verification: S-PLANE markets communication solutions for unmanned aircraft, combining TRACKER+, airborne/ground data terminals and third-party line-of-sight or satellite links.
    - Company verification: The offering page provides a Somerset West, South Africa business address.
149. Ground Control System for Drones - Drone Antenna Tracker
    - Company verification: Nextech's official product catalog presents a branded drone ground-control system and antenna-tracker offering associated with drone data and video connectivity.

150. MIS Digital Catalogue 2022
    - Company verification: Milkor's 2022 official catalog offers data-link and radio communication equipment and discusses communications within its unmanned-system electronics portfolio.
    - Company verification: The catalog includes satellite communications as a offered system option; it does not establish present product-specific sales.
151. ALTI UAS Launches Complete UAV Ground Control and Command Station Inbox x
    - Company verification: A July xx.xx 2018 announcement records ALTI's launch in Knysna, South Africa of a packaged UAV ground-control system incorporating control, telemetry, data and video links.
    - Company verification: This is evidence of a dated product launch, not current availability.
152. AVNON GROUP - DEFENCE & HLS TECHNOLOGY SOLUTIONS
    - Company verification: AVNON GROUP's own portfolio page describes ALTI UAS as its subsidiary based in Knysna, South Africa, supplying unmanned aircraft systems.
    - Company verification: The inspected subsidiary statement is undated.
153. Elistair - Station d'alimentation Safe - T 2.2 - Medina Street Group
    - Company verification: Medina Street Group's Moroccan catalog lists Elistair Safe-T xx.xx and advertises tethered data-link options.
    - Company verification: The listing establishes advertised regional channel availability, not completed sales or local production.
154. YANGDA Technical Support Team Successfully Conducts 5-Day Training on Sky Whale VTOL Drone System in Kenya - YANGDA
    - Company verification: YANGDA's February xx.xx 2025 announcement documents a Nairobi business-support event for its Sky Whale UAV package.
    - Company verification: The announced package includes Videopass-N60 video/data-link equipment and a ground-control station.
155. RAAD Dynamics - Decisive Advantage in Air & Cyber
    - Company verification: RAAD Dynamics identifies Cairo, Egypt as its headquarters and describes integrated aircraft, data-link and communications activity.
    - Company verification: Its named RAAD portfolio is presented as development/R&D programs rather than established marketed products.
156. Groupe TELNET
    - Company verification: TELNET's official French corporate material describes a Tunisian drone program begun in 2018 and a PHOENIX unveiling in June 2020.
    - Company verification: This supports the corporate drone-program lead, not current data-link ownership or merchant-link availability.
157. Iroko UAV - Terra Industries
    - Company verification: Terra Industries publicly presents Iroko UAV in a dedicated business/product page.
    - Company verification: The record supports a named aircraft offering; direct link-supplier attribution remains unresolved.
158. Archer VTOL - Terra Industries
    - Company verification: Terra Industries publicly presents Archer VTOL in a dedicated business/product page.
159. Briech UAS - Africa's Premier Unmanned Aerial Systems Manufacturer
    - Company verification: Briech UAS describes itself as a Nigerian unmanned-system manufacturer established in 2021 and based in Kuje, Abuja.
    - Company verification: Its business description establishes a regional OEM identity, but not ownership of a named drone data-link offering.
160. DL-6000 | HENSOLDT
    - Company verification: HENSOLDT's DL-xx.xx product page explicitly describes video and telemetry communications from unmanned airborne platforms to ground centers.
    - Company verification: The product page establishes UAV-specific offering participation that the earlier country-hub record alone did not resolve.

161. HENSOLDT Annual Report 2021 - Financial Statements
    - Company verification: HENSOLDT's 2021 financial statements report acquisition of Tellumat's ATM and Defence business units and their integration into HENSOLDT South Africa.
    - Company verification: This supports retaining the acquired portfolio under the existing HENSOLDT identity rather than adding a duplicate Tellumat supplier row.
162. About Shenzhen Suntor Technology Company Introduction
    - Company verification: Identifies Shenzhen Suntor Technology Co., Ltd. as the supplier and gives a Shenzhen, China business address.
    - Company verification: Describes airborne radios within its communications portfolio.
163. CD30NMT-V3 Drone Video Transmission Radio
    - Company verification: Markets CD30NMT-V3 as a drone video-transmission radio with airborne and ground equipment carrying video and data.
164. Advanced UAV Communication Products Collection - LinkAV
    - Company verification: Presents a UAV communication-product collection under the LinkAV supplier identity.
165. About Us - Iwave Communications Co., Ltd.
    - Company verification: Identifies the IWAVE business and describes wireless communication products and OEM modules for UAVs and other unmanned systems.
166. Drone Video Transmitter Factory, Suppliers - China Drone Video Transmitter Manufacturers
    - Company verification: Publishes a dedicated drone video-transmitter product category under IWAVE's supplier identity.
167. About CUAV - CUAV
    - Company verification: Identifies CUAV's UAV business and describes wireless data-link, image-link and digital-link product portfolios.
168. Nomad Dual 1-watt Gemini Xrossband ExpressLRS Module - RadioMaster RC
    - Company verification: Lists the Nomad ExpressLRS transmitter module as a RadioMaster RC-branded commercial product.
169. 通訊模組 | 星協系統科技有限公司
    - Company verification: Lists WPC-branded airborne and ground drone communication modules, including ELRS and mesh product families.
    - Company verification: Identifies WPC Systems Ltd. and provides a New Taipei City, Taiwan business address.
170. About & Contact | HiDes Technology
    - Company verification: Identifies the HiDes business and Taiwan operating locations.
    - Company verification: Describes its unmanned-vehicle link portfolio, including ETL-210A and FV-series offerings.
    - Company verification: Identifies HiDes, Inc. in the company page's legal footer.
171. ETL-210A - 300+ km COFDM Data Link | HiDes Technology
    - Company verification: Markets ETL-210A as a bidirectional data-link transceiver for UAV and USV applications.
    - Company verification: Describes UAV video and command/control connectivity as a commercial application.
172. KTL 通訊設備系列-田屋科技股份有限公司
    - Company verification: Lists AVIX's KTL communication-module family and named UVN product variants.
    - Company verification: Describes the family as combining data and image transmission.
173. AVIX Philosophy-田屋科技股份有限公司
    - Company verification: Uses AVIX as the company's official English operating name and describes its UAV-system business.
    - Company verification: The associated company materials identify the native legal identity as 田屋科技股份有限公司.

174. Data Patterns (India) Limited - Investor Presentation / Q4FY26 - May 2026
   - Company verification: Identifies Data Patterns (India) Limited in its May 2026 investor presentation.
   - Company verification: Describes communications-system activity and radio-relay capabilities for airborne platforms/UAVs.
175. Data Patterns corporate presentation (AboutDP.pdf)
   - Company verification: Identifies a beyond-line-of-sight satellite data-link program for the RUSTOM UAV within Data Patterns' corporate communications portfolio.
   - Company verification: The older presentation does not establish current product availability or recent sales.
176. DATA PATTERNS | Contact
   - Company verification: Identifies Data Patterns (India) Ltd., its corporate identifier and Chennai corporate office.
177. 送信機 | Sky Buddy by Futaba
   - Company verification: Lists Futaba FMT-series transmitters and associated receivers in its drone-facing product catalog.
   - Company verification: Describes bidirectional communications that return sensor information from unmanned aircraft.
   - Company verification: Includes lifecycle-related repair qualifications rather than establishing availability of every listed model.
178. Network | Futaba Corporation
   - Company verification: Identifies Futaba Corporation's Japan headquarters and radio-control business.
   - Company verification: Lists a Japanese sales function for drone-related products.
179. ドローン向け上空 LTE SIM なら上空電波パッケージ | DJI 対応 | KDDI スマートドローン
   - Company verification: Markets KDDI SmartDrone's dedicated aerial LTE communications package, including drone-facing SIM connectivity.
180. Establishment of KDDI SmartDrone Inc. | 2022 | KDDI Corporation
   - Company verification: Establishes KDDI SmartDrone Inc.'s formation on January xx.xx 2022 and KDDI's xx.xx% ownership at formation.
   - Company verification: Describes the transfer of KDDI's drone business and its cellular-enabled remote-flight service role.
181. LTE 上空利用プラン | 料金・割引 | NTT ドコモ
   - Company verification: Publishes NTT DOCOMO's LTE aerial-use tariff page.
   - Company verification: The retrieved page establishes the named aerial-connectivity plan but does not resolve detailed current drone-service terms.
182. JRC REVIEW No.77 2026 Technical Reports｜JRC（Japan Radio Co.,Ltd.）
   - Company verification: Identifies Japan Radio Co., Ltd. and reports that JRC built a drone communications system for a 2024 demonstration in Nagano Prefecture.
   - Company verification: Describes aircraft-to-ground telemetry and control communications at the business-category level.
   - Company verification: The record establishes demonstration activity, not current marketed availability.
183. Macgio: Boutique IoT, AI & Secure Communication Solutions | Macgio
   - Company verification: Identifies Macgio LLP, a Singapore business address and a publicly stated entity identifier.
   - Company verification: Describes drone technology and encrypted data-link activity within its business offering.
   - Company verification: Also emphasizes CUAS connectivity, leaving aircraft-data-link participation qualified.

184. News - ST Engineering Highlights Advanced Defence Capabilities
    - Company verification: ST Engineering's February xx.xx 2026 announcement identifies the GEMINI-X airborne datalink among newly announced offerings.
    - Company verification: The same announcement establishes unmanned-system and manned-unmanned integration activity.
    - Company verification: The announcement does not establish that GEMINI-X is a marketed drone-specific link.
185. Communications
    - Company verification: Identifies Viettel High Tech's communications-equipment business and its official communications catalog.
    - Company verification: The rendered retrieved content did not establish the indexed UCX29A UAV product entry.
186. Drone Supply Chain Solutions | Aerora Technology
    - Company verification: Presents Aerora Technology's drone-solutions offering, including remote data links and ground-control stations.
    - Company verification: This offering page does not independently establish the production country of a particular link product.
187. SIYI MK15 Mini HD Handheld Ground Station Enterprise Smart Controller with 5.5 Inch LCD Touchscreen 1080p 60fps FPV 180ms Latency for UAV UGV 15KM CE FCC KC
    - Company verification: SIYI's official shop lists the MK15 handheld ground station for UAV applications with digital image transmission.
    - Company verification: The listing provides a commercial offering route but does not independently establish every advertised regulatory certification.
188. Cubepilot products | AERMATICA3D
    - Company verification: AERMATICA3D identifies itself as an official CubePilot distributor and system integrator.
    - Company verification: Its CubePilot product material provides channel corroboration for the CubePilot portfolio, including HereLink HD-video products.
    - Company verification: The channel record does not resolve CubePilot's supplying legal entity or Australian sales.
189. Producto U-RadioLink - Airelectronics
    - Company verification: Offers U-RadioLink as a command-and-control data-link accessory in OEM, boxed and complete-package commercial formats.
190. Technology - Airelectronics
    - Company verification: Publicly offers licensing of its proprietary UAV autopilot technology.
    - Company verification: The record supports a UAV technology business; it does not establish a communication-IP licensing agreement.
191. Skynode X - The Best All-in-One Solution For Autonomous Robots | Auterion
    - Company verification: Markets Skynode X to drone manufacturers as an integrated flight controller, mission computer and LTE-connected avionics product.
    - Company verification: Provides a direct commercial sales route.
192. Technology | HDZERO
    - Company verification: Identifies Divimath Inc. as the developer and owner of HDZero digital wireless video-transceiver technology for FPV applications.
193. Divimath HDMI VTX - Digital 5.8 GHz HDMI Wireless Link for FPV and Emb - Divimath, Inc
    - Company verification: Markets a Divimath-branded HDMI digital video transmitter for FPV and embedded-system applications.
    - Company verification: The commercial listing identifies compatibility with HDZero and Divimath digital receivers.

194. UXV Technologies Communications - SRM Airside USB
    - Company verification: Offers SRM Airside USB for drone and vehicle compatibility with its swappable-radio ecosystem.
    - Company verification: Official materials present UXV Technologies ApS and UXV Technologies, Inc. within the same commercial presentation.
195. Unleashing the Power of Swappable Radio Modules (SRM): The Future of Connectivity Is Here.
    - Company verification: Markets branded SRM radio integrations for unmanned-system ground-control equipment.
    - Company verification: Names Persistent Systems, Silvus Technologies, Doodle Labs, Microhard and TrellisWare among integrated radio suppliers.
    - Company verification: Named as an upstream radio supplier incorporated into UXV's commercial SRM ecosystem.
196. Successful Flight Operations Conducted Between UTM System, Blue UAS Platforms
    - Company verification: A government account identifies Somewear Node transporting drone telemetry during a June 2024 event.
    - Company verification: The record reports an airborne relay node carried by a Freefly Astro UAV.
    - Company verification: A government account identifies UXV Soldier Robotic Controllers as the ground-control equipment used for the participating aircraft.
    - Company verification: Government material identifies Freefly Astro as the aircraft carrying a range-extending communication relay in the event.
    - Company verification: Government material identifies Skydio aircraft supplying telemetry through the Somewear network.
197. Blue UAS Refresh List, Framework Platforms and Capabilities Selected
    - Company verification: Government material identifies Skyhopper PRO and Pro Lite in the framework selection process and reports addition of Mobilicom components to the framework.
    - Company verification: The record is not product-specific spectrum authorization.
    - Company verification: Government material identifies Auterion Government Solutions Skynode S as selected for verification and cybersecurity review.
    - Company verification: Selection is distinguished from a completed approval.
198. Somewear Labs Delivers Resilience to Global Drone Operations
    - Company verification: An August xx.xx 2024 company announcement describes Node and associated software supplying drone and operator telemetry connectivity.
    - Company verification: Identifies Somewear's San Francisco business location and the activity as a demonstration.
199. About AMP | Advanced Microwave Products | Reno, NV
    - Company verification: Identifies Advanced Microwave Products as a privately owned Reno, Nevada business.
    - Company verification: Describes its UAV-facing video and data transmitter/receiver product lines.
200. UAV/UGV Products | Advanced Microwave Products | Reno, NV
    - Company verification: Provides a dedicated UAV/UGV commercial catalog of data, analog and encrypted transmitters, receivers and transceivers.
201. About Us - BMS, Vislink of Poway LLC
    - Company verification: The official BMS company page describes wireless video/data equipment serving UAV and UGV markets.
    - Company verification: Its displayed page title uses BMS, Vislink of Poway LLC, while the body identifies Broadcast Microwave Services, LLC.
    - Company verification: The refreshed BMS page continues to describe wireless video/data equipment serving UAV/UGV markets. Its displayed branding uses BMS, Vislink of Poway LLC, while its body and address use Broadcast Microwave Services, LLC and identify a Vislink relationship. ([bms-inc.com](https://www.bms-inc.com/about-us))

202. MANET/FANET Solutions | Huneed Technologies
    - Company verification: Markets TRN-M6 and TRN-M30 FANET modules expressly addressing UAV applications.
203. Huneed, Signed the Supply Contract for UAV Core Mission Equipment with KAL
    - Company verification: A December xx.xx 2021 announcement identifies a Korean Air agreement for UAV data-link equipment.
    - Company verification: The supplying role includes communication equipment associated with aircraft and ground units.
204. Radio Link for UAV, UGV and Robotic Platforms | Rebhu Radio CY-2
    - Company verification: Markets CY-xx.xx as an aircraft/ground radio carrying UAV video, telemetry and other mission data.
    - Company verification: The commercial page footer identifies Rebhu Computing Private Limited.
205. Autonomous Systems | Iridium
    - Company verification: Presents dedicated satellite connectivity for autonomous aircraft, including control and mission-data communication use cases.
206. Products & Services
    - Company verification: Markets PLANET xx.xx UAV-L, UAV-F and PLANET xx.xx UAV terminal offerings.
    - Company verification: Its commercial catalog includes PLANET services and satellite-capacity provision.
207. ATMOSPHERE
    - Company verification: Describes its own UAV SATCOM terminal business and PLANET product family.
    - Company verification: Identifies business locations in France, Germany and Spain.
208. Iridium | UAV Navigation
    - Company verification: UAV Navigation's partner record names an ATMOSPHERE Iridium-terminal integration into its flight-control system.
    - Company verification: Its own partner record identifies an ATMOSPHERE satellite-terminal integration within UAV Navigation's avionics business.
209. Data link for UAS baja
    - Company verification: An official catalog presents Indra's UAS data-link offering with aircraft and ground equipment.
    - Company verification: Names Atlante UAS as an application and provides a Spanish commercial contact.
210. Indra is developing the satellite communications system for the long endurance defence drones of the future
    - Company verification: A March xx.xx 2022 announcement identifies development of satellite communications for long-endurance defense drones.
    - Company verification: The announcement does not establish current marketed availability of that terminal.
211. Software-defined, Mission-aligned SATCOM Service
    - Company verification: Markets the HM satellite system and identifies remotely piloted aircraft SATCOM applications.
    - Company verification: Identifies Maryland manufacturing for HM equipment.
212. Hughes Satellite Modems Power BLoS Comms | Hughes
    - Company verification: An official business announcement connects Hughes specialized satellite modems to beyond-line-of-sight communications for remotely piloted aircraft.
213. Team BlackSheep Crossfire Shop
    - Company verification: Markets branded Crossfire drone receivers and transmitter starter sets.
    - Company verification: The inspected catalog marks some variants in stock and others out of stock.
214. LiteRadio 3 Radio Transmitter - BETAFPV
    - Company verification: Markets the LiteRadio xx.xx transmitter for multirotor and aircraft control.
    - Company verification: Identifies ExpressLRS and FrSky versions and a direct purchase route.

215. Data Link - Moneypro Group
    - Company verification: Its commercial catalog offers a data-link product explicitly addressing UAV control, telemetry and video communication.
216. SDL MK22/MK55 22km 55km Wireless Data Link | Integrated HD Video & Telemetry | Professional Industrial UAV
    - Company verification: Markets an SDL MK22/MK55 package for UAV video, telemetry and control transmission under the SoarApex commercial presentation.
    - Company verification: Provides a commercial inquiry route; upstream manufacturing attribution is not established.
217. Unmanned Industries | The Future of UAV Production, Built in America.
    - Company verification: Describes an Austin, Texas custom UAV manufacturing business with in-house activity extending from airframes to data links.
    - Company verification: Does not identify a named separately marketed link product.
218. HOD4stream Product Flyer
    - Company verification: An official brochure offers HOD4stream for UAS remote control and video communication.
    - Company verification: The package includes cellular connectivity and is described as ready for use in Germany.
219. Terms of service - Droniq GmbH
    - Company verification: Droniq's commercial terms reference video-service hours associated with the HOD4stream module.
    - Company verification: The terms identify Droniq GmbH as a contracting business.
220. Skydio Connectivity Solutions
    - Company verification: A 2026 commercial solution sheet presents Skydio Connect point-to-point, cellular, fused-connectivity and external-radio offerings.
    - Company verification: It identifies subscription and separate carrier-data requirements for cellular connectivity.
221. All Drone Components and Autonomy Computers | ModalAI, Inc.
    - Company verification: Markets VOXL communication add-ons, a Microhard modem carrier and a Microhard digital data-link product in its current drone-component catalog.
    - Company verification: ModalAI's commercial catalog names Microhard digital data-link equipment and related branded integration products.
222. VOXL & VOXL 2 Microhard Modem Add-on with USB Hub | ModalAI, Inc.
    - Company verification: Offers a ModalAI-branded VOXL/VOXL xx.xx Microhard modem add-on with a commercial product listing.
    - Company verification: Identified as the radio technology incorporated into ModalAI's VOXL modem package.
223. Astro - US Made Commercial Drone
    - Company verification: Its current Astro business page names Pilot Pro, Doodle Labs radios, cellular connectivity and AuterionOS within the offered integrated aircraft platform.
    - Company verification: Freefly's current Astro commercial offering identifies Doodle Labs as its radio supplier.
224. Monopulse tracking GDT system for UAV applications
    - Company verification: An official company-domain business brochure presents a ground-data-terminal system expressly for UAV data-link applications.
    - Company verification: Provides a company-domain sales contact; current deliveries and the official English legal name are not established.

225. About us - Aeronautics

· Company verification: Aeronautics' corporate page lists Commtact among its subsidiaries and recounts its acquisition, providing direct group-relationship evidence. Ownership percentages are not disclosed. ([aeronautics-sys.com](https://aeronautics-sys.com/about/))

· Company verification: Aeronautics identifies RAFAEL as its parent company. Together with its Commtact subsidiary presentation, this exposes a potential consolidation overlap between retained RAFAEL and Commtact identities. ([aeronautics-sys.com](https://aeronautics-sys.com/about/))

226. Vislink Reports Fourth Quarter and Full Year 2025 Financial and Operational Results

· Company verification: Vislink's March xx.xx 2026 operating-results release describes an AVDS offering engaging legacy BMS customers and addressing aircraft-to-drone and drone-to-drone connectivity. This supports parent-portfolio continuity, not definitive attribution to the protected BMS contracting name. ([vislink.com](https://www.vislink.com/wp-content/uploads/2026/xx.xx/VISL_Q425_FY2025_Earnings_PR_Final.pdf))

227. Vodafone Germany launches platform for commercial drones

· Company verification: Vodafone's June xx.xx 2024 announcement identifies its German DroNet Hub launch with FlyNex and a named DroNet Connect Stream tariff for live drone-to-platform data transmission. This establishes dedicated connectivity participation beyond generic mobile-network capability. ([vodafone.com](https://www.vodafone.com/news/technology/vodafone-germany-launches-platform-for-commercial-drones))

· Company verification: Vodafone identifies FlyNex as its partner in the commercial DroNet Hub launch, establishing a named route to market for the platform business. ([vodafone.com](https://www.vodafone.com/news/technology/vodafone-germany-launches-platform-for-commercial-drones))

228. Informationen nach Art. 3 (2) und (3) Datenverordnung - DroNet Hub, September 2025

· Company verification: The September 2025 DroNet Hub disclosure identifies Vodafone GmbH as the contracting seller and connected-service provider. It describes drone live-video and related service-data categories. ([vodafone.de](https://www.vodafone.de/business/media/informationen-nach-datenverordnung-dronet-hub.pdf))

· Company verification: The disclosure identifies FlyNex GmbH as Vodafone's partner, nonpersonal-data holder and processor of DroNet Hub product and service data, corroborating its continuing platform relationship. ([vodafone.de](https://www.vodafone.de/business/media/informationen-nach-datenverordnung-dronet-hub.pdf))

229. Impressum | FlyNex

· Company verification: FlyNex's official imprint identifies FlyNex GmbH, Leipzig headquarters, a Hamburg branch and the company's stated Leipzig registry number HRB xx.xx. This is company identity disclosure, not an independently retrieved registry determination. ([flynex.io](https://www.flynex.io/de/impressum/))

230. Check Out the New Flynex Platform - FlyNex

· Company verification: FlyNex's February xx.xx 2022 platform announcement describes Connect App as its drone/platform interface enabling live streaming and transmission of collected drone data. It establishes a named software offering, with current version continuity still qualified. ([flynex.io](https://www.flynex.io/en/news/check-out-the-new-flynex-platform/))

231. MissionKeeper

· Company verification: KSI's specific MissionKeeper product page markets proprietary streaming software providing live video and data access from drones and other remote devices, including telemetry functionality. The page is undated. ([ksidatasciences.com](https://ksidatasciences.com/mission-keeper/))

232. FirstNet - August 2021 Newsletter

· Company verification: FirstNet's August 2021 newsletter identifies MissionKeeper by KSI Data Sciences in its app catalog and describes drone video and telemetry streaming. This independently corroborates a historical public-safety channel, not current adoption volume. ([firstnet.com](https://www.firstnet.com/content/dam/firstnet/newsletters/firstnet-vol5-edition8-aug2021.pdf))

233. Privacy Policy - KSI Data Sciences, Inc.

· Company verification: KSI's September 2019 privacy policy explicitly identifies KSI Data Sciences, Inc. as the provider of its mobile/web applications and related commercial-drone services. The dated disclosure supports the official English name but not current registry status or ownership. ([ksidatasciences.com](https://ksidatasciences.com/privacy-policy))

234. WaveStorm Technologies Expands Tactical Communications at CANSEC2026

· Company verification: WaveStorm's attributable CANSEC2026 business post promotes UAV-facing MANET and data-link solutions, identifies its Creomagic partnership and provides a commercial contact. Claimed government evaluations are not independently verified. ([linkedin.com](https://www.linkedin.com/posts/wavestorm-technologies_best-defence-cansec2026-activity-xx.xx-7tNw))

· Company verification: WaveStorm publicly identifies Creomagic as the partner supplying the promoted airborne and ground data-link portfolio, adding a Canadian channel relationship without establishing realized sales. ([linkedin.com](https://www.linkedin.com/posts/wavestorm-technologies_best-defence-cansec2026-activity-xx.xx-7tNw))

235. RockREMOTE UAV | Iridium Certus 100 Satcom | Ground Control

· Company verification: Ground Control markets RockREMOTE UAV as a dedicated satellite terminal for UAV command, telemetry and application-data communications, with an inquiry route and related OEM format. Its footer identifies Ground Control Technologies UK Ltd and Ground Control Systems as trading under Ground Control. ([groundcontrol.com](https://www.groundcontrol.com/product/rockremote-uav/))

· Company verification: Ground Control's RockREMOTE UAV offering explicitly uses Iridium Certus xx.xx adding downstream commercial-offering corroboration for Iridium's dedicated UAV connectivity role without establishing subscriber or shipment counts. ([groundcontrol.com](https://www.groundcontrol.com/product/rockremote-uav/))

23. Key Experts

[redacted] Organizations such as BT Group, ASTM International, ArduPilot, and the listed civil aviation authorities provide professional perspectives relevant to connectivity access, interoperability, qualification, and commercial deployment. The listed country affiliations bring perspectives from North America, Latin America, Europe, Africa, the Middle East, and Asia-Pacific, contextualizing the Global market without implying that requirements are uniform across jurisdictions.

Table 589. Global Drone Data Link System Market, Key Experts

Name	Professional Role	Organization	Country
Abbas Jamalipour	Professor of Ubiquitous Mobile Networking	The University of Sydney	Australia
Abe Bachrach	Co-Founder and Chief Technology Officer	Skydio	United States
Adam Woodworth	Chief Executive Officer	Wing	United States
Adnan Abu-Mahfouz	Chief Researcher, Internet of Things and Wireless Networks	Council for Scientific and Industrial Research	South Africa
Alon Shalev	Co-Founder and Chief Technology Officer	Elsight	Israel
Andrew Terry	Co-founder and Chief Technology Officer	Morse Micro	Australia
Andrew Tridgell	Core Developer	ArduPilot	Australia
Anish Kurien	Associate Professor, Electrical Engineering	Tshwane University of Technology	South Africa
Anthony Spouncer	Senior Director, Advanced Air Mobility	Inmarsat	United Kingdom
Ashish Bhat	Co-founder and Executive Vice President, Research and Development	ideaForge Technology	India
Assaf Monash	Co-Founder and Chief Technology Officer	D-Fend Solutions	Israel
Babak Daneshrad	Founder and Chief Executive Officer	Silvus Technologies	United States
Basem Shihada	Professor of Computer Science	King Abdullah University of Science and Technology	Saudi Arabia
Bastien Mancini	Co-founder and CEO	Delair	France
Brendan Groves	Vice President of Regulatory and Policy Affairs	Skydio	United States

Table 589 - continued

Name	Professional Role	Organization	Country
Carlos Azurdia-Meza	Professor of Electrical Engineering	Universidad de Chile	Chile
Chau Yuen	Professor, School of Electrical and Electronic Engineering	Nanyang Technological University	Singapore
Chris Day	Co-founder and Chief Technology Officer	Flylogix	United Kingdom
Christoph Raab	Executive Director	Drone Alliance Europe	Belgium
Cüneyd Fırat	Chief Executive Officer	CTech	Turkey
Daniel du Plessis	Director of Marketing and Communications	Milkor	South Africa
Daniel Marfo	Senior Vice President, Africa	Zipline	Ghana
Dany Eshchar	Chief Executive Officer	Orbit Communication Systems	Israel
Dario Valenza	Founder and Chief Technology Officer	Carbonix	Australia
Dave Pankhurst	Director of Drones	BT Group	United Kingdom
David Benavente	Founder and CEO	Embention	Spain
David Holmer	Co-Founder and Chief Technology Officer	Persistent Systems	United States
David W. Matolak	Professor of Electrical Engineering	University of South Carolina	United States
Duran de Villiers	Founder and Director	ALTI Unmanned Aircraft Systems	South Africa
Emerson Granemann	Founder and Chief Executive Officer	MundoGEO	Brazil
Eric A. Brock	Chairman and Chief Executive Officer	Ondas Holdings	United States
Eric Murray	Principal Engineer	Vodafone	United Kingdom
Eric Rutayisire	Founder and Chief Executive Officer	Charis UAS	Rwanda
Frank Wang	Founder and Chief Executive Officer	DJI	China
Giovani Amianti	Founder and Chief Executive Officer	XMobots	Brazil
Greg Tyrrell	Executive Director	Australian Association for Uncrewed Systems	Australia
Gregory S. McNeal	Professor of Law and Public Policy	Pepperdine University	United States
Gustavo Fraidenraich	Professor, School of Electrical and Computer Engineering	Universidade Estadual de Campinas	Brazil

Table 589 - continued

Contributors

Meet the Experts

Our reports are shaped by experienced analysts and industry specialists whose expertise ensures every insight is backed by rigorous research, deep industry knowledge, and thorough validation.

Shikha Sachan

Chief Executive Officer

A transformational leader with a strong focus on integrating new technology frameworks into market research. She focuses on reshaping business models in line with evolving technologies and geopolitical shifts, while actively engaging with decision-makers and experts to deliver trustworthy insights, strategic clarity, and lasting business value.

Shraddha Bhirud

Research Manager

With extensive experience in market intelligence, leads complex client engagements by overseeing research projects from initiation to delivery. Strengthens research operations through standardized methods, process optimization, and cross-functional collaboration. Her commitment to quality and client success ensures the delivery of actionable insights.

Nikhil Kadnor

Research Analyst

Skilled in developing customized research outputs by understanding project requirements, evaluating market conditions, and conducting competitive analysis. Ensures accurate and insight-driven outcomes using structured research methodologies.

360iResearch

Founded in 2017, 360iResearch is a market research and business consulting company headquartered in India, with clients and focus markets spanning the globe.

We are a dynamic, nimble company that believes in carving ambitious, purposeful goals and achieving them with the backing of our greatest asset - our people.

Quick on our feet, we have our ear to the ground when it comes to market intelligence and volatility. Our market intelligence is diligent, real-time and tailored to your needs, and arms you with all the insight that empowers strategic decision-making.

Our clientele encompasses about 80% of the Fortune Global 500, and leading consulting and research companies and academic institutions that rely on our expertise in compiling data in niche markets. Our meta-insights are intelligent, impactful and infinite, and translate into actionable data that support your quest for enhanced profitability, tapping into niche markets, and exploring new revenue opportunities.
